Imports and Exports. In 1944-45 tobacco worth Rs. 233 lakhs was imported through British India ports, representing an increase of 45 per cent as compared with the value of imports in 1943-44. The total value of exports of tobacco from British India ports in 1944-45 was Rs 96 lakhs as against Rs. 58 lakhs in 1943-44 *i.e.* an increase of 66 per cent.

THE LAC INDUSTRY.

Lac is a resin secreted by the insect *Laccifer lacca* which thrives best on the twigs of *Palas*, *Ber* and *Kusum* trees chiefly in Bihar and the Central Provinces. The annual production of raw lac in the whole of India is about 50,000 tons, which when refined yields about 25,000 to 35,000 tons of shellac and seedlac. The refining consists in crushing the lac, washing out the red dye-matter by water and melting and squeezing out the resin through cloth, which keeps back all the impurities. The refineries are situated mostly in the United Provinces, Bihar and Bengal. In a large factory near Calcutta, the washed grains of lac are dissolved in industrial spirit and the impurities are removed by filtration, which incidentally helps to separate

a useful wax which is associated with lac, the resulting wax-free lac being prized for its greater transparency.

Most of the lac produced in India is exported, principally to the U. S. A. and the U. K., to be used there in literally hundreds of industrial processes and materials, the chief, however, being in the manufacture of gramophone records, French polish, transparent varnishes from bleached lac, electrical insulating materials, hats, leather-dressings, grinding wheels, sealing waxes, etc. About 10,000 tons of seedlac goes to the U. S. A. annually for conversion into bleached lac and the world-consumption of shellac for making 200,000,000 gramophone records is 10,000 tons.

In India, lac is used for making gramophone records, French polish, lacquering wooden toys, bangles, sealing-wax, etc.

The Indian Lac Research Institute at Namkum, near Ranchi, has been investigating better methods of production of lac and finding new uses for lac and gives practical demonstrations to those interested. Among new materials based on lac are plastic moulded articles, baking insulating varnishes, oil-cloth, abrasive papers, laminated boards, etc. A Lac Information Officer attached to the Institute answers all enquiries regarding the better utilisation of lac in industries. There is provision at the Institute for training those interested in uptodate methods of cultivation of lac and its applications for various uses.

INDIAN FILM INDUSTRY.

The Indian film industry, which is now 33 years old, can well claim to be the largest of the medium-scale industries of the country.

The first Indian film "Harischandra" was produced by Mr. D. G. Phalke in the year 1913, and since then the development of the industry has been both extensive and rapid. With the coming of talkies in 1931 the pace of progress substantially increased. Early development took place in Bombay, which today is the "Hollywood of India." It is estimated that about 66 per cent. or two-thirds the total annual production of Indian films comes from Bombay studios From Bombay the industry spread to other provinces, and it is now well established in Bengal and Madras.

For some years now, half a dozen pictures have annually been produced in Lahore as well

NUMBER OF STUDIOS

There are to-day about 50 film studios in India, and over 150 concerns engaged in producing films. The principal film producing studios are located at Bombay, Poona, Kolhapur, Calcutta, Madras, Salem, Coimbatore and Lahore.

Although exact figures are not available in certain cases, it is roughly estimated that about Rs. 10 crores is invested in the Production, Distribution and Exhibition branches of the Indian film industry, in which some 15,000 persons find employment. Investment in Production and Distribution amounted to about Rs. 4½ crores; Investment in the construction and equipment of Studios about Rs. 1½ crores, and investment in the Construction and Equipment of Cinemas about Rs. 4½ crores.

Of the 15,000 employed in the industry some 4,000, mainly artistes and technicians are engaged in Production, some 4,500, mainly clerical, are engaged in the Distribution, and some 6,500 are engaged in the Exhibition of films. The total salaries paid out in a year are estimated to come to about Rs. 1 crore.

The Average number of workers* employed in film studios registered under the Factories Act as on 31st December 1942 was

Bombay Province	2,224
Madras	462
Calcutta and Lahore numbers are not available but are estimated at.	650
Total ..	3,336

These employees receive under Rs. 200 a month. Supposing the average paid to be Rs. 100, the annual paybill of these employees is estimated at .. .. Rs. 40,003,200

(*i.e., excepting Author, Photo-playwriter, Scenario Writer, Composer of Songs, Production Manager, Assistant Production Manager, Costume Designer and his assistants, Art Director and his assistant, Music Director, Cameraman in chief, Sound Engineer, Chief Recordist, Sculptor, Make up Supervisor, Painter, Decorator, Property Man, and Orchestra.)

Raw Film Imports.

Following are the import figures since 1937-38:

Year of Import.	Footage of Raw Film Imported.
1937-38	7,42,35,103
1938-39	7,38,55,853
1939-40	8,30,00,000
1940-41	7,00,00,000
1941-42	9,30,00,000
1942-43	8,65,53,000
1943-44	7,87,58,000
1944-45 }	Not available.
1945-46 }	

FEATURES AND SHORTS.

The following table gives the number of short and feature films exhibited in India. The table has been compiled from reports of censored films published by the Boards of Film Censors at Bombay, Calcutta, Madras and Lahore.

Year.	FEATURES		SHORTS		GRAND TOTAL	
	Indian	Foreign	Indian	Foreign	Indian	Foreign
1920 (figures not available).	..	..	..	..	..	..
1922 (figures not available).	..	..	..	..	..	..

1941	137	169	..	201	..	370
1942	165	197	..	153	..	350
1943	183	212	..	202	..	414
1944	124	208	630	812	754	1110
1945	98	332	689	664	787	996

The sudden drop in Indian feature film production in 1944 and 1945 is explained by the severe shortage of raw films. On the other hand the extraordinary increase in Indian short films during the same period is due entirely to the Government of India who, to enable exhibitors to show war effort films under D.I.R. 44A, had themselves to produce the necessary films in the absence of civilian short film producers. These short films, which included the Indian News Parade, were released chiefly in English, Hindustani, Tamil, Telugu and Bengali.

The increase in the number of foreign feature and short films is explained (1) by the entertainment needs of the numerous Service units stationed during the period of the War in India (2), by the fact that the American, the British and the Soviet Governments put out many films calculated to explain the progress of the War and intensify the common war effort and (3) because the importers utilised their import quotas to the maximum extent permitted under the import regulations. Other Allied Government such as France, Belgium and Poland sent out their own short films.

COUNTRY OF ORIGIN OF FEATURE FILMS.

The following Table gives the country of origin of feature films exhibited in India for the years 1933 to 1945 :—

	1936	1937	1938	1939	1940	1941	1942	1943	1944	1945
India	229	180	163	146	162	137	165	183	124	98
America	314	312	220	178	178	167	167	180	250	200
Britain	83	80	55	39	22	33	22	30	30	30
Other Countries ..	2	3	2	9	1	..	2	2	18	12
Total ..	628	575	440	370	363	337	356	395	422	430

DISTRIBUTORS.

There are about 150 distributors in all, of whom 9 are distributors of foreign films. 8 distributors of foreign films represent American and one represents British producers. These distributors imported on an average about 280 Feature Films and 300 Shorts every year.

During the period of World War II the import of feature films fell down by one-fourth, while that of short films became negligible as exhibitors were compelled under the Defence of India Rules to exhibit not less than 2,000 ft. of such films as were approved or produced by the Government of India which took away all the time that was formerly used for showing imported short films.

The distributors are mainly centred in Bombay Calcutta, Delhi, Madras, Lahore, Bangalore, Karachi and Bhusawal to supply cinemas throughout the country with pictures for exhibition.

CINEMAS IN INDIA.

When compared to the world's film business, the Indian film industry rates below 3 per cent. For a population of 400,000,000 there are about 1,605 cinemas whether permanent or touring in India. Britain for a population of 4,74,16,842 has nearly 5,000 cinemas while America with a population of 12,27,75,046 has as many as 17,000 cinemas.

Country.	Population	Cinema Houses	Persons per cinema	Cinemas per 1,000 population.
Great Britain	4,74,16,842	5,000	9,483	0·01
U. S. A.	12,27,75,046	17,000	7,222	0·14
India	40,00,00,000	1,605	2,35,294	0·0040

The number of cinemas has been increasing and there were in 1943 some 1657.

The gross annual income of cinemas showing Indian films amounted pre-war to about Rs 2·40 crores. Although there is a source of income from abroad for Indian films this does not amount to much. It is estimated that about 5 per cent. only of the total income from Indian films comes from abroad while 95 per cent. comes from India itself. The gross annual income of cinemas showing foreign films was estimated pre-war at about Rs. 60 lakhs.

Production in 1944.

In 1944 and 1945, however, these incomes increased five-fold as a direct result of gainful employment provided by the needs of World War II and because large numbers of American and British soldiers were stationed in the country.

The gross box office collection in the official year 1944-45 is estimated at Rs. 11,53,25,611 which is nearly four times the gross box office collection of Rs. 3,62,88,000 of the year 1941. In this new increased gross income Producers, Distributors and Exhibitors, whether of Indian or foreign films, as well as Government as collectors of taxes (to the extent of 40 per cent) share.

The following table shows how the box office collection of 1944-45 was distributed :

	Rs.
Gross Income	11,53,25,611
Less 25% paid as taxes other than entertainments tax	2,88,31,402
	8,64,94,209
Less 50% share of exhibitors of which 20% represents exhibition of foreign films ..	4,32,47,105
	4,32,47,105
Less 15% earned by distributors.	64,87,065
	3,67,60,040
Less 20% for one or foreign films .	73,52,088
Net income of Indian film producers	2,94,07,952

The amount recovered from the film industry in all Central, Provincial and Municipal taxes is :

Entertainments Tax ..	2,44,12,496
Taxes other than the Entertainments Tax .	2,88,31,402
Total ..	5,32,43,898

21*st September*, 1946.

Film Production

The total number of films produced in India in 1944 was 124 against 149 in the previous year. There was reduced production in view of shortage of raw film imports. The imports were controlled by Government upto 15th Dec., 1945. In 1945 production was further curtailed by one-fourth.

The following table gives the production of films in the year 1940 to 1945 :—

Language.	1940	1941	1942	1943	1944	1945
Tamil	35	30	21	11	13	11
Telugu	12	13	10	4	5	4
Kanarese	..	2	2	4	..	1

Urdu	1	..	..	..	..	6
English	..	1	..	..	..	..
Arabic	..	..	..	1	..	..
Hindi	77	51	99	98	88	67
Grand Total ..	**162**	**137**	**165**	**149**	**124**	**98**

The provincial production showed that Bombay maintained its ascendancy in production with 81 pictures in 1944.

Bombay 99 pictures.
Bengal 20.
South India 18.
The Punjab 5.
Total 124.

No less than one-third of the films produced came from the Major Producers.

Film Control Order.

The system of licencing production of Indian films with a view to conserving raw film introduced by Government on the 17th July 1943 continued until 15th December 1945.

TAXATION.

The taxation includes (1) Import Duty on **Raw Films** and Production and Projection **Machinery** (2) An Octroi or Terminal Tax which is levied by most District Municipalities (3) An Advertisement Tax on cinema publicity of every sort including slides shown on the screen in the cinemas. This tax is levied by important Municipalities (4) Government Electricity Duty (5) Entertainment Tax (6) Income Tax, Super Tax and Excess Profits Tax upto 31st March 1946. The sum total of these taxes is estimated at 40 per cent. of the gross annual income of the industry. Thus, on the industry's gross income in 1944-45 of Rs. 11,53,25,611 Rs. 5,32,43,898 were paid in these taxes.

IMPORTS OF FILMS.

The following table giving in footage and value the totals of raw and exposed films imported into India and of the import duty paid to Government :—

Year	Footage	Value	Total Import Duty
1922–23	73,10,429	13,23,393	2,55,935
1923–24	72,01,655	14,10,637	2,25,407

Cinematograph films	31·06	29·67	30·86	34·08	31.65	37·81

The Cocaine Traffic.

The form of cocaine chiefly used in India is Cocaine Hydrochloride. This salt forms light shining crystals, with a bitterish taste, and is soluble in half its weight of water. The alkaloid cocaine—of which this is a salt—is obtained from the dried leaves of the Erythroxylon Cocaine which grows in Bolivia, Peru, Java, Brazil and other parts of South America. The leaves are most active when freshly dried and are much used by the Natives as a stimulant. Tea made from them has a taste similar to green tea and is said to be very effectual in keeping people awake.

Spread of the habit.—The cocaine traffic in India is of comparatively recent growth, though it is impossible to estimate how widespread it was in 1903 when the Bombay High Court for the first time decided that cocaine was a drug included within the definition of an intoxicating drug in the Bombay Abkari Act. Since that date the illegal sale of cocaine in India has largely increased and the various provincial Excise Reports bear witness to the spread of the "Cocaine habit." The consumers of the drug, which is notoriously harmful, are to be found in all classes of society. In India, as in Paris, the drug is mostly used by prostitutes or by men as an aphrodisiac. The habit has spread chiefly to those classes which are prohibited by religion or caste rules from partaking of liquor and the well-known Indian intoxicating drugs.

Smuggling.—So far as the cases already detected show, the persons who smuggle the drug by sea from Europe and places outside India, into India, are chiefly sailors, stewards, firemen and sometimes engineers and officers of foreign ships. The ports through which cocaine enters India are Bombay, Karachi, Calcutta, Madras, Mormugao and Pondicherry. The main inland distributing centres are Delhi, Lucknow, Meerut, Lahore, Mooltan, Surat and Ahmedabad. Delhi especially is notorious for the cocaine trade. Great ingenuity is employed in smuggling cocaine through the Custom Houses. It is packed in parcels of newspapers, books, toys and piece-goods and in trunks which have secret compartments. The retail trade in the towns is very cunningly organised and controlled. In addition to the actual retailers, there is a whole army of watchmen and patrols whose duty is to shadow the Excise and Police officials and give the alarm when a raid is contemplated. During the Great War No. 1 several cases of importation of Japanese cocaine were detected, the importers being Japanese and Chinese sailors. The original marks on the packets and phials are usually destroyed so that the name of the manufacturing firm may not be found out.

It is no longer possible to buy cocaine from any betelnut seller as it was some years ago, but scores of cases in the Police Courts show that the retail trade thrives, though to a diminished extent, in Bombay. High profits ensure the continuance of the trade.

During World War II illicit import of Cocaine into India from the Far East came to a standstill with the result that the number of addicts shrank sharply.

The Law in regard to Cocaine.—This varies in different provinces. A summary of the law in Bombay is as follows: No cocaine can be imported except by a licensed dealer and importation by means of the post is entirely prohibited. The sale, possession, transport and export of cocaine are prohibited except under a license or permit from the Collector of the District. A duly qualified and licensed medical practitioner is allowed to transport, or remove 20 grains in the exercise of his profession; and as much as 6 grains may be possessed by any person if covered by a *bona fide* prescription from a duly qualified medical practitioner. The maximum punishment for illegal sale, possession, transport, etc., under Act V of 1878 as amended by Act XII of 1912 is as follows: Imprisonment for a term which may extend to one year or fine which may extend to Rs. 2,000 or both and on any subsequent conviction imprisonment for a term which may extend to 2 years or fine which may extend to Rs. 4,000 or both. The law in Bombay has been further amended so as to enable security to be taken from persons who have been convicted of cocaine offences. The amended Act also contains a section for the punishment of house-owners who let their houses to habitual cocaine sellers.

The Opium Trade.

Mention opium and half the Western world directs its thought to India, as though India were a most unscrupulous producer of the most noxious drug on earth. Refer to the League of Nations' proceedings in regard to opium and again, mainly under the leadership of American representatives, one finds India and the Government of India held up to humanity as traffickers in opium and as thereby obstacles to making the world a better place to live in. In fact, neither India nor the Government of India has anything to be ashamed of in its opium history. Whatever may be the case in other countries, centuries of inherited experience have taught the people of India discretion in the use of the drug and its misuse is a negligible feature in Indian life. Abuse of its properties is rarer in India than the abuse of alcohol in Western countries.

The record as regards exports is equally clean. India has never driven hard bargains to secure the sale of the product overseas. Where it has been bought the reason is its superiority over other supplies, because of the stringent regulations by which its manufacture has always, under the British authorities, been regulated in India, in order to secure the purity and cleanliness of the finished product. Directly any importing country has expressed a desire to have the trade reduced, the Government of India have responded by stiffening their restrictions on export. There have, in recent years, mainly at the instance of America, been numerous International conferences with a view to making opium and drugs derived from it more difficult to obtain and in every case it has been found that India had already given the lead in the special regulations which it was proposed to lay down.

The China Trade.—The classic case of Indian restriction of her export opium trade is provided by China. There is a long history of Indo-Chinese negotiations on the subject, but it is unnecessary to go further back into these than 1911. On 8th May of that year, there was drawn up between India and China an agreement under which the Government of India assented to: (1) the payment of an import duty three times the existing amount in return for the promised abolition of provincial taxes; (2) the partial closure of China to Indian opium by provinces, including not only stoppage of transit passes, but also treaty port closure, Shanghai and Canton excepted; (3) the total extinction of trade before 1917 on proof of total cessation of opium production in China; and (4) revision of the agreement on due notice by either party. This agreement, as its terms indicate, was on the side of China the outcome of a professed desire to stamp out the opium trade and opium consumption in her midst. And on her side China, in the agreement, undertook, among other things, to reduce production in China *pari passu* with the reduction of export from India.

In addition to the limit to the China trade imposed by the agreement, the Government of India undertook in order to lessen the danger of smuggling into China, and as an earnest of their desire to assist that country, strictly to confine the remainder of Indian opium export to the legitimate demands of the non-China markets. A figure was elaborately calculated for these markets and India drastically cut her non-China exports down to it in 1911. In subsequent years, she progressively reduced the permissible export limit and in 1913 she stopped exports to China altogether.

The financial sacrifice thereby undertaken by India in order to help the Chinese in their professed desire for reform amounted to many millions sterling a year. China never carried out her side of the bargain. She is still the greatest opium producing country in the world.

Agreements observed by India.—The Government of India have carried out to the letter their side of the 1911 agreement. They have gone further. Not only were exports to China stopped and exports to non-China countries in the East limited in accordance with the agreement with China, but exports to non-China countries have, on the voluntary initiative of India, been subjected to successive restraining agreements with the countries concerned. The Government of India introduced, with effect from 1st January 1923, a certificate system recommended by the League of Nations, whereby all exports of opium must be covered by certificates from the Government of the importing country that its consignment

is approved and is required for legitimate purposes. The pressure exerted by the League of Nations in this regard was not pressure upon the Government of India but upon the Governments of the importing countries and, so far as India was concerned, the new system was welcomed because it removed from the shoulders of the Government of India all responsibility in regard to opium consumption in the importing countries and laid it upon their own respective Governments. In 1926, in order to fulfil the spirit of her international agreements, India decided, though she was in no way bound to do so, to reduce her exports to Far Eastern countries for other than medical and scientific purposes by 10 per cent. yearly, so as to extinguish them altogether by December 1935, and effect has been given to that policy at considerable financial sacrifice.

Indian Uses of Opium.—There is a fundamental difference between the problem in India and that in foreign countries, particularly in America and Europe. America and Europe are principally concerned with the problem of the vicious consumption of cocaine and morphia and it is on the experience of the abuse of these drugs in those countries that much of the condemnation of Indian policy is based. It is accepted that the consumption of opium in America and Europe is in effect hardly less disastrous than that of morphia and cocaine. And the reason is that to Americans and Europeans opium is an unaccustomed drug. The habit of its use being both new and strange to them, it is never used to moderation but always abused, and the results have no relation to the result of moderate opium eating in India. The fact appears to be that peoples acquire a tolerance to drugs to the use of which they are long habituated. Opium has been used in India since the 16th century at least. The method of use is eating and in India, generally speaking, eating seems to do little, if any, harm. Smoking, which is the habit of the Far Eastern races, rather than of the Indian-races, seems to do much more harm in India than eating, while on the other hand where smoking is in ordinary use competent authorities (*e.g.*, the Royal Commission on opium in Malaya) think eating to be more harmful than smoking.

The Government of India have fully participated in the different International Conferences on the drug question and responded to the obligations which her assent to their conclusions has placed upon her in regard to home consumption. But the principal effect upon India to these international discussions has been to draw the fresh attention of her Government and people to the opium situation in her midst, to cause consultations on the subject between the Government of India and the Indian Legislature and to produce what may be described as considerable intelligent progress in the development of those regulations upon the use of opium which are time-honoured.

India's Opium Policy.—The current attitude and policy of the Government of India were explained on their behalf to the League of Nations at Geneva. Their representative declared that any genuine measure of reform initiated by a Provincial Minister in connection with it would receive encouragement and support from the Central Government and showed that the policy of that Government is, and has been, one of non-interference with the moderate use of raw opium, whether the object of the consumer be some real or supposed physical benefit or merely the indulgence of the almost universal desire of human beings, particularly those whose occupations involve exposure or severe bodily exertion, for a stimulant or narcotic. It is, and always has been, the desire of Government to supress excessive indulgence.

In a statement in the Council of State in April 1946, Mr. V. Narahari Rao, Finance Secretary, said: "The position is kept under constant review. While the consumption of opium by addicts and its use as a prophylactic or anodyne or as a household remedy by people to whom qualified medical assistance is inaccessible are tolerated, every step is being taken to check its use and to reduce consumption. The people of India have, by long experience, acquired an empirical skill in the use of opium for medical and semi-medical purposes and until proper medical aid becomes generally available throughout the country, it would appear neither practicable nor humane to prohibit the use of opium altogether. The Government of India are, however, at present reviewing the whole field in consultation with the provincial governments and the states and in particular are examining the practicability of suppressing opium smoking.

Under the Government of India Act of 1919, opium was a provincial transferred subject. Nevertheless, owing to the jealous watching and criticism by observers in every continent, the Government of India called an official All-India Conference, which was opened at Simla by Lord Irwin, on 5th May 1930, to consider the question of certain areas where opium consumption was alleged to be unduly high. This was followed by the prosecution of special provincial inquiries by committees set up by the Local Governments at the special instance of His Majesty's Government. The Conference, after an exhaustive discussion of the phenomena presented by the various areas selected for investigation, and in the light of the personal knowledge of the representatives of the different Provinces and of the reports of the local committees, concluded that it appeared that certain parts of Assam and Calcutta might correctly be regarded as having excessive consumption and that Orissa and the Ferozepore District of the Punjab might be held to provide cases for further inquiry. In other cases the Conference considered that there was no evidence of prevalent excess. But they gave a series of examples to show that there were simple explanations showing harmless causes for what appeared to be excessive consumption in many places.

Opium policy has on several occasions during the past few years come under discussion in the Central Indian Legislature and in regard to it the Government of India and the non-official members of the Legislature have been in accord. The area under cultivation of poppy is fixed every year with references to the requirements of opium for home consumption, manufacture of alkaloids and exports. Its cultivation is now restricted to a compact area in the

United Provinces and is the only source of supply to the Government of India Factory at Ghazipur. Several Indian States in the Central India are, however, known to have unrestricted cultivation to meet their requirements of their people the Government of India Factory at Ghazipur in the United Provinces where it can only be cultivated under license. Importation into British India from the Indian States is controlled by prohibition of imports except on Government account and by agreement with the states concerned that they will not allow exports to British India except by arrangement. But smuggling is the main source of getting opium from these States into British India. Cultivation in British India is progressively and rapidly being reduced. The process of reduction was stayed in 1931-1932 because it was found that the rate before 1931 had been too rapid so that stocks were brought to a dangerously low level. Progressive and rapid reduction was resumed in 1933, and continued till 1941-42. The area under poppy cultivation was, however, raised thereafter in order to meet the large demands for opium and its alkaloids for medical and scientific purposes from the United Kingdom, the U.S.A., the Eastern Group countries and the Indian Defence Services. The total area of cultivation of poppy from 1932-33 is as under :—

1932-33	=	27,228 Acres.
1933-34	=	13,792 ,,
1934-35	=	6,806 ,,
1935-36	=	7,167 ,,
1936-37	=	6,366 ,,
1937-38	=	6,564 ,,
1938-39	=	4,812 ,,
1939-40	=	4,899 ,,
1940-41	=	4,819 ,,
1941-42	=	15,301 ,,
1942-43	=	27,778 ,,
1943-44	=	36,415 ,,

Gradual Extinction Of Exports.—Lord Reading, as Viceroy, made the position clear in a statement in February, 1926, when he explained that to avoid complications that would arise in attempting to sit in judgment on the internal policy of other Governments the Government of India had decided to reduce exports to all countries in the Far East by a fixed proportion annually with a view ultimately to discontinuing them altogether.

In June, 1926, it was announced that extinction of these exports would take place in ten years.

Since the beginning of 1936, exports of opium from India are not allowed except in the following cases : small quantities sent to the French and Portuguese Settlements in India, Nepal, Zanzibar and Pemba in accordance with long standing practice ; quantities sent to Burma and Aden which until recently formed part of India ; and exports of raw opium to the United Kingdom for the manufacture of alkaloids. Exports to these places are allowed in accordance with longstanding practice and are subject to arrangements (prescribed by the League of Nations) which confine the amount of such exports to the quantities approved by the Governments of these territories.

Exports of opium averaged 51 cwts. between 1909-10 and 1913-14. They were reduced to 14 cwts. in the following five years and were further brought down to 9 cwts. during the five years ended 1923-24.

The steady decrease in the average annual net receipts (after deducting expenditure) from the opium export trade is shown by the following table :

1910-11 to 1912-13 ..	.. Rs. 801·62	lakhs.
1920-21 to 1922-23 ..	.. Rs. 183·41	,,
1922-23 to 1924-25 ..	.. Rs. 167·51	,,
1932-33 to 1933-34 ..	.. Rs. 55·22	,,
1934-35..	.. Rs. 19·35	,,

In making this sacrifice, the Government of India had gone further than the requirements of the provisions of international conventions. India's voluntary relinquishment of crores in revenue has not, however, contributed to the reduction of consumption in the Far Eastern countries, which are now obtaining their supplies of opium from various other sources.

Total Prohibition In Assam.—The control of policy about internal consumption rests with Provincial Governments, who are adopting several measures to curtail supply to the public.

Since 1919 various restrictive measures had been adopted by the Government of Assam in their efforts to eradicate the opium habit, such as the raising of the retail price, the rationing of shops, the issue of passes, introduction of prohibition in selected areas, and accelerated reduction of rations.

The Government of Assam embarked upon a policy of total prohibition in the included areas of the Province from March 1, 1941. A system of quarterly accelerated reduction of opium rations by which rations of all consumers were reduced at the rate of one-eighth of a tola—according to the prescribed scale—was enforced from September 1, 1939, in the partially excluded areas of the Province with a view to eradicating this pernicious habit of opium consumption in these areas within a period of two years.

Close supervision is maintained over the licensed vendors in all parts of British India ; the conditions of their licenses require that the shops shall always be open to inspection, that no opium shall be sold to children or bad characters, that sales shall only be made on the licensed premises and during the prescribed hours, that only unadulterated Government opium shall be sold, that credit shall not be allowed, that no consumption shall be permitted on the premises, that full accounts shall be maintained and that the names and addresses of purchasers of more than one or two tolas shall be recorded. These conditions are effectively enforced by the excise departments of the various provinces.

GLASS AND GLASSWARE.

Glass was manufactured in India centuries before Christ. Pliny mentions "Indian glass" as being of superior quality.

As a result of recent archæological excavations a number of small crude glass vessels, indicative of the very primitive stage of the industry at the time, have been discovered.

The first Indian references to glass are in the Mahavamsa, the Chronicles of the Sinhalese Kings (306 B.C.), when glass mirrors were carried in processions.

It is certain, according to Sir Alfred Chatterton, that by the sixteenth century, glass was an established industry in India, producing mainly bangles and small bottles. The quality of the materials was bad and the articles turned out were rough.

Manufacture of glass in India on modern European lines dates from the nineties of the last century, when some pioneer efforts were made in this direction. Since then, a number of concerns have started. They devote themselves to the manufacture of bangles and lampware, while bottlemaking and production of table articles increased rapidly since the beginning of this War.

In its present stage, the industry takes two well-defined forms—(1) Indigenous Cottage Industry and (2) the modern Factory Industry. The former, which is represented in several parts of the country, has its chief centres in the Firozabad area in the United Provinces. It is mainly concerned with the manufacture of cheap bangles made from glass blocks manufactured in large quantities. With the coming of the factory-scale manufacture of bangles, the Cottage Industry is struggling hard for existence. The Factory Industry is turning out much better quality bangles and has also successfully eliminated Japanese imports. Firozabad is in full control of the bangle market since the outbreak of the War. It was experiencing extreme prosperity in the first three years of the war, lately toned down by shortage of coal.

In other fields the factory industry is mainly concerned with the manufacture of bottles, lamp chimneys and globes, tumblers and jars, the chief centres of production being the United Provinces, Calcutta and Bombay. During the war the manufacture of a number of new articles was founded at the instance of Government, for the use both of Fighting Services and Civilian population. Three sheet glass factories are at present in existence and two in construction, while before the war there was only one sheet glass factory in India.

Records of pre-war ventures have shown that failure in some cases was due in part at least, to lack of enlightened management and the lack of expert guidance. As a result of an enquiry held in 1931 the Government of India decided to assist the glass industry by way of a rebate of customs duty on imported Soda Ash.

In 1938 special action towards development of this industry was taken by the Government in the United Provinces. A glass Technology Section was established under the direction of Dr. A. Nadel, Glass Technologist to Govt., U.P. Since then modern recuperative furnaces have been introduced, and the large scale industry as a whole changed over from pot-furnaces to tank furnaces, which are more economic and better suited for mass production. Numerous glass shaping, refining and decorating machines of a modern type have been installed in factories, in some cases at Government expense, according to development plans implemented by the Section. The production of laboratory ware was initiated and also the manufacture of glass beads was introduced, as an entirely new cottage industry, following a process hitherto unknown in India. The glass Section tends to improve working conditions in Firozabad and other centres and evolves new types of decorative glasses for the bangle and bead industry. Several modern glass factories were built by the Section to cope with war supplies of articles never before made in India. They are now in full production. In particular the bottle industry has been organised on semi-automatic lines and the production of glass elements for the use of electric lamp factories has been established on large scale. One factory situated at Shikohabad specializes exclusively in electric lamp shells.

Due to technical improvements of a fundamental nature on the other hand due to favourable economic conditions connected with the war, the glass industry in the United Provinces has taken the lead, both in quality and quantity, and supplies the bulk of glass consumed in India, successfully replacing foreign imports. Various new lines, never before made in India, like boiler gauges, steamware, hospital ware, technical articles required by the Defence Departments, etc., have been evolved in the Laboratory of the Section and handed over to the industry for regular production.

Next to the United Provinces, the glass industry has lately grown in Calcutta where due to the increased demand for glass goods, a number of small and medium-sized factories have come into existence. In Bombay one old-established bottle factory has greatly developed the quantity and quality of its products, also venturing into the field of glass instrument making. There are also several small factories of recent origin.

Lately the Government of India have decided to call into being a Glass & Ceramic Institute to be situated in Calcutta.

HIDES, SKINS AND LEATHER.

Supply of raw hides and skins.—India is regarded as a surplus country in respect of her resources of raw hides and skins. It is estimated that normally she produces 20 million cattle hides, 5.7 million buffalo hides, 27.5 million goat and 17 million sheep skins a year. Only a portion of the cattle and buffalo hides is obtained from slaughtered animals and the bulk, about 75 to 80 per cent., is derived from animals that die a natural death. On account of this reason the output of these hides increases when famine, flood, cattle epidemics, etc., take an undue toll on livestock. Goat and sheep skins are, however, derived from animals slaughtered for meat and their production remains more or less at a steady level. In normal times India also imports annually mostly from the neighbouring countries about 1 million hides and 5 million goat and sheep skins. So the total quantities of hides and skins normally available are about 26.7 million hides and 50 million goat and sheep skins annually.

Trade in raw hides and skins.—Just before the second World War about the year 1938-39 about 10 per cent. of the buffalo hides, 22.5 per cent. of the cow hides (kips), 6.5 per cent of the sheep skins and 80 per cent. of the goat skins available in India annually were exported and the balance tanned in the country. The figures show that surpluses for export dwindled considerably except in the case of goat skins. This was due to the expansion of hide and sheep skin tanning in India. Goat skin tanning did not expand much.

Cattle hides are cured for the export trade by air drying and dry salting. The better grades of the former are dried out, being stretched lengthwise on frames, and are called "Framed" hides, and the inferior ones are dried by spreading on the ground and are known as "Crumpled" hides. Air dried hides are treated with a solution of arsenic to ward off insect damage before export. Dry salt curing is done mostly in Bengal with a saline earth known as "Khari Salt" which consists principally of sodium sulphate mixed with varying proportions of sodium chloride and earthy matter. Goat skins are mostly dry salted and to a lesser extent air dried. The total export of raw hides and skins amounted to Rs. 3,84,66,560 in 1938-39.

The Agricultural Marketing Adviser to the Government of India has been attempting to grade slaughtered cattle hides. Hide-grading stations have been started at slaughter houses at Delhi, Agra, Bandra (Bombay), Bareilly, Karachi and Rampur, and specifications for grades have been formulated. Hides and skins are included in the Schedule to the Agricultural Produce (Marketing and Grading) Act of 1937. An attempt is being made by the Central Agricultural Marketing Department, Govt. of India, to improve flaying in the slaughter houses where grading stations have been started by giving a bonus to flayers. The Department has published a Report on the Marketing of Hides in India and Burma (Marketing Series No. 36) and another Report on the Marketing of Skins in India and Burma (Marketing Series No. 40) which contain valuable informations regarding Indian hides and skins.

Tanning in India.—The expansion of the tanning industry in India just before the second World War has already been mentioned. The War stimulated this expansion further. The tanneries which had existed when the war broke out extended their plants and increased their productive capacity and a number of new tanneries were also started during the war. India's tanning capacity has increased so much now that all the available hides and sheep skins can be tanned in the country leaving practically no surplus for export. Tanning of goat skin is also making steady progress in India. The Indian tanning industry may be divided into 2 categories, indigenous and modern.

Indigenous tanning.—This is carried out principally by the people of the tanning caste which is a depressed Hindu community known as the Chamar. They tan according to indigenous methods and their products may be divided into a number of typical groups, *viz.*, (*i*) the miscellaneous crude leather produced in the villages to meet local needs, (*ii*) the bag tanned buffalo sole leather produced in the Punjab, Calcutta, Bombay and many other places which is extensively used for making shoes, (*iii*) tanned sheep skins of the Punjab known as "Kabuli Bheris" used as a cheap book binding leather throughout India, (*iv*) half-tanned leather of Madras and Bombay. The first three varieties are all consumed in India while the better grades of the fourth are exported chiefly to the United Kingdom and from there to other countries. The half-tanned cattle hides and calf skins are known in the International trade as East India tanned Kips and Calf skins. These are retanned and finished in the importing countries for making shoe upper and other varieties of dressing leather. The cattle hides used to be tanned formerly with avaram or turwar bark (Cassia auriculata) which occurs in South and Western India. But since the first world war they are being tanned in Madras with wattle bark, large quantities of which are imported from South Africa. The goat and sheep skins in Madras and these as well as cattle hides in Bombay are still tanned with avaram bark. The export of half-tanned leather was of the value of Rs. 5.6 crores in 1938-39. During the war the production of half tanned leather in South India suffered a reduction due to lack of hides and skins.

Modern tanning.—Leather for Harness and Saddlery for military equipment has long been manufactured at Cawnpore by Western processes of vegetable tanning in pits from buffalo and heavy cow hides using the local tanstuffs, babul bark (Acacia arabica) and myrobalans (Terminalia Chebula). At present large quantities of South African wattle bark and its extract (Mimosa Extract) are also being used as the supply of babul bark is getting inadequate. Since the first world war sole leather has also been manufactured in Cawnpore, Agra, Calcutta and Madras from buffalo hides according to modern process for use in ammunition boots and better types of civilian footwear. Its output is now quite considerable in the country and is increasing. The second world war greatly stimulated the

production of vegetable tanned harness and sole leather and all the big and medium sized tanneries in India capable of producing these leathers were engaged in their manufacture. Most of them had to extend their plants to cope with the war demand for leather and all were supplying practically the whole of their outputs to the Government. Even after the war the increased production of pit tanned buffalo sole leather is continuing to meet its demand for the manufacture of civilian footwear in India and for export.

Chrome tanning.—The outstanding feature in the field of modern tanning in India since the first World War is the phenomenal development of chrome tanning, especially for the manufacture of the shoe upper leather, Box and Willow sides from cattle hides and Box and Willow calf from calf skins. A number of tanneries in Cawnpore, Calcutta and Madras are engaged in the production of these leathers. Some of the tanneries are quite big and equipped with the latest chrome tanning machinery while there are large numbers in Calcutta which are small. Indian Box and Willow sides have been regularly exported to Burma, the Straits Settlements, Iraq, Persia and Africa since that war But after the Ottawa Trade Pact of 1933 Indian Box and Willow sides and Calf were exported in increasing quantities to the United Kingdom, being helped by a preferential tariff in favour of India. The export of these leathers to the United Kingdom rose to Rs. 54,15,500 worth in 1937. The Ottawa Trade Pact has also helped the development of the manufacture of glace kid in India and its export from the country. The export of glace kid rose to the value of 9.3 lakhs of rupees in 1938. Fairly large quantities of embossed stout chrome upper leather were manufactured during second World War by a number of Chrome tanneres in India for ammunition boots. Export of chrome leather from India to U.K. and other countries was considerably reduced during the last war due to war time exigencies. After the war its demand from the Overseas Markets continues to be keen and its export on a larger scale has been resumed recently. Its demand and consumption in India are also increasing considerably for the manufacture of civilian shoes.

Other items of modern tanning which have made some progress in India are belting leather, chamois leather, Suede leather, Vegetable and chrome patent leather, improved type of case leather, picking bands, roller skins, chrome lace leather, etc.

Training centres for leather industry.—There are a few training centres among which the Bengal Tanning Institute in Calcutta and Jullundar Tanning Institute, Jullundar City, Government Tanning Institute, Bombay, maintained respectively by the Governments of Bengal, Punjab and Bombay may be mentioned. Particulars of the courses of training may be obtained from the institutes. There are also peripatetic tanning demonstration parties under the Industries Departments of the Governments of the Punjab, U.P., Bihar, Orissa and Bengal which hold instructional classes in rural areas to introduce improved processes of tannings.

Tanners Federation of India.—To look after the interests of the Indian Tanning Industry this Federation was started a few years ago. Its Head quarters are the Upper India Chamber of Commerce, Cawnpore. Most of the organised tanneries in India are members of the Federation.

COIR.

Coir is the trade name given to the fibre obtained from the husk of the coconut fruit. India and Ceylon have a virtual monopoly in the production of this by-product of the coconut industry and its development in these countries has been rendered possible by the fact that these coconuts are usually harvested when the husk of the fruit is still green, though the coconut within is ripe. Good quality coir can only be produced from the fresh green husk of the ripe fruit. If the nut is not fully ripe the fibre in the husk has not developed its full strength, and if the fruit has dried out the fibre is weak, dark coloured and difficult to extract.

In Ceylon, the extraction is done by mechanical means on a factory scale after the husks have been retted in water for two or three weeks, and under such methods it is not possible to obtain either the colour or cleanliness of the fully retted Indian coir. The process consists of holding the husk against a revolving spiked drum which combs and extracts the fibre. The shorter fibres collect in the drum and after cleaning are classed as "mattress fibre." The longer fibres are retained in the hand of the operator and are classed as "bristle fibre" which is exported and used in the manufacture of brushes, etc. About 75 per cent. of the Ceylon produce is exported as raw fibre, and only 25 per cent. as yarn or manufactured coir.

The Indian industry, as far as the export trade is concerned, is confined to the backwater regions of the Malabar coast, Cochin, Travancore, and to the Laccadive and Divi Islands, which are administered by the Madras Government. The extraction of the fibre and the manufacture of coir yarn forms a well organised cottage industry. The freshly harvested nuts are purchased by merchants who convey them down the backwaters to suitable places for retting. Such places are situated along the tidal reaches of the backwaters, and sites for retting are selected in places where the ground contains a considerable admixture of sand. Here, pits are dug, either in the backwater itself or on the banks and after lining these with palm leaves they are filled with the husks. When filled they are covered with plaited coconut leaves and weighed down with soil or mud. The husks are left to ret in these pits for a period of about eight months, the tidal rise and fall of the water and the porous nature of the ground ensuring constant water movement through the mass of retting husks and thus supplying aeration for the necessary bacterial action. At the end of this period, the husks are removed from the retting pit, washed in clean water and distributed among the local people who extract the fibre. This is usually spare time work done by the women of the house. Firstly, the outer skin of the husk is removed and the husk is then

beaten with a wooden mallet on a block of wood or stone. This separates the fibre from the decaying pithy matter in which it is embedded in the husk. The fibre thus extracted is dried in the shade and then beaten or willowed with thin bamboo canes. The fibre is then returned to the merchant who further cleans this in a revolving drum furnished with projecting spikes resembling thin saw blades made of iron. The fibre is sorted out into colour grades and distributed among the local people who spin this into yarn. The fibre is first made into "slivers" and is then either spun by hand or on a wheel. This is again returned to the merchant who again grades this for colour and splices the short lengths into a continuous length of 450 yards. It is then tied into bundles and is disposed of to the factories where it is either baled up for export or is manufactured into matting, door mats, braid, ship's fenders, rope, etc.

The yarn is very carefully graded, both for manufacture and for export, according to its colour, which is, in reality, a gauge of proper retting. The best quality of coir is a golden-yellow colour and the lowest grade is a grey colour which shows that the husks have either been over-retted or that the condition for retting have not been satisfactory.

Properly retted coir is of the highest quality. It is much more easily spun than machine made coir, because the fibres are clean and free from adhering pith and a much more even yarn is obtained. It is much stronger than machine-made coir because none of the long or "bristle" fibres have been removed in the process of extraction. The colour is not only attractive, but is an indication that retting has been carried through to the correct stage.

Coir fibre, when made into ropes, is extremely elastic and thus yields to heavy strains, and it therefore has special uses. It does not rot easily when exposed to atmospheric conditions, or to salt or fresh water, and in manufacture it is found to take dyes readily.

The value of the Indian trade is considerable, the imports into Great Britain alone, which represent less than 20 per cent. of the Indian exports, are shown in the Board of Trade returns to amount in value to more than one million pounds per annum. It is an industry which provides a profitable occupation to the densely populated back water tracts of Western India, and it provides the raw material in the shape of yarn and fibre for a considerable industry in Europe. More than 80 per cent. of the manufactured coir products imported into the United Kingdom are produced in India and more than 90 per cent. of the coir yarn. The imports of coir fibre from India are inconsiderable and amount to only 25 per cent. of the quantity imported. The export of coir fibre from India represents in value only 0·35 per cent. of that of the total Indian exports of coir and coir products.

The Government of Madras are conducting a coir demonstration school at Beypore near Calicut under the control of the Director of Industries and Commerce, where students are trained in improved methods of cleaning fibre, of spinning of coir yarn on the wheel, of producing ropes, belts, mats, rugs, etc.

It is proposed to enlarge the activities of the School and also to open fresh centres in suitable localities on the East Coast for teaching coir handicraft and increasing the output of coir articles.

PATENTS, DESIGNS AND TRADE MARKS.

'*Patents*,' '*Designs*' and '*Trade Marks*' constitute certain forms of personal rights which are collectively referred to as rights of 'industrial property'. In British India the rights in Patents and Designs are regulated by the Indian Patents and Designs Act, 1911, as amended from time to time, and the procedure under the Act is regulated by the Indian Patents and Designs Rules, 1933 and the Indian Secret Patent Rules, 1933. The Act and the Rules are contained in the *Patent Office Handbook*, which is available from the Manager of Publications, Civil Lines, Delhi, at a cost of Re.1 per copy. The Handbook contains in addition detailed instructions for those interested in Patents and Designs. In the latest edition (6th) of the Handbook is added a new chapter wherein are collected together some of the important decisions of the Courts, the Central Government and the Controller of Patents and Designs. These decisions are helpful in interpreting the provisions of the Indian Patents and Designs Act of 1911. The broad features of the Patents and Designs Act may be described as follows :—

PATENTS.

A patent is a legal document which confers upon the patentee the exclusive privilege of making, selling and using the patented invention and of authorising others so to do. Patents granted under the Indian Patents and Designs Act are operative throughout British India. The normal term of a patent in British India is 16 years. But in exceptional cases, this term can be extended by a maximum of ten years. The continuance of the right conferred by a patent after the first four years of its term is subject to the payment of an annual renewal fee.

What may be patented.—A patent may be granted for an '*invention*,' which is defined as "any manner of new manufacture including an improvement or an alleged invention." In other words, to be patentable an invention must be a *manufacture* ; it must be new ; it must be useful and it must not be such as may be said to be obvious to a person skilled in the art to which the invention relates and acquainted with the common knowledge in that art at the time of applying for the patent. The word 'manufacture' includes any process, apparatus, device, machine, article, or composition of matter.

Illustrations of patentable inventions are *new* textile machines, power plants, agricultural implements, domestic appliances, drying and moistening apparatus and processes and sanitary appliances.

In the field of chemical industry *new* processes and apparatuses for manufacturing synthetic products, foodstuffs, dyes, tallow substitutes, starchy raw materials, soda ash, caustic soda, bleaching powder, toilet preparations, and processes for the treatment of oil seeds, by-products and waste materials, are all patentable inventions.

A plan of campaign in warfare or business, or the discovery of a hitherto unknown natural law is not patentable. Similarly, a game of chance or skill which does not require new means for playing it, or a method of calculation or a new notation for writing music, a new method of curing diseases, natural substances suitable for food, cannot be classed as 'manufactures,' and are therefore not patentable.

What are commonly called "patent medicines" are medicines prepared by secret formulæ and are not usually covered by the grant of patents. The proprietors of such medicines may in most cases possess trade mark rights in the names by which the medicines are known.

New methods of using well-known apparatus may also be patented, provided the *new* methods result in unforeseen technical advantages. *New* compositions of matter may also be patented if their properties would not be deducible from known properties of their constituent substances.

In the case of chemical inventions, it should be noted that the article or substance which is produced may be old, but if the mode of producing it is new, the process will be patentable.

Who may obtain a patent and how.—Any person in possession of an invention may obtain a patent. Application for a patent should be made to the Controller of Patents and Designs and filed at the Patent Office at 214, Lower Circular Road, Calcutta. The applicant himself need not be the inventor, but the name of the inventor has to be disclosed. The application should be accompanied by either a Provisional specification or a Complete specification, in duplicate. If the application is accompanied by a Provisional specification, it will be necessary to file a Complete specification within 9 months from the date of the application. This period of nine months may be extended by one month by paying an additional fee of Rs. 10.

The fee payable in respect of an application accompanied by a Provisional specification is Rs. 10, and in respect of an application accompanied by a Complete specification is Rs. 30. The fee payable in respect of filing a Complete specification following a Provisional specification is Rs. 20. All applications for patents and the specifications in respect thereof are examined by the Patent Office and after their acceptance are advertised in the Gazette of India, Part II, Section I, so as to enable interested parties to oppose the grant of patents.

Other features.—Inventors of instruments or munitions of war may assign their inventions to the Central Government and obtain 'secret' patents therefor. No fees are payable in respect of 'secret' patents.

Improvements on an existing patent may be protected by 'patents of addition,' for which no renewal fee need be paid, but which would ordinarily remain in force only so long as the main patent is in force.

After a patent is obtained, the patentee may either sell the patent outright or may grant licences for its exploitation. He may work the patent himself.

If, during the continuance of a patent, any person makes, sells, or uses the invention without obtaining a licence from the patentee, or counterfeits it or imitates it, the patentee may institute a suit for infringement against the said person.

The defendant in an infringement suit may counterclaim revocation of the patent. A patent worked wholly outside British India may also be revoked by the Central Government.

DESIGNS.

For the purpose of the Indian Patents and Designs Act, 1911, a 'design' means the features of shape, configuration, pattern or ornament applied to any article by any industrial process, which in the finished article appeal to and are judged solely by the eye. A model or principle of construction, or anything which is in substance a mere mechanical device, or a trade mark is not a design for the purpose of the Indian Patents and Designs Act. Literary or artistic creations such as books, pictures, and music, which fall under the Indian Copyright Act (Act III of 1914) do not also come within the scope of the Indian Patents and Designs Act.

A design to be registrable must be *new or original* and must be applicable to an *article*. The original registration remains in force for five years, but the period can be extended upto fifteen years in all.

During the existence of copyright in a registered design, the unauthorised application of the design to the article in question for purpose of sale is prohibited. The penalty for each infringement is a sum not exceeding five hundred rupees recoverable as a contract debt; the proprietor may, in the alternative, elect to bring a suit for the recovery of damages and for an injunction against the repetition of the infringement, in which case the infringer is liable to pay such damages as may be awarded. By a recent amendment of section 18 of the Indian Sea Customs Act, the importation into British India of goods bearing a pirated design can be stopped.

GENERAL.

On the whole, Indian Law and practice for the protection of Inventions and the registration of designs closely follow the law and practice of the United Kingdom. The existing Indian Patents and Designs Act extends to British India only. The Indian States do not come within the scope of the Indian Patents and Designs Act; but Baroda, Cochin, Cooch Behar, Hyderabad (Deccan), Indore (Holkar), Jodhpur, Jammu and Kashmir, Mysore, Rampur and Travancore have patent laws of their own, and particulars of the same may be obtained from the Patent offices of the respective States.

A patent granted in British India does not extend to the United Kingdom or to any other British possession. But, under a reciprocal arrangement, an applicant for a British Indian patent may, under certain conditions, claim a 12 months' priority in Australia, Baroda, Canada, Ceylon, Eire, Mysore, New Zealand, Rampur, the Union of South Africa, and the United Kingdom for the corresponding patents that may be granted to him in those countries. Similarly an applicant for a patent in any one of the said countries may claim a 12 months' priority for his corresponding patent in British India.

WAR LEGISLATION.

Rules 84A to 84C of the Defence of India Rules enable the Central Government to grant licences under *enemy-owned patents and designs.*

For further information on this subject reference may be made to the Patent Office, 214, Lower Circular Road, Calcutta.

Rule 42 of the Defence of India Rules provides that except under the authority of the Controller, no person shall make an application for the grant of a patent or the registration of a design in any country or place not included in His Majesty's Dominions, and not being an Indian State.

The Indian Patents & Designs (Extension of Time) Act, 1942, authorises the Controller of Patents & Designs to grant extensions of time for the completion of proceedings under the Indian Patents & Designs Act, 1911, when such proceedings could not be completed within the prescribed time due to delay caused by war conditions.

TRADE MARKS.

The Trade Marks Act, 1940 (Act V of 1940), was passed by the Indian Legislature in March 1940, to provide for the registration and more effective protection of trade marks in British India. Sections 1 and 85 of the Act came into force at once, and under the latter section, intending applicants for registration were enabled to deposit their trade marks. About 1,58,000 trade marks were so deposited, which were since classified and indexed.

Before the other provisions of the Act could be brought into force the Act was amended in 1941 (Act XXVII of 1941) to establish a separate Trade Marks Registry at Bombay under a Bombay Registrar with jurisdiction over textile marks only. The Amended Act came into force on the 1st June 1942, but had again to be amended by the Trade Marks Amendment Act, 1943. The Act was further amended in April 1946 (Act XII of 1946) with a view to avoiding conflict of registration in various Indian States who have either passed Trade Marks Act of their own or proposed to do so in the near future, and also to make trade marks registered in any territory effective in all territories in India, in which trade marks legislation has been enacted.

Infringement actions of trade marks and certification of trade marks registered in British India can accordingly be filed in any of the reciprocating Indian States thus making it unnecessary for the proprietor of a trade mark to register a trade mark more than once in India. The Trade Marks Register is kept at the Registry at Bombay under the control and management of the Registrar of Trade Marks. Mr. K. S. Shavaksha, B.A. (Oxon.), Bar-at-Law, is at present the Registrar of Trade Marks.

A branch of the Trade Marks Registry is established at Calcutta, at which a copy of the Register and the Refused Textile Marks List are kept. The Branch Registry is in charge of the Deputy Registrar who is empowered under section 4 (2A) of the Act to discharge, under the superintendence and direction of the Registrar, any function which under the Act may be discharged by the Registrar. Any reference in the Act to the Registrar includes a reference to the Deputy Registrar when so discharging any such function. Where the Registrar directs the Deputy Registrar to deal with a particular matter, he has in disposing of such matter the same powers as the Registrar. At present, the Deputy Registrar of Trade Marks is Dr. S. Venkateswaran, D.Sc., B.L.

The following is a summary of the important provisions of the Trade Marks Act, 1940:

A "mark" includes a device, brand, heading, label, ticket, name, signature, word, letter or numeral or any combination thereof; a "trade mark" means a mark used or proposed to be used in relation to goods for the purpose of indicating or so as to indicate a connection in the course of trade between the goods and some person having the right to use the mark. A trade mark may be registered only in respect of particular goods or classes of goods. Any person who is desirous of registering a mark should apply to the Registrar in the prescribed manner. The application may be made either at the Registry at Bombay or at the branch office at Calcutta.

Under section 6 (1), distinctiveness is the prime requisite of a trade mark for registration. A registrable trade mark must consist of or contain at least one of the following essential particulars: (1) name of a company or individual represented in a special or particular manner, (2) signature of the applicant or some predecessor in business, (3) one or more invented words, (4) word or words, having no direct reference to the character or quality of the goods and not being according to its ordinary meaning a geographical name or surname or the name of a sect, caste or tribe in India and (5) any other distinctive mark. A mark consisting of a name, signature, or any word other than such as fall within the above description is not registrable except upon evidence of distinctiveness. In determining whether a trade mark is distinctive the extent of the inherent distinctiveness of the mark, as well as its acquired distinctiveness by use or otherwise, will be considered. The commonly accepted name of any single chemical element or chemical compound is not registrable in respect of a chemical substance or preparation. Trade marks which are contrary to law or morality, or disentitled to protection in a Court of Law by being likely to deceive or cause confusion,

or which are likely to hurt religious susceptibilities, are not registrable. The Act contains also special provisions for the registration of certification trade marks, and for defensive registration.

When an application for registration has been accepted subject to such conditions, if any, as the Registrar might think fit to impose, the Registrar shall cause the application to be advertised accordingly. Under section 15 (2) any person may in the prescribed manner oppose an application so advertised within 4 months, and after hearing the parties, the Registrar will decide whether registration is to be permitted. The date of registration of an application shall be the date of filing such application in the Registry.

The registration of a mark will be in force for 7 years in the first instance, after which it may be renewed for a period of 15 years. In all legal proceedings relating to a registered trade mark, the fact of registration shall be *prima facie* evidence of validity of the registration and of all subsequent assignments and transmissions. Further, after seven years from the date of registration, the validity of the original registration cannot be questioned except on grounds of fraud or deception or unless the mark offends against section 8.

The registered proprietor of a trade mark is entitled to an action for infringement under the Act. This valuable right is extended to owners of "old" marks, who had applied for registration of their trade marks within five years from the commencement of the Act and registration of which has been refused by the Registrar. The rights of action to passing off are not affected by registration, and are expressly preserved under the Act. Registration gives to the registered proprietor the exclusive right to the use of the trade mark in relation to the goods for which the mark is registered. Where a mark is already registered by one person, the same or nearly similar mark cannot be registered by another person, except in case of honest concurrent use or of other special circumstances section 10 (2).

The proprietor of a registered trade mark has power to assign the mark, and may assign it whether in connection with the goodwill of the business or not. A registered proprietor may also assign an unregistered trade mark without the goodwill of the business along with a registered trade mark under certain circumstances. Any assignment made without the goodwill of the business must be advertised as directed by the Registrar.

A person other than the proprietor of a mark may be registered as a registered user, on application being made both by the proprietor and such person to the Registrar in the prescribed manner, accompanied by particulars relating to their relationship, the control of the one over the other, and other facts relevant to the "permitted" use. The registered user may under certain circumstances file an action for infringement in his own name as if he were the proprietor, but cannot assign or transmit the mark.

Any person aggrieved by the presence of a mark or entry on the Register may apply in the prescribed manner to the Registrar or to a High Court for rectification of the Register. The registered proprietor may apply to the Registrar for correction or cancellation of any entry in the Register, relating to his trade mark. He may also apply for alteration of the registered mark in any manner not substantially affecting its identity.

With effect from the 1st January, 1947, it will be an offence to describe a trade mark as registered when it is not so registered. The use of the word 'Registered', however, is permissible if it is clearly indicated that the reference is to registration of the mark under the law of a country outside British India or if the word is used solely in relation to goods to be exported to a foreign country where the mark is registered. Declaration of ownership of a trade mark under the Indian Registration Act of 1908 is not equivalent to registration under the Trade Marks Act, 1940, and the use of the word "registered" to signify registration of declaration of ownership would therefore be an offence with effect from the aforesaid date. The use of Royal Arms, Heraldic devices, and State emblems without due authority may be restrained by injunction from the Registrar or at the suit of any other person who is duly authorised to use such Arms, etc., but the rights to their use acquired before the coming into force of the Act, are not affected.

All appeals from the decisions of the Registrar lie to the High Court.

There are also special provisions for registration of textile trade marks and for the constitution of an Advisory Committee to advise the Registrar with respect to usages of the textile trade.

The criminal law relating to the registration of trade marks is contained in the Merchandise Marks Act (IV of 1889), which has recently been amended. Section 3 of this Act enacts sections 478—489 of Chapter XVIII of the Indian Penal Code.

ABSORPTION OF GOLD (both coin and bullion) IN INDIA

(In lakhs of Rupees.)

(Figures after 1938-39 are not available as publication of these Statistics has been suspended for the duration of the war)

Total Miscellaneous Premium Income ..	·94 ,,	1·04 ,,	1·37 ,,	1·47 ,,

There was considerable expansion of insurance business in India during the decade preceding the War. This is shown by the fact that the total business remaining in force with Indian life offices which, at the end of the year 1929 was Rs. 82,00,00,000 had, by the end of 1938, grown to Rs. 219,00,00,000, or an average increase of Rs. 13·7 crores yearly.

The War years saw new business written by Indian Companies decline in 1939 to Rs. 42·5 crores against Rs. 43·3 crores in 1938. There was a further sharp drop in the year 1940 to Rs. 32·3 crores. In 1941 new business showed an improvement to Rs. 34·1 and in 1942 to Rs. 36·4 crores. In 1943 there was a very substantial improvement to Rs. 62·9 crores, while in 1944 new life business passed the 100 crore mark attaining a level of 451,000 policies insuring Rs. 106·20 crores, a record figure.

There is however enormous leeway to be made up in life insurance in India. This will be evident if it is realised that as against per capita insurance in India of about only Rs. 10, the per capita insurance in the U.S.A. is nearly 1,000 dollars and in Canada it is 700 dollars. These two countries with only 7 per cent of the world's population, possess as much as 75 per cent of the world's life insurance. The rapid strides insurance has been taking in the U.S.A since the close of the world War I will be evident from these figures :—The average of life insurance per family shot up to 4,300 dollars in 1943 from 1,400 dollars in 1918.

When industrialisation takes place and the economic condition of the masses improves, life insurance in India will have to take enormous forward strides. The above figures pertaining to U.S.A., if applied to a country of nearly three times its population, even if only partly realized, will indicate the enormous work that lies before insurers in this country, particularly in the field of life insurance.

DISTRIBUTION OF COMPANIES.

The total number of insurers registered under the Insurance Act, 1938, up to 30th September 1945 was 330 of which 234 Insurers were Indian insurers and 96 were non-Indian insurers.

Of the 234 Indian Insurers 89 had their head offices in the Bombay Presidency, 58 in the Bengal Presidency, 37 in the Madras Presidency, 17 in the Punjab, 14 in Delhi Province, 8 in the United Provinces, 4 in the Central Provinces, 3 in Sind, 2 in Bihar and 1 each in Assam and Ajmer-Merwara.

Of the 96 non-Indian insurers 65 (including 3 insurers holding standing contracts with Lloyds) were constituted in the United Kingdom, 21 in the British Dominions and Colonies, 6 in the United States of America, 3 in Switzerland and 1 in Java.

Most of the Indian Insurers carry on life insurance business only. They are 151 in number, and of the remaining 83 Indian insurers, 47 carry on life business along with other insurance business, and 36 carry on insurance business other than life only. Of the Indian insurers 41 are either Mutual Insurance Companies or Co-operative Insurance Societies. Further there are a few pension funds, mostly connected with Government services, and the Postal Insurance Fund which are exempt from the operation of the Insurance Act.

As regards non-Indian insurers, most of them carry on insurance business other than life. Out of the total number of 96 non-Indian insurers, 81 carry on insurance business other than life, 4 carry on life business only, and 11 carry on life business along with other insurance business.

LIFE INSURANCE BUSINESS.

The total net new life insurance business effected in India during the year 1944 amounted to 451,000 policies insuring a sum of Rs. 106·2 crores and having an annual renewal premium of Rs. 5·74 crores, of which the new business done by Indian insurers amounted to 4,32,000 policies insuring a sum of Rs. 95·2 crores and having a yearly renewal premium income of Rs. 5·12 crores. The new life business effected by Non-Indian insurers amounted to 19,000 policies insuring a sum of Rs. 11 crores and having a yearly renewal premium income of ·62 crores.

The average sum insured per policy under the new policies issued in India by Indian insurers was Rs. 2,206 and under those issued by non-Indian insurers Rs. 5,874.

The total net life insurance business effected in India and remaining in force at the end of 1944 amounted to 2,127,000 policies insuring a total sum of Rs. 443·13 crores including bonus additions and having an annual premium income of Rs. 22·43 crores. Of this the share of Indian insurers is represented by 1,940,000 policies insuring a sum of Rs. 366·15 crores and having an annual premium income of Rs. 18·10 crores. The share of non-Indian insurers is represented by 187,000 policies insuring a sum of Rs. 76·98 crores and having an annual premium income of Rs. 4·33 crores.

The following table shows the New Sums Insured by Indian Life Offices, the Average Sum Insured Per Policy and the Total Sums Insured in Force at the end of the year:

Year.	New Sums Insured.		Total Sums Insured in Force.
	Sum insured (in crores).	Average sum insured per policy.	Sum insured including bonus additions (in crores).
	Rs.	Rs.	Rs.
1930	16·50	1,518	88·66
1931	17·76	1,786	98·02
1932	19·66	1,697	105·02
1933	24·83	1,573	118·77
1934	28·92	1,547	136·65
1935	32·81	1,565	151·63
1936	37·80	1,532	174·67
1937	41·74	1,520	196·74
1938	46·68	1,498	218·86
1939	45·96	1,511	232·42
1940	35·23	1,685	243·91
1941	36·68	1,841	256·43
1942	37·89	2,193	266·60
1943	65·24	2,258	310·95
1944	95·20	2,206	366·15

ANNUITY BUSINESS.

The total new annuity business effected during the year 1944 was for the amount of Rs. 9,46,000 per annum, of which the share of Indian insurers was Rs. 4,09,000 per annum. The total annuity business remaining in force at the end of the year was the amount of Rs. 42,61,000 per annum, of which the amount payable by Indian insurers was Rs. 21,84,000 per annum, and by non-Indian insurers Rs. 20,81,000 per annum.

Some Indian Life Offices have been operating outside India also. The total new sums insured by these offices outside India in 1944 amounted to 9,200 policies insuring Rs. 3·06 crores having an annual renewal premium of Rs. 0·19 crore, and the total business remaining in force at the end of 1944 amounted to 69,000 policies insuring Rs. 18·73 crores and having an annual premium income of Rs. 0·73 crore.

The total income of Indian and non-Indian Insurers during 1944, in respect of their life insurance business amounted to Rs. 29·12 crores, while the total outgo was Rs. 17·5 crores.

The total income of Indian and non-Indian Insurers during the year 1944, in respect of their life insurance business was made up of:

(In lakhs of rupees.)

Particulars of Income	Indian Insurers.	Non-Indian Insurers.
	Rs.	Rs.
Premium..	19,31	4,59
Interest, Dividend and Rents	3,20	1,13
Other Receipts	48	41
Total ..	22,99	6,13

The total outgo of these insurers during the year in respect of the life insurance business was made up of:

(In lakhs of rupees.)

Particulars of Outgo	Indian Insurers.	Non-Indian Insurers.
	Rs.	Rs.
Claims by death ..	2,67	88
Claims by Maturity ..	3,41	1,65
Annuities	8	11
Surrender value ..	62	47
Expenses of Management	6,03	85
Depreciation and Transfer to Investment Reserves, etc... ..	16	4
Miscellaneous	7	37
Transfer to Shareholders Reserves and dividends	4	5
Total ..	13,08	4,42

The respective balances of Rs. 9,91 lakhs and Rs. 1,71 lakhs represent the increase in the Funds of the Indian and Non-Indian Insurers.

INTEREST RATE & EXPENSE RATIO.

The net rate of interest earned on the mean life insurance funds during the year 1944 by Indian Insurers was 3·68 per cent. The net rates of interest realized on mean life insurance funds by the Indian insurers in each of five years were as follows:—

Year.	1940	1941	1942	1943	1944
Rate of Interest per annum ..	4·37	4·17	3·94	3·88	3·64

The total expenses of management of Indian insurers in respect of life insurance business, expressed as a percentage of the Premium income during each of five years was as follows:—

Year.	1940	1941	1942	1943	1944
Expense Ratio ..	28·9	27·4	26·7	27·9	31·2

If the figures of half a dozen Insurers having the largest premium income are excluded, the expense ratio in the case of remaining Insurers would be as under.—

Year.	1940	1941	1942	1943	1944
Expense Ratio ..	36·0	34·3	31·3	31·4	36·1

The net rates of interest realised in India on mean life insurance funds by the Non-Indian Insurers in each of five years were as follows:—

Year.	1940	1941	1942	1943	1944
Rate of Interest per annum ..	3·66	3·63	3·50	2·79	3·35

The total expenses of management of Non-Indian Insurers in respect of Life Insurance business in India expressed as a percentage of the premium income during each of five years was as follows:—

Year.	1940	1941	1942	1943	1944
Expense Ratio ..	16·6	15·6	17·8	16·0	18·6

NON-LIFE BUSINESS.

The net Indian premium income of all Insurers under insurance business other than life insurance during 1944 was Rs. 7,39 lakhs (Rs. 7·63 lakhs in 1943) of which the Indian Insurers' share was Rs. 3,22 lakhs and that of the non-Indian Insurers Rs. 4·17 lakhs. The total amount was composed of Rs. 3,45 lakhs from Fire, Rs. 2,47 lakhs from Marine, and Rs. 1,47 lakhs from Miscellaneous Insurance business.

The Indian Insurers received Rs. 1,79 lakhs from Fire, Rs. 77 lakhs from Marine, and Rs. 66 lakhs from Miscellaneous Insurance business.

The non-Indian Insurers received Rs. 1,66 lakhs from Fire, Rs. 1,70 lakhs from Marine, and Rs. 81 lakhs from Miscellaneous Insurance business.

Some Indian Insurers who transact fire, marine or miscellaneous insurance business also operate outside India. These insurers had a net premium income of Rs. 1,18 lakhs in 1944 from business outside India.

ASSETS OF INSURERS.

The assets of all the Indian Insurers amounted to Rs. 1,22,21 lakhs on 31st December 1944 which were held invested in :—

(In lakhs of rupees.)

Particulars.	Amount.
	Rs.
Indian Government Securities ..	74,42
Securities of Indian States	81

PROVIDENT INSURANCE SOCIETIES.

When the Insurance Act, 1938 came into force there were 505 Provident Insurance Societies (Provident Insurance Societies issue policies of small values, the maximum being a Sum Assured of Rs. 500 or an Annuity of Rs. 50 inclusive of any Profit or Bonus).

A large number of societies which existed at the commencement of the Act were either unable to make the initial deposit of Rs. 5,000 or did not choose to continue their business.

Between 1st October 1944 and 30th September 1945, only two societies were newly registered under the Insurance Act and the registration of 5 were cancelled. On 30th September 1945 there were in existence 137 provident societies.

The total new business effected by the societies during the year 1944 amounted to 18,700 policies insuring a sum of Rs. 83,81,300 and annuities for Rs. 900 per annum. The premium income received during the year on these policies amounted to Rs. 3,57,000. The business in force at the end of the year amounted to 72,500 policies, insuring a total sum of Rs. 2,25,66,300 including bonuses and annuities for Rs. 21,700.

The total life insurance funds of these societies at the end of 1944 amounted to Rs. 56,50,000 showing a net increase of Rs. 1,03,000 over 1943.

The net rate of interest realized on mean life funds of the societies in the year was 4·11 per cent., and the total expenses of management expressed as a percentage of the premium income was 48.

Out of 127 societies, which had submitted their returns for the year ending 31st December 1944, 18 had renewal expense ratios, calculated in the prescribed way, in excess of 100 per cent. and 32 between 50 per cent. and 100 per cent. Further 12 societies have not yet built up any life fund. There has been no improvement in this respect in spite of repeated warning given to the Societies while examining their annual accounts year after year. Commenting on the condition of provident societies the Government Year Book states.

"There is an appreciable number of societies with less than 100 policies on their books and quite a large number with less than 1,000 policies, while only a very few have 1,000 policies or more. All those societies which have been functioning for a period of 10 years or more and yet have less than 1,000 policies on their books should realize in their own interests and those of the policyholders whom it is their desire to serve, that they have not been able to secure the confidence of the public and that therefore they should amalgamate with larger societies."

INSURANCE AGENTS.

Insurance agents constitute an important pillar of the insurance structure. The rapid increase in their number during the last few years, as indicated by the table below, naturally raises the question whether the growth has kept within healthy limits or whether the evil of overcrowding is present in this profession as well.

Year.	1942	1943	1944
Number of Agents ..	52,955	65,921	89,902

As regards Life insurance business, the Government Year Book states that even assuming that Insurers had paid the maximum first year's and renewal commission on the total new business transacted by them in 1943 and on the balance of business on their books as at 31st December 1943 respectively, the average commission per annum accruing to each agent amounted to something less than Rs. 30. Further if allowance is made for the fact that generally, and quite justifiably, Insurers pay as first year's commission a basic rate much less than 40 per cent. and work up to that limit as the size of the new business introduced by the agent increases and that some new business, particularly under staff and other special schemes, is secured without the intervention of agents and that so far as old business is concerned no renewal commission would fall to be paid when the agent is dead or no longer in service, the average figure of Rs. 30 would be significantly reduced. As this reduced figure is only an average it will be evident that there should be a large number of agents drawing commission amounting to Rs. 10 per annum and perhaps even less.

Finance.

The gradual evolution of the present financial organisation of India is in many respects a reflection of her constitutional development. In the earliest days of British rule, the Provinces, and especially the older Presidencies, were for all practical purposes independent of the central government and responsible only to the authority sitting in London. After the middle of the nineteenth century the process was reversed, and the Government of India was all-powerful, controlling the Provinces down to the smallest items of their expenditure. This centralisation reached its highest point during the long Viceroyalty of Lord Curzon, who was so jealous of his supreme authority that he sought to deprive the Presidency Governors of their right to correspond direct with the Secretary of State for India. This system was found top-heavy in the days of his successors, and a continuous process of devolution set in. In the matter of finance the measures took the form of long-term "contracts" with the Provincial Governments, and later in the assignment of definite heads of revenue to the Provincial Governments, thus removing the dual authority and responsibility which had clogged progress. A much clearer cut was made when the great reform scheme embodied in the Government of India Act of 1919 was passed. Here, for all practical reasons, Provincial finance was entirely separated from the finances of the Government of India, and with one reservation the Local Governments were made masters in their own financial houses. The reservation arose from the circumstance that the funds of the Government of India did not then permit them to do entirely without contributions from the Provinces. These contributions were fixed in the shape of definite sums, which the Provincial Governments had to find from their own resources and pay to the Government of India in cash. They varied between Province and Province, on a scale which at first sight seemed inequitable, but which had a definite logical basis. The total of these contributions was a little less than ten crores of rupees. This was admittedly a temporary expedient, to last only so long as was necessary for the Government of India to reduce its post-war expenditure and develop its revenues to the point when they would balance without drawing from the Provinces. They were an open sore, each Province claiming that it paid an undue proportion of the total contribution, and that it was starved in consequence. There was no possibility of adjusting these differences, so the contributions were reduced as fast as the finances of the Government of India permitted. They finally disappeared from the Budget in 1928-29.

But this did not end the discussion; indeed it was only the first phase. The Government of India had taken the growing heads of revenue—those which issue from taxes on income and customs. The Provinces were left with resources either almost static, like land revenue, or actually declining, as with excise where steps are being taken to reduce the consumption of alcoholic liquor in response to the strong Indian sentiment towards prohibition. At the same time the Provinces were confronted with the great growing sources of expenditure, like those on education and sanitation which bulk largely in Provincial budgets.

Federal Finance Committee.

The financial organisation was, of course, reviewed as part of the work of the Round Table Conference. A sub-committee of the Federal Structure Committee was appointed under the chairmanship of Lord Peel to examine the question of federal finance and the principles embodied in the sub-committee's report were endorsed by the parent Committee as a suitable basis. A Federal Finance Committee with Lord Eustace Percy as Chairman was appointed at the end of 1931 to subject to the test of figures, the suggested classification of revenues by the Peel Committee and to estimate the probable financial position of the Federal and of the Provincial Governments under the proposed scheme. In the course of their report the Federal Finance Committee said that the transfer to the Provinces of taxes on income though defensible in principle would leave the Centre in deficit. Therefore the Peel Committee suggested a method of transferring to each Province a percentage of the share of income-tax estimated to be attributable to it. But in view of the incomplete data on which the estimates were made, a special review was held to be necessary at the time federation is established in order to fix the initial percentages. A strict allocation on a percentage basis would still leave some Provinces in deficit and so as to right their finances the committee suggested spreading the charge over the other Provinces by giving them back less in income-tax than they were entitled to.

Regarding possible new sources of revenue, Federal or Provincial, the Federal Finance Committee reported as follows:—

Federal.

Excise on Tobacco.—The present position in regard to this tax appears to be that a substantial revenue may be expected from a system of vend licenses and fees, but that an excise duty imposed in the near future could not be relied on to yield a substantial revenue. There is general agreement that such a duty could not be imposed on the cultivtaor, and it is doubtful whether a duty on the manufactured product could be successful while manufacture continues to be so largely carried on in small establishments and even as a domestic industry. Vend licenses and fees can obviously be imposed only by the Governments of the Units, and their imposition by the Provincial Governments is now being encouraged by the Government of India.

Excise on Matches.—The imposition of an excise duty on matches is already under active consideration, and we feel justified in contemplating the existence of such a duty from the outset of federation. We are advised that the probable net yield of the tax for all-India at a reasonable rate, with due allowance for reduced consumption, would be about 3 crores, of which at least 2.50 crores would be raised in British India. (Here it may be noted that an excise duty on matches made in British India was first imposed in the 1934-35 Budget and has continued since).

Other Excises.—It is possible that other excise duties may occupy an important place in the fiscal policy of India in the future, but we do not feel warranted in relying upon the introduction of such measures in the early years of federation. (Here it may be noted that an excise duty on sugar made in India was first imposed in the 1934-35 Budget and has continued at varying rates since then.)

Monopolies.—We have examined the suggestion, made at the Round Table Conference, that federal revenues should be augmented by a few selected monopolies. From the fiscal point of view it is only in very special circumstances that a monopoly, whether of production, manufacture or sale, is to be preferred to an excise duty as a means of raising revenue. Except in so far as the proposals already noticed in regard to tobacco may be regarded as a monopoly, we can suggest no new commodity to which the monopoly method could be applied with advantage. The manufacture of arms and explosives, which has been suggested as a possible monopoly, is already subject to licence. Public utility monopolies stand on rather a different footing; but the only new federal monopoly of this kind that has been suggested to us is broadcasting, the revenue from which must be entirely problematical.

Commercial Stamps.—In the Peel Report it was observed that "There is much to be said for federalising Commercial Stamps on the lines of various proposals made in the past," but no definite recommendation was made. We have examined this suggestion, but on the whole we **cannot** recommend it, at least as an immediate measure.

In proposing that the proceeds of commercial stamps should be assigned to the Units, we have to some extent been influenced by a doubt whether the problems arising from the imposition of federal stamp duties in the States might not be disproportionate to the revenue involved. We do not, however, wish to prejudge the possibility that, as part of the general federation settlement with the States, it might be found desirable to include these duties among the sources of federal revenue. This consideration might well outweigh the reasons which have led us to recommend that commercial stamps should not be made a source of federal revenue.

Corporation Tax.—From the financial point of view, it seems clear that, if a corporation tax were imposed on companies registered in the States on the same basis as the present super-tax on companies in British India, the yield at present would be negligible.

Provincial.

Taxation of Tobacco.—We have already dealt briefly with this question and have suggested that the taxation of tobacco, otherwise than by excise on production or manufacture, should rest with the Units, but that the Federal Government should be given the right to impose a general federal excise. This distinction is, we think, justified by the fact that *ex hypothesi* the introduction of excise duties on manufacture will be difficult, if not impossible, until manufacture becomes more highly industrialised; and as that development takes place an excise levied at the factory by one Unit of the Federation would be a tax on consumers in other Units. It will be seen from our later proposals in regard to powers of taxation that the federalisation of tobacco excise would not preclude the Federal Government from assigning the proceeds to the Units, if it so desired. (Here it may be noted that a sales tax on Tobacco has since been imposed by the provinces of Bombay and Madras, in their 1939-40 Budget.)

There is, unfortunately, no material which would enable us to estimate the yield of any of these forms of taxation. The provincial taxes will take some time to mature, but eventually they may be expected to form at least a very useful additional source of provincial revenue.

Succession Duties.—Bombay is, we believe, the only Provincial Government which has attempted legislation for the imposition of succession duties, and the attempt was unsuccessful. We understand that even that Government would have preferred that legislation should have been undertaken by the Government of India. We propose elsewhere that succession duties should be classed among taxes leviable by the Federal Government for the benefit of the Units; but clearly the facts would not justify reliance on them as a source of revenue in the near future. (Here it may be noted that in 1938 the Government of India deputed a special officer, Sir Alan Lloyd, of the Central Board of Revenue, to conduct an investigation into the possibilities of instituting a system of death duties in India. The upshot of the investigation was that the Government of India decided not to proceed with the proposal to impose death duties, as most provincial Governments were opposed to it.)

Terminal Taxes.—We have been asked to weigh the issues which arise from the proposal to introduce terminal taxes generally as an additional source of revenue for the Provinces. We are not prepared to regard terminal taxes as a normal source of revenue.

Taxation of Agricultural Incomes.—We have not considered the broad issues of policy involved in the taxation of agricultural incomes, but we have considered, as we were commissioned to do, the more limited question of "the possibility of empowering individual Provinces, if they so desire, to raise, or appropriate the proceeds of a tax on agricultural incomes." In view of the close connection between this subject and land revenue, we agree that the right to impose such taxation should rest with the Provinces. For the same reason, we think that this right should be restricted to the taxation of income originating in the Province concerned. There will presumably be no difficulty in drafting into the constitution a definition of agricultural income which has so long been recognised in Indian income-tax law and practice.

We are not prepared to express a final opinion as to whether agricultural and non-agricultural income should be aggregated for the purpose of determining the right of the assessee to exemption and the rate of taxation to which he is liable on either section of his income; and we doubt whether any provision need be inserted in the

constitution on this point since we are advised that, in practice, it would scarcely be possible for either the Federal or a Provincial Government to take into consideration income not liable to taxation by it, except with the consent and co-operation of the other Government. We are aware of no reliable data for estimating the yield of such taxation.

Niemeyer Report.

A necessary prelude to the introduction of the Constitutional Reforms was an investigation of their safety in the light of the financial situation and prospects of India. The investigation was carried out by Sir Otto Niemeyer whose report was published in April 1936. The Report proposed immediate financial assistance from the beginning of provincial autonomy to certain provinces partly in the form of cash subventions, partly in the form of cancellation of the net debt incurred previous to April 1, 1936, and partly in the form of distribution to the jute growing provinces of a further 12½ per cent. of the jute tax.

Annual cash subventions are as follows: To the U. P. Rs. 25 lakhs for 5 years only, to Assam Rs. 30 lakhs, to Orissa Rs. 40 lakhs, to the N.-W. F. Province Rs. 1,00 lakhs (subject to reconsideration after 5 years), and to Sind Rs. 1,05 lakhs to be reduced by stages after 10 years.

The total approximate annual relief in lakhs aimed at by Sir Otto Niemeyer is as follows:—Bengal Rs. 75, Bihar Rs. 25, C. P. Rs. 15, Assam Rs. 45, N.-W. F. Province Rs. 110, Orissa Rs. 50, Sind Rs. 105, and U. P. Rs. 25, extra recurrent cost to the centre Rs. 192 lakhs.

Orissa is to get a further non-recurrent grant of Rs. 19 lakhs and Sind of Rs. 5 lakhs by six equal steps beginning from the sixth year from the introduction of provincial autonomy, but subject to the proviso to section 138 (2) of the Act. The Centre is to distribute the income-tax to the provinces so that finally 50 per cent. of the distributable total has been relinquished in the intermediate five years, so long as the portion of the distributable sum remaining with the Centre, together with any contribution from the Railways, aggregates 13 crores.

As regards the provincial share of the proceeds from income-tax, Sir Otto Niemeyer recommended that half of the proceeds should remain with the Centre, while the other half should be distributed among the provinces on the following percentage division:—Madras 15, Bombay 20, Bengal 20, U. P. 15, Punjab 8, Bihar 10, C. P. 5, Assam 2, N.-W. F. Province 1, Orissa 2 and Sind 2.

Sir Otto Niemeyer suggested that the Centre would not be in a position to distribute any part of income-tax proceeds for the first five years from the beginning of provincial autonomy but that it might be in a position to distribute some of the proceeds, though not necessarily the percentage allocated, within the first ten years of provincial autonomy. But this, he said, largely depended on the financial condition of the railways and their ability once again to contribute to general revenues. His remarks on this point were:—

"The position of the railways is frankly disquieting. It is not enough to contemplate that in five years' time the railways may merely cease to be in deficit. Such a result would also tend to prejudice or delay the relief which the provinces are entitled to expect.

"I believe that both the early establishment of effective co-ordination between the various modes of transport and the thorough-going overhaul of railway expenditure in itself are vital elements in the whole provincial problem."

RECENT INDIAN FINANCE.

India, in common with other countries of the world, felt the full force of the economic blizzard which began in 1930 and attained its maximum the following year. The net result from the Government of India's point of view was the introduction during 1931 of two Budgets, the ordinary Budget in the spring of the year and a supplementary Budget containing fresh taxation proposals in September.

The 1932-33 Budget.—Presenting the 1932-33 budget on March 7, 1932, the Finance Member explained that the circumstances were somewhat unusual. The supplementary budget had been introduced only six months earlier. He did not, therefore, propose to ask the House at the present stage to approve any extensions or modifications of the plan for raising revenue put forward in September 1931.

The 1933-34 Budget.—In introducing the budget, the Finance Member summarised the results for the two previous years. He estimated the general position for 1933-34 to be the same as for the current year, neither better nor worse, and in particular that India would be able to maintain the same purchasing power for commodities imported from abroad.

The 1934-35 Budget.—In order to provide an even balance for 1934-35 it was necessary to find means of improving the position to the extent of Rs. 1,53 lakhs. The Finance Member announced the imposition of an excise duty on sugar, a reduction in the silver import duty by 2½ annas to 5 annas per ounce and the abolition of the export duty on raw hides. Announcing that the Government intended to hand over half the jute export duty to the jute producing Provinces, the Finance Member said that the Government of India would recoup their losses by imposing an excise duty on matches.

The 1935-36 Budget.—This Budget was expected to show a surplus of Rs. 1,50 lakhs available for tax reduction. The Silver duty was reduced to 2 annas an ounce. The export duty on raw skins was abolished. The remaining surplus of Rs. 1,42 lakhs was disposed of, first, in restoring the emergency cuts in pay, and second, in taking off some of the surcharge on income-tax. This surcharge was reduced by one-third; the cost was Rs. 1,36 lakhs, leaving a nominal surplus of Rs. 6 lakhs.

The 1936-37 Budget.—The surplus for 1936-37 was estimated at Rs. 2,05 lakhs, and this was

disposed of in two ways. First, the remaining surcharge on income-tax and super-tax was cut by a half, leaving it at one-twelfth of the original figure; further, income-tax on incomes between Rs. 1,000 and Rs. 2,000 a year was abolished. Second, a postal concession was made by increasing the weight of the one-anna letter from half to one tola, and adopting a scale of an additional half-anna for every additional tola. The effect of these changes was to reduce the surplus to Rs. 7 lakhs.

The 1937-38 Budget.—The prospective deficit for 1937-38 (due to trade depression and consequent smaller receipts from customs and income-tax) was Rs. 1,58 lakhs, which would have been Rs. 3,42 lakhs but for an amount available in the Revenue Reserve Fund. The deficit was met by a series of imposts: import and excise duties on silver were raised from two annas to three annas an ounce, while the sugar duties were raised on a graduated scale. Changes were made in the postal rates for parcels, book-patterns and samples, and the existing rates of salt duty, income-tax and super-tax were continued.

The 1938-39 Budget.—This Budget was generally regarded as preserving the *status quo*, since no changes in the taxation system were introduced and a surplus of Rs. 9 lakhs was anticipated. But there were special features in regard to Defence, for which an extra Rs. 80 lakhs was to be expended. A further feature of the 1938-39 Budget was the financing of Provincial Autonomy in its inaugural stages. While the separation of Burma caused a loss of Rs.2,50 lakhs, payments to the Provinces under the Niemeyer Award amounted to Rs.1,98 lakhs. To start the Provinces in a sound state the following steps were taken: their existing debts to the Centre were partly cancelled and partly consolidated at a lower rate of interest; additional grants-in-aid were made to deficit provinces; a larger share of the jute excise duty was disbursed and with the improvement in railway revenues, a start was made on the distribution of income-tax receipts to the provinces.

The 1939-40 Budget.—On the basis of the maintenance of existing taxation and the adoption of the new system of income-tax embodied in the Income-Tax (Amendment) Act of 1939 and the "slab system" of assessment (for details of which see under "Income-Tax"), the position was as follows: Estimated Revenue, Rs. 82,15 lakhs; Estimated Expenditure, Rs. 82,65 lakhs; Estimated Deficit, Rs. 50 lakhs. Both revenue and expenditure were down on the previous year, the former because of trade recession which would result in lower receipts from customs, and the latter because of economies under interest charges and Defence.

To meet the prospective deficit the Finance Member proposed an increase of 100 per cent. in the tariff duty on imported raw cotton, from six pies per lb. to one anna per lb. This was estimated to yield Rs. 55 lakhs, thus converting the deficit into a small estimated surplus of Rs. 5 lakhs. Other changes embodied in the Budget were the new rates of income-tax and super-tax drawn up on the "slab system" and modifications in the excise duty on sugar, estimated to yield an extra Rs.51 lakhs.

The 1940-41 Budget.—A fortunate surplus for the previous financial year (1939-40) of Rs. 91 lakhs, but the necessity of finding new revenue to meet a prospective deficit of Rs. 7,16 lakhs in 1940-41 were the basic features of India's first War Budget presented by the Finance Member Sir Jeremy Raisman. By applying the surplus of Rs. 91 lakhs towards the coming year, the prospective deficit was reduced to Rs. 6,25 lakhs.

This short fall Sir Jeremy Raisman proposed to meet in three ways. The first was an Excess Profits Tax, to provide for an impost of 50 per cent. on all abnormal war profits, above a taxable minimum of Rs. 30,000, earned since September 1, 1939, these excess profits to be calculated on the basis of a standard year which might be, at the assessee's option, any financial year between 1935-36 and 1939-40. This was estimated to produce a net accession to revenue of Rs. 3,00 lakhs. The second means was a further increase of two annas per gallon in the duty on motor spirit (petrol), estimated to yield Rs. 1,40 lakhs, while the third impost was an increase from two rupees to three rupees in the excise duty on refined sugar with corresponding increase in the import duty, calculated to yield Rs. 1,90 lakhs. The three changes together were expected to produce Rs. 6,30 lakhs and to convert the prospective deficit of Rs. 6,25 lakhs in to a small surplus of Rs. 5 lakhs.

On the expenditure side, the main feature was naturally the Defence Budget, which provided for an increase of Rs. 5,11 lakhs on the previous year's estimate and stood at the sum of Rs. 49,29, lakhs. Under the settlement reached with His Majesty's Government on the division of defence obligations, India was to be liable only for the normal peace time cost of the Army in India, adjusted in relation to the rise in prices, plus the cost of India's own immediate war measures, plus a lump sum of Rs.1,00 lakhs towards the maintenance of external defence troops overseas. In terms of figures it worked out as follows: (1) Normal peace Defence Budget, Rs. 36,77 lakhs; (2) effect of rise of prices on (1), Rs. 25 lakhs; (3) Indian war measures, Rs. 3,86 lakhs; (4) Non-effective charges, Rs. 8,41 lakhs; Total Rs. 49,29 lakhs.

The 1940-41 Supplementary Budget.—The rapidly mounting expenditure on defence coupled with the dislocation of trade caused by the war and consequent loss of Customs revenue, led to a deterioration in India's financial position which impelled the Finance Member to introduce a Supplementary Budget in November 1940. He had to meet an increase of at least Rs.14¼ crores in defence and nearly Rs.7 crores in Civil expenditure, coupled with a drop of Rs.3 crores in revenue. He therefore supplemented the Finance Act, 1940, by two measures of fresh taxation designed to bring in Rs.6 crores in a full year, leaving the position to be fully surveyed in the following February. The first measure was a 25 per cent. surcharge on all taxes on income including Super-tax and Corporation Tax. The second measure was an increase in postal rates, telegram and telephone charges, designed to bring in Rs.1 crore in a full year.

The 1941-42 Budget.—Presenting the Budget for 1941-42, the Finance Member said that while Government's expenditure was expected to rise by Rs.15 crores to a total of Rs.1,26 crores, its

revenue was expected to rise by Rs.3 crores to a total of Rs.1,06 crores, leaving a prospective deficit of Rs.20 crores. One-third of this was proposed to be met by fresh taxation and the remainder from Defence Loans. For the previous year 1940-41, instead of the deficit being Rs.13 crores as estimated in November, the deficit was expected to be no more than Rs.8 crores; this was due to an increased contribution from the railways and a surplus over from the year before.

The additional taxation intended to raise a further Rs.6,61 lakhs in order to meet a share of the cost of India's war measures took the following forms: The Excess Profits Tax was raised from 50 per cent. to 66⅔ per cent. to yield Rs.250 lakhs, and the Central surcharge on Income-tax and Super-tax from 25 per cent. to 33⅓ per cent. to produce a further Rs. 190 lakhs. Other proposals were to double the match duty, to raise the import duty on artificial silk yarn and thread from 3 annas to 5 annas per pound, and to levy an excise duty on pneumatic tyres and tubes, to yield together Rs. 221 lakhs.

Defence.—The main purpose of these fresh imposts was to strengthen all arms of India's Defence Services, and for this a total expenditure of Rs.84 crores was envisaged in 1941-42. Rs.35 crores of this was for India's own war measures, while His Majesty's Government in Britain were paying separately for all supplies and services rendered to them by India and were also providing free of charge much of the equipment needed for the modernisation of the Army in India. The strength of India's armed forces, already well over half a million, was to be further expanded. Civil expenditure had increased by Rs.2,61 lakhs, mainly on account of schemes connected with the war. The Supply Department's expenditure on placing orders for Indian products for allied Governments, the value of which had already exceeded Rs.82 crores, was expected to be Rs.58 lakhs.

The 1942-43 Budget.—Presenting the Budget for 1942-43 Sir Jeremy Raisman, the Finance Member, disclosed a revenue deficit of Rs. 17 crores for the year and a prospective deficit on the prevailing basis of taxation of Rs. 47 crores for the next year. The revised estimate on defence in 1941-42 was placed at Rs. 102 crores; in 1942-43 it was estimated at Rs. 133 crores. The amount of expenditure on defence services and supplies which the Government of India expect to recover from His Majesty's Government under the operation of the financial settlement would exceed Rs. 400 crores in 1942-43.

Sir Jeremy Raisman proposed to meet the deficit by raising loans to the tune of Rs. 35 crores and leaving taxation to cover the balance of Rs. 12 crores. The new taxation proposals included: (1) the surcharge on income-tax and super-tax to be increased from 33⅓% to roughly 50%; (2) an all-round customs surcharge of 20% to be levied on existing import tariff except on raw cotton, petrol and salt; (3) petrol tax to be increased by 25% and post and telegraph rates also to be increased. The share of the provinces in the income-tax was placed at Rs. 7,39 lakhs in the current year and Rs. 8,37 lakhs in the following year. Sir Jeremy estimated the total additional revenue from fresh taxation at Rs. 12 crores, leaving a deficit of Rs. 35 crores to be covered by the borrowing programme.

Defence.—Of the gross expenditure on defence likely to be brought to account in India's books during 1942-43, Sir Jeremy revealed that nearly three-quarters, totalling Rs. 400 crores, would be met by Whitehall. In addition His Majesty's Government undertook to supply India with large quantities of aeroplanes, vehicles, guns and other equipment without charge; these free supplies already made or expected to be received by the end of the following financial year total roughly an additional Rs. 60 crores.

The 1943-44 Budget.—Presenting the Budget for 1943-44, Sir Jeremy Raisman stated that the total revenue estimates for the coming year amounted to Rs. 199.3 crores, as compared with Rs. 178.76 crores in the revised estimates for the current year. The total expenditure was expected to be Rs. 259.59 crores, leaving a prospective deficit of Rs. 60.29 crores. The deficiency was to be made good by Rs. 20.1 crores of new taxation and the remainder totalling Rs. 40.19 crores by borrowing. He estimated that increases in income-tax, super-tax and corporation tax would yield Rs. 7 crores of new revenue. As a result of the budget proposals a 66 per cent. income-tax surcharge would be applied uniformly over all levels of income.

Defence Expenditure.—Reviewing defence expenditure, Sir Jeremy Raisman pointed out that the revised estimates for the current year had risen from Rs. 133 crores mentioned in the budget last year to Rs. 189.75 crores. For the coming year, however, this expenditure is expected to fall to Rs. 182.81 crores. The decrease is due to the fact that during the coming year the land forces in India will have reached a stage which can be regarded as reasonably adequate to meet all the demands likely to be made upon them.

The 1944-45 Budget.—Presenting the Budget on February 29, 1944, the Hon. Sir Jeremy Raisman, Finance Member, placed the total revenue estimates at Rs. 284·97 crores as compared with Rs. 254 50 crores in the revised estimates for 1943-44. The estimates for expenditure amounted to Rs. 363·18 crores comprising of Rs. 86·57 crores under civil estimates and Rs. 276·61 crores under Defence Services. Thus, a revenue deficit of Rs. 78·21 crores was foreshadowed. He proposed to meet this deficit by measures of ordinary taxation and compulsory deposit. The most important of the latter was a provision for advance payments of tax on income from which tax was not deducted at source. The compulsory deposit of one-fifth of the excess profits tax was increased to 19/64 of the tax with the object of immobilising the whole of the excess profits. He hoped to reduce the prospective revenue deficit by Rs. 23½ crores by raising the scale of income-tax which was expected to bring in an additional revenue of Rs. 8½ crores and by getting Rs. 1 crore from the increased surcharge on tobacco and spirits under customs duties, Rs. 10 crores from the increased excise duty on tobacco and Rs. 4 crores by bringing betelnuts, coffee and tea under the Central Excise Tariff. The total effect of new measures of taxation and compulsory deposits would approximate to Rs. 100 crores.

Defence Expenditure.—Reviewing the defence expenditure, the Finance Member stated that the revised estimates for 1943-44 amounted to Rs. 262·64 crores and Rs. 38·30 crores under the revenue and capital heads respectively as compared with the budget estimates of Rs. 182·81 crores and Rs. 16·85 crores for the respective items. He estimated that the defence expenditure for 1944-45 would amount to Rs. 276·61 crores and Rs. 24·60 crores under the revenue and capital heads respectively.

Excess Profits Tax.—The budget proposals for 1944-45 took the most important step of immobilising as deposits the whole of the excess profits remaining after the excess profits tax has been paid on them and income-tax and super-tax has been paid on the balance. This compulsory deposit has not hitherto been payable in connection with provisional E. P. T. assessments made under the provisions of the Ordinance, but now it has to be made. The level of E. P. T. remains unchanged at 66⅔ per cent. and there is no change in the proportion of the tax, namely one-tenth, which is to be repaid to the assessee.

The system of compulsory deposit, which was raised this year from one-fifth of the tax to 19/64 of the tax, was first prescribed in Ordinance No. XVI of 1943. In announcing it, the Finance Member told the press conference on May 17, 1943 that the assessee would be able to withdraw the compulsory deposit within 12 months of the termination of hostilities or two years from the payment of the deposit whichever is later. On that money he would get two per cent. interest. In addition, he would be entitled to 6⅔ per cent. which Government were putting into the fund for his benefit.

The 1945-46 Budget.—In his budget speech, the Finance Member, Sir Jeremy Raisman, stated that the actual deficit for 1943-44 turned out to be Rs.189.79 crores as against the revised estimate of deficit of Rs.92.43 crores due to an excess of Rs.96 crores in defence expenditure. The total revenue estimates for 1945-46 were placed at Rs.353.74 crores compared with Rs.356.88 crores in the revised estimates for 1944-45, the defence estimates amounted to Rs.394.23 crores and Rs.17.76 crores for the revenue and capital heads respectively as against Rs.397.23 crores and Rs.59.41 crores respectively in the revised estimates for 1944-45. The expenditure on civil estimates was estimated at Rs.123.40 crores, showing an increase of Rs.8 crores over the revised estimates. As a result, a prospective revenue deficit of Rs.163.89 crores was foreshadowed.

He hoped to get an additional revenue of Rs.8.60 crores by raising the tobacco duty, by increasing the rate for postal parcels from as. 6 for the first 40 tolas and as. 4 for every 40 tolas thereafter to a uniform as. 6 for every 40 tolas, by raising the surcharge on telephone rentals from one-third to one-half and that on trunk call fees from 20 to 40 per cent. and by increasing the surcharge on ordinary and express telegrams by one anna and two annas respectively. Thus the prospective deficit would be reduced to Rs.155.29 crores to be met by borrowing. A feature of the budget was the recognition of the practice prevailing abroad of differentiating between earned and unearned incomes.

The 1946-47 Budget.—The first peace-time budget has for its background the possible effects on the country's economy of a steep fall in wartime expenditure and income levels, as well as the continued need closely to watch and control the position arising from the wartime legacy of inflation. The budget, therefore, lays stress on subordinating fiscal policies to the broader aims of national economy with revenue receipts at Rs. 311·65 crores and total expenditure at Rs. 355·71 crores, the deficit envisaged is of the order of Rs. 44·06 crores, after taking into account new taxation measures and the transfer to revenue of the balance in the two war Risks Insurance funds amounting to Rs. 26·10 crores.

The new taxation proposals for 1946-47 offer a number of substantial concessions to industry and to persons of moderate means. Such concessions to industry include (1) the complete abolition of the Excess Profits Tax after the 31st March 1946, (2) the grant of special initial depreciation allowances of 10 per cent. on new buildings and 20 per cent. on new plant and machinery as well as allowances for expenditure on scientific research for purposes of Income Tax; the scope of the obsolescence allowance will be widened so as to include the loss of an asset by destruction or demolition, and also extended to buildings, (3) the relief from Customs duty on raw materials imported for industry and reduction of rates on such imported plant and machinery as are now dutiable, (4) a net reduction of 1¼ annas in the present total rate of Super Tax and Income Tax (payable by a company) from 7¾ annas to 6 annas, as a result of the lowering of Super Tax by 2 annas and the raising of the Income Tax by ¼ anna and (5) the exemption from Income Tax for two years in the case of buildings for residential purposes and an initial depreciation allowance of 15 per cent. for buildings used as business premises. In addition, the total rate on life insurance companies has been reduced from 5 annas 3 pies to 5 annas. Other concessions include (1) the reduction of the rate on the second slab of income of Rs. 3,500 from 15 pies to 12 pies and the rate on the third slab of Rs. 5,000 from 2 annas 1 pie to 2 annas, and (2) the raising of the earned income allowance from one-tenth of the earned income, (subject to a maximum of Rs. 2,000) to one fifth (subject to a maximum of Rs. 4,000). Similarly in the Super Tax range there will be differential treatment in favour of earned income at the rate of 1 anna in the rupee between Rs. 25,000 and Rs. 2 lakhs and of ¼ anna between Rs. 2 lakhs and Rs. 5 lakhs.

Under indirect taxation, the duty on kerosene oil has been reduced by nine pies from 4 annas 6 pies to 3 annas 9 pies per imperial gallons, and on motor spirit from 15 annas to 12 annas per imperial gallons, the latter as an incentive to increased motor transport.

The following further concessions estimated to cost Rs. 5·12 crores to the Central Exchequer were announced by the Finance Member during the course of discussion on the Budget: (1) reduction in the duty on kerosene by an anna and half instead of only 9 pies as was originally proposed, (2) reduction in the excise duty on betelnuts from two annas to one anna per lb., (3) reduction by 6 pies of the increase in the

customs duty on betelnuts originally proposed in the budget and (4) reduction in the duty on cinematographs film (not exposed) from 6 pies per linear foot as originally proposed to 3 pies. Other concessions announced were a reduction in the price of a match-box from 9 pies to 6 pies and a similar reduction in the price of a post-card from 9 pies to 6 pies to come into force respectively from August 1 and July 1, 1946.

Reductions in expenditure arising from the cuts by the Legislative Assembly amount to Rs. 93·34 lakhs on revenue account and Rs. 3·46 crores under capital disbursements. In consequence of changes in taxation and expenditure, the expected deficit of Rs. 44·06 crores for 1946-47 will move up by Rs. 4·19 crores to Rs. 48·25 crores, with revenue at Rs. 341·87 crores and expenditure at Rs. 390·12 crores.

An innovation in the budget is the presentation of a Capital Budget separately from the Revenue Budget. The advantage is that it enables a person to focus attention on the productive and dead-weight debts of the Government and their relative disbursements on productive and non-productive schemes.

Presenting the budget, which was his first and last one, Sir Archibald Rowlands stated that the drop in defence expenditure on account of His Majesty's Government and the Government of India combined would be of the order of Rs. 600 crores in 1946-47 as compared with the budget for the previous year. He, therefore, indicated the measures for public expenditure and the establishment of an Industrial Finance Corporation in order to ensure the availability of medium and long term finance to industrial enterprise in India. Another matter under consideration was in respect of the planning of investment, both public and private, with a view to securing the fullest and most advantageous utilisation of the economic resources of the country in the interest of planned capital development.

Repatriation of Sterling Debt.

The year 1943-44 saw the final stage of the programme of repatriation of India's sterling debt. Of the total amount of £323 million repatriated since 1937-38 at the purchase value of £321 million (or Rs. 429 crores), stocks of the value of Rs. 155·7 crores or a little over one-third have been cancelled, while rupee counterparts have been issued in respect of the balance of Rs. 273·6 crores. During the year 1945-46 stray lots of the face value of £0·28 million were repatriated at a cost of Rs. 37 lakhs, the rupee counterparts created being only Rs. 1 lakh. The outstanding debt at the end of 1945-46 was only Rs. 37·46 crores as compared with Rs. 469·10 crores at the end of 1938-39 and represented mostly repatriated stocks not surrendered earlier.

Sterling Balances.

The Finance Member estimated that the total sterling holdings of the Reserve Bank on March 31, 1946, would be of the order of £1,330 million. Additions to this total on account of His Majesty's defence expenditure would be quite small next year. On the contrary, he thought, there was a possibility of even reducing them through Britain's increased exports. The negotiations for the transfer of these balances would be held after the U.S. Congress had ratified the U.S.-U.K. Loan Agreement; but he assured the Legislature that no grounds existed for the fears that "India's ability to obtain, in the immediate future, capital equipment from abroad will be prejudiced by the fact that a large proportion of her foreign exchange reserves are in the form of Sterling."

Empire Dollar Pool.

"The Dollar Pool", he said, "is in effect the modification, imposed by war conditions, of the sterling area arrangement which has existed for a century. When war broke out, an arrangement was entered into among them whereby earnings of dollars and other hard currencies would be pooled and the essential requirements of the several countries, in terms of these currencies, would be met from the Pool. India had free access to the Pool to finance her essential current imports from hard currency countries. Moreover, a sum of Rs. 20 million dollars was specifically earmarked to pay for capital equipment required by India from non-sterling countries for her post-war development. Under Article 7 of the Anglo-American Loan Agreement, the U.K. are committed to making arrangements which will involve the dissolution of the Dollar Pool within one year of the effective date of that Agreement."

As regards the accounts, he stated: "Between September 1939 and March 1945 India earned hard currency assets to the amount of Rs. 364·33 crores. Excluding the 20 million dollar special fund, India has utilized hard currency assets to the amount of Rs. 265·02 crores. To this latter figure should be added the net import of gold from the United Kingdom during the same period. Computed at the world (not the Indian) price, the value of this gold is Rs. 50,08 crores. The balance in India's favour is, therefore, Rs. 49·23 crores as at March of last year."

Post-War Planning.

The Central Government announced during the year their policies and plans of development in respect of a number of subjects. According to a statement issued on April 21, 1945, the fundamental objectives of Government's policy in regard to the industrial development of the country were (1) to increase the national wealth by the maximum exploitation of the country's resources (additional wealth to be distributed in a socially equitable manner), (2) to make the country better prepared for defence and (3) to promote a high and stable level of employment. To attain these objectives, Government propose (1) to transfer from provincial jurisdiction to the Centre 20 industries and (2) to nationalise basic industries of national importance.

Government further propose to assist industries by means such as making loans or subscribing a part of the capital or guaranteeing a minimum dividend and buying, as far as possible, Indian products in preference to others. Government have also appointed an Interim Tariff Board, while they have now under preparation a plan for establishing an Industrial Finance Corporation for ensuring the availability of medium and long-term credit to industrial enterprises. The planning of investment, both public and private, with a view to securing the

maximum utilisation of the economic resources of the country is also under Government's active consideration.

The Industrial Research Planning Committee has recommended the creation of a Central Research Orgnisation to be called the National Research Council. Recommendations have also been made for the immediate adoption by the Council of a five-year plan which includes the establishment of a national chemical laboratory, a national physical laboratory and a network of laboratories in all provinces and major States.

The Labour Department has prepared a housing scheme for industrial workers which envisages the construction of two million houses in 10 years, estimated to cost Rs. 40 crores within the first two years. The scheme provides for Central subsidies up to 12½ per cent. to local bodies and industrial and other employers, provided that the provincial government concerned will make an equivalent grant. The Central Government have also forwarded to provincial Governments a unified scheme of social security covering health insurance, maternity benefits and compensation for accidents. The scheme covers all perennial factories and is designed to remove some of the defects in the present working of the Workmen's Compensation Act and the Maternity Benefits Act.

The Posts and Telegraphs Department has prepared a 15-year plan which envisages the establishment of one telegraph office for every town with a population of 5,000 and a quicker and more efficient telegraph service throughout the country. The All-India Health Survey and Public Health Committee issued a report in February 1946 which envisages a ten-year plan of public health at an estimated cost of Rs. 1,000 crores. The plan aims at providing one doctor for every 2,000 citizens and, when brought into full operation, the country is expected to have in all 185,000 doctors as against 47,500 at present.

As regards the financial implications of the post-war planning, the provincial five-year plans are estimated to involve an expenditure of the order of Rs. 900 crores, a part of which might extend into the second five-year period. In addition to these, Central plans in respect of railways, roads, civil aviation etc. will also add up to a considerable figure. As an incentive to urgent action and to check possible deflationary effects of the estimated reduction of Rs. 600 crores in defence expenditure, the Central Government will assist the provincial governments with funds for approved schemes, particularly those which may provide a high proportion of employment relative to their cost or of a productive or economic importance and calculated to increase the national income. In the case of self-financing schemes the assistance will take the form of loans, while for others advance grants will be made to cover the full cost, which will not be recoverable but will be adjusted against whatever grants the Central Government might allot to the provinces. A lump sum provision of Rs. 35 crores has been made in the budget estimates for 1946-47 for such advance payments and of Rs. 15 crores for loans to provinces for productive development works.

The Central Government have made provision for an expenditure of Rs. 49 crores on their own schemes, for developmental purposes, of which Rs. 22 crores are in respect of railways.

Estate Duty.

With a view to assisting provincial governments in implementing their post-war plans, a bill to levy an estate duty on non-agricultural property was introduced in the Central Assembly on March 21, 1946. Modelled on the Estate Duty Act of the United Kingdom, it seeks to charge a duty at graduated rates according to the principal value of all property passing on the death of any person whether by disposition of the deceased or by any settlement made by others. Immoveable and movable property not exceeding Rs. 1 lakh in value and (with certain minor exceptions) property situated outside British India are exempted. The duty is leviable on non-agricultural property, the provinces being free to levy a similar duty in respect of agricultural property. The basis for distribution of the proceeds as between the Central and the provinces will be decided in consultation with the latter. Separate legislation will be undertaken at a later stage to fix the rates of duty, which are expected to vary from time to time.

Public Debt.

Excluding the liability for the British War Loan, which remains suspended, the total regular interest-bearing debt on March 31, 1939 amounted to Rs. 1,158 crores, comprising Sterling loan and Railway Annuities Rs. 445 crores, Rupee loans and Treasury Bills Rs. 484 crores and Unfunded debt (i.e., Cash Certificates, Savings Bank Deposits and Provident Funds) Rs. 229 crores. It is estimated that by the end of 1945-46 this would have risen to Rs. 1,950 crores comprising Sterling loans and Railway Annuities Rs. 39 crores, Rupee loans and Treasury bills Rs. 1,576 crores and Unfunded debt Rs. 335 crores. The corresponding figures on March 31, 1947 are expected to be Rs. 2,216 crores, Rs. 35 crores, Rs. 1,775 crores and Rs. 406 crores respectively.

The capital portion of the Railway Annuities now appears under public debt only for accounting purposes and is offset by a corresponding deposit with His Majesty's Government. The net regular debt will, therefore, be Rs.1,924 crores on March 31, 1946 and Rs. 2,194 crores on March 31, 1947, and Rs. 1,904 crores on March 31, 1946. In addition, however, Government are liable to repay the balances of Depreciation and Reserve Funds of Railways, Posts and Telegraphs, etc. and certain other deposits which, it is expected, will have grown from Rs. 27 crores on March 31, 1939 to Rs. 280 crores on March 31, 1946 but reduced to Rs. 271 crores on March 31, 1947. In other words, as compared with the last pre-war figure of Rs.1,185 crores, the total interest-bearing obligations will have increased by Rs. 1,025 crores by the end of the current year and by Rs. 1,280 crores by the end of the next year.

A large part of this increase is represented in Governments' cash balances and investments which are expected to amount to Rs. 597 crores on March 31, 1947 as compared with Rs. 30 crores on March 31, 1939. The net increase of

Rs. 713 crores will have been utilised towards meeting the revenue deficits and the capital expenditure. Actually the amounts required on these accounts total Rs. 991 crores, as it is expected that during the eight years ending March 31, 1947, the cumulative revenue deficits excluding the provision for debt redemption (Rs. 26 crores) will have amounted to Rs. 645 crores and the capital outlay to Rs. 346 crores. The balance, *viz.*, Rs. 278 crores, will be covered by the net balance resulting from the other debt head transactions such as repayment of loans by provinces, issue of rupee coins to the Reserve Bank, small coin profits, etc.

By far the greater portion of this debt of Rs. 2,465 crores is what may be compendiously termed as productive. Thus, the capital outlay on Railways upto the 31st March 1947 accounts for no less than Rs. 818 crores, on Posts and Telegraphs and other Commercial Departments Rs. 50 crores, Loans and Advances (including the debt due from Burma) Rs. 130 crores, and cash and investments Rs. 597 crores, making a total of Rs.1,597 crores. This leaves an uncovered debt of Rs.870 crores against the pre-war figure of Rs.208 crores. Even this may not be called wholly unproductive debt for the large Defence Capital outlay of Rs. 169 crores and the grant of Rs. 35 crores to provinces for development are not entirely unremunerative, and, similarly, the large capital outlay on Central property the value of which is either not shown at all in the Government accounts or is shown only as non-commercial (such as the Delhi Capital Outlay) is not without value.

General Statement of the Revenue and Expenditure.

THE LAND REVENUE.

The principle underlying the Land Revenue system in India has operated from time immemorial. It may be roughly formulated thus—the Government is the supreme landlord and the revenue derived from the land is equivalent to rent. On strict theoretical grounds, exception may be taken to this statement of the case. It serves, however, as a substantially correct description of the relation between the Government and the cultivator. The former gives protection and legal security. The later pays for it according to the value of his holding. The official term for the method by which the Land Revenue is determined is "Settlement." There are two kinds of settlements in India—Permanent and Temporary. Under the former the amount of revenue has been fixed in perpetuity, and is payable by the landlord as distinguished from the actual cultivator. The Permanent Settlement was introduced into India by Lord Cornwallis at the close of the eighteenth century. It had the effect intended of converting a number of large revenue farmers in Bengal into landlords occupying a similar status to that of landowners in Europe. The actual cultivators became the tenants of the landlords. While the latter became solely responsible for the payment of the revenue, the former lost the advantage of holding from the State. This system has prevailed in Bengal since 1795 and in the greater part of Oudh since 1859. It also obtains in certain districts of Madras. Incidentally, the Bengal system was the subject of an exhaustive examination by a Commission under the chairmanship of Sir Francis Floud in 1939-40, which produced a radical report—a minority dissenting—in favour of State purchase of land, thus challenging the Bengal system of land tenure based on the Permanent Settlement.

Elsewhere the system of Temporary Settlements is in operation. At intervals of thirty years, more or less, the land in a given district is subjected to a thorough economic survey, on the basis of the trigonometrical and topographic surveys carried out by the Survey Department of the Government of India. Each village area, wherever the Temporary Settlement is in vogue, has been carefully mapped, property-boundaries accurately delineated, and records of rights made and preserved. Under the Permanent Settlement in Bengal the occupant does not enjoy these advantages. The duty of assessing the revenue of a district is entrusted to Settlement Officers, members of the Indian Civil Service specially delegated for this work. The duties of a Settlement Officer are thus described in Strachey's *India*

(revised edition, 1911):—"He has to determine the amount of the Government demand and to make a record of all existing rights and responsibilities in the land. He has a staff of experienced subordinates, almost all of whom are natives of the country, and the settlement of the district assigned to him is a work which formerly required several years of constant work. The establishment of agricultural departments and other reforms have, however, led to much simplification of the Settlement Officer's Proceedings, and to much greater rapidity in the completion of the Settlements. All the work of the Settlement Officer is liable to the supervision of superior officers, the assessments proposed by him require the sanction of the Government before they become final in binding: and his judicial decisions may be reviewed by the Civil Courts. It is the duty of the Settlement Officer to make a record of every right which may form the subject of future dispute, whether affecting the interests of the State or of the people. The intention is to alter nothing, but to maintain and place on record that which exists."

The Two Tenures.

Under the Temporary Settlement and tenures fall into two classes—peasant-holdings and landlord-holdings, or *Ryotwari* and *Zemindari* tenures. Broadly speaking, the difference between the two in a fiscal sense is that in Ryotwari tracts the *ryot* or cultivator pays the revenue direct; in *Zemindari* tracts the landlord pays on a rental assessment. In the case of the former, however, there are two kinds of *Ryotwari* holdings—those in which each individual occupant holds directly from Government, and those in which the land is held by village communities, the heads of the village being responsible for the payment of revenue on the whole village area. This latter system prevails in the North. In Madras, Bombay, Burma and Assam, *Ryotwari* tenure is on an individual basis, and the Government enters into a separate agreement with every single occupant. The basis of assessment on all classes of holdings is now more favourable to the cultivator than it used to be. Formerly what was believed to be a fair average sum was levied on the anticipated yield of the land during the ensuing period of settlement. Now the actual yield at the time of assessment alone is considered, so that the cultivator gets the whole of the benefit of improvements in his holding subsequently brought about either by his own enterprise or by "unearned increment." The Government, however, may at a new settlement re-classify a holding so as to secure for itself a fair share in an increment that may have resulted from public works in the vicinity, such as canals and railways, or from a general enhancement of values. But the principle that improvements effected by private enterprise shall be exempt from assessment is now accepted by the Government and provided for in definite rules.

Incidence of the Revenue.

The incidence of the revenue charges varies according to the nature of the settlement, the class of tenure, and the character and circumstances of the holding. Under the Permanent Settlement in Bengal Government derive rather less than £3,000,000 from a total rental estimated at £12,000,000. Under Temporary Settlements, 50 per cent. of the rental in the case of *Zemindari* land may be regarded as virtually a maximum demand. In some parts the impost falls as low as 35 and even 25 per cent. and only rarely is the proportion of on half the rental exceeded. In regard to *Ryotwari* tracts it is impossible to give any figure that would be generally representative of the Government's share. But one-fifth of the gross produce is the extreme limit, below which the incidence of the revenue charge varies greatly. About sixty years ago, the Government of India were invited in an influentially signed memorial to fix one-fifth of the gross produce as the maximum Government demand. In reply to this memorial and other representations the Government of India (Lord Curzon being Viceroy) issued a Resolution in defence of their Land Revenue Policy. In it was stated that "under the existing practice the Government is already taking much less in revenue than it is now invited to exact" and "the average rate is everywhere on the down grade." This Resolution, together with the statements of Provincial Governments on which it was based, was published as a volume; it is still the authoritative exposition of the principles controlling the Land Revenue Policy of the Government of India. In a series of propositions claimed to be established by this Resolution the following points are noted:—(1) In *Zemindari* tracts progressive moderation is the keynote of the Government's policy, and the standard of 50 per cent. of the assets is more often departed from on the side of deficiency than excess; (2) in the same areas the State does not hesitate to interfere by legislation to protect the interests of the tenants against oppression at the hands of the landlords. (3) In *Ryotwari* tracts the policy of long-term settlements is being extended, and the proceedings in connection with new settlements simplified and cheapened; (4) local-taxation (of land) as a whole is neither immoderate nor burdensome; (5) over-assessment is not, as alleged, a general or widespread source of poverty, and it cannot fairly be regarded as a contributory cause of famine. At the same time the Government laid down as principles for future guidance—(*a*) large enhancements of revenue, when they occur, to be imposed progressively and gradually, and not *per saltum*; (*b*) greater elasticity in revenue collection, suspensions and remissions being allowed according to seasonal variations and the circumstances of the people; (*c*) a more general resort to reduction of assessments in cases of local deterioration.

Protection of the Tenants.

In regard to the second of the five propositions noted above, various Acts have been passed from time to time to protect the interests of tenants against landlords, and also to give greater security to the latter in possession of their holdings. The Oudh Tenancy Act of 1886 placed important checks on enhancement of rent and eviction; and in 1900 an Act was passed enabling a landowner to entail the whole or a portion of his estate; and to place it beyond the danger of alienation by

his heirs. The Punjab Land Alienation Act, passed at the instance of Lord Curzon, embodied the principle that it is the duty of a Government which derives such considerable proportion of its revenue from the land, to interfere in the interests of the cultivating classes. This Act greatly restricted the credit of the cultivator by prohibiting the alienation of his land in payment of debt. It had the effect of arresting the process by which the Punjab peasantry were becoming the economic serfs of money-lenders. A good deal of legislation affecting land tenure has been passed from time to time in other provinces; and it has been called for more than once in Bengal where the problems arising out of the Permanent Settlement have been examined by a Royal Commission under Sir Francis Floud which visited Bengal in 1939-40, and whose proposals are still under consideration.

Government and Cultivator.

While the Government thus interferes between landlord and tenant in the interests of the latter, its own attitude towards the cultivator is one of generosity. Mention has already been made of the great advantage to the agricultural classes generally of the elaborate systems of Land Survey and Records of Rights carried out and maintained by Government. In the Administration Report of Bombay for 1911-12, it is stated:—"The Survey Department has cost the State from first to last many lakhs of rupees. But the outlay has been repaid over and over again. The extensions of cultivation which have occurred (by allowing cultivators to abandon unprofitable lands) have thus been profitable to the State no less than to the individual; whereas under a *Zemindari* or kindred system the State would have gained nothing, however much cultivation had extended throughout the whole of 30 years' leases." On the other hand, the system is of advantage to the *ryots* in reducing settlement operations to a minimum of time and procedure. In the collection of revenue the Government consistently pursues a generous policy. In times of distress, suspensions and remissions are freely granted after proper inquiry.

Land revenue is now a provincial head of revenue and is not shown in the All-India accounts. It may be taken roughly at £28 million, as compared with £84 million said to have been raised annually by Aurungzeb from a much smaller Empire.

Since the coming into operation of provincial autonomy in April 1937, there has been a great impetus towards land revenue reform in most provinces, the primary object being to better the lot of the tenant by modifying *Zemindari* rights and usages, and by altering the system of land revenue assessment. To this end, legislation has been introduced in practically all the autonomous provinces during the years 1937 to 1939 and widespread changes are in process of being made everywhere.

In May 1940, after more than a year's inquiry, the Bengal Land Revenue Commission presided over by Sir Francis Floud, published a long and lucid report. By the Permanent Settlement of 1793, a system of land tenure and taxation was laid down by which the Bengal zemindar pays to Government a part of the rent he receives from the cultivator. The Commission decided that the admitted defects in the zemindari system can best be removed not by amending the system but by abolishing it altogether. It recommended that the Permanent Settlement should be abolished and the zemindar bought out by Government, who would thus acquire all the superior interests in agricultural land in Bengal. Ministerial changes coupled with the exigencies of the war situation have delayed the implementing of these recommendations which were submitted to an expert by the Bengal Government.

Following strong representations by Dr. B. R. Ambedkar, the Harijan leader, the Bombay Government in 1941 agreed to suspend the levy of an increased *judi* or payment in cash upon the inam lands of Watandar Mahars. The watandari system is a legacy from the Peshwas who created a large class of alienated lands popularly called inams, the holders of which were designated as inamdars or watandars. These watandars did various services in return for remuneration—in land, money and kind though the principle of "no service, no pay" is by no means general. As Dr. Ambedkar pointed out in the memorial submitted to His Excellency the Governor, there is a large class of landholders including inamdars, jahagirdars, hereditary district officers and kulkarnis who, while freed from the obligation to serve, retain substantial portion of their emoluments. Government's new policy, now suspended, was actuated by a desire to reduce the number of village servants which it considered excessive.

The growing conflict between the landlord and the tiller of the soil during the past few years has brought to the forefront the need for drastic reforms in the settlement system. In pursuance of the promise given to the electorate by the Congress on the eve of the elections to the provincial legislatures in 1946, the Congress ministries in the various provinces have taken up the question of land revenue reform which includes the gradual elimination of the zamindari system. The Government of the United Provinces, Bihar and Orissa are engaged in working out the details for the abolition of the system. In Bombay the bill to amend the Khoti Settlement Act of 1880 has been referred to the Select Committee of the Legislature. Moving the first reading of the Bill, the Revenue Minister declared that it had been the policy of Government to see that the rights of tenants were protected. It was in pursuance of that policy that the Tenancy Act had been amended in 1939 and legislation to facilitate consolidation of holdings in the province had been undertaken. The Madras Government has decided to levy agricultural income-tax on persons whose total agricultural earnings are not less than Rs. 5,000 a year.

Pleading for a radical reform in the land revenue system, the sub-committee of the National Planning Committee observed in its report: "Whatever the reason and justification at the time of the origin of this system may be, the fact of land revenue settlement being open to revision from time to time makes it difficult for the cultivator to be quite sure about the return to himself from further investment of

labour and capital in land. Another handicap is the fixed cash demand which remains unchanged all through the period of the settlement, no matter what the changing level of prices may be and no matter what the peculiar fortunes of agricultural produce in any given season may be." As a part of the reform, it said "the absentee landlord must be progressively, if not all at once, eliminated with or without compensation as the State may determine." Co-operative farming and consolidation of holdings were two other principal recommendations of the sub-committee.

The literature on the subject is considerable. The following should be consulted by readers who require fuller information :—"Land Revenue Policy of the Indian Government," 1902 (Superintendent of Government Printing); Baden Powell's "Land System of British India"; Sir John Strachey's "India, its Administration and Progress, 1911," (Macmillan & Co.); M. Joseph Chailley's "Administrative Problems of British India" (Macmillan & Co.; 1910), and the Annual Administration Reports of the respective Provincial Government.

EXCISE.

The Excise revenue in British India can be classified into two divisions one derived from the Central Excise Duties and belonging to the Central Government's finance and the other derived from the manufacture and sale of intoxicating liquors, hemp drugs, toddy and opium. The latter is a provincial revenue. The revenue from the Central Excise Duties has increased by six times during the past decade. As against a comparatively small revenue of Rs. 7,66 lakhs in 1937-38 and Rs. 12,79 lakhs in 1942-43, the budget for 1946-47 forecasts a revenue of Rs. 46,70 lakhs. These duties are at present levied on motor spirit, kerosene, sugar, matches, steel ingots tyres, tobacco, vegetable product, betel-nut, coffee, tea and coal cess.

The Budget of the Government of India for 1944-45 brought in force important changes in the field of Central Excises. It raised the rates of duty on unmanufactured tobacco and on cigars and cheroots and included in the central Excise Tariff betel-nuts, coffee and tea.

A further change in respect of tobacco was proposed in the following year. Accordingly, the highest class of flue-cured tobacco in the excise tariff was subdivided into three and subjected to a duty of Rs 7-8, Rs.5 or Rs 3-8 per lb., according as it was intended for use in manufacturing cigarettes containing more than 60 per cent more than 40 but not more than 60 per cent, or more than 20 but not more than 40 per cent, by weight of imported tobacco. In order to avoid double incidence some of the provincial governments reached an agreement with the Centre by which they withdrew the provincial excise duty on tobacco in lieu of a share in the proceeds from the Centre's tobacco excise. Tobacco excise has been responsible for nearly half the receipts under central Excise Duties.

As the result of the discussion in the Legislature on the budget for 1946-47, the duty on Kerosene has been reduced from 4 annas six pies to 3 annas per imperial gallon. The duty on Motor spirit has been lowered by three annas to 12 annas and that on betelnuts from 2 annas to 1 anna per lb. A Reduction in excise duty on matches was also announced with a view to lowering the price of a match-box from 9 pies to 6 pies.

The provincial excise revenue in British India is derived from the manufacture and sale of intoxicating liquors, hemp drugs, toddy and opium. The percentage of excise to total revenues of the provincial Government increased from 16·0 to 24·5 between 1938-39 and 1945-46.

The forms of intoxicating liquor chiefly consumed are country spirit; fermented palm juice; beer made from grain; country brands of rum, brandy, etc., locally manufactured malt beer and imported wine, beer and spirits. Country spirit is the main source of revenue, except in the Madras Presidency, and yields about two-thirds of the total receipts from liquors. It is usually prepared by distillation from the Mhowra flower, Molasses and other forms of unrefined sugar, fermented palm juice and rice. In Madras a very large revenue is derived from fresh toddy. The British inherited from the Native Administration either an uncontrolled Out-Still System or in some cases a crude Farming System and the first steps to bring these systems under control were the limitation of the number of shops in the area farmed, and the establishment of an improved Out-Still System under which the combined right of manufacture and sale at a special shop was annually granted. This of course was a kind of control, but it only enabled Government to impose haphazard taxation on the liquor traffic as a whole by means of vend fees. It did not enable Government to graduate the taxation accurately on the still-head duty principle nor to insist upon a standard of purity or a fixed strength of liquor. Moreover for political and other reasons the extent of control could not at first be complete.

Various Systems.

The Out-Still System may be taken to include all systems prior in order of development to the imposition of Still-head duty. Briefly stated the stages of development have been—First: farms of large tracts; Second: farms of smaller areas; Third: farms of the combined right to manufacture and sell at particular places without any exclusive privilege over a definite area; Fourth: farms of similar right subject to control of means and times for distilling and the like. The Provincial Governments have had to deal with the subject in different ways suited to local conditions, and so the order of development from the lower forms of systems to the higher has not been always everywhere identical in details. Yet in its essence and main features the Excise Administration in most provinces of British India has progressed on uniform lines the keynote lying in attempts, where it has not been possible to work with the fixed duty system in its simplest forms, to combine the farming and fixed duty systems with the object of securing that every gallon of spirit should bear a certain amount of taxation. The Out-Still System has in its turn been superseded by either the

Free-supply system or the District Monopoly system. The Free-supply system is one of free competition among the licensed distillers in respect of manufacture. The right of vend is separately disposed of. The District monopoly system on the other hand is one in which the combined monopoly of manufacture and sale in a district is leased to a farmer subject to a certain amount of minimum still-head duty revenue in the monopoly area being guaranteed to the State during the term of the lease.

Reforms.

The recommendations of the Indian Excise Committee of 1905-06 resulted in numerous reforms in British India, one of them being that the various systems have been or are gradually being superseded by the Contract Distillery System under which the manufacture of spirit for supply to a district is disposed of by tender, the rate of still-head duty and the supply price to be charged are fixed in the contract and the right of vend is separately disposed of. This is the system that now prevails over the greater portion of British India. The other significant reforms have been the revision of the Provincial Excise Laws and Regulations, and the conditions of manufacture, vend, storage and transport, an improvement in the quality of the spirit, an improved system of disposal of vend licenses, reductions and re-distributions of shops under the guidance and control of Local Advisory Committees and gradual enhancement of taxation with a view to checking consumption.

Excise was made over entirely to the Provincial Governments, and the duties vary from province to province. The governing principle in fixing these rates is the highest duty compatible with the prevention of illicit distillation.

Sap of the date, palmyra, and cocoanut palms called toddy, is used as a drink either fresh or after fermentation. In Madras and Bombay the revenue is obtained from a fixed fee on every tree from which it is intended to draw the liquor and from shop license fees. In Bengal and Burma the sale of shop licenses is the sole form of taxation. Country brands of rum, and so-called brandies and whiskies, are distilled from grape juice, etc. The manufacture is carried out in private distilleries in various parts of India. A number of breweries has been established, mostly in the hills, for the manufacture of a light beer.

Prohibition.

After the introduction of provincial autonomy in April 1937, it became the avowed policy in principle of all provincial Governments to discourage the consumption of alcoholic beverages; but the Congress administrations which held office in seven provinces until September 1939 went further and, before they resigned, adopted an active policy of enforcing prohibition within a period of years. The measures taken by them varied from province to province, but generally speaking, they took the form of declaring certain areas, either urban or rural, "dry," and within those areas the production, sale and consumption of liquor were banned. Thus in Madras four districts were declared "dry"; a special excise regime was set up and active steps were taken to wean the populace from the use of liquor. Early reports indicated that a considerable measure of success had been attained, but later it was officially admitted that enthusiasm for prohibition was waning. In the United Provinces, Bihar, Orissa, the Central Provinces, Sind and Assam similar steps were taken to prevent the people of certain areas from drinking alcohol. In order to discourage the consumption of alcohol in the United Provinces, the provincial government enhanced the excise duty in 1946-47. In Bengal and the Punjab (where Coalition Governments were in office), on the other hand, there was no actual prohibition but only temperance propaganda.

In Bombay, the Congress scheme went further than elsewhere. The capital city Bombay and the second largest city Ahmedabad were declared "dry," subject to an elaborate system of personal "permits" for Europeans, Parsees and "confirmed addicts." In Bombay, as in Madras, newspapers and magazines published in the province were forbidden to publish liquor advertisements—a ban which persisted after the Congress administrations had resigned and the prohibition drive had lost most of its force. In April 1941, however, the Government of Bombay withdrew the ban on newspaper advertisements of liquor. In Bombay, successive judgments of a full bench of the High Court held that both the original Congress legislation and the subsequent "Governor's Act" were *ultra vires* the provincial administration, and refused to allow that administration to appeal to the Federal Court on the question of the validity or otherwise of the prohibition law. The ban on sales of foreign liquor was accordingly withdrawn as from July 2, 1940, and that on country liquor was modified subject to severe restrictions.

The restoration of provincial autonomy in the middle of 1946 is to be followed by revival of the old policy of prohibition in the Congress provinces. The Government of Bombay have tightened the machinery charged with enforcement of prohibition and contemplate legislation on the Madras model. The Madras Government have chalked out a two-year plan for complete prohibition. The C.P. Government will introduce prohibition in certain districts on October 1. A feature of their plan is to have a shopless zone of 10 miles round the "dry" areas.

Difficulties of Enforcement.—Even on the limited and "permissive" scale adopted, the enforcement of prohibition had been by no means free from abuses and difficulties. It placed a severe strain on the authorities and numerous cases were reported of evasion and defiance of the law on an organised basis. In addition to smuggling into the "dry" areas and illicit distillation, a considerable exodus of workers and others not entitled to permits used to take place every week-end and holiday from the cities to adjacent areas where prohibition was not in force, and much drinking to excess was known to occur. Although Congress and orthodox opinion continued to support prohibition, it gave rise to popular resentment among certain classes and communities, as also to grave legal anomalies. Thus in Bombay, after several hundreds of persons had been convicted for breaches of the prohibition

rules in the first eight months of their introduction, the validity of the rules was successfully challenged in the courts of law.

Despite the efforts of the Governor of Bombay (the Congress Ministry having in the meantime resigned office) to avoid administrative chaos and legalise the position, the experiment may be said to have failed because it lacked both legal sanction and general approval. The position in all the erstwhile Congress provinces was then somewhat as follows: Governors and their advisers while not committed to prohibition in principle and while reserving the right to make such further changes as might seem fit, refrained from reversing the policy of their former ministries. On the other hand, they did not extend the policy, even in its modified form, to new areas, but left the whole future of prohibition open, to be settled by whatever popular regime might later assume office. And here it is pertinent to note that apart from the moral issue, the financial implication of prohibition was far-reaching. In some provinces it involved a sacrifice of anything up to a quarter of the total provincial income and the imposition of new and burdensome taxation. A further complication was caused by the existence of Indian States whose territories are inextricably mixed with British India, and which have not yet adopted a prohibitionist policy any more than the Government of India has done. Thus the whole future of the prohibition experiment is problematical.

Drugs.—The narcotic products of the hemp plant consumed in India fall under three main categories, namely, ganja or the dry flowering tops of the cultivated female hemp plant charas, or the resinous matter which forms an active drug when collected separately; and bhang, or the dried leaves of the hemp plant whether male or female cultivated or uncultivated. The main features of the existing system are restricted cultivation under supervision, storage in Bonded Warehouses, payment of a quantitative duty before issue, retail sale under licenses and restriction on private possession. Licenses to retail all forms of hemp drugs are usually sold by auction. The sale of charas has been prohibited in the Bombay Presidency from the 1st April 1922.

Opium.—The general practice is to sell opium from the Government Treasury, or a Central Warehouse, to licensed vendors. The right of retail to the public is sold by annual auction to one or several sanctioned Shops. Further legislation against opium smoking in clubs and dens is now under contemplation.

The revenue from opium is derived mainly from exports of what is called provision opium to foreign countries and from the sale to Provincial Governments of excise opium for internal consumption in India. The entire quantity is now exported under the system of direct sales to Foreign and Colonial governments, the system of auction sales in Calcutta to traders for export to foreign countries having been stopped with effect from 7th April 1926. In no case are exports permitted without an import certificate by the Government of the country of import as prescribed by the League of Nations.

It was decided to reduce the total of the opium exported since the calendar year 1926 by 10 per cent. annually in each subsequent year until exports were totally extinguished at the end of 1935. The war, however, witnessed the revival of the trade.

Excise opium is sold to Provincial Governments for internal consumption in India at a fixed price based on the cost of production. This opium is retailed to licensed vendors at rates fixed by the Provincial Governments and varying from Province to Province. The price of opium was raised in 1946-47.

Opium, which was an important source of revenue till 1933-34, receded in importance gradually and became a burden on the general revenues in 1943-44 and in the following two years. A small revenue surplus of Rs. 8 lakhs is, however, anticipated in the 1946-47 budget.

SALT.

The salt revenue was inherited by the British Government from Native rule, together with a miscellaneous transit dues. These transit dues were abolished and the salt duty consolidated and raised. There are four great sources of supply; rock salt from the Salt range and Kohat Mines in the Punjab; brine salt from the Sambhar Lake in Rajputana; salt brine condensed on the borders of the lesser Rann of Cutch; and sea salt factories in Bombay, Madras and at the mouth of the Indus.

The Salt Range mines contain an inexhaustible supply. They are worked in chambers excavated in salt strata, some of which are 250 feet long, 45 feet wide and 200 feet high. The Rajputana supply chiefly comes from the Sambhar Lake where brine is extracted and evaporated by solar heat. In the Rann of Cutch the brine is also evaporated by solar heat and the product is known as Baragara salt. Important works for the manufacture of that salt were opened in Dhrangadhra State in 1923. In Bombay and Madras sea water is let into shallow pans on the sea-coast and evaporated by solar heat and the product sold throughout India. In Bengal the damp climate together with the large volume of fresh water from the Ganges and the Brahmaputra into the Bay of Bengal render the manufacture of sea-salt difficult and the bulk of the supply, both for Bengal and Burma, is imported from Liverpool, Germany, Aden, Bombay and Madras.

Broadly, one-half of the indigenous salt is manufactured by Government Agency, and the remainder under license and excise systems. In the Punjab and Rajputana the salt manufactories are under the control of the Northern India Salt Department, a branch of the Commerce and Industry Department. In Madras and Bombay the manufactories are under the supervision of Local Governments. Special treaties with Native States permit of the free movement of salt throughout India, except from the Portuguese territories of Goa and Damaun, on the frontiers of which patrol lines are established to prevent the smuggling of salt into British India.

From 1888-1903 the duty on salt was Rs. 2-8 per maund of 82 lbs. In 1903, it was reduced to Rs. 2; in 1905 to Rs. 1-8-0; in 1907 to Re. 1 and in 1916 it was raised to Rs. 1-4-0. The successive reductions in duty have led to a largely increased consumption, the figures rising by 25 per cent. between 1903-1908. In 1923 the duty was doubled bringing it again to Rs. 2-8. In 1924 it was reduced to Rs. 1-4-0. The duty remained at Rs. 1-4-0 from March 1924 to 29th September 1931. It was raised to Rs. 1-9-0 with effect from 30th September 1931. Prior to 17th March 1931, the excise duty and import duty on salt were always kept similar, but by the Indian Salt (Additional Import Duty) Act XIV of 1931, a temporary additional customs duty of 4½ annas per maund was imposed on foreign salt. In March 1933 the customs duty was reduced by 2 annas. The present duty on salt manufactured in or imported by land is Rs. 1-9-0 per maund.

The revenue from salt for 1946-47 was estimated at Rs. 9,30 lakhs, being higher by Rs. 5 lakhs than the revised estimates for 1945-46 and Rs. 9,29 lakhs for 1944-45. The actual consumption of duty paid salt in 1944-45 was 5,99 lakhs maunds as against 600 lakhs maunds being the revised estimates for 1945-46. The budget for 1946-47, placed consumption for the current year at 610 lakhs maunds.

CUSTOMS.

The import duties have varied from time to time according to the financial condition of the country. Before the Mutiny they were five per cent.; in the days of financial stringency which followed they were raised to 10 and in some cases 20 per cent. In 1875 they were reduced to five per cent.; but the opinions of Free Traders, and the agitation of Lancashire manufacturers who felt the competition of the Indian Mills, induced a movement which led to the abolition of all customs dues in 1882. The continued fall in exchange compelled the Government of India to look for fresh sources of revenue and in 1894 five per cent. duties were reimposed.

The Customs Schedule was completely recast in the Budget of 1916-17 in order to provide additional revenue to meet the financial disturbance set up by the war.

The Customs Tariff was further raised in the Budget of 1921-22 in order to provide for the big deficit which had then to be faced.

The Central Budget for 1942-43 included among its taxation proposals an all-round customs surcharge of 20% to be levied on existing import tariff except raw cotton, petrol and salt.

The Senior Collectors were Covenanted Civilians specially chosen for this duty, before the introduction of the Imperial Customs Service in 1906. Since that date, of the five Collectorships at the principal ports (Calcutta Bombay, Madras, Rangoon, and Karachi) three are ordinarily reserved for Members of the I. C. S. (*i.e.*, "Covenanted Civilians"). The other two are reserved for members of the Imperial Customs Service.

Assistant Collectors in the Imperial Customs Service are recruited in two ways: (*a*) from members of the Indian Civil Service—3 vacancies, and (*b*) by the Secretary of State—19 vacancies. There are in addition a few Gazetted Officers in what is known as the Provincial Customs Service. These posts are in the gift of the Government of India, and are usually filled by promotion from the subordinate (in the Government sense of the word) service. The "subordinate" staff is recruited entirely in India.

The reduction in imports during the war affected the income under this head which reached its bottom at Rs. 25,12 lakhs in 1942-43. Since then there has been smart recovery and the budget estimates for 1946-47 anticipate a revenue of Rs. 65,55 lakhs as against Rs. 65 crores, being the revised estimates for 1945-46. Neglecting the special items which had swollen the revenue in 1945-46, such as larger imports of motor spirits to meet the requirements of the Defence Services and of railway plant, the estimates for the next year allow for a further improvement on a conservative basis and take into account a certain amount of revenue on account of disposals of American stores, etc., taken over by the Government of India.

Important changes affecting the policy underlying this tax were announced by the Finance Member in his budget speech. He met the demand for the relief from customs duty of raw materials imported for industry and to reduce the rates on imported plant and machinery to the extent it might be practicable without injury to the Indian manufacturers of similar goods. He proposed to give effect to the decisions by a notification under the Sea Customs Act.

While continuing the general surcharge for one more year, the Finance Act as finally passed has made the following important changes: (*a*) Reduction in the duty on kerosene from as. 4¼ to as. 3 per imperial gallon, (*b*) Reduction in the duty on motor spirits from as. 15 to as. 12 an imperial gallon involving a loss of Rs. 120 lakhs, (*c*) Increase in the surcharge on "wines" from one-fifth to one-half, (*d*) Replacement of *ad valorem* duty by specific duty in respect of cinematograph film, the duty on unexposed film being reduced from half an anna per linear footage as originally proposed to three pies, (*e*) Fixation of duty on imported betelnuts at as. 5 (without any surcharge) a pound as against the original budget proposal for as. 5¼, to yield Rs. 155 lakhs, (*f*) Consolidation of the customs duty on raw cotton and that levied under the Cotton Fund Ordinance so as to raise the duty to as. 2 per pound, (*g*) Imposition of a specific duty on gold bullion and coin at the rate of Rs. 25 a tola of 180 grains fine to be varied from time to time by a notification under the Sea Custom Act in order to attain in an orderly manner a reasonable measure of approximation to world prices, and (*h*) Increase in the existing duty of silver of three annas an ounce, with a surcharge of 7½ pies, to eight annas an ounce without any surcharge. No revenue provision has been made on account of the change in silver duty.

INCOME-TAX.

The income-tax was first imposed in India in 1860, in order to meet the financial dislocation caused by the Mutiny. It was levied at the rate of four per cent. or a little more than 9½d. in the pound on all incomes of five hundred rupees and upwards. Many changes have from time to time been made in the system, and the present schedule was consolidated in the Act of 1886. This imposed a tax on all incomes derived from sources other than agriculture which were exempted. On incomes of 2,000 rupees and upwards it fell at the rate of five pies in the rupee, or about 6¼d. in the pound; on incomes between 500 and 2,000 rupees at the rate of four pies in the rupee or about 5d. in the pound. In March 1903 the minimum taxable income was raised from 500 to 1,000 rupees. The income-tax schedule was completely revised, raised, and graduated in the Budget of 1916-17 in the general scale of increased taxation imposed to meet the deficit arising out of war conditions.

Since then the process has been almost continuous and in every financial difficulty the authorities turn to the Income-Tax as a means of raising fresh revenue.

The Supplementary Finance Bill of 1931 imposed surcharges on income-tax and super-tax to meet the emergency of that year. The surcharges were subsequently scaled down in succeeding years, but were not completely abolished until after the passage of the Income-Tax (Amendment) Act of 1939. That Act itself was the sequel to an exhaustive inquiry from 1935 onwards by a committee consisting of Khan Bahadur J. B. Vachha, C.I.E., Commissioner of Income-Tax in Bombay, and Messrs. C. W. Ayers and S. P. Chambers of the British Inland Revenue Department. Their report covered a wide field and made numerous recommendations, most of which were incorporated in the Act of 1939, summary of which is given below. Among other recommendations was that for the adoption of the "Slab" system instead of the "Step" system, and this was duly done in the India Budget for 1939.

Taxation on income under Corporation, Income and Excess Profits Taxes provided the largest expansion in yield during the war. These three taxes contributed an increasingly higher portion of the total revenue, from 20·2 per cent. in 1940-41 to 49·1 per cent. in 1944-45. In 1945-46 it was as much as three-fifths. This was rendered possible by the gradual increase in the surcharges on basic rates of income-tax and super-tax upto 66 per cent. and the introduction of the Excess Profits Tax. The total collections under E. P. T. since its introduction in April 1940 to the end of 1946-47, when it would be abolished, would amount to Rs. 350·18 crores or 43 per cent. of the total taxes on income or 19·3 per cent. of the total revenue during these years before deducting the provincial share.

The financial proposals for 1946-47 marked an important step in the direction of giving relief to the industry and the ordinary tax-payer, though the year witnessed the amalgamation of the surcharges with the basic rates of income-tax and super-tax. These measures include:—(1) the grant of special initial depreciation allowances of 10 per cent. on new plant and machinery as well as allowances for expenditure on scientific research, (2) widening the scope of depreciation allowance so as to cover the loss of the asset by destruction or demolition and its extention to buildings, (3) the exemption from income-tax for two years in the case of buildings for residential purposes and an initial depreciation allowance of 15 per cent. for buildings used as business premises, (4) a net reduction of 1¾ annas in the present total rate of income-tax and super-tax payable by a company from annas 7¾ to annas 6 and additional-super tax at steepening rates on dividends, other than those payable at a fixed rate, in excess of 5 per cent. of the capital of a company (other than a private company) including reserves or 30 per cent. of the total income, whichever is higher, with a view to keeping the dividends within reasonable limits and encouraging the ploughing back of profits into industry, (5) reduction in the rate of tax in lower ranges and increase in the earned income allowance from one-tenth of the earned income, subject to a maximum of Rs. 2,000 in terms of income to one-fifth, subject to a maximum (in terms of income), of Rs. 4,000, (6) carryover of the differential treatment in favour of earned income to the super-tax range at the rate of one anna in the rupee between Rs. 25,000 and Rs. 2 lakhs and of half an anna in the rupee between Rs. 2 lakhs and Rs. 5 lakhs, (7) an increase in the rate of income tax on the balance of the income above Rs. 15,000 from annas 4-9 to annas 5-0, (8) an increase in the number of slabs subject to super-tax, resulting in a more gradual steepening of the rates, which will be more severe on the largest incomes than at present, (9) a reduction of the rate on life insurance companies from annas 5¼ to annas 5, and (10) discontinuance of the provision for funding a portion of the tax in the case of income upto Rs. 6,000.

EXCESS PROFITS TAX.

In regard to the Excess Profits Tax, it is announced that the tax will be discontinued after March 31, 1946. The discontinuance of the tax will not, however, affect the revenue in 1946-47 since the tax will be payable in respect of all excess profits earned upto March 31, 1946. The scheme of compulsory deposits will also remain in force to the end of E. P. T. period. As regards the refunds of E. P. T. deposits, they will be sanctioned in advance of the date for which the law provides on condition that they are not distributed as dividends to shareholders but are required for the provision or replacement of buildings, plant or machinery. As regards the loss and expenditure arising in the period of transition from wartime to peacetime conditions, the question of allowing them against the profit of the final E.P.T. chargeable accounting period is under consideration.

GUIDE TO NEW TAXES ON INCOME.

RATES OF INCOME-TAX.

A.—In the case of every individual, Hindu undivided family, unregistered firm and other association of persons not being a case to which paragraph B of this Part applies:—

	Rate.
1. On the first Rs. 1,500 of total income.	*Nil.*
2. On the next Rs. 3,500 of total income.	One anna in the rupee.
3. On the next Rs. 5,000 of total income.	Two annas in the rupee.
4. On the next Rs. 5,000 of total income.	Three and a half annas in the rupee.
5. On the balance of total income.	Five annas in the rupee.

Provided that—

(*i*) no income-tax shall be payable on a total income which, before deduction of the allowance, if any, for earned income, does not exceed Rs. 2,000;

(*ii*) the income-tax payable shall in no case exceed half the amount by which the total income (before deduction of the said allowance, if any, for earned income) exceeds Rs. 2,000;

(*iii*) the income-tax payable on the total income as reduced by the allowance for earned income shall not exceed either—

(*a*) a sum bearing to half the amount by which the total income (before deduction of the allowance for earned income) exceeds Rs. 2,000 the same proportion as such reduced total income bears to the unreduced total income, or

(*b*) the income-tax payable on the income so reduced at the rates specified in this Schedule,

whichever is less.

B.—In the case of every company and Local authority, and in every case in which under the provisions of the Indian Income-tax Act, 1922, income-tax is to be charged at the maximum rate—

	Rate.
On the whole of total income.	Five annas in the rupee.

RATES OF SUPER-TAX.

A.—In the case of every individual, Hindu undivided family, unregistered firm and other association of persons, not being a case to which paragraph B or paragraph C or paragraph D of this Part applies—

	Rate, if income wholly earned.	Rate, if income wholly unearned.
On the first Rs. 25,000 of total income.	*Nil.*	*Nil.*
On the next Rs. 10,000 of total income.	Two annas in the rupee.	Three annas in the rupee.
On the next Rs. 10,000 of total income.	Three annas in the rupee	Four annas in the rupee.
On the next Rs. 15,000 of total income.	Four annas in the rupee.	Five annas in the rupee.
On the next Rs. 20,000 of total income.	Five annas in the rupee.	Six annas in the rupee.
On the next Rs. 30,000 of total income.	Six annas in the rupee.	Seven annas in the rupee.
On the next Rs. 40,000 of total income.	Seven annas in the rupee.	Eight annas in the rupee.
On the next Rs. 50,000 of total income.	Eight annas in the rupee.	Nine annas in the rupee.
On the next Rs. 50,000 of total income.	Nine annas in the rupee.	Nine and a half annas in the rupee.
On the next Rs. 1,00,000 of total income.	Nine and a half annas in the rupee.	Ten annas in the rupee.
On the next Rs. 1,50,000 of total income.	Ten annas in the rupee.	Ten and a half annas in the rupee.
On the balance of total income	Ten and a half annas in the rupee.	Ten and a half annas in the rupee.

B.—In the case of every Local Authority—

	Rate.
On the whole of total income ..	One anna in the rupee.

C.—In the case of an association of persons being a co-operative society, other than the Sanikatta Saltowners' Society in the Bombay Presidency, for the time being registered under the Co-operative Societies Act, 1912, or under an Act of the Provincial Legislature governing the registration of co-operative societies—

	Rate.
On the first Rs. 25,000 of total income.	*Nil.*
On the balance of total income.	One anna in the rupee.

D.—In the case of every company—

	Rate.
On the whole total income.	One anna in the rupee.

and in addition, in respect of that part of the total income (as reduced by the amount of dividends payable at a fixed rate) which does not exceed the amount of dividends, not being devidends payable at a fixed rate, declared in British India in respect of the whole or part of the previous year for the assessment for the year ending on the 31st day of March 1947—

on the amount by which such part—

	Rate.
(*a*) exceeds 30 per cent., but does not exceed 40 per cent., of the total income as so reduced.	Two annas in the rupee.
(*b*) exceeds 40 per cent., but does not exceed 45 per cent., of the total income as so reduced.	Three annas in the rupee.
(*c*) exceeds 45 per cent., but does not exceed 50 per cent., of the total income as so reduced.	Four annas in the rupee.
(*d*) exceeds 50 per cent., but does not exceed 55 per cent., of the total as so reduced.	Five annas in the rupee.
(*e*) exceeds 55 per cent., but does not exceed 60 per cent., of the total as so reduced.	Six annas in the rupee.
(*f*) exceeds 60 per cent of the total income as so reduced.	Seven annas in the rupee.

Provided that -

(*i*) no additional super-tax shall be payable where such part is less than, or equal to, five per cent. on the capital of the company;

(*ii*) where such part is more than five per cent. on the capital of the company, the additional super-tax payable shall be reduced by the amount of additional super-tax which would, but for the provisions of clause (*i*) of this proviso, have been payable had such part been equal to five per cent. on the capital of the company;

(*iii*) where any dividends (not being dividends payable at a fixed rate) have been declared before the 1st day of March 1946 in respect of the whole or part of the previous year for the assessment for the year ending on the 31st day of March 1947, and the amount of super-tax computed at the rates set out in this paragraph exceeds the amount of super-tax which would be payable by the company at the rate specified in the Indian Finance Act, 1945, such proportion of the amount of super-tax computed under this paragraph as the amount of dividends declared before the 1st day of March 1946 bears to the total amount of dividends declared in respect of the said previous year (not being dividends payable at a fixed rate) shall be so reduced as not to exceed the same proportion of the super-tax computed at the rate specified in the Indian Finance Act, 1945.

Explanation.—For the purposes of the paragraph,—

(*a*) the expression "capital of the company" shall be deemed to mean the paid-up share capital at the beginning of the previous year for the assessment for the year ending on the 31st day of March 1947 (other than capital entitled to a dividend at a fixed rate) plus any reserves other than depreciation reserves and reserves for bad or doubtful debts at the same date as diminished by the amount on deposit on the same date with the Central Government under section 10 of the Indian Finance Act 1942, or section 2 of the Excess Profits Tax Ordinance, 1946;

(*b*) the expression "dividend" shall be deemed to include any distribution included in the expression "dividend" as defined in clause (6A) of section 2 of the Indian Income-tax Act, 1922, and any such distribution made during the year ending on the 31st day of March 1947 shall be deemed to have been made in respect of the whole or part of the previous year.

HISTORY OF INDIAN COINAGE.

The Indian mints were closed to the unrestricted coinage of silver for the public from the 26th June 1893, and Act VIII of 1893, passed on that date, repealed Sections 19 to 26 of the Indian Coinage Act of 1870, which provided for the coinage at the mints for the public of gold and silver coins of the Government of India. After 1893 no Government rupees were coined until 1897, when, under arrangements made with the Native States of Bhopal and Kashmir, the currency of those States was replaced by Government rupees. The re-coinage of these rupees proceeded through the two years 1897 and 1898. In 1899 there was no coinage of rupees; but in the following year it seemed that coinage was necessary, and it was begun in February 1900, the Government purchasing the silver required and paying for mainly with the gold accumulated in the Paper Currency Reserve. In that and the following month a crore of rupees was coined and over 17 crores of rupees in the year ending the 31st March 1910 including the rupees issued in connection with the conversion of the currencies of Native States. From the profit accruing to Government on the coinage it was decided to constitute a separate fund called the Gold Reserve Fund as the most effective guarantee against temporary fluctuations of exchange. The whole profit was invested in sterling securities, the interest from which was added to the fund. In 1906 exchange had been practically stable for eight years, and it was decided that of the coinage profits devoted to this fund, six crores should be kept in rupees in India, instead of being invested in gold securities. The Gold Reserve Fund was then named the Gold Standard Reserve. It was ordered in 1907 that only one-half of the coinage profits should be paid into the reserve, the remainder being used for capital expenditure on railways.

Gold.

Since 1870 there had been no coinage of double mohurs in India and the last coinage of single mohurs before 1918 in which year coinage was resumed, was in the year 1891-92.

A Royal proclamation was issued in 1918 establishing a branch of the **Royal Mint at Bombay.** Pending the completion of the arrangements at the Branch, Royal Mint, power was taken by legislation to coin in India gold mohurs of the same weight and fineness as the sovereign. Altogether 2,109,703 pieces of these new coins of the nominal value of Rs. 3,16,45,545, were struck at the Bombay Mint. The actual coinage of sovereigns was begun in August, 1918, and 1,295,372 sovereigns were coined during the year. This branch of the Royal Mint was closed in April, 1919, owing to difficulties in supplying the necessary staff.

The Indian Currency Act of 1927 established a new ratio of the rupee to gold. It established this ratio at one shilling and six pence by enacting that Government would purchase gold at a price of twenty-one rupees three annas ten pies per tola of fine gold in the form of bars containing not less than forty tolas and would sell gold or, at the option of Government, sterling, for immediate delivery in London at the same price after allowing for the normal cost of transport from Bombay to London. A rate of one shilling and five pence forty-nine sixty-fourths was notified as Government's selling rate for sterling to meet these obligations. Great Britain and India left the gold standard in September 1931 but the buying and selling rates for sterling are still maintained.

With the receipt of large consignments of gold, the Bombay Mint made special arrangements for the **refining of gold** by the chlorine process and at the end of the year 1919-20 the Refinery Department was capable of refining a daily amount of 6,000 ounces of raw gold.

Silver.

Mintage of silver rupees was undertaken in India in 1835 and continued almost uninterruptedly till 1922 when it was suspended. It was resumed in 1940 when the Government of India decided, as a measure for conserving silver resources as far as possible in view of the rapid absorption of rupee coin for hoarding purposes, to adopt the fineness of one-half silver and one-half alloy for all three coins. The new coins bore the date of 1940 and were exactly similar in weight and appearance to the old coins, except that the ring was somewhat duller. Incorporated in the new rupee was a new security edge device consisting of the insertion of a shallow re-entrant in the centre of the milled edge which was considered to be a virtually absolute safeguard against counterfeiting.

All Victoria and King Edward VII rupee and half rupee coins of the old fineness were withdrawn with effect from April 1, 1941 and May 31, 1942, respectively and King George V and King George VI standard silver rupees were called back with effect from May 1, 1943. These announcements marked the end of the policy which originated over 50 years ago of converting the rupee which had previously been a full value silver coin into a token. The return of coin was, however, meagre as, since the end of March 1943, the average price was higher than the melting point of the standard silver rupee.

As standard silver coins have been demonetised, it is no longer illegal to hoard or melt them or to purchase or sell them at a value other than their face value; consequently, large quantities of coin have been hoarded or melted and sold for their bullion content. Under The Indian Coinage Amendment Act 1918, silver two anna pices are no longer coined and issued, but coins previously issued continues to be legal tender.

New one-rupee notes were issued through the Reserve Bank of India in July 1941: the issue of these notes does not affect the earlier issue, the Government of India one-rupee notes of the 1935 King George V pattern which continue to be legal tender. A bank note of the denomination of Rs. 2 was issued by the Reserve Bank on February 1, 1943.

Section 5 of the Indian Coinage Act of 1906 was modified by the Amending Act of March 11, 1940. The amendment reduced the silver content of the four-anna coin from 11/12 or 41-¼ grains of fine silver to 50 per cent. or 22-½ grains. This brings the silver four anna coin into line with the British subsidiary coinage. With a view to preventing counterfeiting, the

Government of India directed on July 15, 1943, that the quarter-rupee coin minted during and after August 1943 should have the same security edge as quarternary rupees and half rupees.

In 1941-42, the design of the half-rupee coin of 1941 and after was altered so as to make it conform to that of the quarternary rupee coin. The minting of the quarternary half and quarter rupee silver coins was, however, suspended by a notification in May 1946 in order to enable the Government to discharge the obligation to return in kind, within five years of the end of the war, the 226 million ounces of silver borrowed from the U. S. Government between 1943 and 1945.

Copper and Bronze.

Copper coinage was introduced into the Bengal Presidency by Act XVII of 1835 and into the Madras and Bombay Presidencies by Act XXII of 1844. The weight of the copper coins struck under Act XXIII of 1870 remained the same as it was in 1835. It was as follows:—

	Grains troy.
Double pice or half-anna	200
Pice or quarter-anna	100
Half-pice or one-eighth of an anna ..	50
Pie being one-third of a pice or one-twelfth of an anna	33⅓

The weight and dimensions of bronze coins were as follows:—

	Standard weight in grains troy.	Diameter in millimetres.
Pice	75	25·4
Half-pice	37½	21·17
Pie	25	17·45

Double pice coin is being withdrawn from circulation since 1924, but is still received at Treasuries and Issue Offices.

With a view to protecting further issues of pice against hoarding resulting from the black market value of the metallic contents rising above the face value the Government of India issued in February 1943 a new design of pice, which economises the metal and is expected to be convenient to the public. The Finance Department notification dated February 23, 1943, provided for the mintage of the new pice with a smaller diameter and a circular hole in the centre, reduced in weight from 75 grains to 35 grains and with a metallic composition of 97 per cent. copper, 2½ per cent. zinc and one-half per cent. tin instead of the former fineness of 95½ per cent. copper, 3 per cent. tin, and 1½ per cent. zinc. The notification also provided for the discontinuance of the coinage of half-pice and pie pieces. The new pice was issued from the Bombay office of the Reserve Bank on February 1, 1943.

Nickel.

The Act of 1906 also provided for the coinage of a nickel coin. It was directed that the nickel one-anna piece should thenceforth be coined at the Mint and issued. The notification also prescribed the design of the coin, which has a waved edge with twelve scollops, the greatest diameter of the coin being 21 millimetres and its least diameter 19·8 millimetres. The disability of issuing a half-anna nickel coin was considered by the Government of India in 1909, but after consultation with Local Governments it was decided not to take action in this direction until the people had become thoroughly familiar with the present one-anna coin. The two-anna nickel coin was introduced in 1917-18; and the four-anna and eight-anna nickel coins in 1919. The eight-anna nickel was withdrawn from circulation in 1924 but is still being received at issue offices only.

On account of war activities, the demand for small coin greatly increased and in January 1942 the Government of India issued a new half anna coin which economises metal and is convenient to the public. Further with a view to economising the use of nickel, it was decided to mint new half-anna pieces and the one anna coin and the later two anna coin in a nickel-brass alloy instead of the cupro-nickel alloy. The notification of January 24, 1942, provided for the mintage of the new half anna coin of a square shape and equal to three-fourths the weight of one anna piece. According to this notification, the half anna and one anna pieces were minted in nickel-brass composed of 79 per cent. copper, 20 per cent. zinc and 1 per cent. nickel. A similar change in the metallic contents of two anna piece was announced on March 21, 1942.

Towards the end of November 1945, the Government of India decided that further requirements of two anna and one anna pieces should be minted in the cupro-nickel alloy instead of nickel-brass alloy which had been adopted as a wartime expedient and later found un-satisfactory.

In May 1946 the Central Government authorised the minting and issue of half and quarter rupee coins in pure nickel owing to "inadequate supplies of silver in the open market and the prevailing high prices in India." These new coins are exactly the same in size and weight as the early silver coins with designs usually adopted for decimal coins of 50 cents and 25 cents respectively. The new coins have no security edge and have been designed with the margin lettering and head of the King Emperor on one side and the name of the country, the denomination in three languages, English, Devanagari and Urdu, with the figure of an Indian tiger on the reverse.

DECIMALIZATION OF THE COINAGE.—With a view to simplifying accounting and facilitating calculations the Government of India have under consideration the introduction of a decimal system of a coinage in India. The present occasion calling for a huge recoinage programme necessitated by the unpopularity of the Nickel Brass coin introduced in 1942 as a wartime measure, is considered to be most opportune for the proposed reform. The proposals under this system are that the rupee would remain unaltered and the half rupee and the quarter rupee, while retaining their present shape, size and weight, would be issued as 50 cents and 25 cents coins. The existing lower denominations of small coin would, however, be discarded and, instead, cupro-nickel coins of 10 cents, 5 cents and 2 cents and bronze coins of 1 cent and, if necessary, ½ cent will be issued. A bill incorporating the above changes was introduced in the Central Legislative Assembly on the 18th February, 1946 and has been circularised to elicit public opinion.

The Currency System.

I. THE SILVER STANDARD.

Prior to 1893 the Indian currency system was a mono-metallic system, with silver as the standard of value and a circulation of silver rupees and notes based thereon. But with the opening of new and very productive silver mines in the United States of America the supply of silver exceeded the demand and it steadily receded in value. The result was that the gold value of the rupee, which was nominally two shillings, fell continuously until it reached the neighbourhood of a shilling. These disturbances were prejudicial to trade, but they were still more prejudicial to the finances of the Government. The Government of India has to meet every year in London a substantial sum in the form of payment of interest on the debt, the salaries of officials on leave, the pensions of retired officials, as well as large payment for stores required for State enterprises. As the rupee fell in its gold value the number of rupees required to satisfy these payments rose. The total reached a pitch which seriously alarmed the Government, which felt that it might be called upon to raise a sum in rupees which would necessitate a considerable increase in taxation, which should be avoided if possible. It was therefore decided to take measures to raise and fix the gold value of the rupee for the purposes of exchange.

Closing the Mints.—The whole question was examined by a strong committee under the presidency of Lord Herschell, whose report is commonly called the Herschell Report. It was decided in 1893 to close the mints to the unrestricted coinage of silver. This step led, as was intended, to a gradual divergence between the exchange value of the rupee and the gold value of its silver content. Government ceased to add rupees to the circulation. Rupees remained unlimited legal tender and formed the standard of value for all internal transactions. Since Government refused, and no-one else had the power to coin rupees, assoon as circumstances led to an increased demand for rupees, the exchange value of the rupee began to rise. By 1898 it had approached the figure of one shilling and four pence. Meantime, in response to the undertaking of Government to give notes or rupees for gold at the rate of fifteen rupees to the pound sterling, gold began to accumulate in the Paper Currency Reserve. These purposes having been attained, a second committee was appointed under the chairmanship of Sir Henry Fowler to consider what further steps should be adopted in the light of these conditions. The report of the Fowler Committee as it was called marked the second stage in Indian currency policy.

II. THE NEW STANDARD.

The Fowler Committee rejected the proposal to re-open the Mints to the free coinage of silver. They proposed that the exchange value of the rupee should be fixed at one shilling and fourpence, or fifteen rupees to the sovereign. They further suggested that the British sovereign should be made a legal tender and a current coin in India: that the Indian mints should be thrown open to the unrestricted coinage of gold; so that the rupee and the sovereign should freely circulate side by side in India. The goal which the Committee had in view was a gold standard supported by a gold currency. Now under the condition which compelled the Government of India to give either rupees or rupee notes for gold tendered in India, at the rate of fifteen rupees to the sovereign, it was impossible for the rate of exchange to rise above one shilling and four pence, save by the fraction which covered the cost of shipping gold to India. But if the balance of trade turned against India, it was still possible for the rate of exchange to fall. To meet this the Fowler Committee recommended that the profits on coining rupees should not be absorbed in the general revenues, but should be set aside in a special reserve, to be called the Gold Standard Reserve. Inasmuch as the cost of coining rupees was approximately elevenpence halfpenny, and they were sold to the public at one and four pence, the profits were considerable; they were to have been kept in gold, so as to be freely available when required for the support of exchange.

A 16 pence Rupee.—The Government of India professed to accept all the recommendations of the Fowler Committee; actually only a portion of them was put in practice. The official rate of exchange was fixed at one and fourpence. The sovereign and the half sovereign were declared unlimited legal tender in India. But after a first attempt, when sovereigns soon came back to the treasuries, no effort was made to support the gold standard by an active gold currency. The gold mint was not set up. The Gold Standard Reserve was established, but, instead of holding the Reserve in gold, it was invested in British securities. These practices gave rise to conditions which were never contemplated by the Fowler Committee. Reference has been made to the Home Charges of the Government of India, which at the time amounted to about seventeen millions sterling a year. These are met by the sale of what are called Council Bills. That is to say, the Secretary of State, acting on behalf of the Government of India, sold Bills against gold deposited in the Bank of England in London. These Bills when presented in India were cashed at the Government Treasuries. Now if the Secretary of State sold Council Bills only to meet his actual requirements, it follows that the balance of trade in favour of India over and above this figure would be liquidated, as it is in other countries, by the importation of bullion or by the creation of credits. It is a fact that owing to the failure of the policy of encouraging an active gold

circulation to support the gold standard, gold tended to accumulate in India in embarrassing quantities. In 1904 therefore the Secretary of State declared his intention of selling Council Bills on India without limit at the price of one shilling fourpence one-eighth—that is to say gold import point. The effect of this policy was to limit the import of gold to India, for it was generally more convenient to deposit the gold in London and to obtain Council Bills against it, than to ship the gold to India. Nevertheless as the Egyptian cotton crop was very largely financed in sovereigns it was sometimes cheaper and more convenient to ship sovereigns from Egypt, or even from Australia, than to buy Council Bills. Considerable quantities of sovereigns found their way into India and circulated freely, particularly in the Bombay Presidency, the Punjab and parts of the Central Provinces.

Sterling Remittance.—This system worked until 1907-08. A partial failure of the rains in India in 1907, and the general financial stringency all over the world which followed the American financial crisis in the autumn, caused the Indian exchange to become weak in November. This was one of the occasions contemplated, in a different form, by the Fowler Committee when it proposed the formation of the Gold Standard Reserve. There had been very heavy coining of rupees in India and the amount in the Reserve was ample. But the Reserve was in securities not in gold, and was therefore not in a liquid form, nor was the time an opportune one for the realisation of securities. Moreover the authorities did not realise that a reserve is for use in times of emergency. It had been assumed that in times of weakness it would be sufficient for the Secretary of State to stop selling Council Bills, and it would firm up; meantime he would finance himself by drawing on the funds in the Gold Standard Reserve. But it was apparent that the stoppage of the sales of Councils was not enough; there was an insistent demand for the export of gold, or the equivalent of gold. The Government of India refused and exchange fell to one and threepence twenty-three thirty-seconds. Ultimately the authorities had to give way. It was decided to sell in India a certain quantity of sterling bills on London at one and threepence twenty-nine thirtyseconds, representing gold export point, and the equivalent of the export of gold. These were met in London from the funds in the Gold Standard Reserve. Bills to the extent of between eight and nine millions sterling were sold, which regularised the position and the Indian export trade recovered. Thus were gradually evolved the main principles of the Indian currency system. It consisted of silver rupees and rupee notes in India, with the sovereign and half sovereign unlimited legal tender at the rate of fifteen rupees to the sovereign, or one and fourpence. The rate of exchange was prevented from rising above gold import point by the unlimited sale of Council Bills at gold point in London; it was prevented from falling below gold point by the sale of Sterling Bills (commonly called Reverse Councils) at gold export point in India. But it was not the system proposed by the Fowler Committee, for there was no gold mint and only a limited gold circulation; some people invented for it the novel term of the gold exchange standard, a term unknown to the law of India. It was described by one of the most active workers in it as a "limping standard."

III. THE CHAMBERLAIN COMMITTEE.

This brings us to the year 1913. There were many critics of the system. Some hankered for a return to the open mints; others objected to the practice of unlimited sales of Council Bills as forcing rupees into circulation in excess of the requirements of the country. But the general advantages of a fixed exchange were so great as to smother the voices of the critics, and the trade and commerce of the country adjusted itself to the one and fourpenny rupee. But there gradually grew up a formidable body of criticism directed against the administrative measures taken by the India Office. These criticisms were chiefly directed at the investment of the Gold Standard Reserve in securities instead of keeping it in gold in India; at a raid on that reserve in order temporarily to relieve the Government of the difficulty of financing its railway expenditure; at the transfer of a solid block of the Paper Currency Reserve from India to London; at the holding of a portion of the Gold Standard Reserve in silver in order to facilitate the coining of rupees; and at the unlimited sales of Council Bills at rates which prevented the free flow of gold to India, thus forcing token rupees into circulation in quantities in excess of the requirements of the country. The cumulative effect of this policy was to transfer from India to London an immense block of India's resources, aggregating over seventy millions, where they were lent out at low rates of interest to the London bankers, whilst India was starved of money until at one point money was not available for loans even against Government securities and the bank rate was artificially high. All these things were done, it was contended, on the *obiter dicta* of a small Finance Committee of the India Office, from which all Indian influence was excluded, and on which London banking influence was supreme. The India Office for long ignored this criticism, until it was summarised in a series of articles in *The Times*, and public opinion was focussed on the discussion through the action of the India Office in purchasing a big block of silver for coining purposes from Messrs. Montagu & Co., instead of through their recognised and constituted agents, the Bank of England. The Government could no longer afford to stand aloof and yet another Currency Committee was appointed under the chairmanship of Mr. Austen Chamberlain. This was known as the Chamberlain Committee.

New Measures.—The conclusions of this Commission were that it was unnecessary to support the Gold Standard by a gold currency; that it was not to the advantage of India to encourage the internal use of gold as currency; that the internal currency should be supported by a thoroughly adequate reserve of gold and sterling; that no limit should be fixed to the

amount of the Gold Standard Reserve, one-half of which should be held in gold; that the silver branch of the Gold Standard Reserve should be abolished; that Reverse Councils should be sold on demand; that the Paper Currency should be made more elastic; and that there should be two Indian representatives out of three on the Finance Committee of the India Office. The Committee dealt in conclusively with the accumulation of excessive balances in London, the general tenor of their recommendations being "not guilty, but do not do it again." They gave a passing commendation to the idea of a State Bank. Sir James Begbie, the only Indian banker on the Committee, appended a vigorous minute of dissent, in which he urged that the true line of advance was to discourage the extension of the token currency by providing further facilities for the distribution of gold when increases to the currency became necessary, including the issue of an Indian gold coin of a more convenient denomination than the sovereign or the half sovereign.

IV. CURRENCY AND THE WAR OF 1914-18.

The report was in the hands of the Government of India before the outbreak of the last war. Some immediate steps were taken, like the abolition of the silver branch of the Gold Standard Reserve, but before the Government could deal entirely with the temporising recommendations of the Commission, the war broke out. The early effects of the war were precisely those anticipated. There was a demand for sterling remittance which was met by the sale of Reverse Councils, £8,707,000 being sold up to the end of January 1915. There were withdrawals from the Post Office Savings Banks, and a net sum of Rs. 8 crores was taken away. There was some lack of confidence in the Note issue, and a demand for gold; Notes to the extent of Rs. 10 crores were presented for encashment and the Government were obliged to suspend the issue of gold. But these were transient features and did not demand a moratorium; confidence was soon revived and Exchange and the Note issue continued strong. The difficulties which afterwards arose were from causes completely unanticipated by all students of the Indian currency. They arose from an immense balance of trade in favour of India, caused by the demand for Indian produce for the United Kingdom and the Allies and the decline in the export trade from these countries; a heavy expenditure in India on behalf of the British Government; and a phenomenal rise in the price of silver. If we take the three years 1916-17 to 1918-19 the balance of trade in favour of India was £6 millions a year above the corresponding years of the previous quinquennium. The disbursements in India on behalf of the Government of the United Kingdom and the Allies were by December 1919 £240,000,000. This balance of trade and expenditure for Imperial purposes could not be financed either by the import of the precious metals, owing to the universal embargo on the movement of gold and silver nor by credits in India. It could be financed only by the expansion of the Note issue, against sterling securities in the United Kingdom, chiefly Treasury Bills, and the issue of coined rupees. But simultaneously there was a reduction in the output of the silver mines of the world coinciding with an increased demand for the metal. The price of silver in 1915 was 27¼ pence per standard ounce. In May 1919 it was 58 pence, on the 17th December of that year it was 78 pence. The main difficulties in India were not therefore the prevention of the rupee from falling below the ratio of 15 to one, but to keep it within any limits and to provide a sufficiency to meet the demand.

Rise in Exchange.—The measures adopted by the Government of India in these emergencies were to bring exchange under rigid control confining remittance to the finance of articles of national importance. The next step was to raise the rate for the sale of Council Bills, so that silver might be purchased at a price which would allow rupees to be coined without loss. The following table shows how rates were raised from one shilling fourpence to two shillings fourpence:—

Date of Introduction.	Minimum Rate for Immediate Telegraphic Transfers.
3rd January 1917 ..	1 4⅛
28th August 1917 ..	1 6
12th April 1918 ..	1 6
13th May 1919 ..	1 8
12th August 1919 ..	1 10
15th September 1919 ..	2 0
22nd November 1919 ..	2 2
12th December 1919 ..	2 4

V. THE 1919 COMMITTEE.

The effect of these measures however was to jettison the currency policy pursued from 1893 to 1915, the main object of which was to stabilise the rupee at one and fourpence. The war being over, a Committee was appointed to advise in regard to the future of Indian exchange and currency. It sat in 1919 and reported towards the end of the year. Its main recommendations are summarised below:—

(i) It is desirable to restore stability to the rupee and to re-establish the automatic working of the Indian currency system.

(*vi*) The reduction of the fineness or weight of the rupee, the issue of 2 or 3-rupee coins of lower proportional silver content than the present rupee, or the issue of a nickel rupee, are expedients that cannot be recommended.

(*vii*) The maintenance of the convertibility of the note issue is essential, and proposals that do not adequately protect the Indian paper currency from the risk of becoming inconvertible cannot be entertained.

(*ix*) The rise in exchange, in so far as it has checked and mitigated the rise in Indian prices, has been to the advantage of the country as a whole, and it is desirable to secure the continuance of this benefit.

(*v*) Indian trade is not likely to suffer any permanent injury from the fixing of exchange at a high level.

If, contrary to expectation, a great and rapid fall in world prices were to take place, and if the costs of production in India fail to adjust themselves with equal rapidity to the lower level of prices, then it might be necessary to consider the problem afresh.

(*vi*) The development of Indian industry would not be seriously hampered by a high rate of exchange.

(*vii*) The gain to India of a high rate of exchange for meeting the Home charges is an incidental advantage that must be taken into consideration.

(*viii*) To postpone fixing a stable rate of exchange would be open to serious criticism and entail prolongation of Government control.

(*ix*) The balance of advantage is decidedly on the side of fixing the exchange value of the rupee in terms of gold rather than in terms of sterling.

(*x*) The stable relation to be established between the rupee and gold should be at the rate of Rs. 10 to one sovereign, or, in other words at the rate of one rupee for 11·30,016 grains of fine gold, both for foreign exchange and for internal circulation.

(*xi*) If silver rises for more than a brief period above the parity of 2s. (gold), the situation should be met by all other available means rather than by impairing the convertibility of the note issue. Such measures might be (*a*) reduction of sale of Council Bills; (*b*) abstention from purchase of silver; (*c*) use of gold to meet demands for metallic currency. If it should be absolutely necessary to purchase silver, the Government should be prepared to purchase even at a price such that rupees would be coined at a loss.

(*xii*) Council Drafts are primarily sold not for the convenience of trade but to provide for the Home charges in the wider sense of the term. There is no obligation to sell drafts to meet all trade demands; but, if without inconvenience or with advantage the Secretary of State is in a position to sell drafts in excess of his immediate needs, when a trade demand for them exists, there is no objection to his doing so, subject to due regard being paid to the principles governing the location of the reserves.

Council Drafts should be sold as now by open tender at competitive rates, a minimum rate being fixed from time to time on the basis of the sterling cost of shipping gold to India. At present this rate will vary, but when sterling is again equivalent to gold, it will remain uniform.

The Government of India should be authorised to announce, without previous reference to the Secretary of State on each occasion, their readiness to sell weekly a stated amount of Reverse Councils (including telegraphic transfers) during periods of exchange weakness at a price based on the cost of shipping gold from India to the United Kingdom.

(*xiii*) The import and export of gold to and from India should be free from Government control.

(*xiv*) The statutory minimum for the metallic portion of the Paper Currency Reserve should be 40 per cent. of the gross circulation.

As regards the fiduciary portion of the reserve, the holding of securities issued by the Government of India should be limited to 20 crores. The balance should be held in securities of other Governments comprised within the British Empire, and of the amount so held not more than 10 crores should have more than one year's maturity and all should be redeemable at a fixed date. The balance of the invested portion above these 30 crores should be held in short-dated securities, with not more than one year's maturity, issued by Government within the British Empire.

The sterling investments and gold in the Paper Currency Reserve should be revalued at 2s. to the rupee. The depreciation which will result from this revaluation, cannot be made good at once, but any savings resulting from the rise in exchange will afford a suitable means of discharging this liability in a limited number of years.

(*xv*) With a view to meeting the seasonal demand for additional currency, provision should be made for the issue of notes up to five crores over and above the normal fiduciary issue as loans to the Presidency Banks on the security of export bills of exchange.

Minority Report.—The main object of the Committee, it will be seen, was to secure a stable rate of exchange, without impairing the convertibility of the Note issue, and without debasing the standard silver rupee in India, or substituting another coin of inferior metallic content, which would be debasement in another form. In order to attain these ends it was imperative to fix a ratio for the rupee in relation to gold which would ensure that the Government was able to purchase silver for coining purposes without more than temporary loss. For reasons given in the report they fixed this point at two shillings gold: all other recommendations are subsidiary thereto. But in this they were not unanimous; an important member of the Committee, Mr. Dadiba Dalal of Bombay, appended a minority report in which he urged the adoption of the following courses:—

(*a*) The money standard in India should remain unaltered; that is, the standard of the sovereign and gold mohur with rupees related thereto at the ratio of 15 to 1.

(*b*) Free and unfettered imports and export by the public of gold bullion and gold coins.

(*c*) Free and unfettered imports and export by the public of silver bullion and silver coins.

(*d*) The existing silver rupees of 165 grains of fine silver at present in circulation to continue full legal tender.

(*e*) As long as the price of silver in New York is over 92 cents, Government should not manufacture silver rupees containing 165 grains fine silver.

(*f*) As long as the price of silver is over 92 cents Government should coin 2 rupee silver coins of reduced fineness compared with that of the present silver rupee and the same to be unlimited legal tender.

(*g*) Government to sell Council Bills by competitive tenders for the amount defined in the Budget as required to be remitted to the Secretary of State. The Budget estimate to show under separate headings the amount of Council Bills drawn for Home Charges, for Capital Outlay and Discharge of Debt. Council Bills to be sold for Government requirements only and not for trade purposes, except for the purpose mentioned in the next succeeding recommendation.

(*h*) "Reverse" drafts on London to be sold only at 1s. 329-32d. The proceeds of "Reverse" drafts to be kept apart from all other Government funds and not to be utilised for any purpose except to meet drafts drawn by the Secretary of State at a rate not below 1s. 43-32d. per rupee.

VI. THE TWO SHILLING RUPEE.

The fundamental recommendation of the Committee was that the rupee should be linked to gold and not to sterling, in view of the decline in the value of sterling; that it should be linked at the rate of two shillings instead of the standard value, one and fourpence: all other recommendations were ancillary to this. But it is very important to bear in mind the twofold problem which confronted the Committee. It would be quite easy to fix any low ratio provided the paper currency were made inconvertible, or the rupee debased to such a point that the Government in providing rupee currency, were independent of the price of silver. But if the convertibility of the rupee were to be maintained, and if the rupee were not to be debased, it was essential that the new ratio should be one at which the Government could reasonably rely on purchasing without loss the silver necessary to meet the heavy demands for rupee in India. For reasons set out in the Report, the Committee came to the conclusion that the Government could reckon on purchasing silver for coining at a little under two shillings gold, and that powerfully influenced them in fixing the new ratio at two shillings gold.

The Report Adopted.—The Currency Committee's Report was signed in December 1919, but it was not until February 1920 that action was taken thereon. In the first week of that month a Notification was issued in India accepting the principal recommendations in the Report and notifying that the necessary official action would be taken thereon. This action covered a wide field, but for the sake of clarity in this narrative we shall concentrate on the main issue, the changing of the official monetary standard from fifteen rupees to the sovereign to ten rupees to the sovereign and its effect on Indian currency and trade. That may be summarised in a sentence. A policy which was avowedly adopted to secure fixity of exchange produced the greatest fluctuations in the exchanges of any solvent country and widespread disturbance of trade, heavy losses to Government, and brought hundreds of big traders to the verge of bankruptcy.

Financial Confusion.—This result was produced by many causes. It has been explained above that the essential features of the Indian currency system are the free sales of Council Bills at gold export point in London to prevent exchange from rising above the official standard and the sale of Reverse Councils in India at gold export point to prevent exchange from falling below the official standard. Now when the Currency Report was signed the Indian exchanges were practically at two shillings gold. But between the signing of the Report and the taking of official action, there was a sensational fall in the sterling exchanges, as measured in dollars, the dollar-sterling rate, inasmuch as America was the only free gold market, being the dominating factor in the situation. Consequently the Indian exchanges were considerably below the two shillings gold rate when the Notification accepting the Currency Committee's Report was issued. The Indian exchanges were two shillings and fourpence, and weak at that; the gold rate was about two shillings ninepence. There was an immediate and prodigious demand for Reverse Councils, to take advantage of this high rate of exchange; the market rate jumped up to two shillings eight pence.

Effect of the Rise.—The effect of a rise in exchange has been well described in the words of the Currency Committee's Report; it is that arising exchange stimulates imports and impedes exports, the effect of a falling exchange is the reverse.

Now when the official notification of the two shilling rupee was made the Indian export trade was weak. The great consuming markets of Great Britain and America were glutted with Indian produce. The continent of Europe, which was starved of Indian produce and in urgent need of it, had not the wherewithal to pay for it nor the means of commanding credit. The only Indian staples which were in demand were foodstuffs, and as the rains of 1920 failed over a wide area, the Government were not able to lift the embargo on the export for foodstuffs, save to a limited extent in the case of wheat. On the other hand, the import trade was strong. Orders had been placed for machinery and other manufactured goods during the war and after the Armistice for delivery at the discretion of manufacturers. These began to come forward.

Difficulties Accentuated.—In accordance with the principles laid down by the Currency Committee these difficulties were accentuated by the action of Government in raising exchange by an administrative act. The weak export trade was almost killed. At the same time the temptation of a high exchange gave powerful stimulus to the import trade and orders were placed for immense quantities of manufactured goods, in which textiles filled an important place. Afterwards other forces intervened which accentuated the difficulties of the situation. There was a severe commercial crisis in Japan and this

checked the export of Indian cotton. Japan is the largest buyer of Indian cotton, and when her merchants not only stopped buying but began to re-sell in the Indian markets, the trade was severely shaken and stocks accumulated at a great rate. Even before the 1920 crop came into the market the stocks in Bombay were double those in the corresponding period of the previous year. The expectations of a revival in the buying power of the Continent which were held in many quarters were disappointed and throughout the year there was a heavy balance of trade against India, which made the stabilisation of exchange at the high ratio attempted a hopeless proposition.

Confession of Failure.—Government struggled long against these conditions in the desperate hope that a revival of the export trade would come to their assistance, but they were further handicapped by the variations of the sterling-dollar exchange, which at one time took the rate for Reverse Councils to two shillings tenpence halfpenny. They sold two millions of Reverse Councils a week, then five millions, then dropped down to a steady million. But their policy only aggravated the situation. In addition to arresting the export trade and stimulating the import trade at a time when the precise converse was demanded, their action created an artificial movement for the transfer of capital from India to England. Large war profits accumulated in India since 1914 were hurriedly liquidated and transferred to England. Then the difference between the Reverse Council rate and the market rate, which on some occasions was several pence, induced gigantic speculations. The Exchange Banks set aside all their available resources for the purpose of bidding for Bills, and at once sold their allotments at substantial profits. Considerable groups of speculators pooled their resources and followed the same course. In this way the weekly biddings for the million of Reverse Councils varied from a hundred and 20 millions to a hundred and thirty millions and the money market was completely disorganised. The biddings assumed such proportions that it was necessary to put up fifty lakhs of rupees to obtain the smallest allotment made, five thousand pounds, and Reverse Councils and the large profits thereon came under the entire control of the Banks and the wealthy speculators. Various expedients were tried to remedy the situation but without the slightest effect.

Sterling for Gold.—The first definite break from the recommendations of the Currency Committee came at the end of June, when the Government announced that instead of trying to stabilise the rupee at two shillings gold they would aim at stabilising it at two shillings sterling, leaving the gap between sterling and gold to be closed when the dollar-sterling rate became par. The effect of this was to alter the rate at which Reverse Councils were sold from the fluctuating rate involved in the fluctuations of dollar-sterling exchange to a fixed sterling rate, namely, one shilling elevenpence nineteen-thirty seconds. But this had little practical effect. The biddings for Reverse Councils continued on a very big scale and the market rate for exchange was always twopence or threepence below the Reverse Council rate. This practice continued until the end of September, when it was officially declared that Reverse Councils would be stopped altogether. Exchange immediately slumped to between one and sixpence and one and sevenpence, and it continued to range between these narrow points until the end of the year. The market made its own rate; it made a more stable rate than the efforts of Government to attain an administrative stability.

Other Measures.—Apart from the effort to stabilise exchange, which had such unfortunate results, the policy of Government had certain other effects. During the year all restrictions on the movement of the precious metals were removed, in accordance with the recommendations of the Currency Committee. This included the abandonment of the import duty on silver, always a sore point with Indian bullionists. Legislative action was taken to alter the official ratio of the sovereign from fifteen to one to ten to one; due notice of this intention was given to holders of sovereigns and of the gold mohurs which were coined as an emergency measure in 1918, and they were given the option of tendering them at fifteen rupees. As the gold value of these coins was above fifteen rupees only a limited number was tendered, although there was extensive smuggling of sovereigns into India to take advantage of the premium. Then measures were adopted to give greater elasticity to the Note issue. Under the old law the invested proportion of the Note issue was fixed by statute and it could be altered only by altering the law or by Ordinance. An Act was passed fixing the metallic portion of the Paper Currency Reserve at fifty per cent. of the Note Issue, the invested portion being limited to Rs. 20 crores in Indian securities and the balance in British securities of not more than twelve months' currency. The invested portion of the Paper Currency Reserve was revalued at the new rate of exchange, and an undertaking was given that the profits on the Note issue would be devoted to writing off the depreciation, as also would be the interest on the Gold Standard Reserve when the total had reached £40 millions. Further, in order to give greater elasticity to the Note issue, power was taken to issue Rs. 5 crores of emergency currency in the busy season against commercial bills. These measures, save the alteration of the ratio, were generally approved by the commercial public.

Results.—It remains to sum up the results of these measures. In a pregnant sentence in their report the Currency Committee say that whilst a fixed rate of exchange exercises little influence on the course of trade, a rising exchange impedes exports and stimulates imports, a falling exchange exercises a reverse influence. Here we have the key to the failure of the currency policy attempted. At the moment when it was sought suddenly and violently to raise the rate of exchange by the introduction of the new ratio of two shillings gold, the export trade was weak and the import trade in obedience to the delivery of long deferred orders was strong. The very principle enunciated by the Currency Committee wrecked the policy which they recommended. The rising rate of exchange scotched the weak export trade and gave a great stimulus to imports. Unexpected forces, such as the financial crisis in Japan, the lack of buying power on the Continent, and the movement for the

transfer of capital from India to England at the artificially high rate of exchange stimulated these forces, but they had their origin in the attempt by administrative action artificially and violently to raise the rate of exchange. If let alone, the natural fall in exchange would have tended to correct the adverse balance of trade; the official policy exaggerated and intensified it. The effects on Indian business were severe. Exporters found themselves loaded with produce for which there was no foreign demand; importers found themselves loaded up with imported goods, bought in the expectation of the continuance of a high rate of exchange, delivered when it had fallen one and fourpence from the highest point reached. Immense losses were incurred by all importers. The Government sold £55 millions of Reverse Councils before abandoning their effort to stabilise exchange at the new ratio; the loss on these—that is the difference between the cost of putting the funds down in London and in bringing them back to India—was Rs. 35 crores of rupees. Government sold £53 millions of gold, without breaking or seriously affecting the premium on gold. The Secretary of State, in the absence of any demand for Council Bills, was able to finance his expenditure in England only through the lucky chance of heavy expenditure on behalf of the Imperial Government for the forces in Mesopotamia—this expenditure being made in India and set off by payments in London. The only advantages were a considerable contraction of the Note issue and the silver token currency.

VII. COMMISSION OF 1925-26.

These unfortunate experiments induced a period of great caution in dealing with Indian currency. The currency quacks having had their way, and proved their ignorance, went out of the field, and the wholesome policy of leaving Exchange alone, to find its natural level, followed. Left alone Exchange established itself round about the old ratio of fifteen to one, that is one shilling and fourpence to the rupee. Meantime great improvements were made in the organisation of Indian credit. The three Presidency Banks were merged in the Imperial Bank of India, a State Bank in all but name, and the Bank entered into a contract with Government to open a hundred new branches in the first five years of its existence. The Bank mobilised and strengthened and widened Indian credit. The metallic backing of the Paper Currency was strengthened and the fiduciary portion of the Reserve brought within negligible proportions. Greater elasticity was established in the currency by the power to issue emergency currency up to Rs. 12 crores against commercial paper endorsed by the Imperial Bank when there is a tightness of money, and the practice of also issuing emergency currency against sterling in England. The Government of India now purchases sterling in India to meet its Home Charges when the conditions are favourable, instead of relying entirely on the sales of Council Bills in London. A notable feature in Exchange history was the rise of Exchange, of its own strength, above the one and fourpenny figure. Towards the close of 1924 it gradually rose to one shilling and sixpence and stayed there.

At this figure Exchange was maintained by Government, though the state of trade might have led to a higher figure. But as the wholly artificial ratio of the two shilling rupee remained on the statute book, the demand for an authoritative inquiry to fix the ratio of the rupee to gold or sterling was insistent, and a Committee was appointed in the autumn of 1925. Of this Commander Hilton Young was chairman, with Sir Henry Strakosch as the chief gold expert. The personnel of the Committee was strongly criticised in India, on the ground that the Indian membership was inadequate, and that the individuals selected were not authoritative; a resolution was passed in the Assembly hostile to the whole body. Nevertheless the Committee arrived in India in November 1925 and took evidence in Delhi, Bombay and Calcutta. It sailed for England in February 1926, and resumed its hearings in London, and reported on July 1st, 1926.

The main recommendations of this Commission are summarised in the actual report in the following terms, and they are textually reproduced in order that they may be above question:—

(*i*) The ordinary medium of circulation should remain the currency note and the silver rupee and the stability of the currency in terms of gold should be secured by making the currency directly convertible into gold, but gold should not circulate as money.

(*ii*) The necessity of unity of policy in the control of currency and credit for the achievement of monetary stability involves the establishment of a Central Banking system.

(*iii*) The Central Banking functions should be entrusted to a new organisation, referred to as the Reserve Bank.

(*iv*) Detailed recommendations are made as to the constitution and functions and capacities of the Bank.

(*v*) The outlines of a proposed charter are recommended to give effect to the recommendations which concern the Reserve Bank.

(*vi*) Subject to the payment of limited dividends and the building up of suitable reserve funds, the balance of the profits of the Reserve Bank should be paid over to the Government.

(*vii*) The Bank should be given the sole right of note issue for a period of (say) 25 years. Not later than five years from the date of the charter becoming operative, Government notes should cease to be legal tender except at Government Treasuries.

(*viii*) The notes of the Bank should be full legal tender, and should be guaranteed by Government. The form and material of the note should be subject to the approval of the Governor-General in Council. A suggestion is made as to the form of the note.

(*ix*) An obligation should be imposed by statute on the Bank to buy and sell gold without limit at rates determined with reference to a fixed gold parity of the rupee but in quantities of not less than 400 fine ounces, no limitation being imposed as to the purpose for which the gold is required.

(*x*) The conditions which are to govern the sale of gold by the Bank should be so framed as to free it in normal circumstances from the task of supplying gold for non-monetary purposes. The method by which this may be secured is suggested.

(*xi*) The legal tender quality of the sovereign and the half-sovereign should be removed.

(*xii*) Government should offer "on tap" savings certificates redeemable in 3 or 5 years in legal tender money or gold at the option of the holder.

(*xiii*) The paper currency should cease to be convertible by law into silver coin. It should, however, be the duty of the Bank to maintain the free interchangeability of the different forms of legal tender currency, and of the Government to supply coin to the Bank on demand.

(*xiv*) One-rupee notes should be re-introduced and should be full legal tender.

(*xv*) Notes other than the one-rupee note should be legally convertible into legal tender money, *i.e.*, into notes of smaller denomination or silver rupees at the option of the currency authority.

(*xvi*) No change should be made in the legal tender character of the silver rupee.

(*xvii*) The Paper Currency and Gold Standard Reserves should be amalgamated, and the proportions and composition of the combined Reserve should be fixed by statute.

(*xviii*) The proportional reserve system should be adopted. Gold and gold securities should form not less than 40 per cent. of the Reserve, subject to a possible temporary reduction, with the consent of Government, on payment of a tax. The currency authority should strive to work to a reserve ratio of 50 to 60 per cent. The gold holding should be raised to 20 per cent. of the Reserve as soon as possible and to 25 per cent. within ten years. During this period no favourable opportunity of fortifying the gold holding in the Reserve should be allowed to escape. Of the gold holding at least one-half should be held in India.

(*xix*) The silver holding in the Reserve should be very substantially reduced during a transitional period of ten years.

(*xx*) The balance of the Reserve should be held in self-liquidating trade bills and Government of India securities. The "created" securities should be replaced by marketable securities within ten years.

(*xxi*) A figure of Rs. 50 crores has been fixed as the liability in respect of the contractibility in the rupee circulation. Recommendations are made to secure that an amount equal to one-fifth of the face value of any increase or decrease in the number of silver rupees in issue shall be added to or subtracted from this liability, and the balance of profit or loss shall accrue to or be borne by the Government revenues.

(*xxii*) The Issue Department of the Reserve Bank should be kept wholly distinct from its Banking Department.

(*xxiii*) The Reserve Bank should be entrusted with all the remittance operations of the Government. The Secretary of State should furnish in advance periodical information as to his requirements. The Bank should be left free, at its discretion, to employ such method or methods of remittance as it may find conducive to smooth working.

(*xxiv*) During the transition period the Government should publish a weekly return of remittances made. A trial should be made of the system of purchase by public tender in India.

(*xxv*) The cash balances of the Government (including any balances of the Government of India and of the Secretary of State outside India), as well as the banking reserves in India of all banks operating in India, should be centralised in the hands of the Reserve Bank. Section 23 of the Government of India Act should be amended accordingly.

(*xxvi*) The transfer of Reserve assets should take place not later than 1st January 1929, and the Bank's obligation to buy and sell gold should come into operation not later than 1st January 1931.

(*xxvii*) During the transition period the currency authority (*i.e.*, the Government until the transfer of Reserve assets and the Bank thereafter) should be under an obligation to buy gold and to sell gold or gold exchange at its option at the gold points of the exchange. This obligation should be embodied in statutory form, of which the outline is suggested.

(*xxviii*) Stabilisation of the rupee should be effected forthwith at a rate corresponding to an exchange rate of 1*s.* 6*d.*

(*xxix*) The stamp duty on bills of exchange and cheques should be abolished. Bill forms, in the English language and the vernacular in parallel, should be on sale at post offices.

(*xxx*) Measures should be taken to promote the development of banking in India.

(*xxxi*) Every effort should be made to remedy the deficiencies in the existing body of statistical data.

A Minute of Dissent.—Whilst all the members of the Commission signed the report, one of them, Sir Purshotamdas Thakurdas did so subject to a minute of dissent. In the first part of this Minute Sir Purshotamdas subjected the long correspondence between the Government of India and the India Office on currency policy to a detailed analysis. The conclusions to which he came were that throughout the Government of India had striven for a system following the Fowler Report—a gold standard based on a gold currency, and that the efforts were emasculated by successive Secretaries of State, who had in view some which was often called the Gold

Exchange Standard, but which was in effect no standard at all. On the question of the Gold Standard, he stressed the importance of the free movement of gold in India, but subject to this condition accepted the Gold Bullion Standard recommended by his colleagues. As for the proposed Reserve Bank, Sir Purshotamdas, whilst recognising that the scheme proposed might be the ideal, to be attained in process of time, thought that the best immediate course was to develop the Imperial Bank into a central bank for India. The chief point of difference with his colleagues was however the ratio.

Dealing with the ratio of the rupee to gold Sir Purshotamdas said that in September 1924 the rate was approximately one and fourpence gold. At that time the Government was pressed to stabilise at the then ratio, and thus legally to restore the long current legal standard of money payments. This it declined to do, and by limiting the supply of currency, the ratio was raised to one and sixpence gold by April 1925. He declined therefore to attach any importance to a ratio reached by such measures. Proceeding to analyse the course of prices and wages, he combated the conclusion of his colleagues that prices had adjusted themselves in a preponderant degree to one shilling and sixpence. For these reasons he recommended that the rupee should be stabilised at the rate which was current for nearly twenty years, namely one and fourpence. His conclusions were summarised in the following terms:—

"I look upon the question of the ratio in this Report as being no less important than the question of the standard to be adopted for the Indian Currency System. I am convinced that if the absolute necessity of the free inflow of gold, which I have emphasised, is recognised, and steps taken to ensure it, the gold bullion standard proposed will be the correct one, and the likelihood of its breaking down under the strain of any convulsions in the future will be as remote as it can reasonably be. But I have very grave apprehensions that if the recommendation of my colleagues to stabilise the rupee at 1*s.* 6*d.* is accepted and acted upon, India will be faced during the next few years with a disturbance in her economic organisation, the magnitude of which is difficult to estimate, but the consequences of which may not only hamper her economic development but may even prove disastrous. Such a disturbance and its consequences my colleagues do not foresee to-day. But the possibility of their occurring cannot be ignored. Until adjustment is complete, agriculture threatens to become unattractive and less remunerative than it is to-day, and industries will have to undergo a painful process of adjustment, unnatural, unwarranted and avoidable—an adjustment which will be much to their cost, and affect not only their stability and their progress, but in certain cases, their very existence. And should Nature have in store for India a couple of lean years after the four good harvests that we have had, during the period of forced adjustment to a rate of 1*s.* 6*d.*, the steps that the Currency Authority will have to take to maintain exchange at this rate may deplete the gold resources of the country to an extent that may seriously shake the confidence of the people in the currency system recommended."

A Survey.—The official summary of the Report, and the summary of the minute of dissent, given above, do not however convey an idea of the far-reaching proposals embodied therein. These can be appreciated only if they are examined in close relation to the currency system of India in its various phases since 1899. This was done in an article contributed to *The Bankers' Magazine* by Sir Stanley Reed, which was recognised to be a fair presentation of the position. The main features thereof are reproduced below. There is here some re-treading of the path laid out in the introductory section, but this is unavoidable, if the full bearing of the measures proposed by the Commission are to be appreciated. After describing the standard in force Sir Stanley Reed asked:—

"What was the standard thus established? It is generally described in London as the Gold Exchange Standard. That status was never claimed for it by its principal protagonist, the late Sir Lionel Abrahams, who described it as a 'limping standard.' The Royal Commission declares that 'in truth in so far as it amounted to a definite standard at all, it was a standard of sterling exchange.' Later they show that 'the automatic working of the exchange standard is thus not adequately provided for in India, and never has been. The fundamental basis of such a standard is provision for the expansion and contraction of the volume of currency.....Under the Indian system, contraction is not, and never has been, automatic.'

"However, the standard limped along until the third year of the war. The exchange value of the rupee was stable; prices adjusted themselves to the ratio; Indian trade and industry developed. From the narrow standpoint of profit and loss, the investment of the reserves, instead of keeping them in gold, resulted in a considerable gain to the finances estimated in 1925 at £17,962,466. But it had three great disadvantages: it did not inspire public confidence; it placed the Indian currency at the mercy of the silver market which was on occasion deliberately cornered against it; and it left the control of currency by the Government divorced from the control of credit by the Presidency Banks, afterwards amalgamated in the Imperial Bank of India. On this the Commission make a very suggestive comment: 'when allowance has been made for all misunderstandings and misapprehensions, the fact remains that a large measure of distrust in the present system is justified by its imperfections.'

"There is, I think, an inadequate appreciation of the influence on the Indian currency and exchange of the war, and the action taken thereafter. The first break in the permanent ratio of one shilling and fourpence did not occur until 1917, when the full effect of dependence on the silver market was revealed. Faced by the unprecedented rise in the price of silver the Government of India had either to raise the price of Council Drafts or else abandon the

convertibility of the Note Issue. Wisely, it took the former alternative; the price of Council Drafts followed the price of silver. The effect of this would have been transitory, but for the attempt in 1920, on the advice of the Babington Smith Committee, to stabilise the rupee at a new ratio of two shillings gold when all gold prices were crashing. It is easy to be wise after the event, but if the Government had followed silver down, as it followed silver up, there is no room to doubt that the rupee would have returned to its 'permanent' ratio with no more disturbance than was inevitable under war conditions. However, this was not done. The vain effort to stabilise the new ratio was abandoned in September, 1920, and the two shilling rupee has since been a legal fiction. Left free from administrative action, the rupee fell below one shilling and threepence sterling and one shilling gold in 1921. Since under the influence of good harvests, it has climbed upwards, and has been in the neighbourhood of one shilling and sixpence gold for the past twelve months. But it is not always realised in London that under these vicissitudes the Indian standard has legally perished. In the words of the report, 'The stability of the gold value of the rupee is thus based upon nothing more substantial than a policy of the Government, and at present that policy can be found defined in no notification or undertaking by the Government. It has to be implied from the acts of the Government in relation to the currency, and those acts are subject to no statutory regulation or control.'

"The responsibility remitted to the Commission was not therefore the mere stabilisation of the rupee, but the establishment of a standard which would command reasoned confidence in India, to link the rupee to that standard, and to provide for its statutory control, automatic working and stability; to bring the control of currency and of credit under a single authority and to free the Indian currency and exchange system from the dominance of the silver market. In short, it was to establish the rule of law in place of the practice of administrative discretion.

Scheme for Gold Currency.—"In the course of their inquiries in India the Commission had placed before them a scheme for the immediate establishment of a gold bullion standard, and its early conversion into the gold standard supported by the gold currency which a large body of Indian opinion has insistently demanded. The scheme was presented by the officials of the Finance Department, but it is known to be the work of the Finance Member, Sir Basil Blackett, whose work in India is of the greatest value.

"The essential features of this Scheme were the undertaking of a statutory obligation by Government to buy and sell gold bullion in 400 oz. bars; as soon as sufficient gold was available to put a gold coin in circulation; after a period tentatively fixed at five years to undertake to give gold coin in exchange for notes and rupees, and after a further period, also tentatively fixed at five years, make the silver rupee legal tender only for sums up to a small fixed amount. The scheme involved the disposal of 200 crores of silver rupees, or 687 million fine ounces, in ten years; the acquisition in all of £103 millions of gold; and the establishment of credits in London or New York. The cost was estimated at one and two-thirds crores of rupees per annum during the first five years and thereafter from two-thirds of a crore to 1·12 crore.

"This scheme is subjected by the Commission to a detailed examination, and rejected on grounds which are convincing. The main grounds for this decision are that the estimates of the amount and time of the gold demand are uncertain, and the absorption by India of this £103 millions of gold, in addition to the normal absorption for the arts, hoards, etc., would powerfully react on the supplies of credit, the rates of interest, and gold prices, throughout the world. The reaction on the silver market from the dethronement of the rupee and realisation of this large quantity of silver bullion would be even more marked, with severely prejudicial effects on the silver hoards of the people of India and the exchanges with China, where India still does a large business. Moreover, the capacity to raise the required credits is doubtful, and the cost is placed by the India Office at Rs. 3 crores a year.

"The evidence of the highest financial authorities in London and New York established beyond doubt that it is not in the interests of India to precipitate any currency reform that would violently disturb the gold and silver markets, however desirable that reform might be in itself. Also, that whilst London, working in close harmony with New York, would strain every nerve to supply India with the funds she might require for her own development, it could hardly be expected to provide credits for a scheme which would upset the gold and silver markets. But whilst on these grounds the Commission were not able to endorse Sir Basil Blackett's scheme, there is no doubt that they were profoundly influenced by it in their own recommendations. The ultimate evolution of a policy which promises a cure for India's currency ills is therefore in large measure due to the courage and resolution with which the Finance Authorities in that country faced them.

A Gold Bullion Standard.—"The currency system recommended by the Commission is a gold bullion standard. They propose that an obligation shall be imposed by statute on the currency authority to buy and sell gold without limit at rates determined with reference to a fixed gold parity of the rupee, but in quantities of not less than 400 fine ounces, no limitation being imposed as to the purpose for which the gold is required. The essence of this proposal is "that the ordinary medium of circulation in India should remain as at present the currency note and the silver rupee, and that the stability of the currency in terms of gold should be secured by making the currency directly convertible into gold for all purposes, but that gold should not circulate as money. It must not circulate at first, and it need not circulate ever." In breaking adrift from any idea of a sterling exchange, or gold exchange standard, the Commission were powerfully influenced by two factors—the necessity of safeguarding the

Indian system from the price of silver rising above the melting point of the rupee and the desirability of establishing confidence by giving the country not only a real, but conspicuously visible link between the currency and gold.

"This reasoning is eminently sound, and the scheme in its broad outlines should command the unhesitating support not only of India, but of all interested in Indian trade. India will have nothing to do with any exchange standard; its experience has been too painful. Proposals to that end would be rejected by the legislature and prolong the currency controversies it is desired to close. The gold bullion standard satisfies all the country's real needs. True, it will not give it the gold mint and the gold currency which have long been demanded; it involves the demonetization of the sovereign to which a sentimental influence attaches. But whilst it does not do these things, it keeps one door open. No one contends that a gold standard and a gold currency are immediately practicable. The most rapid progress thereto is embodied in Sir Basil Blackett's scheme, which is full of uncertainties and risks. But when the gold reserves are strengthened to the requisite point, the proposals leave India perfectly free to decide, through her legislature, where a gold currency is worth the expense.

"We must, however, face the obligation which a gold bullion standard imposes on the currency authority in India; indeed the Commission do not attempt to burke it. 'The obligation is to convert the currency, not merely into foreign exchange, but into metallic gold, and it is an obligation that is not, as formerly, conditional and circumscribed, but absolute and unlimited. Nevertheless. . . . it has been undertaken by every other country that has adopted an effective gold standard; and we have satisfied ourselves that the present resources in the form of reserves at the disposal of the Government of India are adequate to enable the currency authority safely to undertake the obligation, with the measures of fortification, and at the time, which we specify.' It is important, therefore, to examine the reserves and the procedure thereat.

"The reserves held for the purpose of maintaining the value of the token currency are twofold—the Paper Currency Reserve and the Gold Standard Reserve. Their constitution on April 30, 1926 (the date taken by the Commission), was as follows:—

Paper Currency Reserve.

	Rs. Crores.
Silver coin	77·0
Silver bullion	7·7
Gold coin and bullion	22·3
Rupee securities	57·1
Sterling securities	21·0
	185·1

(The gold coin and bullion and the sterling securities are converted at the legal fiction ratio of two shillings per rupee.)

"The Gold Standard Reserve amounts at present to £40,000,000 invested in Gold and in British Treasury Bills and other sterling securities.

"In theory the two reserves fulfil entirely different functions. The Paper Currency Reserve is the backing for the Note Issue. The Gold Standard Reserve, accumulated from the profits on coining, is designed to maintain the external value of the rupee. In practice their action is closely interlocked, and the first line of defence in the event of a demand for remittance from India is the gold in the paper currency reserve. This inviable line of demarcation will disappear if the Commission's proposals are adopted. The Commission are justified in recommending that the two shall be amalgamated. Their further proposals are that the proportions and composition of the combined Reserve should be fixed by statute; that gold and gold securities should form not less than 40 per cent. of the whole, with 50 to 60 per cent. as the ideal; and that the holding of gold, which now stands at about 12·8 per cent. should be raised to 20 per cent. as soon as possible, and to 25 per cent. in ten years. Generally, they are of opinion that during this period no favourable opportunity of fortifying the gold holding in the Reserve should be allowed to escape.

"The proposal to bring the combined Reserve under statutory control is wise; an arguable case could be made out for the thesis that the currency difficulties of India have arisen in the main from the decision of Lord Curzon's Government not to invest the official acceptance of the Fowler Report with legislative authority. The strengthening of the gold reserves is in entire accord with Indian needs.

The Ratio.—"The majority of the Commission, Sir Purshotamdas Thakurdas being the only dissentient, recommend that the rupee be stabilised in relation to gold at a rate corresponding to an exchange rate of one shilling and sixpence to the rupee. Round this point controversy in India will be concentrated; it is worth while to refresh our memories of the history of the ratio. The Fowler Committee recommended that the rupee should be permanently stabilised at one shilling and fourpence; the Secretary of State for India accepted their recommendations without qualification. The rupee was substantially steady at this point until August 1917.

"One principle advanced in Sir Dadiba Dalal's prophetic minority report in 1919, that the legal standard of money payments should be and usually is, regarded as less open to repeal or modification than any other legislative Act, will command general acceptance. But when Sir Dadiba went on to suggest that the Government of India might have avoided this measure by larger borrowings in India and encouraging investment abroad he was on ground where no one in touch with Indian conditions can follow him. In the circumstances of the day the Government had no alternative to raising the rate of exchange save in declaring the rupee inconvertible, which during the war would have been disastrous. I must reiterate the belief that the real mischief was done not when the rate of exchange was raised to meet the rise in silver, but when it was not lowered as silver fell; the attempt to stabilise the rupee

at the two shilling rate caused the Government of India large losses, and inflicted a terrible blow on trade; after it was abandoned in September, 1920, the rupee fell below one shilling and threepence sterling and one shilling gold. Thereafter, under the influence of a succession of abundant harvests, it recovered. In 1923, it was one shilling and fourpence sterling; in October, 1924 one and sixpence sterling and one and four gold. With the rise in the pound to gold parity, the rupee reached one and sixpence gold in June, 1925, and has remained there.

"It is not, I think, open to doubt that if the vain attempt to stabilise the rupee at two shillings had not been made in 1920, or if advantage had been taken of its return to one and four, the permanent standard might have been re-established without undue disturbance. Sir Purshotamdas Thakurdas asserts in his minute of dissent that 'the Executive had made up their minds to work up to a one shilling and sixpence ratio long before this Commission was appointed to examine the question. Indeed, they have presented to us the issue in this regard as a *fait accompli*, achieved by them, not having hesitated by manipulation to keep up the rate even while we were in session. I cannot conceive of any parallel to such a procedure in any country.'

"It is to my mind a great misfortune that the opportunity of restoring the permanent ratio of one and four was not seized when it offered. Not because there is any special sanctity in a ratio as such but because there is a sanctity in the legal standard of money payments. If this had been done the Commission's scheme would have received practically unanimous support in India; as it is, a violent controversy will rage round this secondary issue, obscuring the great merit of the Commission's basic recommendation a true gold standard, statutory in its composition and automatic in action, with the coalescence of the currency and credit authorities. However, we have to deal with facts as we find them. The majority of the commission base their recommendation on the 'conviction, which has been formed and cumulatively reinforced during the progress of our inquiry, that at the present exchange rate of about one shilling and sixpence, prices in India have already attained a substantial measure of adjustment with those in the world at large, and as a corollary, that any change in the rate would mean a difficult period of readjustment, involving widespread economic disturbance, which it is most desirable in the interests of the people to avoid, and which would in the end be followed by no countervailing advantage.' Sir Purshotamdas Thakurdas, in a closely-reasoned minute of dissent, supported by a wealth of figures, avers—and to my mind with conclusive force that the adjustments are far from complete, and cannot be completed in regard to wages without disastrous labour disputes. Both sides admit that their conclusions are weakened by the unreliability of the Indian index figures.

"The truth, I suggest, lies between these two contentions. There have been very substantial adjustments to one shilling and sixpence; no ratio could be operative for over a year without inducing this result. But it is clear that the adjustments, especially in regard to wages in Western India, are not complete. In the matter of the indebtedness of the agricultural classes of India—seventy per cent. of the whole population there has been no adjustment, not in relation to the land revenue they pay to Government. The ratio therefore cannot be determined as a question of academic principle, but is a matter of expediency.

"Here, it seems to me, the decisive factor is the economic consequence of a return to one shilling and fourpence. There is no half-way house; the rate must be either the *de facto* one of one and sixpence, or the old permanent ratio of one and fourpence. The change would be immediate not a matter of weeks or months, but of hours or minutes. There would be an immediate rise in prices of twelve and a half per cent., with a consequent reduction of real wages by that proportion; there would be convulsive disturbance of the foreign trade; there would be violent speculation. I omit all calculation of the effect of the lower rate on the finances of the Government of India, because this is an influence which has been over-valued in the past; it is infinitesimal in comparison with the industrial and commercial interests involved. No one who realises the sensitiveness of the Indian market, and the proneness to speculation, can contemplate these violent disturbances without a feeling akin to dismay. The balance of advantage lies with stabilisation at one and six; the controversy which must ensue is part of the price to be paid for the neglect to re-establish the permanent ratio when it was practicable.

The Note Issue.—"Before the war there was a considerable and growing circulation of sovereigns. On the outbreak of hostilities these disappeared as currency; the actual currency of India is a token, the silver rupees and another token, the note convertible into rupees. Ever since the breakway from the accepted gold standard this obligation has imposed serious difficulties on the currency. It drove it into the very heavy coining which followed recovery from the famine of 1899-1900; it compelled heavy purchases of silver, which invariably rose in prices as the Government came into the market; and it placed the Indian currency system, as occurred during the war, at the mercy of the silver market. The maintenance of the convertibility of the note into silver rupees of the present fineness is only possible so long as silver does not rise above 48*d.* an ounce. The removal of this anomalous provision, the Commission say, is an essential step in Indian currency reform which must be taken sooner or later. 'No opportunity for the termination of this obligatory convertibility is likely to be so favourable at the present when, by making the notes convertible into gold bars for all purposes, a more solid right of convertibility is attached to them than they have ever had since silver ceased to be a reliable standard of value.' Both propositions can be accepted in their entirety.

"The rise in the volume of the paper currency is one of the most remarkable features in Indian financial history. It developed from no change in the status of the note itself; it was always convertible on demand; but from increased facilities for the encashment of notes, beginning with the introduction of universal notes of small de-

nomination and steadily progressing as experience was gained. We can therefore endorse the conclusion of the Commission that the best way to foster the use of currency notes is to establish confidence in their practical convertibility, 'and this confidence has been secured not so much by a legal obligation to encash them at currency offices as by making rupees readily available to the public at centres where there is a demand for them.'

"The Commission therefore propose that whilst the legal obligation to convert into rupees all the notes in circulation shall remain, this obligation should not attach to the new notes to be issued by the Central Bank, and coincidentally the one-rupee note, which had acquired great popularity before it was discontinued on the ground of economy, shall be re-issued. The legal obligation on the Central Bank will be to give legal tender money, either notes of smaller denominations or silver rupees, at its option; but it will be the duty of the Bank to supply rupees freely in such quantities as may be required for circulation, and of the Government to furnish the Bank with such coin. The currency position is such that the change in the legal status of the note will be unfelt. India is suffering from a surfeit of rupees, the total volume of which is estimated at approximately Rs. 400 crores. There are Rs. 85 crores of silver coin and bullion in reserve. The whole tendency will be in the direction of a return of rupees to the reserve rather than to an appetite therefor. Not only will there exist the fullest capacity to supply rupees on demand, but there will be a positive inducement to the currency authority to encourage a demand for rupees in order to get rid of its redundant stock. It is clear that the present opportunity of freeing the currency authority from the dependence on the silver market which has hampered India for so many years is exceptionally favourable, and should be seized without hesitation."

The reception of the Report followed very closely the lines indicated as probable in the article in *The Bankers' Magazine* which we have quoted extensively above. There was a considerable protest, strongest in Western India but shared in other parts of the country, against the proposal to stabilise the rupee at one shilling and sixpence and a demand for a reversion to one and fourpence. There was, particularly in Bombay, a reluctance to agree to the establishment of the Reserve Bank, coupled with the desire that the Imperial Bank of India should be re-moulded in order to make it the Central Bank, with the functions proposed to be remitted to the Reserve Bank. These voices were so loud that they overbore the consideration of the basic recommendations of the Report, a true gold standard, and the establishment of an organisation which would link currency with credit.

In August 1926 the Government published the text of a Bill designed to fix the ratio at one and six, and to support it by the sale of bullion on the lines laid down in the Report. At the request of a large body of opinion in the Legislative Assembly, which urged that there had not been time to study the Report and that the papers were not available, the discussion of this measure was postponed until the 1927 session. On November 18th the Government of India issued a notification to the following effect:—

"After considering the report of the Royal Commission on Indian Currency and Finance, the Secretary of State for India in Council is agreement with the Government of India, is prepared to accept as a whole the recommendations of the Commission, subject to such further consideration of details as may prove to be necessary. The necessary legislation to give effect to these recommendations will be introduced in the Indian Legislature during the forthcoming session."

The New Ratio.—So far from closing the discussion, this notification intensified it. Feeling ran high on the subject of the ratio, considerable interests in the country being convinced that one shilling and sixpence was a higher rate than the manufacturing and agricultural industries could bear without prolonged and disastrous readjustment. These found strong expression when the Bill to give effect to the new rate was brought before the Legislative Assembly in February-March 1927. The Indian Currency Bill was, however, accepted by the Assembly by a small majority, and adopted by the Council of State. It established the ratio of one shilling and sixpence by enacting that the Government would purchase gold at a price of twenty-one rupees three annas ten pies per tola of fine gold in the form of bars containing not less than forty tolas and would sell gold or, at the option of Government, sterling for immediate delivery in London at the same price after allowing for the normal cost or transport from Bombay to London. A rate of one shilling five pence forty-nine sixty-fourths was notified as Government's selling rate for sterling to meet these obligations.

Exchange has since remained stable at the one and sixpenny rate. World trade depression in the slump of 1930 made it increasingly difficult for the Government of India to maintain the statutory ratio, but their difficulties were solved when Great Britain went off the Gold standard in September 1931, and the rupee was linked to sterling. Since then, large exports of commercial and hoarded gold from India have served to keep the exchange ratio stable, despite much agitation for a reversion to the 1s. 4d. ratio by interested parties. Generally speaking, the tendency in the last ten years has been for the rupee to be worth more than 1s. 6d., and thus Government have found no difficulty in maintaining a stable exchange. Since the outbreak of the war in September 1939, official restrictions on exchange operations have perforce increased and caused some inconvenience to businessmen. But the rupee continues to maintain its strength and there is little doubt that, left to itself, it would appreciate in terms of foreign currencies rather than depreciate.

CURRENCY AND WAR No. II.

Of the total wartime absorption of legal tender currency of Rs. 1,198·64 crores, notes accounted for Rs. 988·89 crores or 82·5 per cent., rupee coin for Rs. 142·16 crores or 11·9 per cent. and small coin for Rs. 62·59 crores or 5·6 per cent.

Another significant feature of the war was the accumulation of huge sterling balances in London of the order of Rs. 1,654·71 crores which enabled the Government to repatriate their sterling debt amounting to Rs. 429·28 crores.

Developments During 1944-45.—Note circulation registered a further increase in 1944-45. Though the rate of expansion declined as in the last year despite the sustained tempo of the country's war effort, the annual rate of increase fell to 28 per cent. as against 37 per cent. in 1943-44 and 69 per cent. in 1942-43, which was the highest rate of rise in note circulation. The circulation increased from Rs. 882·49 crores at the end of 1943-44 to Rs. 1,084·88 crores at the end of 1944-45. The total amount of notes legal tender in India stood at Rs. 1,094·66 crores at the end of 1944-45 compared with Rs. 894·84 crores at the end of the previous year, while the average circulation for the year worked out at Rs. 968·69 crores as against Rs. 777·17 crores during 1943-44. Of the total absorption of Rs. 912·52 crores of notes since September 1, 1939, when the circulation in India stood at Rs. 172·36 crores, the year under review accounted for Rs. 202·39 crores or 22 per cent. as compared with 26 per cent. in 1943-44 when Rs. 238·91 crores of notes were absorbed.

There was a net absorption of notes during all the months of 1944-45 except in July when for the first time since July 1941 a net return was recorded. The average monthly absorption declined to Rs. 16·87 crores from Rs. 19·91 crores in 1943-44 and Rs. 21·82 crores in 1942-43, the peak year of absorption. The slower rate of expansion as a whole during the year under review may be attributed to vigorous loan and taxation programmes and official sales of bullion.

The demand for rupee coin (including Government of India one rupee notes) showed a further fall during the year. The decline in the rate of expansion being more marked than in the case of notes, the absorption stood at Rs. 10·05 crores compared with Rs. 25·60 crores in 1943-44 and the record figure of Rs. 44·93 crores in 1942-43.

With the cessation of the legal tender character of the standard coin with effect from November 1, 1943, the quarternary rupees and the Government of India one rupee notes constitute as from that date the total amount of rupee coin in circulation. Their aggregate circulation stood at Rs. 123·81 crores at the end of October 1943. The circulation of rupee coin rose to Rs. 137·33 crores at the end of 1943-44 and to Rs. 147·38 crores at the end of 1944-45.

While the metallic coin continued to be in demand in the interior, a marked partiality for the more convenient and handy one rupee note was in evidence in urban areas and to an extent in certain mofussil parts; with restricted issues of one rupee notes, however, the demand for quarternary rupees stepped up from about the middle of the year.

The demand for small coin continued unabated during 1944-45 and greater quantities were absorbed than in any previous year. The absorption of small coin during the year under review stood at the record figure of Rs. 19·20 crores as compared with Rs. 18·46 crores in 1943-44, Rs. 11·64 crores in 1942-43, Rs. 5·06 crores in 1941-42 and Rs. 2·21 crores in 1939-40, and accounted for 31·3 per cent. of the total absorption of Rs. 61·28 crores since September 1, 1939.

Although the total output and issues of small coin during 1944-45 exceeded those of the previous year, there were signs of a gradual falling off in demand during the closing months of the year. The mintage of small coin amounted to 2,143 million pieces in 1944-45, as against 1,836 million pieces in 1943-44 and 963 million pieces in 1942-43. By the end of the financial year, the mints were able to curtail production. As compared with the peak of 219 million coins in August 1944, the combined output of the three mints declined to 190 million in February 1945 and 199 million in March 1945.

The total absorption of currency, including small coin, during the year was lowered at Rs. 231·64 crores as against Rs. 282·97 crores in 1943-44 and compared with the aggregate total absorption of Rs. 199·10 crores during the whole of the last war period between 1914-15 and 1918-19. Of the total wartime absorption of currency of Rs. 1,136·14 crores to the end of 1944-45, notes accounted for Rs. 934·32 crores or 82 per cent., rupee coin for Rs. 140·54 crores or 12 per cent. and small coin for Rs. 61·28 crores or 6 per cent.

Total Money Supply.—Under this head is given below a somewhat closer analysis of the trends during the course of war in the 'total money supply' in the country and in its main constituents, with a view to indicating the fundamental factors underlying the process of monetary expansion during wartime.

"TOTAL MONEY SUPPLY" IN INDIA.

(Excluding Rupee Coin Circulation.)

(In crores of Rupees.)

Last Friday of	Aug. 1939.	Sept. 1940.	Sept. 1941.	Sept. 1942.	Sept. 1943.	Sept. 1944.	March 1945.
Note Circulation	169	217	268	453	760	941	1,085
Demand Deposits of Banks (Scheduled and Non-Scheduled)	141	163	213	324	473	610	597
Deposits of Reserve Bank ..	43	63	68	91	118	313	393
Notes held by Scheduled Banks.	7	7	7	11	19	25	25
Total Money Supply excluding Rupee Coin	346	436	542	897	1,332	1,839	2,050
Index	100	126	157	259	385	532	592

Note circulation (excluding notes held by banks) plus demand deposits of banks may be said to represent the cash balances of the public; deposits with the Reserve Bank consist of two main items: the cash balances of banks (including a certain necessary amount of reserve balances) and the cash balances of Government (including balances held by the Government on account of certain classes of tax-payers and refundable to the latter). Underlying the rising general trend of 'total money supply, there is a measure of compensatory movements in the cash balances of the public and the cash balances of Government.

As regards the sources of additions to money supply during wartime, the total net accrual of sterling from the balance of payments on private as well as Government's account is the largest part of what may be termed as the inflationary potential the budget deficit on revenue account and the defence expenditure on capital account are other constituents of this inflationary potential: the addition to the internal debt of the country acts largely as a deflationary influence but has been reflected partly in the high and rising level of Government balances recently, the expansion of the public's cash balances given by the addition to the aggregate amount of note circulation, rupee coin and small coin and of deposits of banks, scheduled and non-scheduled, measures the extent of monetary inflation. The progressive series of each of these factors since 1939-40; are given below:—

GENERAL ANALYSIS OF SOURCES OF MONEY SUPPLY.

(In crores of rupees)

	1939-40.	1943-44.	1944-45.

Total of Both ..	92	1,470	2,079
Increase in the Rupee debt of the Central Government since March 31, 1939, progressive	18	623	860

MONETARY AGREEMENTS.

International Monetary Fund.—The year 1945-46 witnessed the establishment of the International Monetary Fund and the International Bank for Reconstruction and Development as, in terms of the Final Act, countries representing more than 65 per cent. of the total of the quotas had signed the Bretton Woods Agreement before December 31, 1945. In order to secure for India the advantages of the original membership of the Fund and of the Bank, the Government of India promulgated an Ordinance on December 24, 1945, providing themselves with the necessary powers for signing the Agreement. This was done on December 27. The inaugural meeting of the Boards of Governors of the Fund and of the Bank was held at Savannah (Georgia) in March. India was represented on both the Boards by Sir Chintaman Deshmukh, Governor of the Reserve Bank of India. The head offices of these institutions will be located in Washington. Their bye-laws have been adopted and the date for admission of those signatories of the Bretton Woods Agreement was extended to the end of 1946. The first annual meeting of the full Board of Governors will be held in September but until

then, to facilitate business, a Procedure Committee of 12 Governors was appointed. In addition, the inaugural meeting proceeded with the work of electing Executive Directors of the Fund and the Bank. In terms of the Final Act, in addition to five Executive Directors appointed by nomination by the Big Five—the U.S.A., the U.K., France, China and India —, seven Executive Directors from amongst the members have been elected. India will be represented on the Fund by Mr. J. V. Joshi, Economic Adviser to the Reserve Bank of India, and on the Bank by Mr. N. Sundaresan, Joint Secretary, Finance Department of the Government of India.

Anglo-American Financial Agreement.— The Anglo-American Financial Agreement entered into in December 1945 and ratified by the American Senate and the House of Representatives in the middle of 1946 may be said to be the biggest step towards the revival of the multi-lateral trade. The agreement stipulates the grant by the U.S.A. of a loan to the United Kindom of $ 4.4 billion (of which $ 650 million was to be applied to the liquidation of lend-lease), and repayment in 50 equal instalments beginning with 1951 and carrying two per cent. interest. The purpose of the loan as stated in the White Paper issued on December 6, 1945, was to facilitate purchases by the United Kingdom of goods and services in the United States, to assist the United Kingdom to meet transitional post-war deficits in her current balance of payments, to help maintain adequate reserves of gold and dollars and generally to enable her to assume the obligations of multilateral clearing. As regards accumulated sterling balances, Britain was to seek an early settlement with the countries concerned ; it was also agreed that one year after the ratification of the loan by both the countries, any sterling balances released will be freely available for current transactions in any currency area without discrimination.

Monetary agreements were concluded with a number of countries during the course of 1945-46 by the British Government. These agreements also applied to India, as the arrangements made covered financial transactions with all countries within the sterling area. In most cases the agreements provided for the fixing of a rate of exchange between the currency of the country concerned and sterling and an arrangement under which payments between the sterling area and these countries were to be made through the medium of sterling accounts of residents in these countries. In certain cases the Governments of the United Kingdom and the signing countries agreed to hold each other's currencies to agreed limits. In all cases the agreements were to be subject to revision in the event of any general international monetary agreement such as would occur when the International Monetary Fund commenced operations. The countries covered by these agreements were Czechoslovakia, Denmark, Finland, Netherlands, and Norway. In the case of Yugoslavia, arrangements were made only for the resumption of financial transactions with Yugoslavia through the medium of payments through "Yugoslav sterling accounts." Monetary agreements were also concluded with Switzerland and Turkey.

The Balance Sheet of the Reserve Bank of India as at 30th June 1945 was as follows:—

THE RESERVE BANK.

The following is the Reserve Bank of India Act of 1934 together with the amendments made therein from time to time:—

Whereas it is expedient to constitute a Reserve Bank for India to regulate the issue of bank notes and the keeping of reserves with a view to securing monetary stability in British India and generally to operate the currency and credit system of the country to its advantage;

And whereas in the present disorganisation of the monetary systems of the world it is not possible to determine what will be suitable as a permanent basis for the Indian monetary system;

But whereas it is expedient to make temporary provision on the basis of the existing monetary system, and to leave the question of the monetary standard best suited to India to be considered when the international monetary position has become sufficiently clear and stable to make it possible to frame permanent measures;

It is hereby enacted as follows:—

(1) A Bank to be called the Reserve Bank of India shall be constituted for the purposes of taking over the management of the currency from the Governor-General in Council and of carrying on the business of banking in accordance with the provisions of this Act.

(2) The Bank shall be a body corporate by the name of the Reserve Bank of India, having perpetual succession and a common seal, and shall by the said name sue and be sued.

Share Capital.—(1) The original share capital of the Bank shall be five crores of rupees divided into shares of one hundred rupees each, which shall be fully paid up.

(2) Separate registers of shareholders shall be maintained at Bombay, Calcutta, Delhi, Madras and Rangoon, and a separate issue of shares shall be made in each of the areas served by those registers, as defined in the First Schedule, and shares shall be transferable from one register to another.

(3) A shareholder shall be qualified to be registered as such in any area in which he is ordinarily resident or has his principal place of business in India, but no person shall be registered as a shareholder in more than one register; and no person who is not—

(*a*) domiciled in India and either an Indian subject of His Majesty, or a subject of a State in India, or

(*b*) a British subject ordinarily resident in India and domiciled in the United Kingdom or in any part of His Majesty's Dominions the government of which does not discriminate in any way against Indian subjects of His Majesty, or

(*c*) a company registered under the Indian Companies Act, 1913, or a society registered under the Co-operative Societies Act, 1912, or any other law for the time being in force in British India relating to co-operative societies or a scheduled bank, or a corporation or company incorporated by or under an Act of Parliament or any law for the time being in force in any part of His Majesty's Dominions the government of which does not discriminate in any way against Indian subjects of His Majesty, and having a branch in British India, in Burma, or

(*d*) a company or co-operative society registered in Burma shall be registered as a shareholder or be entitled to payment of any dividend on any share, and no person, who, having been duly registered as a shareholder, ceases to be qualified to be so registered, shall be able to exercise any of the rights of a shareholder otherwise than for the purpose of the sale of his shares.

(4) The Central Government shall, by notification in the Gazette of India, specify the parts of His Majesty's Dominions which shall be deemed for the purposes of clauses (*b*) and (*c*) of sub-section (3) to be the Parts of His Majesty's Dominions in which no discrimination against Indian or Burman subjects of His Majesty exists.

(4A) Without prejudice to the validity of any registration made before the commencement of the Reserve Bank of India (Second Amendment) Act, 1940, no person after the commencement of that Act, be registered as a shareholder in respect of any shares held by him whether in his own name or jointly with another person or persons in excess of a total nominal value of Rs. 20,000 or be entitled to any dividend on such shares or to exercise any of the rights of a shareholder in respect of such shares otherwise than for the purpose of selling the shares.

(5) The nominal value of the shares originally assigned to the various registers shall be as follows, namely:—

(*a*) to the Bombay register—one hundred and forty lakhs of rupees;

(*b*) to the Calcutta register—one hundred and forty-five lakhs of rupees;

(*c*) to the Delhi register—one hundred and fifteen lakhs of rupees;

(*d*) to the Madras register—seventy lakhs of rupees

(*e*) to the Rangoon register—thirty lakhs of rupees:

Provided that if at the first allotment the total nominal value of the shares on the Delhi register for which applications are received is less than one hundred and fifteen lakhs of rupees, the Central Board shall, before proceeding to any allotment, transfer any shares not applied for up to a maximum nominal value of thirty-five lakhs of rupees from that register in two equal portions to the Bombay and the Calcutta register.

A Committee consisting of two elected members of the Assembly and one elected member of the Council of State to be elected by non-official members of the respective Houses shall be associated with the Central Board for the purpose of making public issue of shares and looking after the first allotment of shares.

(6) In allotting the shares assigned to a register, the Central Board shall, in the first instance, allot five shares to each qualified applicant who has applied for five or more shares; and,

if the number of such applicants is greater than one-fifth of the total number of shares assigned to the register, shall determine by lot the applicants to whom the shares shall be allotted.

(7) If the number of such applicants is less than one-fifth of the number of shares assigned to the register, the Central Board shall allot the remaining shares firstly, up to the limit of one-half of such remaining shares, to those applicants who have applied for less than five shares, and thereafter as to the balance to the various applicants in such manner as it may deem fair and equitable, having regard to the desirability of distributing the shares and the voting rights attached to them as widely as possible.

(8) Notwithstanding anything contained in sub-sections (6) and (7), the Central Board shall reserve for and allot to Government shares of the nominal value of two lakhs and twenty thousand rupees to be held by Government for disposal at par to Directors seeking to obtain the minimum share qualification required under sub-section (2) of section 11.

(9) If, after all applications have been met in accordance with the provisions of sub-sections (6), (7) and (8), any shares remain unallotted, they shall, notwithstanding anything contained in this section, be allotted to and taken up by Government, and shall be sold by the Central Government as soon as may be, at not less than par, to residents of the areas served by the register concerned.

(10) The Central Government shall have no right to exercise any vote under this Act by reason of any shares allotted to him under sub-section (8) or under sub-section (9).

(11) A Director shall not dispose of any shares obtained from Government under the provisions of sub-section (8) otherwise than by re-sale to Government at par, and Government shall be entitled to re-purchase at par all such shares held by any Director on his ceasing from any cause to hold office as Director.

Increase and reduction of share capital—(1) The share capital of the Bank may be increased or reduced on the recommendation of the Central Board, with the previous sanction of the Central Government and with the approval of the Central Legislature, to such extent and in such manner as may be determined by the Bank in general meeting.

(2) The additional shares so created shall be of the nominal value of one hundred rupees each and shall be assigned to the various registers in the same proportions as the shares constituting the original share capital.

(3) Such additional shares shall be fully paid up, and the price at which they may be issued shall be fixed by the Central Board with the previous sanction of the Central Government.

(4) The provisions of section 4 relating to the manner of allotment of the shares constituting the original share capital shall apply to the allotment of such additional shares, and existing shareholders shall not enjoy any preferential right to the allotment of such additional shares.

The Bank shall, as soon as may be, establish offices in Bombay, Calcutta, Delhi, Madras and Rangoon and a branch in London, and may establish branches or agencies in any other place in India or, with the previous sanction of the Governor-General in Council, elsewhere.

The general superintendence and direction of the affairs and business of the Bank shall be entrusted to a Central Board of Directors which may exercise all powers and do all acts and things which may be exercised or done by the Bank and are not by this Act expressly directed or required to be done by the Bank in general meeting.

(1) The Central Board shall consist of the following Directors namely:—

(*a*) a Governor and two Deputy Governors, to be appointed by the Central Government after consideration of the recommendations made by the Board in that behalf.

(*b*) four Directors to be nominated by the Central Government.

(*c*) eight Directors to be elected on behalf of the shareholders on the various registers, in the manner provided in section 9 and in the following numbers, namely:—

(i) for the Bombay register—two Directors;
(ii) for the Calcutta register—two Directors;
(iii) for the Delhi register—two Directors;
(iv) for the Madras register—one Director;
(v) for the Rangoon register—one Director, and

(*d*) one government official to be nominated by the Central Government.

(2) The Governor and Deputy Governors shall devote their whole time to the affairs of the Bank, and shall receive such salaries and allowances as may be determined by the Central Board, with the approval of the Central Government.

(3) A Deputy Governor and the Director nominated under clause (*d*) of sub-section (1) may attend any meeting of the Central Board and take part in its deliberations but shall not be entitled to vote:

Provided that when the Governor is absent a Deputy Governor authorized by him in this behalf in writing may vote for him.

(4) The Governor and a Deputy Governor shall hold office for such term not exceeding five years as the Governor-General in Council may fix when appointing them, and shall be eligible for re-appointment.

A Director nominated under clause (*b*) or elected under clause (*c*) of sub-section (1) shall hold office for five years, or thereafter until his successor shall have been duly nominated or elected, and, subject to the provisions of section 10, shall be eligible for re-nomination or re-election.

A Director nominated under clause (*d*) of sub-section (1) shall hold office during the pleasure of the Central Government.

(5) No act or proceeding of the Board shall be questioned on the ground merely of the existence of any vacancy in, or any defect in the constitution of the Board.

Local Boards.—(1) Local Board shall be constituted for each of the five areas specified in the First Schedule, and shall consist of—

(*a*) five members elected from amongst themselves by the shareholders who are regis-

tered on the register for that area and are qualified to vote, and

(*b*) not more than three members nominated by the Central Board from amongst the shareholders registered on the register for that area, who may be nominated at any time:

Provided that the Central Board shall in exercising this power of nomination aim at securing the representation of territorial or economic interests not already represented, and in particular the representation of agricultural interests and the interests of co-operative banks.

(2) At an election of members of a Local Board for any area, any shareholder who has been registered on the register for that area, for a period of not less than six months ending with the date of the election, as holding five shares shall have one vote, and each shareholder so registered as having more than five shares shall have one vote for each five shares, but subject to a maximum of ten votes, and such votes may be exercised by proxy appointed on each occasion for that purpose, such proxy being himself a shareholder entitled to vote at the election and not being an employee of the Bank.

(3) The members of a Local Board shall hold office until they vacate it under sub-section (6) and, subject to the provisions of section 10 shall be eligible for re-election or re-nomination as the case may be.

(4) At any time within three months of the day on which the Directors representing the shareholders on any register are due to retire under the provisions of this Act, the Central Board shall direct an election to be held of members of the Local Board concerned, and shall specify a date from which the registration of transfer from and to the register shall be suspended until the election has taken place.

(5) On the issue of such direction the Local Board shall give notice of the date of the election and shall publish a list of shareholders holding five or more shares, with the dates on which their shares were registered, and with their registered addresses, and such list shall be available for purchase not less than three weeks before the date fixed for the election.

(6) The names of the persons elected shall be notified to the Central Board which shall thereupon proceed to make any nominations permitted by clause (*b*) of sub-section (1) it may then decide to make, and shall fix the date on which the outgoing members of the Local Board shall vacate office, and the incoming members shall be deemed to have assumed office on that date.

(7) The elected members of a Local Board shall as soon as may be after they have been elected, elect from amongst themselves one or two persons, as the case may be, to be Directors representing to the shareholders on the register for the area for which the Board is constituted.

(8) A Local Board shall advise the Central Board on such matters as may be generally or specifically referred to it and shall perform such duties as the Board may by regulations, delegate to it.

(1) No person may be a Director or a member of a Local Board who—

(*a*) is a salaried government official or a salaried official of a State in India, or

(*b*) is, or at any time has been, adjudicated an insolvent, or has suspended payment or has compounded with his creditors, or

(*c*) is found lunatic or becomes of unsound mind, or

(*d*) is an officer or employee of any bank, or

(*e*) is a director of any bank, other than a bank which is a society registered or deemed to be registered under the Co-operative Societies Act, 1912, or any other law for the time being in force in British India relating to co-operative societies.

(2) No two persons who are partners of the same mercantile firm, or are directors of the same private company, or one of whom is the general agent of or holds a power of procuration from the other, or from a mercantile firm of which the other is a partner, may be Directors or members of the same Local Board at the same time.

(3) Nothing in clause (*a*), clause (*d*) or clause (*e*) of sub-section (1) shall apply to the Governor, or to a Deputy Governor or to the Director nominated under clause (*d*) of sub-section (1) of section 8.

(1) The Central Government may remove from office the Governor, or a Deputy Governor or any nominated or elected Director:

Provided that in the case of a Director nominated or elected under clause (*b*) or clause (*c*) of sub-section (1) of section 8 this power shall be exercised only on a resolution passed by the Central Board in that behalf by a majority consisting of not less than nine Directors.

(2) A Director nominated or elected under clause (*b*) or clause (*c*) of sub-section (1) of section 8, and any member of a Local Board shall cease to hold office if, at any time after six months from the date of his nomination or election, he is not registered as a holder of unencumbered shares of the Bank of a nominal value of not less than five thousand rupees, or if he ceases to hold unencumbered shares of that value, and any such Director shall cease to hold office if without leave from the Governor-General in Council he absents himself from the consecutive meetings of the Central Board convened under sub-section (1) of section 13.

(3) The Central Government shall remove from office any Director, and the Central Board shall remove from office any member of a Local Board, if such Director or member becomes subject to any of the disqualifications specified in sub-section (1) or sub-section (2) of section 10.

(4) A Director or member of a Local Board removed or ceasing to hold office under the foregoing sub-sections shall not be eligible for re-appointment either as Director or as member of a Local Board until the expiry of the term for which his appointment was made.

(5) The appointment, nomination or election as Director or member of a Local Board of any person who is a member of the Indian Legislature or of a local Legislature shall be void

unless, within two months of the date of his appointment, nomination or election, he ceases to be such member, and, if any Director or member of a Local Board is elected or nominated as a member of any such Legislature, he shall cease to be a Director or member of the Local Board as from the date of such election or nomination, as the case may be.

(6) A Director may resign his office to the Governor-General in Council, and a member of a Local Board may resign his office to the Central Board, and on the acceptance of the resignation the office shall become vacant.

(1) If the Governor or a Deputy Governor by infirmity or otherwise is rendered incapable of executing his duties or is absent on leave or otherwise in circumstances not involving the vacation of his appointment, the Central Government may, after consideration of the recommendations made by the Central Board in this behalf, appoint another person to officiate for him, and such person may, notwithstanding anything contained in clause (*d*) of sub-section (1) of section 10, be an officer of the Bank.

(2) If an elected Director is for any reason unable to attend a particular meeting of the Central Board, the elected members of the Local Board of the area which he represents may elect one of their number to take his place, and for the purposes of that meeting the substitute so elected shall have all the powers of the absent Director.

(3) Where any casual vacancy in the office of any member of a Local Board occurs otherwise than by the occurrence of a vacancy in the office of a Director elected by the Local Board, the Central Board may nominate thereto any qualified person recommended by the elected members of the Local Board.

(4) Where any casual vacancy occurs in the office of a Director other than the vacancies provided for in sub-section (1), the vacancy shall be filled, in the case of a nominated Director by nomination, and in the case of an elected Director by election held in the manner provided in section 9 for the election of Directors:

Provided that before such election is made the resulting vacancy, if any, in the Local Board and any vacancy in the office of an elected member of such Board which may have been filled by a member nominated under sub-section (3) shall be filled by election held as nearly as may be in the manner provided in section 9 for the election of members of a Local Board.

(5) A person nominated or elected under this section to fill a casual vacancy shall, subject to the proviso contained in sub-section (4), hold office for the unexpired portion of the term of his predecessor.

(1) Meetings of the Central Board shall be convened by the Governor at least six times in each year and at least once in each quarter.

(2) Any three Directors may require the Governor to convene a meeting of the Central Board at any time and the Governor shall forthwith convene a meeting accordingly.

(3) The Governor, or in his absence the Deputy Governor authorised by the Governor under the proviso to sub-section (3) of section 8 to vote for him, shall preside at meetings of the Central Board, and, in the event of an equality of votes, shall have a second or casting vote.

General Meetings.—(1) A general meeting (hereinafter in this Act referred to as the annual general meeting) shall be held annually at a place in British India where there is an office of the Bank within six weeks from the date on which the annual accounts of the Bank are closed, and a general meeting may be convened by the Central Board at any other time:

Provided that the annual general meeting shall not be held on two consecutive occasions at any one place.

(2) The shareholders present at a general meeting shall be entitled to discuss the annual accounts, the report of the Central Board on the working of the Bank throughout the year and the auditors' report on the annual balance-sheet and accounts.

(3) Every shareholder shall be entitled to attend at any general meeting and each shareholder who has been registered on any register, for a period of not less than six months ending with the date of the meeting, as holding five or more shares shall have one vote and on a poll being demanded each shareholder so registered shall have one vote for each five shares, but subject to a maximum of ten votes and such votes may be exercised by proxy appointed on each occasion for that purpose, such proxy being himself a shareholder entitled to vote at the election and not being an officer or employee of the Bank.

Central Board's First Constitution.—(1) The following provisions shall apply to the first constitution of the Central Board, and, notwithstanding anything contained in section 8, the Central Board as constituted in accordance therewith shall be deemed to be duly constituted in accordance with this Act.

(2) The first Governor and the first Deputy Governor or Deputy Governors shall be appointed by the Central Government on its own initiative, and shall receive such salaries and allowances as it may determine.

(3) The first eight Directors representing the shareholders on the various registers shall be nominated by the Central Government from the areas served respectively by those registers, and the Directors so nominated shall hold office until their successors shall have been duly elected as provided in sub-section (4).

(4) On the expiry of each successive period of twelve months after the nomination of Directors under sub-section (3) two Directors shall be elected in the manner provided in section 9 until all the Directors so nominated have been replaced by elected Directors holding office in accordance with section 8. The register in respect of which the election is to be held shall be selected by lot from among the registers still represented by nominated Directors, and for the purposes of such lot the Madras and Rangoon registers shall be treated as if they comprised one register only.

As soon as may be after the commencement of this Act, the Central Board shall direct elections to be held and may make nominations, in order to constitute Local Boards in accordance with the provision of section 9, and the

members of such Local Boards shall hold office up to the date fixed under sub-section (6) of section 9 but shall not exercise any right under sub-section (7) of that section.

Business.—The Bank shall be authorized to carry on and transact the several kinds of business hereinafter specified, namely:—

(1) the accepting of money on deposit without interest from, and the collection of money for, the Secretary of State, the Central Government (the Federal Railway Authority, the Provincial Governments, the Government of Burma, the British Military Administration, Burma, the Burma Railway Board), States in India, local authorities, banks and any other persons;

(2) (*a*) the purchase, sale and rediscount of bills of exchange and promissory notes, drawn on India or Burma and payable in India or Burma and arising out of *bona fide* commercial or trade transactions bearing two or more good signatures, one of which shall be that of a scheduled bank or a Burma scheduled Bank, and maturing within ninety days from the date of such purchase or rediscount, exclusive of days of grace;

(*b*) the purchase, sale and rediscount of bills of exchange and promissory notes, drawn either in India or in Burma and payable either in India or in Burma and bearing two or more good signatures, one of which shall be that of a scheduled bank, a Burma scheduled bank, a provincial co-operative bank or a Burma co-operative bank, and drawn or issued for the purpose of financing seasonal agricultural operations or the marketing of crops, and maturing within nine months from the date of such purchase or rediscount, exclusive of days of grace;

(*c*) the purchase, sale and rediscount of bills of exchange and promissory notes drawn either in India or Burma and payable either in India or Burma and bearing the signature of a scheduled bank or a Burma scheduled Bank, and issued or drawn for the purpose of holding or trading in securities of the Central Government, a Provincial Government, or the Government of Burma, or such securities of States in India as may be specified in this behalf by the Central Government on the recommendation of the Central Board, and maturing within ninety days from the date of such purchase or rediscount, exclusive of days of grace;

(3) (*a*) the purchase from and sale to scheduled banks and Burma scheduled Banks of sterling in amounts of not less than the equivalent of one lakh of rupees;

(*b*) the purchase, sale and rediscount of bills of exchange (including treasury bills) drawn in or on any place in the United Kingdom and maturing within ninety days from the date of purchase, provided that no such purchase, sale or rediscount shall be made in India except with a scheduled bank or in Burma except with a scheduled bank or a Burma scheduled bank; and

(*c*) the keeping of balances with banks in the United Kingdom;

(4) the making to States in India, local authorities, scheduled banks, Burma scheduled banks, provincial co-operative banks, and Burma co-operative banks, and the principal currency authority of Ceylon of loans and advances, repayable on demand or on the expiry of fixed periods not exceeding ninety days, against the security of—

(*a*) stocks, funds and securities (other than immovable property) in which a trustee is authorized to invest trust money by any Act of Parliament or by any law for the time being in force in British India or Burma;

(*b*) gold or silver or documents of title to the same;

(*c*) such bills of exchange and promissory notes as are eligible for purchase or rediscount by the Bank;

(*d*) promissory notes of any scheduled bank, Burma scheduled bank, provincial co-operative bank or Burma co-operative bank, supported by documents of title to goods which have been transferred, assigned, or pledged to any such bank as security for a cash credit or overdraft granted for *bona fide* commercial or trade transactions, or for the purpose of financing seasonal agricultural operations or the marketing of crops;

(5) the making to the Central Government, (the Federal Railway Authority, Provincial Governments, the Government of Burma and the Burma Railway Board) of advances repayable in each case not later than three months from the date of the making of the advance;

(6) the issue of demand drafts made payable at its own offices or agencies and the making, issue and circulation of bank post bills;

(7) the purchase and sale of Government securities of the United Kingdom maturing within ten years from the date of such purchase

(8) the purchase and sale of securities of the Central Government, a Provincial Government, or the Government of Burma of any maturity or of such securities of a local authority or such Indian States as may be specified in this behalf by the Central Government on the recommendation of the Central Board;

Provided that securities fully guaranteed as to principal and interest by any such Government, authority, or State shall be deemed for the purposes of this clause to be securities of such Government, authority or State;

Provided further that the amount of such securities held at any time in the Banking Department shall be so regulated that—

(*a*) the total value of such securities shall not exceed the aggregate amount of the share capital of the Bank, the Reserve Fund and three-fifths of the liabilities of the Banking Department in respect of deposits;

(*b*) the value of such securities maturing after one year shall not exceed the aggregate amount of the share capital of the Bank, the reserve fund and two-fifths of the liabilities of the Banking Department in respect of deposits; and

(*c*) the value of such securities maturing after ten years shall not exceed the aggregate amount of the share capital of the Bank and the Reserve Fund and one-fifth of the liabilities of the Banking Department in respect of deposits;

(9) the custody of monies, securities and other articles of value, and the collection of the proceeds, whether principal, interest or dividends, of any such securities;

(10) the sale and realisation of all property, whether movable or immovable, which may in any way come into the possession of the Bank in satisfaction, or part satisfaction, of any of its claims;

(11) the acting as agent for the Secretary of State, the Central Government (or any Provincial Government or the Government of Burma, or any local authority or any Indian State) in the transaction of any of the following kinds of business, namely:—

(*a*) the purchase and sale of gold or silver;

(*b*) the purchase, sale, transfer and custody of bills of exchange, securities or shares in any company;

(*c*) the collection of the proceeds, whether principal, interest or dividends, of any securities or shares;

(*d*) the remittance of such proceeds, at the risk of the principal, by bills of exchange payable either in India or elsewhere;

(*e*) the management of public debt;

(12) the purchase and sale of gold coin and bullion;

(13) the opening of an account with or the making of an agency agreement with, and the acting as agent or correspondent of, banks which are the principal currency authorities of any country under the law for the time being in force in that country or any international bank formed by such banks, and the investing of the funds of the Bank in the shares of any such international bank;

(14) the borrowing of money for a period not exceeding one month for the purposes of the business of the bank, and the giving of security for money so borrowed;

Provided that no money shall be borrowed under this clause from any person in India or Burma other than a scheduled Bank or from any person outside India and Burma other than a bank which is the principal currency authority of any country under the law for the time being in force in that country;

Provided further that the total amount of borrowings from persons in India and Burma shall not at any time exceed the amount of the share capital of the Bank;

(15) the making and issue of bank notes subject to the provisions of this Act and the making and issue of Burma notes in accordance with the law of Burma, and

(16) generally, the doing of all such matters and things as may be incidental to or consequential upon the exercise of its powers or the discharge of its duties under this Act and the law of Burma;

When, in the opinion of the Central Board or, where the powers and functions of the Central Board under this section have been delegated to a committee of the Central Board or to the Governor, in the opinion of such committee or of the Governor as the case may be, a special occasion has arisen making it necessary or expedient that action should be taken under this section for the purpose of regulating credit in the interests of Indian or Burman trade, commerce, industry and agriculture, the Bank may, notwithstanding any limitation contained in sub-clauses (*a*) and (*b*) of clause (2) or sub-clause (*a*) or (*b*) of clause (3) or clause (4) of section 17—

(1) purchase, sell or discount any of the bills of exchange or promissory notes specified in sub-clause (*a*) or (*b*) of clause (2) or sub-clause (*b*) of clause (3) of that section though such bill or promissory note does not bear the signature of a scheduled bank, a Burma scheduled bank, a provincial co-operative bank or a Burma co-operative bank; or

(2) purchase or sell sterling in amounts of not less than the equivalent of one lakh of rupees; or

(3) make loans or advances repayable on demand or on the expiry of fixed periods not exceeding ninety days against the various forms of security specified in clause (4) of that section;

Provided that a committee of the Board or the Governor shall not, save in cases of special urgency, authorise action under this section without prior consultation with the Central Board and that in all cases action so authorized shall be reported to the members of the Central Board forthwith.

Forbidden Business.—Save as otherwise provided in sections 17, 18 and 45, the Bank may not—

(1) engage in trade or otherwise have a direct interest in any commercial, industrial or other undertaking except such interest as it may in any way acquire in the course of the satisfaction of any of its claims: provided that all such interests shall be disposed of at the earliest possible moment;

(2) purchase its own shares or the shares of any other bank or of any company, or grant loans upon the security of any such shares;

(3) advance money on mortgage of, or otherwise on the security of immovable property or documents of title relating thereto, or become the owner of immovable property, except so far as is necessary for its own business premises and residences for its officers and servants;

(4) make loans or advances;

(5) draw or accept bills payable otherwise than on demand;

(6) allow interest on deposits or current account.

CENTRAL BANKING FUNCTIONS.

The Bank shall undertake to accept monies for account of the Secretary of State, the Central Government, the Provincial Governments and such States in India as may be approved of and notified by the Central Government in the Gazette of India, and to make payments up to the amount standing to the credit of their accounts respectively, and to carry out their exchange, remittance and other banking operations, including the management of the public debt.

(1) The Central Government and Provincial Governments shall entrust the Bank, on such conditions as may be agreed upon, with all their money, remittance, exchange and banking transactions in India, and, in particular, shall deposit free of interest all their cash balances with the Bank;

Provided that nothing in this sub-section shall prevent the Central Government or any Provincial Government from carrying on money transactions at places where the Bank has no branches or agencies, and the Central Government and Provincial Governments may hold at such places such balances as they may require.

(2) The Central Government and each Provincial Government shall entrust the Bank, on such conditions as may be agreed upon, with the management of the public debt and with the issue of any new loans.

(3) In the event of any failure to reach agreement on the conditions referred to in this section the Central Government shall decide what the conditions shall be.

(4) Any agreement made under this section to which the Central Government or any Provincial Government is a party shall be laid, as soon as may be after it is made, before the Central Legislature and in the case of a Provincial Government before the Provincial Legislature also.

Bank Notes.—(1) The Bank shall have the sole right to issue bank notes in British India, and may, for a period which shall be fixed by the Central Government on the recommendation of the Central Board, issue currency notes of the Government of India supplied to it by the Central Government, and the provisions of this Act applicable to bank notes shall, unless a contrary intention appears, apply to all currency notes of the Government of India issued either by the Central Government or by the Bank in like manner as if such currency notes were bank notes, and references in this Act to bank notes shall be construed accordingly.

(2) On and from the date on which this Chapter comes into force the Central Government shall not issue any currency notes.

Issue Department.—(1) The issue of bank notes shall be conducted by the Bank in an Issue Department which shall be separated and kept wholly distinct from the Banking Department, and the assets of the Issue Department shall not be subject to any liability other than the liabilities of the Issue Department as hereinafter defined in section 34.

(2) The Issue Department shall not issue bank notes to the Banking Department or to any other person except in exchange for other bank notes or for such coin, bullion or securities as are permitted by this Act to form part of the Reserve;

(3) In this section, references to bank notes include references to Burma notes.

Bank notes shall be of the denominational value of five rupees, ten rupees, fifty rupees, one hundred rupees, five hundred rupees, one thousand rupees and ten thousand rupees, unless otherwise directed by the Central Government on the recommendation of the Central Board.

The design, form and material of bank notes shall be such as may be approved by the Central Government after consideration of the recommendations made by the Central Board.

(1) Subject to the provisions of sub-section (2), every bank note shall be legal tender at any place in British India in payment or on account for the amount expressed therein, and shall be guaranteed by the Central Government.

(2) On recommendation of the Central Board the Central Government may, by notification in the Gazette of India, declare that, with effect from such date as may be specified in the notification, any series of bank notes of any denomination shall cease to be legal tender save at an office or agency of the Bank.

(3) Every Burma note shall be guaranteed by the Central Government.

The Bank shall not re-issue bank notes which are torn, defaced or excessively soiled.

(1) Notwithstanding anything contained in any enactment or rule of law to the contrary, no person shall of right be entitled to recover from the Central Government or the Bank, the value of any lost, stolen, mutilated or imperfect currency note of the Government of India, or bank note;

Provided that the Bank may, with the previous sanction of the Central Government, prescribe the circumstances in and the conditions and limitations subject to which the value of such currency notes or bank notes may be refunded as of grace and the rules made under this proviso shall be laid on the table of both Houses of the Central Legislature.

(2) The Provisions of sub-section (1) of this section, other than the proviso thereto, shall apply to Burma notes as they apply to bank notes; and refunds may be made as of grace in respect of Burma notes in accordance with the provision made in that behalf by the law of Burma.

The Bank shall not be liable to the payment of any stamp duty under the Indian Stamp Act, 1899, in respect of bank notes or Burma notes issued by it.

(1) If in the opinion of the Central Government the Bank fails to carry out any of the obligations imposed on it by or under this Act or by or under the law of Burma, the Central Government may, by notification in the Gazette of India, declare the Central Board to be superseded, and thereafter the general superintendence and direction of the affairs of the Bank shall be entrusted to such agency as the Central Government may determine, and such agency may exercise the powers and do all acts and things which may be exercised or done by the Central Board under this Act.

(2) When action is taken under this section the Central Government shall cause a full report of the circumstances leading to such action and of the action taken to be laid before the Central

Legislature at the earliest possible opportunity and in any case within three months from the issue of the notification superseding the Board.

No person in British India other than the Bank or, as expressly authorized by this Act, the Central Government shall draw, accept, make or, issue any bill of exchange, hundi, promissory note or engagement for the payment of money payable to bearer on demand, or borrow, owe or take up any sum or sums of money on the bills, hundis or notes payable to bearer on demand of any such person :

Provided that cheques or drafts, including hundis, payable to bearer on demand or otherwise may be drawn on a person's account with a banker, shroff or agent.

(1) Any person contravening the provisions of section 31 shall be punishable with fine which may extend to the amount of the bill, hundi, note or engagement in respect whereof the offence is committed.

(2) No prosecution under this section shall be instituted except on complaint made by the Bank.

Assets of the Issue Department.

(1) The assets of the Issue Department shall consist of gold coin, gold bullion, sterling securities, rupee coin and rupee securities to such aggregate amount as is not less than the total of the liabilities of the Issue Department as hereinafter defined.

(2) Of the total amount of the assets, not less than two-fifths shall consist of gold coin, gold bullion or sterling securities :

Provided that the amount of gold coin and gold bullion shall not at any time be less than forty crores of rupees in value.

(3) The remainder of the assets shall be held in rupee coin, Government of India rupee securities of any maturity and such bills of exchange and promissory notes payable in British India or in Burma, as are eligible for purchase by the Bank under sub-clause (*a*) or sub-clause (*b*) of clause (2) of section 17 or under clause (1) of section 18 :

Provided that the amount held in Government of India rupee securities shall not at any time exceed one-fourth of the total amount of the assets or fifty crores of rupees, whichever amount is greater, or, with the previous sanction of the Central Government, such amount plus a sum of ten crores of rupees.

An ordinance issued on February 8, 1941 called as the Reserve Bank of India (Amendment) Ordinance, 1941, omitted the proviso to sub-section (3).

(4) For the purposes of this section, gold coin and gold bullion shall be valued at 8.47512 grains of fine gold per rupee, rupee coin shall be valued at its face value, and securities shall be valued at the market rate for the time being obtaining.

(5) Of the gold coin and gold bullion held as assets, not less than seventeen-twentieths shall be held in British India, and all gold coin and gold bullion held as assets shall be held in the custody of the Bank or its agencies :

Provided that gold belonging to the Bank which is in any other bank or in any mint or treasury or in transit may be reckoned as part of the assets.

(6) For the purposes of this section, the sterling securities which may be held as part of the assets shall be securities of any of the following kinds payable in the currency of the United Kingdom, namely :—

(*a*) balances at the credit of the Issue Department with the Bank of England ;

(*b*) bills of exchange bearing two or more good signatures and drawn on and payable at any place in the United Kingdom and having a maturity not exceeding ninety days ;

(*c*) government securities of the United Kingdom maturing within five years :

Provided that, for a period of two years from the date on which this Chapter comes into force, any of such last mentioned securities may be securities maturing after five years, and the Bank may, at any time before the expiry of that period, dispose of such securities notwithstanding anything contained in section 17.

Liabilities of the Issue Department.—(1) The liabilities of the Issue Department shall be an amount equal to the total of the amount of the currency notes of the Government of India and bank notes for the time being in circulation.

(2) For the purposes of this section any currency note of the Government of India or bank note which has not been presented for payment within forty years from the 1st day of April following the date of its issue shall be deemed not to be in circulation, and the value thereof shall, notwithstanding anything contained in sub-section (2) of section 25, be paid by the Issue Department to Central Government or the Banking Department, as the case may be, but any such note, if subsequently presented for payment, shall be paid by the Banking Department, and any such payment in the case of a currency note of the Government of India shall be debited to the Central Government.

In this section, references to bank notes include references to Burma notes.

On the date on which this Chapter comes into force the Issue Department shall take over from the Central Government the liability for all the currency notes of the Government of India for the time being in circulation and the Central Government shall transfer to the Issue Department gold coin, gold bullion, sterling securities, rupee coin and rupee securities to such aggregate amount as is equal to the total of the amount of the liability so transferred. The coin, bullion and securities shall be transferred in such proportion as to comply with the requirements of section 33 :

Provided that the total amount of the gold coin, gold bullion and sterling securities so transferred shall not be less than one-half of the whole amount transferred, and that the amount of rupee coin so transferred shall not exceed fifty crores of rupees.

Provided further that the whole of the gold coin and gold bullion held by the Central Government in the gold standard reserve and the paper currency reserve at the time of transfer shall be so transferred.

(1) After the close of any financial year in which the minimum amount of rupee coin held in the assets, as shown in any of the weekly accounts of the Issue Department for that year prescribed under sub-section (1) of section 53, is greater than fifty crores of rupees or one-sixth of the total amount of the assets as shown in that account, whichever may be the greater the Bank may deliver to the Central Government rupee coin up to the amount of such excess but not without that Governments' consent exceeding five crores of rupees, against payment of legal tender value in the form of bank notes, gold or securities:

Provided that if the Bank so desires and if the amount of gold coin, gold bullion and sterling securities in the assets does not at that time exceed one-half of the total assets, a proportion not exceeding two-fifths of such payment shall be in gold coin, gold bullion or such sterling securities as may be held as part of the assets under sub-section (6) of section 33.

(2) After the close of any financial year in which the maximum amount of rupee coin held in the assets, as so shown, is less than fifty crores of rupees or one-sixth of the total amount of the assets, as so shown, whichever may be the greater the Central Government shall deliver to the Bank rupee coin up to the amount of such deficiency, but not without its consent exceeding five crores of rupees, against payment of legal tender value.

At the close of any week in which the amount of rupee coin held in the assets, as shown in the weekly accounts of the Issue Department for that week, is less than fifty crores of rupees or one-sixth of the total amount of the assets as so shown, whichever may be the greater, the Central Government may, with the consent of the Bank, deliver to the Bank rupee coin upto the amount of such deficiency against payment of legal tender value.

(1) Notwithstanding anything contained in the foregoing provisions, the Bank may, with the previous sanction of the Central Government for periods not exceeding thirty days in the first instance, which may, with the like sanction, be extended from time to time by periods not exceeding fifteen days, hold as assets gold coin, gold bullion or sterling securities of less aggregate amount than that required by sub-section (2) of section 33 and, whilst the holding is so reduced, the proviso to that sub-section shall cease to be operative:

Provided that the gold coin and gold bullion held as such assets shall not be reduced below the amount specified in the proviso to sub-section (2) of section 33 so long as any sterling securities remain held as such assets.

(2) In respect of any period during which the holding of gold coin, gold bullion and sterling securities is reduced under sub-section (1), the Bank shall pay to the Central Government a tax upon the amount by which such holding is reduced below the minimum "prescribed by sub-section (2) of section 33; and such tax shall be payable at the bank rate for the time being in force, with an addition of one per cent. per annum when such holding exceeds thirty-two and a half per cent. of the total amount of the assets and of a further one and a half per cent. per annum in respect of every further decrease, of two and a half per cent. or part of such decrease:

Provided that the tax shall not in any event be payable at a rate less than six per cent. per annum.

The Central Government shall undertake not to re-issue any rupee coin delivered under section 36 nor to put into circulation any rupees, except through the Bank and as provided in that section; and the Bank shall undertake not to dispose of rupee coin otherwise than for the purposes of circulation or by delivery to the Central Government under that section.

(1) The Bank shall issue rupee coin on demand in exchange for bank notes and currency notes of the Government of India, and shall issue currency notes or bank notes on demand in exchange for coin which is legal tender under the Indian Coinage Act, 1906.

(2) The Bank shall, in exchange for currency notes or bank notes of five rupees or upwards, supply currency notes or bank notes of lower value or other coins which are legal tender under the Indian Coinage Act, 1906, in such quantities as may, in the opinion of the Bank, be required for circulation; and the Central Government shall supply such coins to the Bank on demand. If the Central Government at any time fails to supply such coins, the Bank shall be released from its obligations to supply them to the public.

Obligation to sell sterling.—The Bank shall sell, to any person who makes a demand in that behalf at its office in Bombay, Calcutta, Delhi, Madras or Rangoon and pays the purchase price in legal tender currency, sterling for immediate delivery in London, at a rate not below one shilling and five pence and forty nine sixty-fourths of a penny for a rupee:

Provided that no person shall be entitled to demand to buy an amount of sterling less than ten thousand pounds.

Obligation to Buy Sterling.—The Bank shall buy, from any person, who makes a demand in that behalf at its office in Bombay, Calcutta, Delhi, Madras or Rangoon, sterling for immediate delivery in London, at a rate not higher than one shilling and six pence and three sixteenths of a penny for a rupee:

Provided that no person shall be entitled to demand to sell an amount of sterling less than ten thousand pounds.

Provided further that no person shall be entitled to receive payment unless the Bank is satisfied that payment of the sterling in London has been made.

(4) (1) The Bank shall provide any person who makes a demand in that behalf with remittance between its office in Rangoon and such office or offices in India as may be prescribed by

the Central Board, in such amounts, at such fixed rate of exchange and subject only to such rate or rates of commission as may be approved by the Central Government and the Government of Burma.

Provided that so long as the Bank is bound under Part II of the India and Burma (Burma Monetary Arrangements) Order, 1937, to issue on demand India rupee coin in exchange for legal tender notes, the rate of exchange shall be at par.

(2) Burma assets and liabilities of the bank or any scheduled bank shall be valued, for the purposes of this Act, at the rate of exchange so fixed or, as the case may be at par.

Cash Reserves of Scheduled Banks.— (1) Every bank included in the Second Schedule shall maintain with the Bank a balance the amount of which shall not at the close of business on any day be less than five per cent. of the demand liabilities and two per cent. of the time liabilities of such bank in India and Burma as shown in the return referred to in sub-section (2).

Explanation.— For the purposes of this section liabilities shall not include the paid-up capital or the reserves, or any credit balance in the profit and loss account of the bank or the amount of any loan taken from the Reserve Bank.

(2) Every scheduled bank shall send to the Central Government and to the Bank a return signed by two responsible officers of such bank showing :-

(*a*) the amounts of its demand and time liabilities, respectively, in India,

(*b*) the amounts of its demand and time liabilities, respectively, in Burma,

(*c*) the total amount held in India in currency notes of the Government of India and bank notes,

(*d*) the total amount held in India in Burma notes,

(*e*) the total amount held in Burma in currency notes of the Government of India and bank notes,

(*f*) the total amount held in Burma notes,

(*g*) the amounts held in India in rupee coin and subsidiary coin, respectively,

(*h*) the amounts held in Burma in rupee coin, subsidiary coin and Burma coin, respectively,

(*i*) the amounts of advances made and of bills discounted in India, respectively,

(*j*) the amounts of advances made and of bills discounted in Burma, respectively, and

(*k*) the balance held at the Bank,

at the close of business on each Friday, or if Friday is a public holiday under the Negotiable Instruments Act, 1881, at the close of business on the preceding working day ; and such return shall be sent not later than two working days after the date to which it relates :

Provided that where the Bank is satisfied that the furnishing of a weekly return under this sub-section is impracticable in the case of any scheduled bank by reason of the geographical position of the bank and its branches, the Bank may require such bank to furnish in lieu of a weekly return a monthly return to be despatched not later than fourteen days after the end of the month to which it relates giving the details specified in this sub-section in respect of such bank at the close of business for the month.

(3) If at the close of business on any day before the day fixed for the next return, the balance held at the Bank by any scheduled bank is below the minimum prescribed in sub-section (1), such scheduled bank shall be liable to pay to the Bank in respect of each such day penal interest at a rate three per cent. above the bank rate on the amount by which the balance with the Bank falls short of the prescribed minimum, and if on the day fixed for the next return such balance is still below the prescribed minimum as disclosed by this return, the rates of penal interest shall be increased to a rate five per cent. above the bank rate in respect of that day and each subsequent day on which the balance held at the Bank at the close of business on that day is below the prescribed minimum.

(3A) When under the provision of sub-section (3) penal interest at the increased rate of five per cent. above the bank rate has become payable by a scheduled bank, if thereafter on the day fixed for the next return the balance held at the Bank is still below the prescribed minimum as disclosed by this return,

(*a*) every director and any managing agent, manager or secretary of the scheduled bank, who is knowingly and wilfully a party to the default, shall be punishable with fine which may extend to five hundred rupees and with a further fine which may extend to five hundred rupees for each subsequent day on which the default continues, and

(*b*) the Bank may prohibit the scheduled bank from receiving after the said day any fresh deposit,

and, if default is made by the scheduled bank in complying with the prohibition referred to in clause (*b*), every director and officer of the scheduled bank who is knowingly and wilfully a party to such default or who through negligence or otherwise contributes to such default shall in respect of each such default be punishable with fine which may extend to five hundred rupees and with a further fine which may extend to five hundred rupees for each day after the first on which a deposit received in contravention of such prohibition is retained by the scheduled bank

(4) Any scheduled bank failing to comply with the provisions of sub-section (2) shall be liable to pay to the Central Government or to the Bank, as the case may be, or to each, a penalty of one hundred rupees for each day during with the failure continues.

(5) The penalties imposed by sub-sections (3) and (4) shall be payable on demand made by the Bank, and, in the event of a refusal by the defaulting bank to pay on such demand, may be levied by a direction of the principal Civil Court having jurisdiction in the area where an

office of the defaulting bank is situated, such direction to be made only upon application made in this behalf to the Court by the Central Government in the case of a failure to make a return under sub-section (2) to the Central Government, or by the Bank with the previous sanction of the Central Government in other cases.

(6) The Central Government shall, by notification in the Gazette of India, direct the inclusion in the Second Schedule of any bank not already so included which carries on the business of banking in British India and which—

(*a*) has a paid-up capital and reserves of an aggregate value of not less than five lakhs of rupees, and

(*b*) is a company as defined in clause (2) of section 2 of the Indian Companies Act, 1913, or a corporation or a company incorporated by or under any law in force in any place outside British India,

and shall by a like notification direct the exclusion from that Schedule of any scheduled bank the aggregate value of whose paid-up capital and reserves becomes at any time less than five lakhs of rupees, or which goes into liquidation or otherwise ceases to carry on banking business.

The Bank shall compile and shall cause to be published each week a consolidated statement showing the aggregate of the amounts under each clause of sub-section (2) of section 42 exhibited in the returns received from scheduled banks under that section and from Burma scheduled banks under the corresponding provisions of the law of Burma.

The Bank may require any provincial co-operative bank with which it has any transactions under section 17 to furnish the return referred to in sub-section (2) of section 42, and if it does so, the provisions of sub-sections (4) and (5) of section 42 shall apply so far as may be to such co-operative bank as if it were a scheduled bank.

Agreement with the Imperial Bank.—(1) The Bank shall enter into an agreement with the Imperial Bank of India which shall be subject to the approval of the Central Government, and shall be expressed to come into force on the date on which this Chapter comes into force and to remain in force for fifteen years and thereafter until terminated after five years' notice on either side, and shall further contain the provisions set forth in the Third Schedule.

Provided that the agreement shall be conditional on the maintenance of a sound financial position by the Imperial Bank and that if, in the opinion of the Central Board, the Imperial Bank has failed either to fulfil the conditions of the agreement or to maintain a sound financial position, the Central Board shall make a recommendation to the Central Government, and the Central Government, after making such further enquiry as it thinks fit, may issue instructions to the Imperial Bank with reference either to the agreement or to any matter which in its opinion involves the security of the Government monies or the assets of the Issue Department in the custody of the Imperial Bank, and in the event of the Imperial Bank disregarding such instructions may declare the agreement to be terminated.

(2) The agreement referred to in sub-section (1) shall, as soon as may be after it is made, be laid before the Central Legislature.

(3) As from the commencement of Part III of the Government of India Act, 1935, references in the said agreement to the Governor-General in Council in relation to his general banking business, his accounts, and sums due to or from him, and references to Government in relation to receipts and disbursements dealt with on account of Government shall be construed as including references to the Provincial Governments and the Federal Railway Authority.

General Provisions.

The Central Government shall transfer to the Bank rupee securities of the value of five crores of rupees to be allocated by the Bank to the Reserve Fund.

Allocation of Surplus. After making provision for bad and doubtful debts, depreciation in assets, contributions to staff and superannuation funds, and such other contingencies as are usually provided for by bankers and after payment out of the net annual profit of a cumulative dividend at such rate not exceeding five per cent. per annum on the share capital as the Central Government may fix at the time of the issue of shares, a portion of the surplus shall be allocated to the payment of an additional dividend to the shareholders calculated on the scale set forth in the Fourth Schedule and the balance of the surplus shall be paid to the Central Government.

Provided that if at any time the Reserve Fund is less than the share capital, not less than fifty lakhs of rupees of the surplus, or the whole of the surplus if less than that amount shall be allocated to the Reserve Fund.

Schedule. (A) If the maximum rate of dividend fixed under section 47 is five per centum and so long as the share capital of the Bank is five crores of rupees—

(1) if the surplus does not exceed four crores of rupees—Nil

(2) if the surplus exceeds four crores of rupees—

(*a*) out of such excess upto the first one and a half crores of rupees a fraction equal to one sixtieth;

(*b*) out of each successive additional excess up to one and half crores of rupees one-half of the fraction payable out of the next previous one and a half crores of excess.

Provided that the additional dividend shall be a multiple of one-eighth of one per centum on the share capital, the amount of the surplus allocated thereto being rounded up or down to the nearest one-eighth of one per cent. on the share capital.

(B) If the maximum rate of dividend fixed under section 47 is below five per centum, the said fraction of one-sixtieth shall be increased in the ratio of the difference between six and the fixed rate to unity.

(C) When the original share capital of the ank has been increased or reduced the said action of one-sixtieth shall be increased or minished in proportion to the increase or duction of the share capital.

Notwithstanding the provisions of section 47 the Reserve Bank of India Act, 1934 (II of 34) and of the Fourth Schedule to that Act iven above), the aggregate of the rate at which yment of the cumulative dividend and the ditional payable to shareholders of the Bank der the said provisions is made shall not, so ng as this Ordinance (the Reserve Bank of na limitation of Dividend Ordinance of 1943) mains in force, exceed four per cent. per annum the share capital of the Bank; and the dance of the surplus of the net annual profits the Bank shall be paid to the Central vernment.

(1) Notwithstanding anything contained in e Indian Income-tax Act, 1922, or any other nactment for the time being in force relating income-tax or super-tax, the Bank shall not e liable to pay income-tax or super-tax on ny of its income, profits or gains.

Provided that nothing in this section shall ffect the liability of any shareholder in respect f income-tax or super-tax.

(2) For the purposes of section 18 of the dian Income-tax Act, 1922, and of any other levant provision of that Act relating to the ery and refund of income tax any dividend aid under section 47 of this Act shall be deemed o be "Interest on Securities."

The Bank shall make public from time to me the standard rate at which it is prepared buy or re-discount bills of exchange or other commercial paper eligible for purchase under his Act.

(1) Not less than two auditors shall be elected and their remuneration fixed at the nnual general meeting. The auditors may e shareholders, but no Director or other offi er of the Bank shall be eligible during his continuance in office. Any auditor shall be eligible to re-election on quitting office.

(2) The first auditors of the Bank may be appointed by the Central Board before the first annual general meeting and, if so appointed, shall hold office only until that meeting. All auditors elected under this section shall severally be, and continue to act as, auditors until the first annual general meeting after their respective elections:

Provided that any casual vacancy in the office of any auditor elected under this section may be filled by the Central Board.

Without prejudice to anything contained in section 50, the Central Government may at any time appoint the Auditor General or such auditors as he thinks fit to examine and report upon the accounts of the Bank.

Every auditor shall be supplied with a copy of the annual balance-sheet, and it shall be his duty to examine the same, together with the accounts and vouchers relating thereto; and every auditor shall have a list delivered to him of all books kept by the Bank, and shall at all reasonable times have access to the books, accounts and other documents of the Bank, and may, at the expense of the Bank if appointed by it or at the expense of the Central Government if appointed by that Government employ accountants or other persons to assist him in investigating such accounts, and may, in relation to such accounts, examine any Director or officer of the Bank.

(3) The auditors shall make a report to the shareholders or to the Central Government as the case may be, upon the annual balance-sheet and accounts, and in every such report they shall state whether, in their opinion, the balance-sheet is a full and fair balance-sheet containing all necessary particulars and properly drawn up so as to exhibit a true and correct view of the state of the Bank's affairs, and, in case they have called for any explanation or information from the Central Board, whether it has been given and whether it is satisfactory. Any such report made to the shareholders shall be read together with the report of the Central Board, at the annual general meeting.

Returns.—(1) The Bank shall prepare and transmit to the Central Government a weekly account of the Issue Department and of the Banking Department in the form set out in the Fifth Schedule or in such other form as the Central Government may by notification in the Gazette of India, prescribe. The Governor-General in Council shall cause these accounts to be published weekly in the Gazette of India.

(2) The Bank shall also, within two months from the date on which the annual accounts of the Bank are closed, transmit to the Central Government a copy of the annual accounts signed by the Governor, the Deputy Governors and the Chief Accounting Officer of the Bank, and certified by the auditors, together with a report by the Central Board on the working of the Bank throughout the year, and the Central Government shall cause such accounts and report to be published in the Gazette of India.

(3) The Bank shall also, within two months from the date on which the annual accounts of the Bank are closed transmit to the Central Government a statement showing the name, address and occupation of, and the number of shares held by, each shareholder of the Bank.

Agricultural Credit Department.—The Bank shall create a special Agricultural Credit Department the functions of which shall be—

(*a*) to maintain an expert staff to study all questions of agricultural credit and be available for consultation by the Central Government [Provincial Governments, the Government of Burma] provincial co-operative banks, Burma Co-operative Banks and other banking organisations.

(*b*) to co-ordinate the operations of the Bank in connection with agricultural credit and its relations with provincial co-operative

banks, Burma Co-operative banks and any other banks or organisations engaged in the business of agricultural credit.

(1) the Bank shall, at the earliest practicable date and in any case within three years from the date on which this Chapter comes into force, make to the Central Government a report, with proposals, if it thinks fit, for legislation, on the following matters, namely :—

(*a*) the extension of the provisions of this Act relating to scheduled banks to persons and firms, not being scheduled banks, engaged in British India in the business of banking and

(*b*) the improvement of the machinery for dealing with agricultural finance and methods for effecting a closer connection between agricultural enterprise and the operations of the Bank.

(2) When the Bank is of opinion that the international monetary position has become sufficiently clear and stable to make it possible to determine what will be suitable as a permanent basis for the Indian monetary system and to frame permanent measures for a monetary standard it shall report its views to the Central Government.

(1) The Local Board of any area may at any time require any shareholder who is registered on the register for that area to furnish to the Local Board within a specified time, not being less than thirty days, a declaration, in such form as the Central Board may by regulations prescribe, giving particulars of all shares on the said register of which he is the owner.

(2) If it appears from such declaration that any shareholder is not the owner of any shares which are registered in his name or that any shareholder, to whom the provisions of sub-section (4A) of section 4 apply, is the holder of shares in excess of a total nominal value of twenty thousand rupees, the Local Board may amend the register accordingly.

(3) If any person required to make a declaration under sub-section (1) fails to make such declaration within the specified time, the Local Board may make an entry against his name in the register recording such failure and directing that he shall have no right to vote, either under section 9 or section 14, by reason of the shares registered in his name on that register.

(4) Whoever makes a false statement in any declaration furnished by him under sub-section (1) shall be deemed to have committed the offence of giving false evidence defined in section 191 of the Indian Penal Code, and shall be punishable under the second paragraph of section 193 of that Code.

(5) Nothing contained in any declaration furnished under sub-section (1) shall operate to affect the Bank with notice of any trust, and no notice of any trust expressed, implied or constructive shall be entered on the register or be receivable by the Bank.

(6) Until Local Boards have been constituted under section 9 the powers of a Local Board under this section shall be exercised by the Central Board in respect of any area for which a Local Board has not been constituted.

(1) Nothing in the Indian Companies Act 1913, shall apply to the Bank, and the Bank shall not be placed in liquidation save by order of the Central Government and in such manner as it may direct.

(2) In such event the Reserve Fund and surplus assets, if any, of the Bank shall be divided between the Central Government and the shareholders in the proportion of seventy-five per cent. and twenty-five per cent. respectively :

Provided that the total amount payable to any shareholder under this section shall not exceed the paid-up value of the shares held by him by more than one per cent. for each year after the commencement of this Act subject to a maximum of twenty-five per cent.

(1) The Central Board may, with the previous sanction of the Central Government make regulations consistent with this Act to provide for all matters for which provision is necessary or convenient for the purpose of giving effect to the provisions of this Act.

(2) In particular and without prejudice to the generality of the foregoing provision, such regulations may provide for all or any of the following matters, namely :—

(*a*) the holding and conduct of elections under this Act, including provisions for the holding of any elections according to the principle of proportional representation by means of the single transferable vote ;

(*b*) the final decision of doubts or disputes regarding the qualifications of candidates for election or regarding the validity of elections ;

(*c*) the maintenance of the share register, the manner in which and the conditions subject to which shares may be held and transferred, and, generally, all matters relating to the rights and duties of shareholders ;

(*d*) the manner in which general meetings shall be convened, the procedure to be followed thereat and the manner in which votes may be exercised ;

(*e*) the manner in which notices may be served on behalf of the Bank upon shareholders or other persons ;

(*f*) the manner in which the business of the Central Board shall be transacted, and the procedure to be followed at meetings thereof ;

(*g*) the conduct of business of Local Boards and the delegation to such Boards of powers and functions ;

(*h*) the delegation of powers and functions of the Central Board to the Governor, or to Deputy Governors, Directors or officers of the Bank ;

(*i*) the formation of Committees of the Central Board, the delegation of powers and functions of the Central Board to such Committees, and the conduct of business in such Committees ;

(*j*) the constitution and management of staff and superannuation funds for the officers and servants of the Bank ;

(*k*) the manner and form in which contracts binding on the Bank may be executed;

(*l*) the provision of an official seal of the Bank and the manner and effect of its use;

(*m*) the manner and form in which the balance-sheet of the Bank shall be drawn up and in which the accounts shall be maintained;

(*n*) the remuneration of Directors of the Bank;

(*o*) the relations of the scheduled banks with the Bank and the returns to be submitted by the scheduled banks to the Bank;

(*p*) the regulation of clearing-houses for the scheduled banks;

(*q*) the circumstances in which, and the conditions and limitations subject to which the value of any lost, stolen, mutilated or imperfect currency note of the Government of India or bank note may be refunded; and

(*r*) generally, for the efficient conduct of the business of the Bank.

(3) Copies of all regulations made under this section shall be available to the public on payment.

In the Indian Coinage Act, 1906, for section 11 the following section shall be substituted, namely:—

"11. Gold coins, coined at His Majesty's Royal Mint in England or at any mint established in pursuance of a proclamation of His Majesty as a branch of His Majesty's Royal Mint, shall not be legal tender in British India in payment or on account, but such coins shall be received by the Reserve Bank of India at its offices, branches and agencies in India at the bullion value of such coins calculated at the rate of 8.47512 grains troy of fine gold per rupee."

The Indian Paper Currency Act, 1923, the Indian Paper Currency (Amendment) Act, 1923, the Indian Paper Currency (Amendment) Act, 1925, and the Currency Act, 1927 are hereby repealed.

In sub-section (3) of section 11 of the Indian Companies Act, 1913, after the word "Royal" the words "Reserve Bank" shall be inserted.

The Reserve Bank began work with the opening of the financial year 1935-36. The Bank made a net profit of Rs 53,42,100 for the year ended December 31, 1936.

REPORT FOR THE YEAR ENDED JUNE 30th, 1945.

The report of the Central Board of Directors of the Reserve Bank of India for the year ended June 30, 1945 states that after payment of expenses of administration and provision for sundry liabilities and contingencies, the net profit amounts to Rs. 14,89,26,803-11-1. Of this amount the sum of Rs. 20,00,000 will be utilised for payment to shareholders of a dividend at the rate of four per cent., the maximum dividend permissible under the Ordinance issued on June 30, 1943, leaving a surplus of Rs. 14,69,26,803-11-1 for payment to the Central Government [illegible] as modified by the Ordinance. The net profit is higher than in the previous year by Rs. 4.63 crores owing to a further increase in the interest-bearing assets of the Bank.

The total number of shareholders decreased during the year from 48,292 to 46,640. The number of shares on the register of the Calcutta area, which had remained practically unchanged last year, rose and that on the Bombay register continued to increase at the expense of the remaining three areas.

Notes and Coins.—A new design of the ten rupee notes was introduced from October 5, 1944, while a new series of the Government of India one rupee notes was issued from December 1, 1944. As a first step in the rehabilitation of the country's economy in the liberated parts of Burma, a Proclamation relating to the status of the various types of currency circulating in Burma was issued by the Supreme Allied Commander of the South East Asia Command on May 1, 1945. With a view mainly to avoiding the disproportionate waste of metal involved in the use of nickel-brass alloy in the minting of the new series of the two anna, one anna and half-anna pieces introduced in 1942, and to replacing the new pice pieces, which have not been popular, the Government of India have decided to undertake a large recoinage programme as soon after the end of the war as possible. Under this programme, the nickel-brass alloy will be replaced by the pre-war cupro-nickel alloy, and a piece of new design will be issued. There is also a proposal to take advantage of the opportunity which might thus arise to introduce in India a decimal system of coinage which has replaced other forms in most of the countries of the world.

Exchange.—In the rupee sterling exchange market, banks quotations for telegraphic transfers continued unaltered at 1 sh. 5-31 32 d. selling and 1 sh 6-1 32 d. buying. There was a shortage of sterling for ready delivery and to relieve this the Reserve Bank commenced selling ready sterling in limited quantities from October onwards at 1 sh. 5 63 64 d. Purchases of sterling for forward delivery continued and the net purchases by the Bank during the year amounted to £63,139,341-5-8 as compared with £101,493,921-4-10 in the preceding year. Repayments made by the Secretary of State on account of recoverable war expenditure and purchases made on behalf of His Majesty's Government and Allied Governments, after deducting the sterling requirements of the Central Government and the Government of Burma, left a net credit in favour of India of £240,195,000 at the end of the year as against £162,685,000 at the end of the previous year. Sales of currencies of countries outside the sterling area continued to be restricted but a more liberal policy was pursued in regard to demands for foreign exchange for purposes which were considered to be of value and importance to the country. The quotas under the import licensing system for the import of consumer goods from countries outside the sterling area were increased as a means of combating inflation and of meeting the extreme shortages arising from the severe restrictions on imports that had been imposed

Security Market.—The gilt-edged market registered a further improvement during the year under review, the Economic Adviser's index number of Government Securities (1927-28-100) averaging higher at 117.9 during the eleven months ended May 1945 as compared with 117.6 during the corresponding period of the preceding year. Prices in the industrial share market ruled on the whole higher than during the previous accounting year. The Economic Adviser's combined index number of prices of variable yield Securities (1927-28-100) for the eleven months ended May 1945 worked out higher at 198.5 as against 186.8 during the corresponding period of the preceding year. As regards individual groups, among equities, all except cotton and sugar showed on the whole a distinct rise; the comparatively sharp recession in cotton shares may be partly attributed to the further intensification of Government Control measures affecting the industry.

Scheduled Banks.—During the year under review, the number of banks included in the second Schedule to the Reserve Bank of India Act rose from 76 to 86. The applications of 11 banks were under consideration at the end of the year. The number of banks included in the second schedule to the India and Burma (Burma Monetary Arrangement) Order, 1937, remained unchanged at 3.

The total demand and time liabilities of Scheduled banks maintained their upward trend, rising from Rs. 747.44 crores on June 30, 1944 to Rs. 868.58 crores on June 29, 1945. The proportion of demand liabilities to total liabilities which was as high as 75.6 per cent on June 30, 1944 declined to 72.4 per cent by the end of the year under review. The percentage of cash in hand and with the Reserve Bank declined from 16.95 at the end of June 1944 to 13.33 at the end of June 1945 mainly as a result of an increase in the trade demand for funds. The balances maintained by scheduled banks with the Reserve Bank at the end of the accounting year were lower at Rs. 78.86 crores as compared with Rs. 95.98 crores at the end of the previous year, the excess over the statutory minimum declining from Rs. 64.08 crores to Rs. 42.60 crores. Advances by scheduled banks during the year further rose to Rs. 279.74 crores on June 29, 1945 as against Rs. 211.47 crores on June 30, 1944. Owing to easy money conditions only four banks approached the Reserve Bank for financial accommodation during the year, the total amount of loans granted to these banks being Rs. 103.25 lakhs as compared with Rs. 379.15 lakhs advanced to seven banks during the previous year.

The total number of offices of scheduled banks including head offices, branches, and pay offices rose from 2,141 on June 30, 1944 to 2,715 on June 30, 1945 an increase of 574 against 534 in the previous year. The ten banks newly included in the second schedule accounted for an addition of 111 offices. 71 new offices were opened at places which were not previously served either by a scheduled bank having capital and reserves above Rs. 50,000.

Non-Scheduled Banks.—The total number of non-scheduled banking companies registered December 1944 as compared with 530 a year before. Their total demand and time liabilities increased from Rs. 34.79 crores at the end of 1943 to Rs. 53.13 crores at the end of 1944 and the ratio of cash to deposits declined from 14 per cent. to 11.4 per cent. during the same period. It was decided during the year that non-scheduled banks desirous of opening accounts with the Reserve Bank may be allowed to do so, subject to certain conditions, with effect from February 15, 1945.

Banking Legislation.—A bill "to consolidate and amend the law relating to banking companies" on the lines recommended by the Board was introduced in the Central Legislature on November 16, 1944. The bill incorporates the provisions of part XA of the Indian Companies Act with certain modifications and also contains several new provisions designed to safeguard the interests of depositors and to ensure the development of banking in India on sound lines. The main features of the bill are as follows:—

(i) A simple definition of banking with the object of limiting the scope of the legislation to institutions in which funds are deposited primarily to ensure their safety and ready withdrawability;

(ii) Fixing of minimum capital standards;

(iii) Prohibition of trading with a view to eliminating non banking risks;

(iv) Inclusion in the scope of the legislation of banks incorporated or registered outside British India;

(v) Provision of an expeditious procedure for liquidation;

(vi) Inspection of the books and accounts of a bank by the Reserve Bank when necessary;

(vii) Empowering the Central Government to take action against banks conducting their affairs in a manner detrimental to the interests of the depositors;

(viii) Prescription of a special form of balance sheet and conferring powers on the Reserve Bank to call for periodical returns.

Issue Department.—The upward trend in the total of the balance sheet of the Issue Department witnessed since the outbreak of war continued during the year, the total of Rs. 1,151.79 crores as at the end of the accounting year under review showing an increase of 22 per cent. over the figures as on the 30th June 1944. On the liabilities side, notes in circulation stood at Rs. 1,137.47 crores, giving an increase of Rs. 206.10 crores as compared with an increase of Rs. 198.89 crores during the previous accounting year. The rate of currency expansion which had tended to slow down till December 1944, was again marked up from that month, mainly as a result of increased expenditure owing to the intensification of the Allied offensive against Japan. On the asset side, 'gold coin and bullion' continued unchanged at Rs. 44.41 crores at the statutory rate of valuation, namely Rs. 21-3-10 per tola. Sterling securities showed a continued rise from Rs. 828.33 crores to Rs. 1,034.33 crores on

...t in respect of recoverable war expenditure ...urred on behalf of the Allied Governments. The percentage of gold and sterling securities to total notes issued stood higher at 93.66 against 92.51 at the close of the previous year. 'Rupee coin', which includes Government of India one rupee notes, increased from Rs. 12.81 crores to Rs. 15.20 crores at the end of June 1945. The Bank received from the Central Government Rs. 10 crores of 'rupee coin' during the year in terms of sub-section (3) in addition to Rs. 5 crores under sub-section (2) of section 36 of the Reserve Bank of India Act. 'Rupee securities' which had declined from Rs. 118.41 crores on the 30th June 1943 to Rs. 57.84 crores at the end of the last year remained unchanged at that level throughout the accounting year under review.

BANKING DEPARTMENT.

The total of the balance sheet of the Banking Department more than doubled, rising from Rs. 201.69 crores to Rs. 425.89 crores mainly owing to a sharp increase under Central Government Deposits on the liabilities side, and a corresponding increase in 'Balances held abroad' on the assets side. The deposits of the Central Government increased by Rs. 212.72 crores to Rs. 277.97 crores. The deposits by banks fluctuated widely between Rs. 113.10 crores for the week ended the 3rd November 1944 and Rs. 67.27 crores for the week ended the 6th January 1945, largely reflecting the changing trade demand for funds, and stood at Rs. 80.19 crores at the end of June 1945. On the assets side, 'Balances held abroad' increased by Rs. 214.39 crores from Rs. 173.74 crores to Rs. 388.13 crores and 'Investments' by Rs. 10.34 crores to Rs. 21.45 crores while 'Bills Purchased and Discounted' were reduced from Rs. 2.59 crores to nil.

Bretton Woods Agreement. The United Nations Monetary and Financial conference held at Bretton Woods in July 1944 has recommended the setting up of two international monetary institutions, viz., an International Monetary Fund and an International Bank for Reconstruction and Development. The former is to deal with the problem of short term equilibrium in international balance of payments with a view to promoting reasonable exchange stability and the balanced growth of international trade consistently with the freedom of member countries to pursue their own domestic, social or political policies. The Bank is intended mainly to stimulate and where necessary to supplement the flow of international long-term capital for the purpose of assisting the reconstruction and development of member countries and the attainment of long-term international equilibrium. The two institutions are largely complementary in character and membership.

Sterling Balances. —The sterling assets of the Reserve Bank continued to increase, the net accretions during the accounting year being Rs. 420.39 crores as against Rs. 358.40 crores in the previous 12 months and Rs. 1,352.88 crores since the beginning of the war. The total holdings in the Issue and Banking Departments as on the 30th June 1945 amounted to £ 1066.85 million or Rs. 1,422.46 crores, which are maintained in the form of cash and investments in short-term British Government securities renewed from time to time. The problem represented by these balances is not one of monetary transfer or exchange but of transfer of resources of an amount equivalent in value to the balances. On the Indian side it is, firstly, the problem of gauging and developing the capacity to absorb the flow of goods, particularly capital goods from abroad, equivalent to the value of sterling balances, in industries and uses adapted to the requirements of demand, national needs and reasonable efficiency of production and to this end, of speeding up the preparation of plans of development, private and Governmental, including the establishment of the conditions necessary for the creation and growth of industries. For the United Kingdom the problem is how best to establish either through direct trade with India or through trade with other countries the surplus of exports over imports necessary to meet the needs of India and the other creditors in addition to covering the gap in the balance of payments resulting from the loss of overseas investments and of income from these and other invisible exports.

Trade.

India is an agricultural country with farming regarded by her people as a tradition rather than a business. She has, however, large deposits of raw materials vitally needed for development of industries. She is the biggest producer of raw cotton and tobacco except the U. A. S. She has the monopoly of jute and is the largest producer of sugar today. She is also the largest grower of oilseeds and has vast mineral resources, most of which have remained untapped. She possesses the world's largest reserves of richest class of iron ore and manganese ore. There is no lack of tungsten, chromium and cobalt which are necessary for manufacturing alloy steel. She also leads in mica and bauxite. Great discoveries of sulphur have been made recently. As regards the position of oil, India is relatively near to the world's largest oil deposits around the Persian Gulf and fresh resources of oil have recently been struck in the country also. These advantages have enabled her to make a steady progress towards industrialisation during the past quarter of a century.

If we look back on the course of agriculture over a long period of years, we shall note a striking development towards stability. In the days that are past, the outturn of the soil was subjected to periodic shocks from famines arising from the failure of the rains, when the export trade in these staples dwindled to small proportions. But the spread of irrigation has produced a great change, and though no doubt in future heavy losses may be incurred from the weakness of the monsoons, they are never likely to be as catastrophic as in such years as 1896-97 and 1899-1900. It is a well-known fact that 6,000,000 acres of additional land have come under irrigation in the last 20 years.

Twenty-five years ago in this country—the second largest producer of raw cotton in the world—long staple varieties of cotton were almost unknown. The position at the outbreak of the present war was that the Indian textile industry was meeting a considerable portion of its long staple requirements from indigenous production. The improvement in the quality of the crop was accompanied by an increase in the average yield per acre of the order of 30 per cent. during the same period. The record of jute has not, however, been one of uninterrupted progress. The steeper fall in the prices of raw jute during the world depression, accompanied by a cut in acreage, was estimated to have reduced the income of the average jute grower by about two-thirds. The plight of the cultivator no doubt improved later but the difficulties of the jute manufacturing industry resulted in a fall in the consumption of raw jute and this necessitated a large measure of State control in regard to the area under this crop.

The progress of sugarcane cultivation was limited solely by the capacity of the internal consumption of sugar to increase. The estimated production of cane in 1924-25 was less than 30 million tons, but by 1936-37 it had exceeded 67 million tons. This turned out to be far in excess of the effective demand and the manufacturing industry was in a state of overproduction. As a result, the production of cane came down to the low level of 36 millio tons in 1938-39, but it improved to 48 millio tons in the next year. A large proportio of the total area under sugarcane in India i now devoted to the improved *Coimbator* varieties with a yield per acre higher than tha of other varieties by more than 30 per cent.

The one agricultural commodity whos fortunes were not appreciably affected by th world depression was groundnut. A quadrup ling of the area and a proportionate increas in output in the course of two decades is record which is not shared by any other cro This phenomenal increase in acreage is explaine as due to the highly remunerative nature of th crop. The greater part of the increased produc tion was exported; in the result groundnut ha steadily displaced the other oilseeds from th export trade of India, and moreover by 193 India had become first among the groundnu exporting countries of the world.

This story of continued progress has to b varied somewhat in relation to the productio of foodgrains. The output of rice has obsti nately refused to improve in spite of the be efforts of the Agricultural Department. Abou 4½ million acres of rice land were brought unde improved varieties but this has no perceptibl effect on the total production; actually, th output declined by something like 10 per cen as between 1920-21 and 1940-41. The tenden to substitute other crops for rice was great accentuated by the availability of an abunda supply of cheaper varieties of imported rice.

The results of research have been applie with much greater success in the case of whea About a third of the total area under whea has been brought under improved crop and i the course of 20 years the total output of whea has increased from 6,000,000 tons in 1920-2 to 8,000,000 tons in 1940-41. The cost o production in India, however, remained ver high in comparison with the other wheat producing countries of the world and the India wheat grower was hit so hard by the fall in th world prices of wheat during the depressio that in his interest a protective duty had to b imposed on imports of wheat.

The experience of the other cereals, particularly millets, was more or less similar to tha of rice. The millet crops are concentrated i areas of very poor rainfall and it is in suc areas that any improvement in cultivation i of peculiar difficulty.

Thus while India's economy is essentiall agricultural, she ranks as one of the eight great est industrial countries of the world. Althoug the basic raw materials of industry were presen in great abundance in the country, it was no generally realized until the early twenties o this century that with the development of th necessary manufacturing processes it would b possible to effect a gradual displacement o various categories of imports by home-mad articles. The pace of industrial developmen since that period has been greatly accelerate by the policy of active assistance pursued b the State both by way of granting tariff pro tection in deserving cases and of giving prefe

ence to the products of Indian industry in purchasing Government requirements. The prospects of continued Government help and the anticipation of handsome profits encouraged a rapid flow of private capital into industry. New capital invested in joint stock enterprise alone in the inter-war period was some thing like Rs. 150 crores.

The outstanding instance of an industry which was greatly fostered by State encouragement is the iron and steel industry. The real growth of the industry took place in the last two decades, and it is remarkable that the industry recorded the most rapid progress during the world depression. Between the year 1932-33, when the regular collection of production figures started, and the year 1940-41, the steel ingot production of the country increased from less than 6 lakhs tons to more than 1·3 million tons. During the same period the output of finished steel jumped up from 359,000 tons to 925,000 tons. This development was accompanied by an expansion of the activities of various ancillary industries like foundries and the structural steel and wagon-building industries, the last-named of which had received an early promise of preference from the Railways.

The cotton textile industry recorded such good progress in the inter-war period that the share of imports in the cloth requirements of the country decreased from about four-fifths to much less than a fifth. In the same period the number of mills increased from 227 to 355, the number of spindles from 6·2 millions to 9·4 millions and the number of looms from 109,000 to 168,000. The output of yarn more than doubled in weight and the output of piecegoods nearly trebled in length. Many mechanical improvements were effected by the industry during the period, chief among these being the installation of modern machinery for spinning and weaving and the development of new bleaching, dyeing, printing and finishing processes. The jute manufacturing industry had, however, to face numerous troubles in the last twenty-five years but in the period taken as a whole the industry did show a fair degree of improvement.

The history of the sugar industry in India may be said to begin with the grant of protection to the industry. The output of sugar which was only about 300,000 tons in 1932-33 has now risen to over a million tons. The industry had to contend for a time against a number of difficulties arising from organisational weaknesses but to offset this there has been the steady improvement in the quality of cane which, in conjunction with the recent technological advances, has made possible a higher percentage recovery of sugar from cane.

The paper industry would have languished in the decade following the last war but for the protection granted to it in 1925. The duty imposed on imported wood pulp some years later was instrumental in the development of the production of indigenous bamboo pulp which is now the main raw material for paper making in the country. The production of the writing and printing paper increased rapidly in the last decade. The same was the case with kraft or packing paper; but in the absence of proper raw materials for making mechanical pulp all efforts made by the Forest Research Institute to produce newsprint in this country have not been crowned with success so far and the whole of our annual requirements totalling about 50,000 tons of newsprint has to be imported from abroad.

Among the industries that were struggling for existence in the early years but which stabilised themselves without direct outside assistance, first mention should be made of the cement industry. It staged a surprising recovery in the thirties on the basis of a mutual agreement and the greater part of the credit for the enormous increase in the consumption of this relatively new building material goes to the industry itself.

Steel, Sugar, Paper and Cement are four major instances of industries which have established themselves in the last twenty years but there are several smaller industries which have witnessed a striking advance in the past ten years. Among the comparatively new industries are paints, soap, matches and chemicals. At the outbreak of the present war although many important constituents, as for example the finer varieties of pigments for the paints industry and soda-ash for the soap industry had still to be imported from abroad, the position was that two-thirds of the country's requirements of paints and almost the whole of the supply of soap came from local production whereas at the end of the last war only a very small portion was so met in either case. This is largely true of the match industry as well.

The development of the Indian chemical industry was handicapped from the beginning by the absence of indigenous supplies of sulphur and in view of the fact that the industry had a measure of protection only for the short period of less than two years; the increase in the output of sulphuric acid by more than 60 per cent. in less than eight years should be considered a creditable achievement for the industry. The other acids also showed a similar improvement but in the case of salts the progress was not an uninterrupted one. The production of ammonium sulphate, to take one instance, which increased from 8,000 tons in 1932-33 to 18,000 tons in 1936-37 fell to 15,000 tons in 1938-39. The import difficulties created by the present war led to an expansion of the indigenous production of ammonium sulphate as evidenced by the output of 28,000 tons in 1940-41 but the industry will have to increase its capacity much more if the greatly enlarged internal demand is to be satisfied.

An obvious lacuna in the country's production of chemicals is in respect of alkalis, particularly soda-ash, the available supply of which remained the sole limiting factor in the expansion of the glass and soap industries in the country in recent years.

The growth of organised industry in India was necessarily accompanied by a number of developments not all of which have been beneficial to the country's economy. In the first place the increased output of factory products led to a gradual decline in handicrafts with the solitary exception of handloom weaving.

With the decline of handicrafts a large number of artisans were thrown out of work and while a considerable proportion of these were no doubt absorbed by the expanding organised industries, the rest had to fall back on agriculture for their livelihood thus increasing the already heavy pressure on land.

The most important outcome of the policy of industrialisation was a significant change in the composition of India's import trade. Imports of finished goods accounted for 84 per cent. of the total value of the imports of India including Burma in 1920-21. By 1936-37 the corresponding percentage had declined to 75. In values the fall was from Rs. 274 crores to Rs. 92 crores. An even more striking development on the import side was the steady increase in the share of industrial raw materials from 5 per cent. to 16 per cent. During a period in which the total value of imports declined by nearly two-thirds, the value of imports of raw materials increased by more than 10 per cent. These tendencies have been greatly accentuated by the war and the position in 1941-42 was that manufactured articles formed but 55 per cent. of the total imports while the share of industrial raw materials had risen to the high figure of 29 per cent.

India's increased demand for foreign raw materials was not, however, accompanied by a decline in her raw material exports, on the other hand between 1920-21 and 1936-37 the proportion of industrial raw materials in total exports increased from 45 per cent. to 53 per cent. During the same period the share of manufactured goods in the total exports declined from 36 per cent. to 26 per cent. owing chiefly to a steep fall in the value of exports of cotton and jute manufactures. Thus it would appear that before the outbreak of the present war the progress of industrialisation was reflected mainly in the development of the then existing industries catering mostly to the internal demand for finished goods rather than in the establishment of new industries merely for the purpose of processing the raw materials that were being exported as such. With the outbreak of the present war, however, the outlook has undergone a vital change. This is well illustrated by the fact that the proportion of raw materials in exports has fallen to 28 per cent. and the exports of manufactures has risen to 47 per cent.

These changes in the composition of trade were accompanied by even more remarkable changes in its direction. In 1920-21, 61 per cent. of the imports were derived from the United Kingdom, but in 1936-37 only 38 per cent. came from that country. Only a small portion of the trade lost by the United Kingdom was captured by the other Empire countries whose share increased from five per cent to only 11 per cent. during the same period, wh foreign countries, particularly Japan, Germa and the U.S.A. improved their position fr 34 per cent. to 51 per cent. After the outbre of the present war, the share of the Unit Kingdom declined to 21 per cent. in 1941- but the other Empire countries not only fill the gap thus created but also improved the position further at the expense of the foreig countries, the share of the two latter grou in India's imports in 1941-42 being 40 per cen and 39 per cent. respectively.

The main changes noticeable in the directio of export trade were an increase of the shar of the United Kingdom from 22 per cent. t 32 per cent. between 1920-21 and 1936-37, decrease in the share of the rest of the Empi from 21 per cent. to 14 per cent. and a relativ stability in regard to the foreign countrie The war has been accompanied by a slig decline in the share of the United Kingdom, pronounced decline in the case of foreign cou tries and a rise from 21 to 30 in the percenta share of the Empire countries.

An interesting consequence of these shift in the direction of trade was the introductio of an element of 'bilateralism' in India's tra with the Empire as a whole. In 1920-21 t Empire took only 43 per cent. of India's export but supplied 66 per cent. of her imports but b 1936-37 the proportions had very near balanced themselves at 46 and 49 per cen respectively. This movement was furth accelerated by the present war and in 1941-4 the Empire's share of India's exports as we as imports was 61 per cent.

Of equal importance with the remarkal changes that took place in the composition an direction of trade were the developments co cerning India's balance of trade. Only on ra occasions did India's total imports exceed h exports as for instance during the years 1920-2 and 1921-22; during the succeeding years, th merchandise balance of trade remained in h favour and the size of the balance was lar enough to permit a considerable importat of gold and silver even after meeting the countr external obligations. This continued t 1930-31 but the trade depression which b become very severe by this time resulted steeper fall in the prices of India's exp than in the prices of her imports and as a co quence the merchandise balance of t dwindled to almost nothing. This would h led to difficulties in regard to India's ext payments; but following the steep rise in rupee price of gold resulting from the mon events of the period, India had become a exporter of this precious metal. The balan of transactions in treasure which had t turned in India's favour largely made up for t decline in the merchandise balance of trade.

I.—GENERAL.

Economic Situation in India.—As the war in Europe entered its concluding phase, the position of India as a major arsenal and centre for the Allied operations against Japan assumed increasing importance. The total defence expenditure during the war period brought to account in India's books amounted to Rs. 2,741 crores of which India's share was Rs. 1,9 crores. The aggregate Governmental expend ture on defence in the financial year 1944-4 is placed at Rs. 896 crores (or 33 per cent. the total expenditure during the war) as ag Rs. 774 crores in 1943-44. The general ne of war-time economic and business acti

was [illegible]
ding year, although shortages of power, skilled labour and transport affected production in certain industries.

Following the adoption of stabilisation measures earlier the rate of expansion in currency during 1944-45 showed a considerable decline, being 23 per cent. as against 37 per cent. in the preceding year. Easy money conditions continued to be the governing element in the financial markets. Gilt-edged prices remained firm almost throughout the year, while industrial share values, which experienced wide fluctuations also registered gains except in the cotton textile section. Speculation prevailed in the bullion market, reflecting the pressure of idle funds and paucity of floating stocks, particularly of silver, and the quotations showed a marked resiliance in the face of favourable war news.

The scope of remedial measures instituted by Government since May 1943 to deal with the serious inflationary forces at work in the country's economy was widely extended during the year to provide for larger supplies of essential goods through free flow of imports, partial diversion to other sources of supply of the heavy defence requirements and allocation for civilian use of a part of the productive capacity reserved for defence requirements. Increased taxation and larger borrowing, sales of bullion and extension of commodity and price controls also assisted in establishing a measure of comparative equilibrium a vital factor in holding inflationary spiral was the rapid return of confidence accompanying successive Allied victories. The prospects of an early successful termination of the war had favourable reactions on wide sectors of the economy. The stimulus of war has led to some industrial advance in the country and expansion of existing capacity in many industries, but the overall measures of industrialisation secured and the durable gain of productive capacity have been small relatively to many other Empire countries. Industrial and economic activity during the year under review was fairly well maintained, although expansion was restrained by shortages of transport, coal and skilled labour.

The food situation showed a marked improvement during the year, owing to a fuller implementation of the main recommendations of the Foodgrains Policy Committee relating to imports of Foodgrains, extension of rationing, statutory price control, larger production, etc. The general consumer goods position was alleviated by increased imports by Government and by releases of a wide range of goods in common use.

The overall supply position also benefited from receipts of materials under lend-lease and under the Mutual Aid Agreement concluded in August 1944 between India and Canada. The supply position is expected to improve further as a result of the institution in March 1945 of the system of open general licence for imports liberalisation of quotas, and further prospects of betterment in the shipping and exchange situation. Early in 1945, an official mission was sent to the United Kingdom to explore ways and means of reducing the strain on the expected intensification of military operations in 1946.

The Calcutta index number of wholesale prices, after touching the peak of 353 in September 1943, gradually declined to 304 in March 1944, moving thereafter within a comparatively narrow range of 295 in May 1944 and 310 in March 1945; the average for 1944-45 stood lower at 303 compared with 321 in the previous year. The Bombay cost of living tended downwards after reaching a peak of 241 in August 1944 and stood at 217 in March 1945; it averaged 228 in 1944-45 compared with 229 in 1943-44 and 168 in 1942-43.

Trend in International Trade.—As mentioned in earlier reviews, war served the principal arteries of trade and led to new alignments canalising trade into blocs or groups more or less conditioned by military developments and the availability of trade routes. Moreover the restriction of the civilian economy at the expense of the war economy's activity affected foreign trade even more than internal trade owing to the need to conserve foreign exchange and available tonnage for essential war uses. In many countries, rise in the value of foreign trade was accounted for mainly by inflated prices. Also the goods exchanged internationally contained large amounts of inflation. In India, while the rise in export prices had been greater than in import prices, the quantum of exports declined by nearly 50 per cent.

Balance of Trade.—The value of published returns of India's foreign trade for drawing up a balance of payments statement for the country is impaired by the exclusion of the trade in defence account, which partly involves financial payments as between Government, and by the inclusion in the trade returns of lend-lease imports and reciprocal lend-lease exports on non-defence account which do not result in money transfers. Movements in the recorded foreign sea-borne trade continued, during the year under review, to be governed by war conditions modified by the recent policy of the Government of India which aims at larger supplies of consumer goods and of essential raw materials and machinery.

The table below carries forward by another year the comparison of the trade in merchandis on the basis of information veiled in statistics brown-out. —

(In crores of rupees)

	1938-39	1943-44	1944-4
Exports including reexports	169	210	228
Imports	152	119	201
Total	321	329	429
Balance of Trade	+ 17	+ 91	+ 27

The total value of India's foreign sea-born trade, which had remained upward since th outbreak of the war owing mainly to the rise i commodity prices, reached a new high level Rs. 429 crores as compared with Rs. 329 in t

preceding year and was slightly higher than the past peak level of Rs. 426 crores in 1941-42. The growing favourable balance of trade had reached the climax at Rs. 91 crores in the preceding year; but the year under review gave a downward twist to it by sharply reducing it to to Rs. 27 crores only. The precipitate decline may be attributable to the 75 per cent. increase in imports and hardly 8 per cent. in exports.

The trends noticed during the year under review are likely, unless restrained, to continue in the following year as the result of the authorities' efforts to stabilise India's economy and the institution in March 1945 of the Open General Licence for importation of several classes of consumer goods and essential raw materials. Imports of consumer and capital goods into India are also likely to expand with the gradual conversion of a portion of the industrial capac of the United Kingdom, the U.S.A. and Cana from wartime to peacetime requirements.

Direction of Trade.—The following ta shows the more important changes in the dir tion of India's trade and the balance of tra with important countries and groups for t two years 1943-44 and 1944-45 and compa them with the pre-war year 1938-39 :—

DIRECTION OF TRADE.

(Rupees in lakhs).

	1938-39.			1943-44.			1944-45.

Japan	15,41	14,59	- 82	..	..	..	..	..	..
Egypt	2,19	1,23	- 96	11,27	2,98	- 8,29	17,38	3,36	- 14,02
Iran	3,49	78	- 2,71	27,49	1,72	- 25,77	49,33	2,74	- 46,59
Other Foreign Countries	36,39	47,72	+ 11,33	3,70	25,76	+ 22,06	5,81	22,26	+ 16,45
Total Foreign Countries	63,77	77,42	+ 13,65	61,03	70,57	+ 9,54	1,22,98	73,15	- 49,83
Total Trade	1,52,33	1,62,79	+ 10,46	1,17,78	1,99,03	+ 81,25	2,00,98	2,11,05	+ 10,07

During the year under review, India's favourable trade balance, being the excess of exports over imports without taking into account re-exports, was reduced to a paltry sum of Rs. 10,07 lakhs as compared with the grand level of Rs. 81,25 lakhs in the preceding year and was brought nearer to the pre-war level of Rs. 10,46 lakhs. The rising trend in imports which set in with November 1943 was re-inforced during the year and values of monthly imports exceeded those in the corresponding months of 1943-44 and 1942-43. The average monthly imports amounted to Rs. 16,75 crores in 1944-45, Rs. 9,9 crores in 1943-44 and Rs. 9,20 crores in 1942-43. The exports, on the other hand, showed only a moderate rise and were valued at Rs. 18,92 crores, Rs. 17,50 crores and Rs. 16,23 crores in 1944-45, 1943-44 and 1942-43 respectively.

Out of the total imports amounting to Rs. 200,98 crores the British Empire was responsible for sending 38.8 per cent. of the goods and the United Kingdom alone accounted for one-fifth of India's imports, the next important source within the Empire being Australia. The foreign countries sent goods worth Rs. 122,98 crores during the year under review and increased their share in the trade from 42 1 per cent. in the pre-war year 1938-39 to 61.2 per cent. in the year under review. In spite of the difficult dollar situation, the intake from the U.S.A. increased from 6 4 per cent in 1938-39 to 25.1 per cent. in 1944-45. The next important supplier was Iran which sent goods, mainly oil, worth Rs. 49,33 lakhs in the year under review as against only Rs. 3,49 lakhs in 1938-39. Egypt stood third with a share of Rs. 17,38 lakhs, mainly of raw cotton.

Exports amounted to Rs. 211,05 crores for which the British Empire was the main customer, her share being 65.3 per cent. Exports to the United Kingdom totalled Rs. 65,71 lakhs as against Rs. 55,51 lakhs in 1938-39 but the share in the total trade declined from 34.1 per cent. to 29.2 per cent. Among foreign countries, the U.S.A. was the best customer with an absorption of goods worth Rs. 44,79 lakhs. Nearly half of this was on account of cashewnuts.

An analysis of the trade returns shows that imports exceeded exports in the case of foreign countries, while the trend was in the opposite direction in the case of Empire countries. India had a favourable balance of trade to the tune of Rs. 59.89 crores with the Empire countries and an adverse balance of Rs. 49,83 crores with foreign countries. The U.S.A., Egypt and Iran accounted between them for an adverse trade balance of Rs. 66,28; but the favourable balance of trade with other countries amounted to Rs. 16,45 lakhs. The net result was a favourable balance of trade, without taking into account re-exports, of Rs. 10,07 crores.

Composition of Trade.—The following table gives the composition of India's imports and exports (including re-exports) according to the main commodity groups during the years 1942-43 and 1943-44 and compares them with the pre-war year 1938-39. Although the exclusion of trade on Government account detracts from the value of these figures, they serve as a comparative guide to the distribution of trade over the constituent categories during the period under review.

	1938-39		1943-44		1944-45	
	Rs. crores.	per cent.	Rs. crores.	per cent.	Rs. crores.	per cent.
			IMPORTS.			
Food	24 03	15 7	7,04	6 0	18,85	9 4
Raw Materials	38,18	21 7	64,08	54 4	117,28	58 3
Manufactured Articles	92,79	60 8	44,95	38 2	62,47	31 8
			EXPORTS.			
Food	39,43	23 3	47,79	22 8	49,83	26 9
Raw Materials	76,28	45 1	53,70	25 6	58,19	25 6
Manufactured Articles	50,72	30 0	106,08	50 5	116,27	51 5

The trade returns for 1944-45 fully reflected the change brought about by the war in the face of India's economy. Imports of manufactured goods occupying a key position in the sea-borne trade were relegated to the background their percentage to total trade being 60 8 per cent in 1938-39, 38 2 per cent. in 1943-44 and 31 8 per cent. in the year under review. On the other hand, the growing demand for raw materials arising from broadening of the industrial activity in the country necessitated larger imports of raw materials which accounted for 58.3 per cent. in 1944-45 as compared with 54 4 per cent. in the preceding year and only 21 7 per cent. in the pre-war year. The arrivals of foodstuffs fluctuated widely owing to food shortage throughout the world. From a 15.7 per cent. share, imports of food were reduced to a low level of six per cent. in 1943-44 but saw a smart recovery to 9 4 per cent. in the following year.

Prior to the war raw materials headed the export list; but their place was acquired by finished goods in the following six years. This could be partly attributed to India's position as an important supplier of cotton textiles and partly to the growing inquiry for other consumer goods of which there was a keen shortage in the East. Export of manufactured articles advanced from Rs.50,72 lakhs in 1938-39 to Rs. 106,08 lakhs in 1943-44 and to a new high level of Rs. 116,27 lakhs in 1944-45, the respective percentages being 30, 51.5 and 51.5, Exports of raw materials were on a downward grade and were reduced to Rs. 58,19 lakhs in

the year under review compared with Rs. 53,70 lakhs in 1943-44 and Rs. 76,28 lakhs in the pre-war year. From a high level of 45.1 per cent. in the pre-war year, the share of raw materials to total trade dropped to 25.6 per cent. in 1943-44 at which it was well held in the following year. Exports of food ruled quietly steady with their share at 23.3 per cent. in 1938-39, 22.8 per cent. in 1943-44 and 20.9 per cent. in the following year.

II—IMPORTS OF MERCHANDISE.

India's import trade created history in 1944-45 by touching a new high figure of Rs. 200,98 lakhs, showing a rise of Rs. 83,20 lakhs over the preceding year. The substantial increase was partly due to the easing of the shipping position following the improvement in the war situation and the vigorous efforts of Government to ensure larger supplies of goods from abroad to prevent the Indian economy from disruption. Forty per cent. of the total imports were under oils valued at Rs. 80,70 lakhs showing a rise of Rs. 44,22 lakhs over the preceding year. Cotton and cotton waste accounted for an intake of Rs. 24,01 lakhs being higher by Rs. 6,48 lakhs over the 1943-44 figure. Arrivals of metals and machinery ranked third in order of importance and amounted to Rs. 22,77 lakhs, showing a rise of Rs. 7,33 lakhs over the previous year. Imports of grain, pulses and flour were valued for the year at Rs. 8,09 lakhs as against hardly 31 lakhs in the previous two years. Sizeable gains were also noted under chemicals drugs and medicines, non-metallic mining and quarry products and paper and stationery.

The following table shows the comparative importance of the principal articles imported into British India :—

IMPORTS (*In thousands of rupees*)

	1942-43	1943-44	1944-45	Percentage on total imports.
Oils	27,76,25	36,48,02	80,70,33	40·14
Cotton and cotton goods	16,78,52	18,86,21	25,55,05	12·70
Machinery of all kinds	10,51,78	11,30,86	16,29,08	8·10

Total value of Imports	110,44,43	117,77,93	200,98,04	100

Cotton Manufactures (Rs. 1,24 lakhs).—The progressive deterioration in the imports of cotton yarn and manufactures witnessed since the beginning of the war cried halt in 1944-45 during which a small improvement was noticed. The total imports were valued at Rs. 154 lakhs as compared with Rs. 133 lakhs in 1942-43. Yarn accounted for an intake of Rs. 4 lakhs only showing a further drop from Rs. 12 lakhs in the preceding year and Rs. 16 lakhs in 1942-43. The improvement in the imports of piecegoods was shared by all the three varieties. Arrivals of grey, which had been reduced from Rs. 1,27,044 in 1942-43 to a nominal level of Rs. 4,674 in the following year, recovered to Rs. 64,357 in the year under review. Imports of white goods were valued at Rs. 9,60,983 in 1944-45 as against Rs. 7,29,996 in 1943-44 and Rs. 31,59,705 in 1942-43. Coloured goods were credited for imports valued at Rs. 22 lakhs being Rs 5 lakhs in excess of the figure for 1943-44 but less than 1942-43 figure by Rs. 24 lakhs. Imports of cotton hosiery advanced sharply from the small value of Rs. 19,353 in 1943-44 to Rs. 1,83,232 in the following year, the intake for 1942-43 being Rs. 84,596.

Quantitatively, the imports of cotton piecegoods totalled 5.2 million yards in 1944-45 as against 3.7 million yards in the preceding year and 13.1 million yards in 1942-43. Of these, the United Kingdom accounted for 4.9 million yards as compared with 3.3 million yards in 1943-44 and 11.8 million yards in 1942-43. The intake of cotton twist and yarn totalled 192,000 lbs. reaching a fresh bottom in the history of the trade, the previous low levels being 630,000 lbs. in 1943-44 and 945,000 lbs. in 1942-43. Of this, the United Kingdom sent 45,000 lbs. valued at Rs. 1,21,000 in the year under review as compared with 66,000 lbs. valued at Rs. 1,36,000 in 1943-44 and 60,000 lbs worth Rs. 1,41,000 in 1942-43.

The following are the details regarding imports of yarn in thousands of Rs. :—

Year ending 31st March	Counts 1-20	Counts 21-40	Counts above 40	Unspecified and other descriptions.	Total.
1942-43	126	10	204	605	945
1943-44	70	69	89	411	630
1944-45	3	13	30	146	192

Before the war, foreign cotton piecegoods held a front seat in order of importance in India's import trade. During the depression of 1928-29, British India imported a record quantity of 1,937 million yards of cotton piecegoods valued at Rs. 53,82 lakhs.

Raw Cotton (Rs. 24,01 lakhs).—A 40 per cent. increase in value and 20 per cent. rise in quantity was achieved by imports in raw cotton in 1944-45. The total intake in that year was 512,300 bales valued at Rs. 24.01 lakhs as compared with 426,100 bales worth Rs 17,53 lakhs in 1943-44 and 490,600 bales valued at Rs. 15,42 lakhs in 1942-43. Imports from the U.S.A. were nil as in the preceding year; but arrivals from Egypt and Kenya showed handsome gains. The intake from Egypt in 1944-45 stood at 49,659 tons valued at Rs 15,06 lakhs as compared with 45,431 tons valued at Rs. 10 21 lakhs in the preceding year and 36,329 tons worth Rs. 7,50 lakhs in 1942-43. Imports from Kenya totalled 30,490 tons valued at Rs. 6,79 lakhs in the year under review as against only 10,860 tons valued at Rs. 2,42 lakhs in 1943-44 and 24,515 tons worth Rs. 3,33 lakhs in 1942-43.

The wartime restrictions on the imports of foreign cotton continued during the year under review. The purchases of high quality types continued to be made by the Co-ordinating Committee in a pool from which allocations were made to India from time to time and these were regulated in India through the agency of the Controlled Purchase Scheme which was charged with the duty of allocating it to the mills according to their requirements.

In February 1945, the question arose as to whether the import of Nyasaland sow-ginned cotton would adversely affect the growers of Indian cotton and the East India Cotton Association unanimously expressed the view to the Government of India, after inspecting the sample, that the import of such cotton would compete with Indian cotton and that India should not be made a dumping ground for the produce of sweated labour of the African growers at the expense of Indian cotton growers even during the war period.

Wool, Raw and Manufactured (Rs. 3,15 Lakhs). Import trade in Wool, raw and manufactured, shrank further to Rs. 315 lakhs in 1944-45 as against Rs 4,47 lakhs in the preceding year and Rs. 3,79 lakhs in 1942-43. The decline was rather sharp in the case of raw wool, which after being marked up from Rs. 2,96 lakhs in 1942-43 to Rs. 4,02 lakhs, fell sharply to Rs. 2,10 lakhs in the year under review. On the other hand, arrivals of woollen manufactures advanced sharply from Rs. 45 lakhs in 1943-44 to Rs. 1,05 lakhs in the following year, the value for 1942-43 being Rs. 83 lakhs. Of these, woollen piecegoods accounted for Rs. 44 lakhs as against Rs 18 lakhs in 1943-44 and Rs. 29 lakhs in 1942-43, while woollen shawls and lohis disappeared completely from the trade returns during the past two years. As usual, Australia was the leading supplier of raw wool.

Silk, Raw and Manufactured (Rs. 6,518).—The trade in this line, which was greatly affected by the spread of the war to the Far East in 1942-43, the main source of supply of these goods came to a standstill in the year under review for which the import dwindled from Rs. 62,041 to Rs. 8,518. Imports of raw silk were worth Rs. 11 only as against Rs. 1,73,599 in 1942-43 and Rs. 25,427 in 1943-44, while silk piecegoods amounted to only Rs. 5,205 as compared with Rs. 12,854 in 1943-44 and Rs. 13,540 in 1942-43.

Owing to limited supply of the materials, there was keen competition among buyers and the Government of India introduced controls over the price and distribution of silk yarns and fabrics.

Artificial Silk (Rs. 36 Lakhs).—Owing to the spread of war in the far East, the main sources of these goods were cut off during 1942-43 and the total value of the imports of artificial silk, yarn and manufactures, had slumped heavily to Rs. 19 lakhs only in that year from Rs. 3,49 lakhs in 1941-42. In 1943-44, arrivals were reduced to Rs. 7 lakhs; but a sharp improvement to Rs. 36 lakhs was noted in the year under review. There was greater advance under artificial silk yarn the arrivals of which jumped up from Rs. 5 lakhs to Rs. 28 lakhs in the year under review while artificial silk piecegoods noted a rise of Rs. 7 lakhs to Rs. 8 lakhs.

The meagre flow of supplies and the resultant scramble for acquiring the goods led the Government of India to enforce control over the distribution and the prices of imported goods throughout the year.

Iron and Steel (Rs. 3,56 lakhs).—After dwindling from Rs. 2,81 lakhs in 1942-43 to Rs. 2,03 lakhs in the following year, imports of iron and steel made an impressive recovery to Rs. 3.56 lakhs in 1944-45. Quantitatively, imports in the year under review stood at 87,100 tons as against, 46,900 tons in the preceding year and 48,600 tons in 1942-43. Most of the increase was noticed under unprotected varieties of steel. The intake of protected iron and steel stood at 23,700 tons in 1944-45 being higher by 15,100 tons over 1943-44 figure and only 800 tons in excess of 1942-43 level. The war exigencies explained for the fall in imports which amounted to 118,400 tons in 1939-40. The highest imports for the past 25 years were recorded in 1928-29 when they amounted to 1,170,000 tons valued at Rs. 20,24 lakhs.

In spite of the advance in imports, arrival of steel bars continued to be extremely limited and remained unchanged at Rs. 3 lakhs in the year under review as against Rs. 8 lakhs in 1942-43. Beams, channels, pillars, girders and bridge work noted a minor improvement after declining sharply from Rs. 1,33,118 in 1942-43 to Rs. 3,259 in the following year and were valued at Rs. 10,656 only in 1944-45. There was practically no change to report under pipes and fittings which shrank slightly from Rs. 5,75,000 in 1942-43 and 1943-44 to Rs. 5,23,000 in 1944-45. But the sharp increase was recorded by imports of sheets and plates which jumped up in value from Rs. 3,74,000 in the preceding year to Rs. 28,84,000 in 1944-45. Yet these imports were far below the level reached in 1942-43, the worst period of the war, for which they were valued at Rs. 64 lakhs.

Other Metals (Rs. 2,96 lakhs).—The continued demand on the metallurgical industries of the united nations for war requirements was responsible for carrying the wartime pattern of the trade under this head into one more year. Metals, other than iron and steel, and ores were imported to the extent of 26,400 tons valued at Rs. 2,96 lakhs in the year under review as compared with 22,124 tons worth Rs. 2,20 lakhs in the preceding year. Imports of metallic ores and scrap iron were halved from Rs. 11 lakhs to Rs. 5 lakhs, while as 75 per cent. rise was noted under metal manufactures other than iron and steel which were valued at Rs. 3,56 lakhs as against Rs. 2,03 lakhs in 1943-44.

The major improvement was noted under wrought copper, the imports of which mounted up from Rs. 1,29 lakhs to Rs. 1,83 lakhs and accounted for half the intake under this group. Arrivals of unwrought copper were reduced to Zero after early progressive reduction from Rs. 59 lakhs in 1942-43 to Rs. 26 lakhs in 1943-44. Supplies of tin from abroad were valued at Rs. 76,682 in 1942-43 and Rs. 43,776 in 1943-44 but were nil in the year under review. Imports of Zinc shrank further in 1944-45 when they were valued at Rs. 4 lakhs only as compared with Rs. 8 lakhs in the preceding year and as much as Rs. 62 lakhs in 1942-43.

Machinery and Millwork (Rs. 16,39 lakhs).—The improvement in value of machinery and mill work noted in the preceding year became more marked in 1944-45 for which imports were valued at Rs. 16,29 lakhs as compared with Rs. 11,31 lakhs in the preceding year. Partially the increase in imports reflected the settled conditions in the market after the elimination of Japan and partly it could be traced to the sharp rise in prices. The improvement was shared by all kinds of machinery excepting the cotton textile machinery. After the sharp setback in 1943-44, the arrivals of machine tools noted a substantial advance, while electrical machinery was responsible for nearly 20 per cent. of the total intake in the year under review. The United Kingdom was the principal source of supply owing to elimination of Japan in 1942 and the stricter restrictions on imports from the U.S.A. and other hard currency countries owing to the need for conserving the foreign exchange.

The following table shows the details of the main types of machinery for the past three years :—

	1942-43	1943-44	1944-45
	(Rs. in lakhs)		
Primemovers other than electrical	60	62	76
Electrical machinery ..	2,04	2,24	3,02
Machine tools, etc. ..	47	28	1,46
Cotton machinery ..	1,83	2,40	2,27
Jute machinery.. ..	35	24	55
Other textile machinery.	60	54	56

The details of other types of machinery are not available; but the following information is available for the three years ended March 31, 1943:—

	(Rupees in lakhs)		
	1940-41	1941-42	1942-43
Agricultural machinery	23	30	8
Boilers	36	60	48
Mining	31	18	27
Oil crushing and refining	15	7	3
Paper mill	31	31	15
Refrigerating	18	20	3
Rice and flour mill	5	4	2
Saw mill	7	15	11
Sewing and knitting machines and parts	51	62	28
Sugar machinery	41	20	8
Tea machinery	16	11	12
Printing and lithographing presses	5	22	2
Belting for machinery	62	68	48
Typewriters	24	24	18

Vehicles (Rs. 1,78 lakhs).- Imports of vehicles excluding locomotives for railways made a slight recovery to Rs. 1,78 lakhs in the year under review after facing a sharp setback from Rs. 5,71 lakhs in 1942-43 to Rs. 1,27 lakhs in the following year. The improvement was mainly due to larger arrivals of carriages and wagons and parts thereof and chassis. The former jumped up by three and a half times from Rs. 9 lakhs to Rs. 42 lakhs while the latter mounted up from Rs. 1¼ lakhs to 15½ lakhs as against Rs. 2,04 lakhs in 1942-43. Imports of motor cars were reduced further from 41 cars valued at Rs 1 lakh in 1943-44 to only 12 cars valued at Rs. 51 000 in 1944-45.

Hardware (Rs. 1,29 lakhs).—Imports of hardware, excluding cutlery and electroplated ware showed a rise of 37 per cent. in the year under review, for their value was Rs. 1,29 lakhs as compared with Rs. 94 lakhs in 1943-44 and Rs. 1,01 lakhs in 1942-43. The United Kingdom monopolised the bulk of the shipments, but imports from the U.S.A. and Canada trickled through the strainer of the import trade control.

Chemicals Drugs and Medicines (Rs. 10,14 lakhs).—Imports under this head staged a sharp recovery of 48 per cent in the year under review and were valued at Rs. 10,14 lakhs after making a small progress from Rs. 5,91 lakhs in 1942-43 to Rs. 6,86 lakhs in 1943-44. Nearly three-fifths of the imports were in respect of chemicals which amounted to Rs. 6,88 lakhs in 1944-45 as compared with Rs. 4,97 lakhs in the preceding year and Rs. 4,67 lakhs in 1942-43. The arrivals of drugs and medicines were able to maintain the pace of progress of the preceding year when they were valued at Rs. 2,09 lakhs as against Rs. 1,47 lakhs in 1942-43 and Rs. 2,87 lakhs in 1944-45. The bulk of the imports were in respect of proprietary medicines.

Paper and Pasteboard (Rs. 2,61 lakhs).—Imports under this group showed handsome improvement in 1944-45 for which they were valued at Rs. 2,61 lakhs as compared with Rs. 1,78 lakhs in the preceding year and Rs. 1,83 lakhs in 1942-43. The increase in the value of imports was almost wholly attributable to the higher imports of paper which amounted to Rs. 2,40 lakhs in the year under review as compared Rs. 1,63 lakhs in the preceding year and Rs. 1,65 lakhs in 1942-43. No details regarding the quantity or sources of supply are available; but it is believed that imports of paper in 1944-45 may be equal to the quantity arrived in 1942-43, *i.e.* around 0.4 million cwts. Canada and the U.S.A. were the principal sources of supply.

Owing to acute shortage of supply, the official and non-official efforts were directed towards maximising production and reducing consumption. The paper mills in the country were provided with higher coal allotment but were able to turn out 1,472,320 cwts. of paper in 1944-45 as compared with 1,752,160 cwts. in the preceding year. The private comsumption of paper was subjected to a rigid control under the Paper Control Economy Order which was issued in June 1944 when the first signs of falling production were noted.

No information is available regarding imports of newsprint which were about 45,000 tons a year in the pre-war years. In 1941, the News Print Control Order was issued and the stocks were frozen and rationed. The price of newspapers was controlled in November 1943. Owing to modest improvement in imports in the year under review, the Government of India raised the quota of newspapers by one-third with effect from August 1, 1944.

Liquors (Rs. 1,08 lakhs).—The small improvement noted in imports of liquors in 1943-44 was followed by a sharp setback in the following year when imports under this head were valued at Rs. 1,08 lakhs being less than the 1943-44 figure by Rs. 16 lakhs. The intake of ale, beer and porter showed a gain of Rs. 2 lakhs and amounted to Rs. 14 lakhs. Spirit which accounted for nearly three-fourth of the imports of liquor, recorded a fall in value from Rs. 1,00 lakhs to Rs. 85 lakhs, while imports of wines were reduced from Rs. 13 lakhs to Rs. 9 lakhs.

No quantitative figures are available from the trade returns; but the monthly survey of Business conditions in India reported that imports totalled 1,061,000 gallons in 1944-45 as compared with 910,000 gallons in the preceding year.

Sugar (Rs. 1,864).—The import trade in sugar, which occupied a key position before the introduction of protection gradually dwindled until it reached a negligible value of Rs. 1,864 representing a small consignment in May 1944 as compared with 21 tons valued at Rs. 12,931 in the preceding year. The imports in 1942-43, the year which saw the conquest of the sugar exporting countries in the east by Japan were valued at Rs. 1,87,314 and totalled 563 tons as compared with 937,000 tons worth Rs. 16,09 lakhs in 1928-29.

Provisions and Oilmen's Stores (Rs. 1,21 lakhs).—After reaching the bottom at Rs. 55 lakhs in 1943-44 the imports of provisions and

officers's stores made an impressive upswing to reach Rs. 1,21 lakhs in the year under review. This was attributed to the large scale arrivals of condensed and preserved milk and farinaceous and patent foods due to extreme shortage of fresh milk. Imports of condensed and preserved milk jumped up by five times from Rs. 10 lakhs to Rs. 49 lakhs while those of farinaceous and patent foods mounted up from Rs. 12 lakhs in 1943-44 to Rs. 33 lakhs in the year under review. A small improvement of Rs. 3 lakhs was noted under canned and bottled provisions which were valued at Rs. 11,49,079 in 1944-45. Biscuits and cakes, which formed an important item in this group, accounted for imports worth Rs. 6,675 only as compared with Rs. 12,141 in 1943-44.

Dyes and Colours (Rs. 7,92 Lakhs). The tightening of restrictions on imports of dyes and colours from non-sterling area resulted in reduction of imports from Rs. 8,30 lakhs in 1943-44 to Rs. 7,92 lakhs in the following year. The decline was more in dyes and was partly offset by an increase in imports of paints and colours. Imports of alizarine dyes were valued at Rs. 5 lakhs only showing a drop of Rs. 13 lakhs over the preceding year, while consignments of other coal tar dyes received a sharp setback of Rs. 52 lakhs and were valued at Rs. 6,36 lakhs in 1944-45. Paints and colours accounted for an intake of Rs. 65 lakhs as compared with Rs. 46 lakhs in the preceding year, to which they had dropped from Rs. 61 lakhs in 1942-43.

Other Articles.—The following table shows the trend of import trade in respect of some of the other articles of importance :—

III.—EXPORTS OF MERCHANDISE

Exports of merchandise from British India during 1944-45 were influenced mainly by the need to consolidate the home front in the face of the rising tide of inflation and by the shipping space. Yet, the total export trade in the year under review reached a new high level owing mainly to the increase in the prices of exportable goods.

Out of Rs. 211,05 lakhs of total exports, three commodities, namely, jute, cotton and tea accounted for nearly three-fourths of the shipments. Jute, raw and manufactured, showed a substantial increase over the preceding year and grew also in importance. The total shipments represented a little over 32 per cent of the total value of exports in 1944-45 as against 29 per cent in the preceding year. Exports of raw cotton were approximately the same, but those of cotton manufactures received a sharp setback and their share was a little less than 18 per cent as compared with 21·3 per cent in the preceding year. Exports of tea were almost steady. Importance of seeds in the trade was reduced further, but the trade in other articles showed sizeable advance.

EXPORTS

Jute, Raw and Manufactured (Rs. 67,92 lakhs)—Exports under this head accounted for 23 per cent of the total Indian exports in 1944-45 as compared with 30 per cent in the previous year following further improvement from Rs. 57,78 lakhs to Rs. 67,92 lakhs as compared with Rs. 47,30 lakhs being the value of the combined shipments of raw and manufactured jute in 1942-43.

Exports of jute manufactures advanced by 11 per cent in volume and 22 per cent in value and totalled 708,184 tons valued at Rs. 60,42 lakhs in 1944-45 as compared with 634,200 tons worth Rs. 49,47 lakhs in the preceding year. Shipments of gunny bags amounted to Rs. 24,50 lakhs showing a gain of Rs. 4,71 lakhs over 1943-44 figure, while exports of gunny cloth advanced from Rs. 28,97 lakhs in 1943-44 to Rs. 34,45 lakhs in the following year, the gain being more than 90 per cent, over 1942-43 shipments which were valued at Rs. 18,54 lakhs.

On the other hand, exports of raw jute shrank further from 177,400 tons valued at Rs. 8,33 lakhs to 160,200 tons worth Rs. 7,50 lakhs in the year under review.

The total supplies of raw jute at the commencement of the 1944-45 season were estimated to be 41·3 lakh bales and the outturn of the 1943-44 season at 54·93 lakh bales making a total available supply of 96·23 lakh bales. The total consumption was placed at 83 lakh bales. But the prospect of a 22 per cent. increase in the current season's crop was mainly responsible for a downward trend in prices. The index number of average raw jute, which ruled at 123 in March 1944 moved up to 126 in the following month and then gradually reacted to 117 in October at which it remained unchanged for the rest of the year. Although the prices of raw jute remained unofficially controlled since July 1943 they were given official recognition only from April 1944 when a comprehensive order was issued fixing ceilings for all grades of jute as well as manufactures.

The year was notable for the institution of a complete control over the jute industry which continued to be handicapped by shortage of coal fuel and requisitioning of certain units. The Indian Jute Mills' Association introduced a scheme whereby the loss of production of all requisitioned mills could be made good by increased output in other units. The total production of the industry showed a small improvement of 25,000 tons over the previous year and was placed at 975,000 tons for the year under review. Stocks of hessian cloth and bags which stood at 44·5 crores yards in March 1944 steadily declined to 26·3 crores yards by December and then gradually went up to 29·1 crores yards in March 1945. The same trend was noticed in the case of sacking cloth and bags, stocks of which were placed at 23·6 crores yards at the end of March 1945 as against 29·4 crores yards and 30·9 crores yards for April and May 1944 respectively.

Reports from overseas consuming centres indicated acute shortage of jute goods for packing and other purposes. In the United Kingdom, imported jute goods served to meet urgent requirements only. Out of the remaining two important customers of this country, the U.S.A. ceased to be a free market for both raw and manufactured jute; but the potential demand was estimated to be 700 million yards per year. The grain trade in Argentine was adversely

hit by shortage of jute packing following the supplies from India being equivalent to 55 per cent. of that country's total requirements.

Cotton, Raw, (Rs. 6,93 lakhs).—After a downward trend as the result of the war developments, exports of raw cotton saw a welcome turn in the trend in 1944-45 during which the overseas demand broadened from 282,000 bales valued at Rs. 6,36 lakhs to 319,000 bales worth Rs. 6,93 lakhs. The United Kingdom absorbed 73 per cent. of the exports and was responsible for taking 234,000 bales of Indian cotton as compared with 180,000 bales in 1943-44. The total intake of cotton from India by the British Empire was 250,000 bales as against 216,000 bales in 1943-44. Other shipments totalled 69,000 bales as against 66,000 bales. India's former customers in Europe and the Far East continued out of the picture of the export trade.

The area under cotton crops in 1944-45 season was officially estimated at 14,744,000 acres yielding 3,543,000 bales representing a drastic cut of 28 per cent. in acreage and 31 per cent in yield over the previous year. The reduction in output was attributable to the statutory restrictions on growth of cotton in provinces like Bombay, a vigorous campaign for growing food in several other provinces and unfavourable weather conditions at the sowing time in many of the major cotton growing areas. The proportion of medium and long staple lengths to total output declined from 62 per cent in 1943-44 to 45 per cent. in the year under review.

The cotton trade placed the season's world supply of Indian cotton, including the previous season's carryover of 4,050,000 bales at 8,350,000 bales compared with 8,950,000 bales for 1943-44. The season's mill consumption of Indian cotton was the second best in the history of the commodity at 4,245,000 bales compared with 4,198,000 bales in 1943-44, while the total world consumption of the commodity was estimated at 4,600,000 bales as against 4,579,000 bales in the preceding season. The world's carryover of Indian cotton on September 1, 1945 was placed at 3,600,000 bales showing a reduction of 450,000 bales over the corresponding day a year ago. Of this, about 3,475,000 bales, comprised of old and new crop short and medium staple cottons, represented the carryover in India showing an overall reduction of 475,000 bales in the carryover.

Cotton Manufactures (Rs. 37,60 lakhs).—The acute shortage of cotton goods within the country brought about a sharp reduction in the export of cotton yarns and manufactures from Rs. 42,62 lakhs to Rs. 37,60 lakhs. The value of cotton twist and yarn for 1944-45 was Rs. 2,28 lakhs showing a decline of Rs. 89 lakhs. While exports of cotton piecegoods shrank by Rs. 27s lakhs to Rs. 33,79 lakhs. Quantitatively exports of yarn declined from 19,078,000 lbs. in 1943-44 to 16,918,000 lbs. in the following year, while these of cotton piecegoods were reduced from 462.3 million yards in 1943-44 to 414.9 million yards in the following year representing nearly a 50 per cent. cut in the record shipment touched in 1942-43.

As in the previous year, the working of the industry was subject to governmental control under the cotton cloth and yarn control. Yet the black markets continued to flourish and even the measures to control the management of some of the mills failed to achieve the objective. Complaints were also received at the beginning of the year regarding exports of inferior cotton goods at fabulous prices. The Government of India, therefore, inaugurated a scheme for restricting profit margin on export of cloth and yarn and also for regulating their quality. A certain percentage of the profit margin was taken as a cess fee for financing research in textile technology.

In the domestic market, production was reduced owing to shortage of coal and was placed at 4,695.1 million yards representing a drop of 4.2 per cent. over the all time record output reached in the preceding year. On the other hand, the demand on civilian account continued to broaden with the result that the distribution machinery was tightened by directing the mills to distribute their output to only those holding connections in the three years ended 1942 and by evolving a scheme for retail distribution including rationing of cloth in certain cities. The question of prices was reviewed by the Textile control Board periodically and the gradual reduction in cloth prices was faithfully reflected in the drop of the index number of wholesale prices of cotton manufactures in India from 381 in January 1944 and 324 for April to 274 for March 1945.

Tea (Rs. 38,12 lakhs). Next to jute manufactures, tea occupied unique importance in the export trade of this country. Exports of tea were subjected, as in the past to governmental regulation. The Government of India had fixed quota in 1943 at 421 56 million lbs., *i.e.*, 110 per cent. of the standard export quota, but lowered it for 1944 at 364 08 million lbs. being 95 per cent. of India's standard export figure owing to the early estimates of reduced output subject, however, to upward revision later on in the light of the crop outlook. Following the clamour for Indian tea among overseas buyers, the export quota was subsequently raised by 15 million lbs. to 379 41 million lbs. being equivalent to 99 per cent. of India's standard export figure.

Under an arrangement between the Government of India and the British Ministry of Food, the latter was given the monopoly for buying tea for export. The price arrangement arrived at in the first year of the war continued to remain in force. By this arrangement, tea planters were paid the average prices for the year 1936, 1937 and 1938 plus allowances for increase in the production costs since the end of the basic period. In 1944, the Food Ministry agreed to pay 5 d. per lb. of tea more than the basic price of each estate in India.

Exports of tea amounted to 415,455,000 lbs. valued at Rs. 38,12 lakhs in the year under review as compared with 408,162,000 lbs. vauled at Rs. 37,19 lakhs in 1943-44. The United Kingdom and Ireland were India's best customers having absorbed between them nearly 63 per cent. of the total shipments, *i.e.*, 262,265,000 lbs. as compared with 269,805,000 lbs. in 1943-44 and 307,995,000 lbs. in 1938-39. Canada and the U.S.A. accounted, on the other hand, for continued improvement in their takings

during the war period. Exports to the former totalled 41,281,000 lbs. in 1944-45 as against 32,822,000 lbs. in the preceding year and represented in increase of 170 per cent. over the 1938-39 share. Shipments to the U.S.A. were reduced from 59,966,000 lbs. to 51,433,000 lbs., but still stood considerably high above the pre-war figure of only 8,096,000 lbs.

The Indian tea industry which is mainly concentrated in Assam and Bengal passed through an anxious period owing to the political and economic conditions created by the fighting on the Assam border and numerous shortages in respect of labour, coal, fertilisers, food, transport and managerial personnel. Yet, the area under plantation in 1944 was 840,644 acres being approximately the same as in 1939 and showed a full of only 1,657 acres over the preceding year. But the output showed a sharp decline of 8 per cent. from 554,830,000 lbs. in 1943 to 509,500,000 lbs. in 1944. Of this, the tea gardens in Northern India produced 409,26 million lbs compared with 452 33 million lbs. in 1943.

The average wholesale price of tea for internal consumption remained upward, the rise being from as. 9-8 per lb for March 1944 to as 13-2 in the same month a year after. The annual average prices of tea sold at Calcutta auctions for consumption in India were as. 10-7 per lb. in 1944 as compared with as 9-8 in 1943. Rs. 1-0-10 in 1942 and only as. 4-4 in 1939. On the other hand, the prices of tea for exports were stabilised at as. 13-9 for clean common broken pekoe and as. 14-11 for medium broken after they were stepped up at the end of June from as. 12-5 and as. 13-7 per lb respectively.

Oilseeds (Rs 10,53 Lakhs)—The gain in value of exported oilseeds noted in the preceding year was wiped in the year under review during which exports totalled Rs 10,53 lakhs as compared with Rs. 11,15 lakhs in 1943-44 and Rs 10,52 lakhs in 1942-43 Quantitatively, however, the outward shipments mounted up from 323,390 tons in 1943-44 to 340,927 tons in the following year. There was very good demand for Indian oilseeds from all over the world owing to acute shortage of fats an Oils, but the exports from India were regulated by the Central Government after having due regard to the requirements at home. The British Ministry of food was the main overseas buyer during the year as in the past.

The Indian linseed crop of the season 1943-44, which was mostly marketed in the year under review, was estimated at 395,000 tons as against 410,000 tons in the preceding season. No quantitative figures are available but exports, which had declined from Rs 3,10 lakhs in 1942-43 to Rs. 1,10 lakhs in the following year, advanced to Rs. 2,74 lakhs in the year under review Shipments from India in 1942-43 were of the order of 161,000 tons Most of the exports took place through the British Ministry of food. The price trend was upward.

The production of groundnuts which normally accounted for 3 million tons out of total output of 7½ million tons oilseeds was estimated at 3,500,000 tons for 1944-45 showing a reduction of 6.9 per cent. over the preceding year. No quantitative figures regarding exports are available; but their value amounted to Rs. 6,31 lakhs representing 60 per cent. of the total shipments of oilseeds and showed a fall of Rs. 1,91 lakhs over the preceding year. The United Kingdom was the main customer; but small shipments were also sent to South Africa, Canada and Australia.

Following the shortage of food supplies within the country there was intense agitation for banning totally the exports of groundnut and its oil which are regarded as subsidiary foods. Several commercial bodies led by the Federation of Indian Chambers of Commerce and Industry pleaded towards the end of 1943-44 for a complete ban on exports of groundnuts till the end of food emergency. But the fact that groundnuts cannot take the place of pulses and millets to an unlimited extent without a radical change in the habits of the people and the limitations on the storage capacity, coupled with the acute shortage of fats and oils in the overseas countries, partifularly Britain, influenced Government's decision to allow exports to limited quantities which were allocated to the quota holders.

The prices of groundnut ruled more or less steady in the year under review. The British Ministry of Food, which was the principal buyer, lowered its buying limit to £30 at the beginning of 1944.

Exports of castor seed continued to decline and stood at Rs. 20 lakhs in the year under review as compared with Rs. 53 lakhs in 1943-44 and Rs. 60 lakhs in 1942-43. The Ministry's purchase price averaged £30½ as compared with £33 at the beginning of 1944.

Shipments of rapeseed continued to remain more or less unchanged and were valued at Rs. 60 lakhs in the year under review as against Rs. 57 lakhs in the preceding year and Rs. 66 lakhs in 1942-43 The output of rape and mustard dropped by 11 per cent. from 1,070,000 tons in 1943-44 to 95 ,000 tons in the following year.

Exports of sesamum received a sharp setback from Rs. 21 lakhs in 1943-44 to Rs. 7 lakhs only in the following year, while the production was reduced by 12 per cent. from 447,000 tons to 393,000 tons.

Hides and Skins (Rs. 8,20 Lakhs.)—The downward trend of exports of hides and skins witnessed in the previous two years was carried forward to one more year owing to acute shortage of supply. The total exports under this head were valued at Rs 8,20 lakhs in the year under review as compared with Rs. 8,49 lakhs in the preceding year.

Shipments of tanned hides and skins amounted to Rs 4,21 lakhs being less by Rs. 17 lakhs than the preceding year. Of these, hides totalled 4,281 tons valued at Rs. 1,49 lakhs only as against 6,976 tons worth Rs. 2,03 lakhs in 1943-44, while exports of skins advanced by a little over two per cent. in volume and 20 per cent. in value from 3,701 tons valued at Rs. 2,06 lakhs to 3,786 tons valued at Rs. 2,51 lakhs.

Exports of raw hides and skins were valued at Rs. 3,99 lakhs in the year under review showing a drop of Rs. 14 lakhs over the preceding year. The bulk of the shipments consisted of skins which were valued at Rs. 3,78 lakhs in the year under review as compared with Rs. 3,67 lakhs in the preceding year. Exports of goat skins

received a sharp setback in volume from 15,343 tons in 1943-44 to 9,597 tons in the following year; but their value declined by 17 per cent. from Rs. 2,42 lakhs to Rs. 2,03 lakhs. On the other hand, exports of raw sheep skins increased by nearly two and a half times in volume from 655 tons to 1,569 tons and by nearly 80 per cent in value from Rs. 62 lakhs to Rs. 1,10 lakhs.

Exports of raw hides were valued at Rs. 17 lakhs only showing a sharp decline of Rs. 26 lakhs over the preceding year. Cow hides accounted for a reduction of 80 per cent. in volume from 1,815 tons to only 365 tons and 70 per cent. in value from Rs. 21 lakhs to 6 lakhs. No details are available regarding shipment of buffalo hides which totalled 687 tons valued at Rs. 9 lakhs in 1943-44.

The year under review proved worst for the trade since the beginning of the war. Scarcity of supply due to gradual extinction of animals, bad prices, official restrictions on the movement and marketing of hides and risk of maintaining stocks affected the trade. The general quality of hides was better this year; but the year saw a drastic cut in war orders. A strong demand was in evidence for tanned sheep skins from South Africa and for tanned goat skins from the U.S.A. with the result that the United Kingdom got poor deliveries in spite of an increase in the London ceiling prices. In the last quarter of the financial year, therefore, steps were taken to canalise supplies in the direction of the United Kingdom by stopping the issue of export licences to the U.S.A. and by the decision of the South African Government not to issue essentiality certificates for imports unless the goods conformed to London Controlled prices and standards.

Metals, metallic ores and quarry products (Rs. 5,56 lakhs). The heavy demand made on the domestic output by the allied war effort had its natural repercussions on the export trade in this group which declined further from Rs. 6,40 lakhs in 1943-44 to Rs. 5,56 lakhs in the year under review. The decline was on account of the drastic cut in the shipments of metals and metal ores but exports of non-metallic mining and quarry products showed a small rise of Rs. 13 lakhs to Rs. 3,04 lakhs. The increase was wholly in the exports of mica which totalled Rs. 2,94 lakhs as compared with Rs. 2,80 lakhs in the preceding year.

Exports of metallic ores and scrap iron were reduced by half from Rs. 2,24 lakhs to Rs. 1,11 lakhs. Manganese ore, for which there was heavy demand from abroad in the previous war years, noted a drastic cut in exports from Rs. 1,85 lakhs in 1943-44 to Rs. 53 lakhs only in the following year.

The total value of metals exported from British India showed a further, though moderate, setback in the year under review and amounted to Rs. 1,26 lakhs as compared with Rs. 1,41 lakhs in the preceding year. Nearly 65 per cent. of the exports were in respect of iron and steel and manufactures thereof. These were valued at Rs. 91 lakhs showing a gain of Rs. 14 lakhs over the preceding year. Exports of iron and steel excluding pig iron and iron ore improved by 50 per cent. from 2,100 tons in 1943-44 to 3,100 tons in the following year. On the other hand, shipments of pig iron declined from 186,300 tons worth Rs. 98 lakhs in 1943-44 to 159,000 tons valued at Rs. 81 lakhs in the year under review. The export trade in other metals showed handsome advance from Rs. 20 lakhs to Rs. 50 lakhs.

Food Grains and Flour (Rs. 1,23 Lakhs).— Exports under this group contracted further to only Rs. 1,23 lakhs as compared with Rs. 2,31 lakhs in 1943-44 and Rs. 6,93 lakhs in 1942-43. The sharp reduction in trade was dictated by domestic shortages of food leaving exports to be restricted to small quantities meant mostly for Ceylon and other neighbouring countries. The publication of the details about the quantity or classification was discontinued by the Government of India since December 1942.

Other Articles.— The following is a summary of the course of trade in the more important of the remaining articles of export:—

	1942-43	1943-44	1944-45

Index Numbers of Prices.

Index Numbers of wholesale prices in India during the years 1861-1931 are available in the publication "Index Numbers of Indian Prices, 1861-1931" issued by Director-General of Commercial Intelligence and Statistics, Calcutta, which contains (1) the unweighted index numbers of 28 articles of export; (2) the unweighted index numbers of 11 articles of import; (3) the general unweighted index numbers for 39 articles of export and import and (4) the weighted index numbers of 100 articles. The last of the four series is a continuation of the series first compiled and published by F. J. Atkinson in the Journal of Royal Statistical Society in March 1897. The index figures subsequent to 1931 are available in the addenda to the Index Numbers of Indian Prices 1861-1931 published from time to time. The compilation of all these series was discontinued in August 1941.

The following table contains these index numbers since the year 1931 :—

(Price in 1873 = 100)

Year	Exported articles 28 (unweighted)	Imported articles 11 (unweighted)	General Index No. for all (39) articles (unweighted)	Weighted Index No. (100 articles)
1931	125	134	127	157
1932	120	139	126	149
1933	118	128	121	139
1934	117	122	119	136
1935	128	122	127	149
1936	127	122	125	150
1937	133	144	136	155
1938	128	142	132	147
1939	133	137	134	157
1940	158*	183*	164	Not available
1941 (Seven-monthly average) ..	Not available	Not available	181	..

* Provisional.

In 1938, the Economic Adviser to the Government of India started a series of index numbers of weekly wholesale prices of certain articles in India. In addition to this series a new series was started in 1940 with a different base period and both these series are being published every week by the Office of the Economic Adviser to the Government of India, which consist of unweighted index numbers of (1) 11 articles of agricultural commodities, (2) 7 articles of raw materials and (3) 5 manufactured articles.

In addition to these series of wholesale prices for the whole of India, wholesale price index numbers for Calcutta and Cawnpore are being published by the Director-General of Commercial Intelligence and Statistics, Calcutta, and the Government of the United Provinces respectively. Similar wholesale prices index numbers for Bombay, Karachi and Madras which were being compiled and published by the Governments of Bombay, Sind and Madras respectively were discontinued since November 1943, June 1942 and June 1943 respectively.

The following table gives these index numbers since 1931 :—

Wholesale price index numbers for Calcutta, Bombay, Karachi, Cawnpore and Madras.

Year	Calcutta (July 1914 = 100)	Bombay (July 1914 = 100)	Karachi (July 1914 = 100)	Cawnpore (1913 = 100)	Madras (Week ended 21st August 1939 = 100)
1931	96	109	95	..	..
1932	91	109	99	..	..
1933	87	98	97	..	..
1934	89	95	96	..	..
1935	91	99	99	..	..
1936	91	96	102	117	..
1937	102	106	108	92	..
1938	95	101	104	85	..
1939	108	109	108	101	..
1940	120	118	116	100	119
1941	139	137	120	104	137
1942	185	219	†	175	192
1943	307	256† (ten-monthly average)		304	270† (five-monthly average)
1944	298			296	
1945	289			307	

† Discontinued.

About the end of the year 1929 there began a sharp decline in wholesale prices which continued during 1930 and 1931. This downward trend, although somewhat checked in 1932, continued during 1933 and 1934 when the prices reached their lowest level. The prices, however, showed some improvement during the next two years and registered a sharp rise during 1937. The prices registered a perceptible fall in the following year but they soon recovered and registered a further rise in Calcutta and Bombay during 1939.

With the outbreak of the war the wholesale prices began to soar. This tendency continued till December, 1939, but thereafter there was a gradual fall till June, 1940, when they again showed a partial recovery which continued till the middle of 1941. From June onwards, the prices rose very rapidly till about the end of the year 1943. The Bombay wholesale prices index number reached its highest level (267) in June 1943 and stood at 240 in October 1943 when the series was discontinued. During 1944 wholesale prices both at Calcutta and Cawnpore registered a fall, which was maintained at Calcutta during the following year. At Cawnpore, however, the index number rose to 307 during 1945.

The various Provincial Governments publish in their respective *Gazettes* fortnightly and monthly statements of retail and wholesale prices of certain important commodities. In addition to these, however, some of the Provincial Governments also publish working class cost of living index numbers. Such index numbers are being published regularly every month for the following centres: for Bombay, Ahmedabad, and Sholapur by the Labour Office of the Government of Bombay; for Nagpur and Jubbulpore by the Labour Commissioner, Central Provinces and Berar; for six centres in Bihar by the Commissioner of Labour and Employment, Bihar; for Madras, by the office of the Secretary to the Commissioner of Civil Supplies, Board of Revenue, Madras; for Lahore, Sialkot, Ludhiana, Rohtak and Multan by the office of the Director of Industries, Punjab and for Cuttack, by the office of the Director of Development, Orissa. In addition to these series, working class cost of living index number for Jalgaon in the Bombay Province and for Bangalore in the Mysore state and cost of living index numbers for low paid employees at eight places in Madras Province and for low paid government servants at five places in the United Provinces are at present being compiled.

The working class *cost of living* index number for Bombay, which was originally compiled on a pre-war base, was revised during 1937, the base adopted for the new series being July 1933 to June 1934=100. The revised index number stood at 242 in December 1945, the average for 1945 being 235. The Ahmedabad cost of living index number, with base August 1926 to July 1927=100, stood at 205 in December 1945 while the Sholapur cost of living index number, with base February 1927 to January 1928=100, stood at 204 in December 1945. The Nagpur cost of living index number, on base January 1927=100, was 173 in December 1945 while the Jubbulpore Index on the same base was 167. The Madras cost of living index number, with base July 1935 to June 1936=100, was 224 in December 1945. The Lahore cost of living index number, with 1931-35 prices equated to 100, was 351 in December 1945. The cost of living index numbers for Sialkot, Ludhiana, Rohtak and Multan, with 1931-35 prices equated to 100, were 349, 388, 344 and 323 respectively for September 1945.

The catastrophic fall in retail prices which commenced at the end of 1929 continued during 1930 and 1931. In 1932 prices ruled at a slightly lower level than in 1931. In 1933 and 1934 the downward tendency of prices continued. This downward tendency was somewhat checked during 1935 and 1936. The prices showed a definite rise in 1937, remained more or less steady during 1938-39 and registered continuous marked increases during the succeeding four years.

The inadequacy as also the general unreliability of Indian price statistics has been the subject of comment by many committees and commissions of enquiry including the Indian Economic Enquiry Committee of 1925, the Royal Commission on Indian Labour and also by Messrs. Bowley and Robertson who were invited by the Government of India to advise them on the question of obtaining more accurate and detailed statistics. The eleventh Industries Conference held at Mysore in December 1939 and the first Conference of the Labour Ministers held at New Delhi in January 1940 recommended that the Central Government should undertake legislation to facilitate the collection of statistics relating to industries. In pursuance of this recommendation, the Government of India introduced in the Legislative Assembly in February 1942 a bill on the subject which has since been passed by the Central Legislature and received the assent of the Governor-General. This Act which is called the Industrial Statistics Act, 1942, empowers the provincial Governments to arrange for the collection of statistics relating to prices of commodities as also certain other matters like wages, employment, industrial disputes, etc.

In view of the inadequacy of the existing retail price data, especially from the point of view of compiling cost of living index numbers, the Court of Enquiry constituted in August, 1940, under the Trade Disputes Act 1929 under the Chairmanship of the Hon'ble Sir B. N. Rau to investigate the question of dearness allowance for the railway employees recommended that the Central Government should take up the work of preparation and maintenance of cost of living index figures for three distinct classes of areas in India, viz. city, urban and rural. In pursuance of this recommendation, the Government of India outlined a tentative scheme for the preparation and maintenance of cost of living index numbers for important centres in British India. The scope of the Scheme has been limited to the preparation of figures for industrial labour. A special post of the Director, Cost of Living Index Scheme, has been created and a Committee of experts has been appointed to assist him. Unweighted retail price index numbers for 15 selected rural centres in British India where cost of living index numbers are not available are being published by the Director, Cost of Living Index Scheme.

The Press.

The newspaper Press in India is an essentially English institution and was introduced soon after the task of organising the administration was seriously taken in hand by the English in Bengal. In 1773 was passed the Regulating Act creating the Governor-Generalship and the Supreme Court in Bengal and within seven years at the end of the same decade, the first newspaper was started in Calcutta by an Englishman in January 1780. Exactly a century and a third has elapsed since, not a very long period certainly, a period almost measured by the life of a single newspaper, *The Times*, which came into existence only five years later in 1785; but then the period of British supremacy is not much longer, having commenced at Plassey, only twenty-three years earlier. Bombay followed Calcutta closely, and Madras did not lag much behind. In 1789 the first Bombay newspaper appeared, *The Bombay Herald*, followed next year by *The Bombay Courier*, a paper now represented by *The Times of India* with which it was amalgamated in 1861. In Bombay the advent of the press may be said to have followed the British occupation of the island much later than was the case in Calcutta. In Calcutta the English were on sufferance before Plassey, but in Bombay they were absolute masters after 1665, and it is somewhat strange that no Englishman should have thought of starting a newspaper during all those hundred and twenty-five years before the actual advent of *The Herald*.

The first newspaper was called *The Bengal Gazette* which is better known from the name of its founder as *Hicky's Gazette* or *Journal*. Hicky like most pioneers had to suffer for his enterprising spirit, though the fault was entirely his own, as he made his paper a medium of publishing gross scandal, and he and his journal disappeared from public view in 1782. Several journals rapidly followed Hicky's, though they did not fortunately copy its bad example. *The Indian Gazette* had a career of over half a century, when in 1833 it was merged into the *Bengal Harkaru*, which came into existence only a little later, and both are now represented by *The Indian Daily News* with which they were amalgamated in 1866. No fewer than five papers followed in as many years, the *Bengal Gazette* of 1780, and one of these, *The Calcutta Gazette*, started in February 1784, under the avowed patronage of Government, flourishes still as the official gazette of the Bengal Government.

In 1821 a syndicate of European merchants and officials commenced the publication of *John Bull in the East*, a daily paper which was intended to reflect Tory opinion in India and set an example to the Press generally in the matter of moderation and restraint. The name of this journal was altered to *The Englishman* by the famous Stocqueler in 1836.

From its commencement the press was jealously watched by the authorities who put serious restraints upon its independence and pursued a policy of discouragement and rigorous control. Government objected to news of apparently the most trivial character affecting its servants. From 1791 to 1799 several editors were deported to Europe without trial and on short notice, whilst several more were censured and had to apologise. At the commencement of the rule of Wellesley Government promulgated stringent rules for the public press and instituted an official censor to whom everything was to be submitted before publication, the penalty for offending against these rules to be immediate deportation. These regulations continued in force till the time of the Marquis of Hastings who in 1818 abolished the censorship and substituted milder rules.

This change proved beneficial to the status of the press, for henceforward self-respecting and able men began slowly but steadily to join the ranks of journalism, which had till then been considered a low profession. Silk Buckingham, one of the ablest and best known of Anglo-Indian journalists of those days, availed himself of this comparative freedom to criticise the authorities, and under the short administration of Adam, a civilian who temporarily occupied Hastings' place, he was deported under rules specially passed. But Lord Amherst and still more Lord William Bentinck were persons of broad and liberal views, and under them the press was left practically free, though there existed certain regulations which were not enforced, though Lord Clare, who was Governor of Bombay from 1831 to 1835, once strongly but in vain urged the latter to enforce them. Metcalfe, who succeeded for a brief period Bentinck, removed even these regulations, and brought about what is called the emancipation of the press in India in 1835, which was the beginning of a new era in the history of the Indian press. Among papers that came into being, was the *Bombay Times* which was started towards the close of 1838 by the leading merchants of Bombay, and which in 1861 changed its name to the *Times of India*. *The Bombay Gazette* founded in 1791, ceased publication in 1914.

The liberal spirit in which Lord Hastings had begun to deal with the press led not only to the improvement in the tone and status of the Anglo-Indian press, but also to the rise of the Native or Indian Press. The first newspaper in any Indian language was the *Samachar Darpan* started by the famous Serampore Missionaries Ward, Carey and Marshman in 1818 in Bengali, and it received encouragement from Hastings who allowed it to circulate through the post office at one-fourth the usual rates. This was followed in 1822 by a purely native paper in Bombay called the *Bombay Samachar* which still exists, and thus was laid the foundation of the Native Indian Press which at the present day is by far the largest part of the press in India, numbering over 650 papers.

From 1835 to the Mutiny the press spread to other cities like Delhi, Agra, Gwalior, and even Lahore, whereas formerly it was chiefly confined to the Presidency towns. During the Mutiny its freedom had to be temporarily controlled by the Gagging Act which Canning passed in June 1857 on account of the license of a very few papers, and owing still more to the fears of its circulating intelligence which might be prejudicial to public interests. The Act was passed only for a year at the end of which the press was once more free.

On India passing to the Crown in 1858, an era of prosperity and progress opened for the whole country in which the press participated. There were 19 Anglo-Indian papers at the beginning of this period in 1858 and 25 Native papers and the circulation of all was very small. The number of the former did not show a great rise in the next generation, but the rise in influence and also circulation was satisfactory. Famous journalists like Robert Knight, James Maclean and Hurris Mookerji flourished in this generation. The *Civil and Military Gazette* was originally published in Simla as a weekly paper, the first issue being dated June 22nd, 1872. Prior to and in the days of the Mutiny the most famous paper in Northern India was the *Mofussilite*, originally published at Meerut, but afterwards at Agra and then at Ambala. After a lively existence for a few years in Simla the *Civil and Military Gazette* acquired and incorporated the *Mofussilite*, and in 1876 the office of the paper was transferred from Simla to Lahore, and the *Gazette* began to be published daily.

INDIAN PRESS LAW.

Before 1835 all printing of books and paper was subject to licence by the Governor-General in Council, and the licences were issued or refused at the discretion of Government. Act XI of 1835 repealed the old Regulations and merely required registration of the printer and made a few minor requirements. That Act was replaced in 1867 by the present Press and Registration of Books Act, and, except for an Act which was in force for one year during the Mutiny, there was no further legislation directly affecting the Press until 1878 when the Vernacular Press Act was passed. That Act was repealed during the Viceroyalty of Lord Ripon in 1882. From that date until 1907 Government made no attempt to interfere directly with the liberty of the Press, the growth of sedition being dealt with in other ways by the passing in 1898 of section 124A of the Penal Code in its present form, which had been originally enacted in 1870, and by the introduction into the Penal Code of section 153A and into the Criminal Procedure Code of section 108. There were a certain number of prosecutions under those sections up to 1907, but the dissemination of sedition through the Press continued. In 1908 the Newspaper (Incitement to Offences) Act was passed which dealt with papers inciting to murder or to acts of violence. This Act failed to have the desired effect.

The Indian Press Act, 1910, was a measure of wider scope, the main object of which was to ensure that the Indian press generally should be kept within the limits of legitimate discussion. The Act deals not only with incitements to murder and acts of violence, but also with other specified classes of published matter, including any words or signs tending to seduce soldiers or sailors from their allegiance or duty, to bring into hatred or contempt the British Government, any Native Prince, or any section of His Majesty's subjects in India, or to intimidate public servants or private individuals.

Repeal of Press Legislation.—By the autumn of 1917 the Government of India had begun to consider the desirability of modifying at least one section of the Press Act to which great exception had been taken on account of the wide powers that it gave. Finally, after more than once consulting Local Governments, a Committee was appointed in February 1921 after a debate in the Legislative Assembly, to examine the Press and Registration of Books Act, 1867, and the Indian Press Act, 1910, and report what modifications were required in the existing law. That Committee made an unanimous report in July 1921, recommending:—

(1) The Press Act should be repealed.

(2) The Newspapers Incitements to Offences Act should be repealed.

(3) The Press and Registration of Books Act and the Post Office Act should be amended where necessary to meet the conclusion noted below: (a) The name of the editor should be inscribed on every issue of a newspaper and the editor should be subject to the same liabilities as the printer and publisher, as

regards criminal and civil responsibilities; (*b*) any person registering under the Press and Registration of Books Act should be a major defined by the Indian Majority Act; (*c*) local Governments should retain the power of confiscating openly seditious leaflets, subject to the owner of the press or any other person aggrieved being able to protest before a court and challenge the seizure of such document, in which case the local Government ordering the confiscation should be called upon to prove the seditious character of the documents. The powers conferred by Sections 13 to 15 of the Press Act should be retained. Customs and Postal officers being empowered to seize seditious literature within the meaning of Section 124A of the I. P. C. subject to review on the part of the local Government and challenge by any persons interested in the courts; (*e*) any person challenging the orders of Government should do so in the local High Court; (*f*) the term of imprisonment prescribed in Sections 12, 13, 14 and 15 of the Press and Registration of Books Act should be reduced to six months; (*g*) the provisions of Section 16 of the Press Act should be reproduced in the Press and Registration of Books Act.

Effect was given to these recommendations during the year 1922.

The Indian and Eastern Newspaper Society.—An important development in connection with newspapers in India took place in 1939, when the Indian and Eastern Newspaper Society was formed. The Society's principal objects are as follows:—(*a*) To act as a central organisation of the Press of India, Burma and Ceylon; (*b*) To promote and safeguard the business interests of members as affected by the action of Legislatures, Governments, the Law Courts, municipal and local bodies and associations or organisations commercial or formed for any other purpose; (*c*) To collect information upon all topics having a practical interest for members and to communicate the same to them. (*d*) To promote co-operation in all matters affecting the common interests of members; (*e*) To hold periodical conferences of its members to discuss and determine action on matters of common interest; (*f*) To make rules to govern the conduct of its members in specified matters, to provide penalties for the infringement thereof, and to provide means of determining whether there has been such infringement; (*g*) To maintain a permanent secretariat in India which should watch over the interests of members and should permit of a constant interchange of information and views; (*h*) To do all such other things as may be conducive or incidental to the attainment of the aforesaid objects.

Editors' Conference.—During 1940 a Conference of Editors was called by Mr. K. Srinivasan of *The Hindu* to consider the Government of India's restrictions on the Press under the Defence of India Act in connection with the Congress satyagraha movement. The Conference was held at Delhi and formed itself into a body representing the Editors of Indian newspapers. As a result of its representations the Government of India decided to withdraw the restrictions on the Press under the Defence of India Act and to set up in each province a Press Advisory Committee which Provincial Press Advisers should consult in connection with articles about which there was doubt. A Committee was also set up at Delhi to act in conjunction with the Chief Press Adviser. These Committees are intended to act as a sort of liaison between the Press and Government and are appointed with the sanction of both Government and the President of the Editors' Conference.

The All-India Newspaper Editors' Conference subsequently adopted a constitution with the following aims and objects:—(*a*) To preserve the high traditions and standards of journalism. (*b*) To serve and safeguard the interests of the press in regard to the publication of news and fair comment. (*c*) To secure all facilities and privileges to the press for the due discharge of its responsibilities. (*d*) To represent the press in India in its relations with the public and public institutions and particularly in its relations to Government to set up Committees who would act as liaison between the Government and the press as a whole. (*e*) To establish and develop contacts with Association with similar objects in other countries.

The Indian National Congress.

For a complete history of the movement represented by the Indian National Congress the reader is referred to earlier editions of the *Indian Year Book*. The Congress was founded in 1885 by Mr. Allan Octavian Hume, a retired member of the Indian Civil Service, and it held its first session in Bombay at Christmas of that year. The fundamental principles of the Congress then laid down were :—

Firstly, the fusion into one national whole of all the different and discordant elements that constitute the population of India;

Secondly, the gradual regeneration, along all lines, mental, moral, social and political of the nation thus evolved; and

Thirdly, the consolidation of union between England and India by securing the modification of such of the conditions as may be unjust or injurious to the latter country.

With these objects in view the Congress pursued an uneventful career until 1907. It undoubtedly exercised a great influence in inducing a spirit of national unity amongst the diverse peoples of India, in focussing the chief political grievances and in providing a training ground for Indian politicians. But in 1907 the extremists, chiefly of the Deccan and the Central Provinces, who had for some time chafed under the control of the older generation, succeeded in wrecking the Surat session of the Congress and produced a split. The senior members of the Congress therefore re-crystallised its creed in definite terms. They laid down that

"The objects of the Indian National Congress are the attainment by the people of India of a system of Government similar to that enjoyed by the self-governing members of the British Empire, and a participation by them in the rights and responsibilities of the Empire on equal terms with those members. These objects are to be achieved by constitutional means by bringing about a steady reform of the existing system of administration and by promoting national unity, fostering public spirit and developing and organising the intellectual, moral, economic and industrial resources of the country."

For some years following 1907 efforts were made to heal the split, but these were without avail. In 1916 a re-united Congress met at Lucknow under the presidency of Babu Ambica Charan Muzumdar of Faridpur in Bengal; but the union then effected was purely superficial. The difference between the moderates and the extremists proved to be fundamental, and the extremists captured the machinery of the Congress, so that from the period of the special session held at Calcutta in September 1920 the Congress passed entirely under the domination of Mr. Gandhi and his lieutenants.

In 1927 the Congress adopted independence as the goal of India. In the following two years the Congress made what the extremist left described as a climb-down. At its 1928 session the Congress, while adhering to Independence, agreed to accept Dominion Status, if granted, before the end of 1929. Things were tending towards a satisfactory settlement when in the latter half of 1929 the Congress insisted on the immediate grant of Dominion Status or an assurance that Dominion Status would be the basis of discussion at the Round Table Conference to be convened in England between representatives of England, British India and the Indian States. Here was the parting of the ways. The Liberals went their way and the Congress its own. In fulfilment of the "ultimatum" issued at its previous session, the Congress, at its 1929 session, declared itself for complete independence or "Purna Swaraj." Throughout the year 1930 the Congress was engaged in a defiance of the law of the land which, it was hoped, would help India, to attain complete independence. Early next year the Congress suspended civil disobedience by virtue of an agreement arrived at with the Government.

As a result of this Mr. Gandhi, on behalf of the Congress, went to London to take part in the Round Table Conference. While he was away things took a turn for the worse in the country, and matters reached a crisis with the birth of the New Year. In 1932 the Government bent all its efforts to making it impossible for the Congress to carry on its subversive activities and succeeded fully in its object. The Congress was crushed and all forms of Congress work throughout the country were successfully prevented. In fact as well as in law the Congress ceased to exist. In the middle of 1934 the civil disobedience movement, which had rendered the Congress illegal, was withdrawn. In the autumn of that year Mr. Gandhi retired from the Congress, although he remains in practice the virtual dictator of the organisation. During the next four or five years the Congress functioned as a constitutional organisation. It was actually in charge of His Majesty's Government for more than two years in eight provinces under the 1935 constitution. (See past issues of the *Indian Year Book* for a history of the non-co-operation and the civil disobedience movements, and for the parliamentary activities of the Congress.)

This parliamentary phase proved to be short lived. Soon after the declaration of the present war the Congress withdrew its Ministers in the majority of the provinces and gave supreme command of the organisation and its members to Mr. Gandhi who launched another campaign of civil disobedience—this time on the issue that Congressmen should have the right non-violently to preach against India's war effort. Thousands of Congressmen answered Mr. Gandhi's call, uttered anti-war slogans and courted jail. This civil disobedience campaign was not of the mass type, but restricted to individuals carefully chosen by Mr. Gandhi himself. Even so, close upon 25,000 representative Congress leaders are said

Late in the year 1941 the satyagrahi prisoners were released by Government whereupon the movement was suspended. Early in the summer of 1942 the Congress was presented with an opportunity to return to parliamentary work, in the shape of the scheme drafted by the British War Cabinet and brought to India by Sir Stafford Cripps; but this was not availed of. The Congress thus reverted to another period of barrenness, with this difference that during this period it did not indulge in any anti-government or anti-war activity; rather did it protest that its demand for the creation of a National Government was not met and thereby it was prevented from prosecuting the defence of India vigorously.

This state of suspended hostilities did not, however, last long. The failure of the Cripps Mission brought in its wake a wave of disappointment, frustration and bitterness which was bound sooner or later to burst out into a conflagration. And it did. Mr. Gandhi raised the slogan of "Quit India," explaining that the British should transfer all political and administrative power to Indians, reserving only the authority to take measures for the defence of India and the prosecution of the war. In pursuance of this demand the All India Congress Committee authorised Mr. Gandhi to meet the Viceroy and failing satisfaction, to launch a mass civil disobedience movement to enforce the demand.

On the morrow of the session of the A.I.C.C. Mr. Gandhi and all prominent Congress leaders were taken into custody and detained under the Defence of India Rules. Their arrest was followed by countrywide disturbances marked by murder, sabotage, arson and looting. Government took strong measures to put down the trouble which had assumed the dimensions of an open rebellion. By the end of the year comparative quiet had been restored.

Early in 1943, Mr. Gandhi undertook a 21-day fast as a protest against Government's refusal to let him meet the members of the Congress Working Committee or enable him to examine and meet the charges of violence levelled at the Congress. He outlived the fast in detention. Government throughout remaining firm in respect both of his release and of facilities to intermediaries to meet him. In less than a year, a sad development brought Mr. Gandhi into contact with the world again. Mrs. Gandhi, who was detained in the same place as her husband, fell a victim to heart attacks and succumbed in February 1944. Friends and relatives were allowed to be present by her death-bed and to attend her funeral.

Mr. Gandhi's Release.—Shortly after Mr. Gandhi had a severe attack of malaria and his health broke down. In May 1944 he was released unconditionally "solely on medical grounds." As a free man he did not take long to recover his normal health. Within a few months of his release he made advances both to British authority and to the Muslim League. Neither responded favourably, and Mr. Gandhi once again shrank into his shell, advising Congressmen outside jails to concentrate on constructive work. In the summer of 1945 all members of the Congress Working Committee were set free to enable the Congress to consider a new proposal framed by Lord Wavell, the Viceroy, in consultation with His Majesty's Governn.ent.

Wavell Plan.—The Wavell Plan sought to set up an interim Government at the centre composed of the people's representatives on the basis of parity between caste Hindus and Muslims but providing for representation to minorities such as the Sikhs and the scheduled castes. The projected central machinery was to function within the framework of the present constitution for the duration of the war without prejudicing the claims of any party in regard to the shape of the future Indian constitution. A conference called by the Viceroy to consider the scheme ended in failure.

Meanwhile Britain went to the polls and the war-time national coalition Cabinet was replaced by a full-fledged Labour Government with an overwhelming majority in Parliament. The new Labour Government lifted the ban on the Congress in the various Indian provinces, ordered general elections in India and summoned Lord Wavell to London for fresh consultations. On his return His Excellency made a declaration reiterating British determination to confer full self-government on India.

British Labour Government's Indian Policy.—The Congress entered the election fray heart and soul and made a good job of it. In March 1946, the British Premier made a pronouncement on the Labour Government's policy towards India, in which he said that India would be free to shape her own destiny and that Britain would help her in the process of framing her own constitution. With a view to enabling the Indian political parties to agree on a machinery to devise the future constitution, it was decided to send three members of the British Cabinet, headed by the Secretary of State for India, to this country. The Premier also announced that, while it was his Government's intention to give adequate protection to the minorities, the latter would not be allowed to veto the progress of the country as a whole.

The Cabinet Mission arrived in India very soon and set about its task with great earnestness of purpose. After interviewing representatives of various shades of Indian opinion the Mission tried to bring the League and the Congress together and to make them agree to a common approach to the problem. This having failed, the Mission in May announced a scheme for the transfer of power from British to Indian hands. A Constituent Assembly elected by the new Provincial Legislative Assemblies on the basis of one to a million of population, was to meet and devise a three-tier constitution —a Union Centre with limited subjects, three group constitutions if the provinces so desired, and provincial constitutions. Pending the meeting of the Constituent Assembly, there would be an Interim Government representative of the principal elements which accepted the long-term proposals.

The Congress sought clarification on several aspects of the proposals and a controversy ensued over the interpretation of the Cabinet Mission scheme. Meanwhile, the Viceroy endeavoured to constitute an Interim Government. Here again the League and the Congress failed to agree. The Mission and the Viceroy suggested a compromise solution. The League accepted both the long and short-term proposals, while the Congress accepted the long-term scheme but rejected the proposals for the Interim Government. Elections to the Constituent Assembly were then held. These resulted in the return of a majority of Congress nominees. Meanwhile, the League withdrew its acceptance of the Cabinet Mission's scheme and decided to launch upon direct action. Thereupon the Viceroy called upon the Congress to assist him in the formation of an Interim Government. In the Autumn of 1946, the Congress formed the Government at the Centre, with the aid of representatives of minorities. The League kept out of it for a time, but after nearly two months decided to come in. (For the Congress attitude to the war see last year's *Indian Year Book*.)

Ramgarh Congress, 1940. The annual session of the Congress was held at Ramgarh in April 1940. Maulana Abul Kalam Azad presided. Only one resolution was adopted by the Ramgarh session. It stated *inter alia*:

"The Congress hereby declares again that nothing short of complete independence can be accepted by the people of India. Indian freedom cannot exist within the orbit of Imperialism and Dominion status or any other status within the imperial structure is wholly inapplicable to India, is not in keeping with the dignity of a great nation, and would bind India in many ways to British politics and economic structure. The people of India alone can properly shape their own constitution and determine their relations to the other countries of the world, through a constituent assembly elected on the basis of adult suffrage.

"The Congress is further of opinion that, while it will always be ready, as it ever has been, to make every effort to secure communal harmony, no permanent solution is possible except through a constituent assembly, where the rights of all recognised minorities will be fully protected by agreement, as far as possible, between the elected representatives of various majority and minority groups, or by arbitration if agreement is not reached on any point. Any alternative will lack finality. India's constitution must be based on independence, democracy and national unity, and the Congress repudiates attempts to divide India or to split up her nationhood. The Congress has always aimed at a constitution where the fullest freedom and opportunities of development are guaranteed to the group and the individual, and social injustice yields place to a juster social order.

"The Congress cannot admit the right of the rulers of Indian States or of foreign vested interests to come in the way of Indian freedom. Sovereignty in India must rest with the people, whether in the States or the provinces, and all other interests must be subordinated to their vital interests. The Congress holds that the difficulty raised in regard to the States is of British creation and it will not be satisfactorily solved unless the declaration of the freedom of India from foreign rule is unequivocally made. Foreign interests, if they are not in conflict with the interests of the Indian people, will be protected." (For full text of the resolution see past issues of *The Indian Year Book*).

The Congress in 1940-41.—The weeks that followed the Ramgarh session of the Congress were occupied by intensive preparation for a direct action movement under the guidance of Mr. Gandhi, side by side with expressions of hope by Mr. Gandhi and other Congress leaders that such a struggle might be avoided. Mr. Gandhi's notion of "preparation" was as usual on the constructive plan, that is, hand-spinning, removal of untouchability and promotion of Hindu-Muslim unity.

As for communal unity, Mr. Gandhi stoutly resisted the Muslim League demand for Pakistan but declared that, although, as a man of non-violence, he could not resist the proposed partition with force, he could never be a willing party to the proposed vivisection of the country. He wrote: "My whole soul rebels against the idea that Hinduism and Islam represent two antagonistic cultures and doctrines. To assent to such a doctrine is for me denial of God. For I believe with my whole soul that the God of the Quran is also the God of the Gita and that we are all, no matter by what name designated, children of the same God. I must rebel against the idea that millions of Indians who were Hindus the other day changed their nationality on adopting Islam as their religion."

A Big Jump.—A few weeks later the war took a sudden turn for the worse. The invasion of the Low Countries, the capitulation of Belgium and the collapse of France produced in India a new feeling in favour of Britain. There was clear evidence of a desire on the part of many Congress leaders actively to help in the war in spite of Mr. Gandhi's known convictions on the subject.

By now the feeling had grown among Indians that the war had come closer to this country and that the danger of external aggression and internal disorder were not remote possibilities. This realisation caused a revolution in the minds of most Congressmen who had not the courage to adhere steadfastly to Mr. Gandhi and his non-violence in any eventuality. The Congress Working Committee virtually abandoned Mr. Gandhi and offered to co-operate in the war effort provided a fully representative National Government was formed at the centre. Apart from the ideological separation from Mr. Gandhi, this offer constituted a big jump for the Congress from non-participation in any war to active help in the prosecution of this war.

Poona Offer.—The resolution said, among other things:—

"The Working Committee are more than ever convinced that the acknowledgment by

Great Britain of the complete independence of India is the only solution of the problems facing both India and Britain and are, therefore, of opinion that such an unequivocal declaration should be immediately made and that, as an immediate step in giving effect to it, a provisional National Government should be constituted at the Centre, which, though formed as a transitory measure, should be such as to command the confidence of all the elected elements in the Central Legislature, and secure the closest co-operation of the responsible Governments in the provinces.

"The Working Committee are of opinion that, unless the aforesaid declaration is made, and a National Government accordingly formed at the Centre without delay, all efforts at organising the material and moral resources of the country for defence cannot in any sense be voluntary or as from a free country, and will therefore, be ineffective. The Working Committee declare that if these measures are adopted, it will enable the Congress to throw in its full weight in the efforts for the effective organisation of the defence of the country."

British Government's August Offer - Then came the famous statement by the Viceroy known as the British Government's August offer. (For full text see past issues of *The Indian Year Book.*) It said

"Last October His Majesty's Government again made it clear that Dominion Status was their objective for India. They declared that they were ready to authorise the expansion of the Governor-General's Council to include a certain number of representatives of political parties, and they proposed the establishment of a Consultative Committee. In order to facilitate harmonious co-operation it was obvious that some measure of agreement in the Provinces between major parties was a desirable prerequisite to their joint collaboration at the Centre. Such an agreement was unfortunately not reached, and in the circumstances no progress was then possible.

His Majesty's Government do not feel that they should any longer postpone the expansion of the Governor General's Council, and the establishment of a body which will more closely associate Indian public opinion with the conduct of the war by the Central Government.

"They (His Majesty's Government) have authorised me accordingly to invite a certain number of representative Indians to join my Executive Council.

"They have authorised me further to establish a War Advisory Council, which would meet at regular intervals and which would contain representatives of the Indian States and of other interests in the national life of India as a whole.

"It goes without saying that they could not contemplate the transfer of their present responsibilities for the peace and welfare of India to any system of Government whose authority is directly denied by large and powerful elements in India's national life. Nor could they be parties to the coercion of such elements into submission to such a Government.

"With regard to the machinery for building, within the British Commonwealth of Nations, a new constitutional scheme when the time comes, there has been very strong insistence that the framing of that scheme should be primarily the responsibility of Indians themselves, and should originate from Indian conceptions of the social, economic and political structure of Indian life. His Majesty's Government are in sympathy with that desire and wish to see it given the fullest practical expression, subject to the due fulfilment of the obligations which Great Britain's long connection with India has imposed upon her, and for which His Majesty's Government cannot divest themselves of responsibility.

"It is clear that a moment when the Commonwealth is engaged in a struggle for existence is not one in which fundamental constitution issues can be decisively resolved.

"But His Majesty's Government authorise me to declare that they will most readily assent to the setting up, after the conclusion of the war, with the least possible delay, of a body representative of the principal elements in India's national life in order to devise the framework of the new Constitution, and they will lend every aid in their power to hasten decision on all relevant matters to the utmost degree."

Congress Rejection —The Congress, however rejected the Viceroy's offer as being wholly opposed not only to the principle of democracy, acclaimed by the British Government in their war aims, but also to the best interests of India.

In order to meet the League objections to the Congress idea of a National Government Mr C Rajagopalachariar made what has come to be known as a "sporting offer". He said: "In answer to Mr. Amery's difficulty as to the minorities, I may make a sporting offer that if His Majesty's Government agree to a Provisional National Government being formed at once, I will undertake to persuade my colleagues in the Congress to agree to the Muslim League being invited to nominate the Prime Minister and to let him form a National Government as he would consider best. If there is sincerity in the difficulty felt by His Majesty's Government it should be met by what I offer." Nothing, however, came out of this "sporting offer."

Civil Disobedience —When this "last gesture" was ignored, the Congress meekly returned to Mr Gandhi and his non violence. This was the outcome of the deliberations of the All India Congress Committee held in Bombay in the middle of September 1940. The A.I.C.C. passed a resolution continuing the August resolution of the Working Committee rejecting the Viceroy's offer and requesting Mr. Gandhi to take over the leadership of the Congress.

About a fortnight after this, Mr. Gandhi unfolded his plan of individual civil disobedience restricted to a limited number of satyagrahis.

Mr Gandhi chose as his first satyagrahi Mr. Vinoba Bhave who had been doing village uplift work. The satyagraha for the time being was to be confined to Mr. Bhave. According to plan, Mr. Vinoba Bhave set out on a marching tour from village to village preaching non-participation in war on grounds of non-violence.

He enjoyed freedom for a couple of days but was arrested on the third day and sentenced to imprisonment for doing an act prejudicial under the Defence of India Ordinance.

It soon became known that Pandit Jawaharlal Nehru was to be the second satyagrahi but before he could formally defy the law he was arrested in respect of certain speeches made by him weeks earlier, and sentenced to four years' imprisonment.

Then followed a series of arrests of persons chosen by Mr. Gandhi. They included most of the members of the Congress Working Committee, most of the Premiers and Ministers of the former Congress Governments and a large number of members of the Central Legislature and other prominent Congressmen all over the country.

Release of Satyagrahi Prisoners.—The general feeling of political inaction engendered by the satyagraha movement, the restlessness of the public at the absence of any gesture from the Government, the conviction that the country's war effort was being adversely affected, ever so slightly, by the continuance of leaders in prison, and the insistent demands of non-congress leaders led the Government to release the prisoners towards the end of 1941. The Government of India announced that "confident in the determination of all responsible opinion in India to support the war effort until victory is secured, have reached the conclusion that those civil disobedience prisoners whose offences have been formal or symbolic in character can be set free." Accordingly the bulk of satyagrahi prisoners were released.

From the statements issued by the Congress President, Pandit Nehru and others soon after their release it became apparent that once again they favoured active participation in the armed defence of India and the prosecution of the war to victory if Indians were given complete control of affairs and if steps were taken to lay the foundations of Indian freedom. There was, however, no inclination to shelve the Indian political issue during the war, and the declaration was made by more than one leader that India would participate "only as a free nation and not as slaves."

Change Again.—The Congress Working Committee met at Bardoli and made an important change in Congress policy. Civil disobedience was suspended, Mr. Gandhi was again dethroned, and the door was left open for negotiations with the British Government for a political settlement.

A resolution was passed reiterating their attitude towards the war as set forth in their statement issued on September 14, 1939, wherein they condemned the Nazi and Fascist aggression and expressed their willingness to help the cause of freedom and democracy, provided the objectives of the war were clearly stated and acted upon insofar as was possible at present. If freedom and democracy were those objectives, then they must necessarily include the ending of imperialism and the recognition of the independence of India.

Another resolution relieved Mr. Gandhi of the responsibility laid upon him by the A.I.C.C. in September 1940, while reiterating that the policy of non-violence adopted under his guidance for the attainment of 'swaraj,' and which had proved so successful in leading to mass awakening and otherwise would be adhered to by the Congress. (For details see past issues of the *Indian Year Book*.)

Japan's Entry into War.—If Japan's entry into the war brought the war nearer to India and engendered a more realistic approach on the part of Indian leaders to the defence of their country and to political affairs, the early gains of Japan in Malaya, the Netherlands, East Indies and Burma impelled the British authorities to consider whether the time had not arrived for settling the political problems in India if only to promote unity of purpose and co-ordinated endeavour in this country in order effectively to meet Japanese invasion of India. It is also widely believed in India that Russia, China and the United States of America brought their influence to bear upon the British authorities in this behalf.

Cripps Visit.—Shortly thereafter the Prime Minister made a statement in Parliament announcing that Sir Stafford Cripps, the Socialist leader who had recently returned to England from his diplomatic successes at Moscow and had been made the Lord Privy Seal in a reconstituted War Cabinet, would go to India immediately on a special mission. Mr. Churchill (*see* past year's issues) said:

"The War Cabinet have agreed unitedly upon conclusions for the present and future action, which, if accepted by India as a whole would avoid alternative dangers, either that the resistance of a powerful minority might impose an indefinite veto upon the wishes of the majority or that a majority decision might be taken which would be resisted to a point destructive of internal harmony and fatal to the setting up of a new constitution."

War Cabinet's Offer. Sir Stafford Cripps flew to India in a few days and held consultations with representatives of the Congress, the Muslim League, the Hindu Mahasabha, the Princes Chamber, and a number of other political and sectional organisations. Here is the text of the offer which he brought to India in the name of the British Cabinet:

"His Majesty's Government, having considered the anxieties expressed in this country and in India as to the fulfilment of promises made in regard to the future of India, have decided to lay down in precise and clear terms the steps which they propose shall be taken for the earliest possible realisation of self-government in India. The object is the creation of a new Indian Union which shall constitute a Dominion associated with the United Kingdom and other Dominions by a common allegiance to the Crown but equal to them in every respect, in no way subordinate in any aspect of its domestic or external affairs.

"His Majesty's Government, therefore, make the following Declaration:—

"(*a*) Immediately upon cessation of hostilities steps shall be taken to set up in India in manner described hereafter an elected body charged with the task of framing a new Constitution for India.

"(*b*) Provision shall be made, as set out below, for participation of Indian States in the Constitution-making body.

"(*c*) His Majesty's Government undertake to accept and implement forthwith the Constitution so framed subject only to:—

"(*i*) The right of any Province of British India that is not prepared to accept the new Constitution to retain its present constitutional position, provision being made for its subsequent accession if it so decides.

"With such non-acceding Provinces, should they so desire, His Majesty's Government will be prepared to agree upon a new Constitution giving them the same full status as the Indian Union and arrived at by a procedure analogous to that here laid down.

"(*ii*) The signing of a Treaty which shall be negotiated between His Majesty's Government and the Constitution-making body. This Treaty will cover all necessary matters arising out of the complete transfer of responsibility from British to Indian hands; it will make provision, in accordance with undertakings given by His Majesty's Government, for the protection of racial and religious minorities; but will not impose any restriction on the power of the Indian Union to decide in future its relationship to other Member States of the British Commonwealth.

"Whether or not an Indian State elects to adhere to the Constitution it will be necessary to negotiate a revision of its Treaty arrangements so far as this may be required in the new situation.

"(*d*) The Constitution-making body shall be composed as follows unless the leaders of Indian opinion in the principal communities agree upon some other form before the end of hostilities:—

"Immediately upon the result being known of Provincial Elections which will be necessary at the end of hostilities, the entire membership of the Lower Houses of Provincial Legislatures shall as a single electoral college proceed to the election of the Constitution-making body by the system of proportional representation. This new body shall be in number about 1/10th of the number of the electoral college.

"Indian States shall be invited to appoint representatives in the same proportion to their total population as in the case of representatives of British India as a whole and with the same powers as British Indian members.

"(*e*) During the critical period which now faces India and until the new Constitution can be framed His Majesty's Government must inevitably bear the responsibility for, and retain the control and direction of, the defence of India as part of their world war effort, but the task of organising to the full the military moral and material resources of India must be the responsibility of the Government of India with the co-operation of the peoples of India. His Majesty's Government desire and invite the immediate and effective participation of the leaders of the principal sections of the Indian people in the councils of their country, of the Commonwealth and of the united nations. Thus they will be enabled to give their active and constructive help in the discharge of a task which is vital and essential for the future freedom of India."

In announcing the scheme, Sir Stafford made it clear that it was only a proposal submitted to the leaders of Indian opinion by the War Cabinet and that its publication was not the publication of a declaration by His Majesty's Government but only a declaration which they would be prepared to make if it met with sufficiently general and favourable acceptance from the various sections of Indian people.

After protracted negotiations, in which representatives of the principal Indian organisations met, in addition to Sir Stafford, the Commander-in-Chief and Col. Louis Johnson, the personal representative in India of President Roosevelt, the Congress rejected the scheme. The Hindu Mahasabha had already rejected it (see chapter on Hindu Mahasabha) and the Muslim League followed suit (see chapter on Muslim League), while other organisations expressed disapproval in more or less strong language (see chapter on the Indian National Liberal Federation).

The Congress Working Committee, which held what was perhaps the longest session in its history, passed a resolution (for full text see last year's issue) of which the following is a summary:—

"The British War Cabinet's new proposals relate principally to the future upon the cessation of hostilities.

"The Committee, while recognising that self-determination for the people of India is accepted in principle in that uncertain future, regret that this is fettered and circumscribed and certain provisions have been introduced which gravely imperil the development of a free and united nation and the establishment of a democratic state. Even the constitution-making body is so constituted that the people's right to self-determination is vitiated by the introduction of non-representative elements. The Committee recognise that future independence may be implicit in the proposals, but the accompanying provisions and restrictions are such that real freedom may well become an illusion.

"The complete ignoring of the ninety millions of the people of the Indian States and their treatment as commodities at the disposal of their rulers is a negation of both democracy and self-determination. Such States may in many ways become barriers to the growth of Indian freedom, enclaves where foreign authority still prevails and where the possibility of maintaining foreign armed forces has been stated to be a likely contingency, and a perpetual menace to the freedom of the people of the States as well of the rest of India.

"The acceptance beforehand of the novel principle of non-accession for a province is also a severe blow to the conception of Indian unity and an apple of discord likely to generate growing trouble in the provinces, which may well lead to further difficulties in the way of the Indian States merging themselves in the Indian Union. The Congress has been wedded to Indian freedom and unity and any break in

that unity, especially in the modern world when people's minds inevitably think in terms of ever larger federations, would be injurious to all concerned and exceedingly painful to contemplate.

"Nevertheless the Committee cannot think in terms of compelling the people in any territorial unit to remain in an Indian Union against their declared and established will. While recognising this principle, the Committee feel that every effort should be made to create conditions which would help the different units in developing a common and co-operative national life.

"The acceptance of the principle inevitably involves that no changes should be made which result in fresh problems being created and compulsion being exercised on other substantial groups within that area. Each territorial unit should have the fullest possible autonomy within the Union, consistently with a strong national state. The proposal now made on the part of the British War Cabinet encourages and will lead to attempts at separation at the very inception of a union and thus create friction just when the utmost co-operation and goodwill are most needed. This proposal has been presumably made to meet a communal demand, but it will have other consequences also and lead politically reactionary and obscurantist groups among different communities to create trouble and divert public attention from the vital issues before the country.

"Any proposal concerning the future of India must demand attention and scrutiny, but in today's grave crisis, it is the present that counts, and even proposals for the future are important in so far as they affect the present. The Committee have necessarily attached the greatest importance to this aspect of the question, and on this ultimately depends what advice they should give to those who look to them for guidance. For this present the British War Cabinet's proposals are vague and altogether incomplete, and it would appear that no vital changes in the present structure are contemplated.

"It has been made clear that the defence of India will in any event remain under British control. At any time defence is a vital subject: during war time it is all important and covers almost every sphere of life and administration. To take away defence from the sphere of responsibility at this stage is to reduce that responsibility to a farce and a nullity and to make it perfectly clear that India is not going to be free in any way and her Government is not going to function as a free and independent Government during the pendency of the war.

"The Committee would repeat that an essential and fundamental prerequisite for the assumption of responsibility by the Indian people in the present is their realisation as a fact that they are free and are in charge of maintaining and defending their freedom. What is most wanted is the enthusiastic response of the people which cannot be evoked without the fullest trust in them and the devolution of responsibility on them in the matter of defence. It is only thus that even at this grave eleventh hour it may be possible to galvanise the people of India to rise to the height of the occasion.

"It is manifest that the present Government of India, as well as its provincial agencies are lacking in competence, and are incapable of shouldering the burden of India's defence. It is only the people of India through their popular representatives who may shoulder this burden worthily. But that can only be done by present freedom, and full responsibility being cast upon them.

"The Committee, therefore, is unable to accept the proposals put forward on behalf of the British War Cabinet."

Sir Stafford Cripps then announced that the draft declaration of the British Government had been withdrawn and that the position reverted to what it was before he came out to India, "though not quite perhaps to that position."

In spite of the failure of the effort of Sir Stafford Cripps and the bitter tone of the final remarks in the controversy, responsible Indian leaders reiterated their determination to defend the country against aggression.

Madras Surprise.—Just at this time, on the eve of the meeting of the All-India Congress Committee, called at Allahabad at the end of April 1942, the Madras Congress Legislature Party, under the guidance of Mr. Rajagopalachari passed a resolution recommending to the A.-I. C.C. to "acknowledge the Muslim League's claim for separation should the same be persisted in when the time comes for framing the future constitution of India" and to "invite the Muslim League for consultation for the purpose of arriving at an agreement and securing the installation of a National Government to meet the present emergency."

The meeting also passed a resolution voicing "the general feeling in this part of the country that there should be at this critical juncture a popular Government in this province doing its utmost to secure the requisite conditions for the people to play their part. The party is of the opinion further that to facilitate united and effective action in this regard by such a popular Government, the Muslim League should be invited to participate in it."

The party requested the A.-I. C. C. to permit it to take steps to this end, notwithstanding the general all-India policy followed by the Congress.

These resolutions met with a storm of protest from Congress leaders outside Madras, but were welcomed by some moderate leaders and by Muslim League circles.

The Madras resolution acknowledging the Muslim League's claim to separation came up for consideration before a meeting of the A.-I.C.C. at Allahabad in April 1942, but was defeated by 120 votes against 15, while a counter-resolution, moved by Pandit Jagat Narain, opposing any proposal to disintegrate India, was carried by 92 votes to 17. The latter resolution ran:

"The A.-I.C.C. is of opinion that any proposal to disintegrate India by giving liberty to any component State or territorial unit to secede from the Indian Union or Federation will be highly detrimental to the best interests of the people of the different States and Provinces and the country as a whole and the Congress therefore cannot agree to any such proposal."

When the bold line suggested by him proved unacceptable to the bulk of Congressmen Mr. Rajagopalachari had to resign his membership of the Congres Working Committee and his leadership of the Madras Legislature Congress party.

Evolution of "Quit India".—The weeks that followed the Allahabad meeting of the All-India Congress Committee witnessed a plethora of writings by Mr. Gandhi in his weekly organ, *Harijan*, advocating the policies outlined in the resolutions adopted at Allahabad and resisting Mr. Rajagopalachari's propaganda to settle with the Muslim League on the basis of dividing India. The South Indian leader, for his part, carried on a raging tearing campaign in favour of making peace with Mr. Jinnah and thereby facilitating the establishment of a National Government, which, he affirmed, was essential not only for the well-being of India but also for the object of effectively defending the country against Japanese aggression.

It became apparent from Mr. Gandhi's writings and utterances that he was growing more and more restless and bitter towards Britain for the latter's refusal to concede the Congress demand. Towards the end of April Mr. Gandhi conceived an idea which later crystallised into what has come to be known as the "Quit India" demand. He urged the withdrawal of the British from India not only in India's interest but also for the sake of Britain. He wrote in *Harijan:* "I see no Indian freedom peeping through all this preparation for the so-called Defence of India. It is a preparation pure and simple for the defence of the British Empire. If the British left India to her fate as they had to leave Singapore, non-violent India would not lose anything. Probably the Japanese would leave India alone ..... Her (India's) real safety, and Britain's, too, lie in orderly and timely British withdrawal from India". Later he said: "Hitherto the rulers have said, 'we would gladly retire if we know to whom we should hand over the reins'. My answer now is, 'leave India to God; if that is too much, then leave her to anarchy'."

As time rolled on Mr. Gandhi appeared to abandon the policy of non-embarrassment to Britain's war effort in India. He also hinted that his views on the moral basis of Britain's war had undergone a change. In an interview to the press in Bombay in the middle of May he stated: "I used to say that my moral support was entirely with Great Britain. I am very sorry to have to confess today that my mind refuses to give that moral support". He added: "It is from the frustration of every effort made to bring about unity by me that has arisen the logical step that not until British power is wholly withdrawn from India can there be any real unity because all parties will be looking to a foreign power..... I am convinced that we are living today in a state of ordered anarchy. It is a misnomer to call such rule as is established in India a rule which promotes the welfare of India. Therefore, this ordered, disciplined anarchy should go, and if there is complete lawlessness in India as a result, I would risk it, for I believe that 22 years of continuous effort at educating India along the lines of non-violence will not have gone in vain and people will evolve real popular order out of chaos."

Mr. Gandhi took care to avoid giving the impression that his demand for the withdrawal of Britain was the outcome of pro-Japanese sentiment. He wrote: "Of course, the people must not, on any account lean on the Japanese to get rid of the British power. That were a remedy worse than the disease. But in this struggle every risk has to be run in order to cure ourselves of the biggest disease, a disease which has sapped our manhood and almost made us feel as if we must for ever be slaves. It is an insufferable thing. The cost of the cure, I know, will be heavy. No price is too heavy to pay for the deliverance. It is true that the solution I have presented is a heroic solution beyond the ken of Englishmen. But being a true friend of Britain and China and Russia, I must not suppress the solution which I believe to be eminently practical and probably the only one in order to save the situation and in order to convert the war into a power for good instead of being what it is, a peril to humanity. .....I am more interested than the British in keeping the Japanese out. For Britain's defeat in Indian waters may mean only the loss of India, but if Japan wins, India loses everything..... It is an unwarranted claim Britain and America are making, the claim of saving democracy and freedom. It is a wrong thing to make that claim when there is this terrible tragedy of holding a whole nation in bondage.

"My proposal is one-sided, *i.e.*, for the British Government to act upon, wholly irrespective of what Indians would do or would not do. I have even assumed temporary chaos on their withdrawal. But if the withdrawal takes place in an orderly manner, it is likely that on their withdrawal a provisional Government will be set up by, and from, among the present leaders. I should hope that with the complete, final and honest withdrawal of the British power, the wise leaders will realise their responsibility, forget their differences for the moment and set up a provisional Government out of the material left by the British power.

"Assuming that the national Government is formed and if it answers my expectations, its first act would be to enter into a treaty with the United Nations for defensive operations against aggressive powers, it being common cause that India will have nothing to do with any of the Fascist powers and India would be morally bound to help the United Nations.

"If I have any hand in guiding the imagined national Government, there would be no further assistance save the toleration of the United Nations on the Indian soil under well-defined conditions. Naturally there will be no prohibition against any Indian giving his own personal

help by way of being a recruit or/and of giving financial aid. It should be understood that the Indian army has been disbanded with the withdrawal of British power. Again if I have any say in the councils of the national Government, all its power, prestige and resources would be used towards bringing about world peace. But of course after the formation of the national Government my voice may be a voice in the wilderness and nationalist India may go warmad."

Answering the criticism that the withdrawal of Britain might lead to Japanese occupation of India Mr. Gandhi wrote: "Abrupt withdrawal of the Allied troops might result in Japan's occupation of India and China's sure fall. I had not the remotest idea of any such catastrophe resulting from my action. Therefore I feel that if in spite of the acceptance of my proposal, it is deemed necessary by the Allies to remain in India to prevent Japanese occupation, they should do so, subject to such conditions as may be prescribed by the national Government that may be set up after the British withdrawal. I am unable to state that the non-violent effort will make India proof against Japanese or any other aggression. I am not able even to claim that the whole of India is non-violent in the sense required. In the circumstances it would be hypocritical on my part to insist on the immediate withdrawal of the Allied troops as an indispensable part of my proposal. It is sufficient for me to declare that so far as India is concerned, she does not need troops to defend herself, having no quarrel with Japan. But India must not by any act of hers short of national suicide let China down or put the Allied powers in jeopardy. So long therefore as India lacks faith in the capacity of non-violence to protect her against aggression from without, the demand for the withdrawal of the Allied troops during the pendency of the war would itself be an act of violence, if the controllers of the troops hold it to be necessary for their defence to keep them in India for that purpose and that alone."

Summarising the implications of his proposals Mr. Gandhi wrote early in July:—

1. India becomes free of all financial obligation to Britain;
2. The annual drain to Great Britain stops automatically;
3. All taxation ceases except what the replacing Government imposes or retains;
4. The deadweight of an all-powerful authority keeping under subjection the tallest in the land is lifted at once;
5. In short, India begins a new chapter in her national life, as I shall hope will affect the fortunes of the war with non-violence as her predominant sanction. This non-violence will no longer take the shape of non-co-operation and the like. It will express itself in her ambassadors going to the Axis powers not to beg for peace but to show them the futility of war for achieving an honourable end. This can only be done if and when Britain sheds the gains of perhaps the most organized and successful violence the world has seen.

"All this may not come to pass," he continued. "I do not mind. It is worth fighting for, it is worth staking all that the nation has."

July Resolution.—With the country thus prepared, the Working Committee of the Congress met at Wardha in the middle of July and passed a lengthy resolution embodying Mr. Gandhi's ideas. The resolution ran:—

"Events happening from day to day, and the experience that the people of India are passing through, confirm the opinion of Congressmen that British rule in India must end immediately, not merely because foreign domination, even at its best, is an evil in itself and a continuing injury to the subject people, but because India in bondage can play no effective part in defending herself and in affecting the fortunes of the war that is desolating humanity. The freedom of India is thus necessary not only in the interest of India but also for the safety of the world and for the ending of Nazism, Fascism, militarism and other forms of Imperialism, and the aggression of one nation over another.

"Ever since the outbreak of the world war, the Congress has studiously pursued a policy of non-embarrassment. Even at the risk of making its *satyagraha* ineffective, it deliberately gave it a symbolic character, in the hope that this policy of non-embarrassment, carried to its logical extreme, would be duly appreciated and that real power would be transferred to popular representatives, so as to enable the nation to make its fullest contribution towards the realisation of human freedom throughout the world, which is in danger of being crushed. It had also hoped that negatively nothing would be done which was calculated to tighten Britain's strangle-hold on India.

"These hopes, have, however, been dashed to pieces. The abortive Cripps proposals showed in the clearest possible manner that there was no change in the British Government's attitude towards India and that the British hold on India was in no way to be relaxed. In the negotiations with Sir Stafford Cripps, Congress representatives tried their utmost to achieve a minimum, consistent with the national demand, but to no avail. This frustration has resulted in a rapid and widespread increase of ill-will against Britain and a growing satisfaction at the success of Japanese arms. The Working Committee view this development with grave apprehension as this, unless checked, will inevitably lead to a passive acceptance of aggression. The Committee hold that all aggression must be resisted, for any submission to it must mean the degradation of the Indian people and the continuation of their subjection. The Congress is anxious to avoid the experience of Malaya, Singapore, and Burma and desires to build up resistance to any aggression on, or invasion of, India by the Japanese or any foreign power.

"The Congress would change the present ill-will against Britain into good-will and make India a willing partner in a joint enterprise of securing freedom for the nations and peoples of the world and in the trials and tribulations which accompany it. This is only possible if India feels the glow of freedom.

"The Congress representatives have tried their utmost to bring about a solution of the communal tangle. But this has been made impossible by the presence of the Foreign Power whose long record has been to pursue relentlessly the policy of divide and rule. Only after the ending of foreign domination and intervention, can the present unreality give place to reality, and the people of India, belonging to all groups and parties, face India's problems and solve them on a mutually agreed basis. The present political parties, formed chiefly with a view to attract the attention of, and influence, the British Power, will then probably cease to function. For the first time in India's history, realisation will come home that princes, jagirdars, zamindars, and propertied and monied classes, derive their wealth and property from the workers in the fields and factories and elsewhere, to whom essentially power and authority must belong. On the withdrawal of British Rule in India, responsible men and women of the country will come together to form a Provisional Government, representative of all important section of the people of India, which will later evolve a scheme whereby a Constituent Assembly can be convened in order to prepare a constitution for the government of India acceptable to all sections of the people. Representatives of Free India and representatives of Great Britain will confer together for the adjustment of future relations and for the co-operation of the two countries as allies in the common task of meeting aggression. It is the earnest desire of the Congress to enable India to resist aggression effectively with the people's united will and strength behind it.

"In making the proposal for the withdrawal of British Rule from India, the Congress has no desire whatsoever to embarrass Great Britain or the Allied Powers in their prosecution of the war, or in any way to encourage aggression on India or increased pressure on China by the Japanese or any other Power associated with the Axis group. Nor does the Congress intend to jeopardise the defensive capacity of the Allied Powers. The Congress is therefore agreeable to the stationing of the armed forces of the Allies in India, should they so desire, in order to ward off and resist Japanese or other aggression, and to protect and help China.

"The proposal of withdrawal of the British Power from India was never intended to mean the physical withdrawal of all Britishers from India, and certainly not of those who would, make India their home and live there as citizens and as equals with the others. If such withdrawal takes place with good-will, it would result in establishing a stable Provisional Government of India and co-operation between this Government and the United Nations in resisting aggression and helping China.

"The Congress realises that there may be risks involved in such a course. Such risks, however, have to be faced by any country in order to achieve freedom and, more especially at the present critical juncture, in order to save the country and the larger cause of freedom the world over from far greater risks and perils.

"While, therefore, the Congress is impatient to achieve the national purpose, it wishes to take no hasty step and would like to avoid, in so far as is possible, any course of action that might embarrass the United Nations. The Congress would plead with the British Power to accept the very reasonable and just proposal herein made, not only in the interest of India but also that of Britain and of the cause of freedom to which the United Nations proclaim their adherence.

"Should however this appeal fails, the Congress cannot view without the gravest apprehension the continuation of the present state of affairs, involving a progressive deterioration in the situation and weakening of India's will and power to resist aggression. The Congress will then be reluctantly compelled to utilise all the non-violent strength it might have gathered since 1920, when it adopted non-violence as part of its policy for the vindication of political rights and liberty. Such a widespread struggle would inevitably be under the leadership of Gandhiji.

"As the issues raised are of the most vital and far-reaching importance to the people of India as well as to the peoples of the United Nations, the Working Committee refer them to the All-India Congress Committee for final decision. For this purpose the A.I.C.C. will meet in Bombay on the 7th August, 1942."

Mr. Gandhi's Commentary.—Commenting on the resolution, Mr. Gandhi said: "it will be a mass movement of a strictly non-violent character. It will include all that a mass movement can include. I do not want rioting as a direct result. If, in spite of all precautions, rioting does take place it cannot be helped.....I am not going to court imprisonment. The struggle does not involve courting imprisonment. It is too soft a thing. We had, no doubt, made it a business to court imprisonment up to now, but there will be no such thing this time. My intention is to make the thing as short and swift as possible. But if I am dragged into jail, it is difficult to say what I may do. But I can fast, as I have fasted before now, though I should try to avoid such an extreme step so far as possible." Discussing the possibility of negotiations, he said: "There is no room left for negotiations in the proposal for withdrawal. Either they recognise independence or they don't. After that recognition many things can follow. After all it is an open rebellion". Declaring that free India would start functioning immediately after its recognition, he said: "If its withdrawal takes place in perfect good-will, the change will be effected without the slightest disturbance. People would have to come into their own without disturbance. Wise people from among the responsible sections will come together and will evolve a Provisional Government. Then there will be no anarchy, no interruption, and a crowning glory."

In rebuttal of the charge that this projected movement was conceived with a view to helping Japan, Mr. Gandhi wrote in the last week of July an article addressed "To Every Japanese," in which he said he deeply grieved the unprovoked attack against China and the "merciless devastation of that great and ancient land. We are in the unique position of having to resist an imperialism that we detest no less than

yours and Nazism. Our resistance to it does not mean harm to the British people. We seek to convert them. Ours is an unarmed revolt against British rule. An important party in the country is engaged in a deadly but friendly quarrel with the foreign rulers. But in this they need no aid from foreign Powers. You have been gravely misinformed, as I know you are, that we have chosen this particular moment to embrass the Allies when your attack against India is imminent. If we wanted to turn Britain's difficulty into our opportunity we should have done it as soon as the War broke out nearly three years ago.

" Our movement demanding the withdrawal of the British Power from India should in no way be misunderstood. In fact, if we are to believe your reported anxiety for the Independence of India, a recognition of that Independence by Britain, should leave you no excuse for any attack on India. Moreover the reported profession sorts ill with your ruthless aggression against China. I would ask you to make no mistake about the fact that you will be sadly disillusioned if you believe that you will receive a willing welcome from India. The end and aim of the movement for British withdrawal is to prepare India, by making her free for resisting all militarist and imperialist ambition, whether it is called British Imperialism, German Nazism or your pattern. Our appeal to Britain is coupled with the offer of Free India's willingness to let the Allies retain their troops in India The offer is made in order to prove that we do not in any way mean to harm the Allied cause, and in order to prevent you from being misled into feeling that you have but to step into the country that Britain has vacated. Needless to repeat that if you cherish any such idea and will carry it out, we will not fail in resisting you with all the might that our country can muster."

In the period between the adoption by the Working Committee of its July resolution and the meeting of the A.-I.C.C. in August Mr. Gandhi indicated that he was prepared to meet the Viceroy and discuss his demand with him and that he would call off the movement if he were convinced by anyone that in the midst of war the British Government could not declare India free without jeopardising the war effort. " My complaint is that critics talk *at* me, swear *at* me but never condescend to talk *to* me ", he said. He wished to guard against " a sudden outburst of anarchy or a state of things which may be calculated to invite Japanese aggression." He intended to handle the movement gently, but he would not hesitate to go to the extremist limit if he found that no impression was produced on the British Government or the Allied powers.

Reply to Foreign Criticism.—Publication of the Working Committee's July resolution aroused much hostile comment abroad in reply to which Mr. Gandhi wrote: " Indian public men should be forgiven if they doubt the sincerity of the fierce opposition which is being organised with ominous unanimity. The latter can only stiffen India's suspicion and resistance ". He continued: " the Justice of the demand for the ending of British Power has never been questioned; the moment chosen for enforcing it is the target of attack. It is clear as crystal in the Working Committee resolution why this moment is chosen. Let me paraphrase it. India is not playing any effective part in the war. Some of us feel ashamed that it is so and, what is more, we feel that if we were free from the foreign yoke, we should play a worthy, nay, a decisive part in the world war which has yet to reach its climax. We know, that if India does not become free *now*, the hidden discontent will burst forth into a welcome to the Japanese, should they effect a landing. We feel that such an event would be a calamity of the first magnitude. We can avoid it if India gains her freedom. To distrust this simple, natural and honest declaration is to court disaster.

" But the critics say, ' To whom are the British rulers to hand the keys on their withdrawal ? " It is a good question. Here is what Maulana Abul Kalam Azad, the Congress President, has said: ' The Congress always stands, firstly for sympathy towards democratic countries, secondly, never desires to embarrass Britain and her war effort, and, thirdly it stands for opposition to the Japanese aggression. The Congress does not desire to take power for itself but for all. If real power is handed over to the Congress, surely it will approach other parties and will persuade them to join '. The Congress President added that he ' had no objection to Britain handing over power to the Muslim League or any other party provided it was real independence. That party will have to approach other parties as no single party can function properly without the co-operation of other parties'. The only thing needful is to hand over complete control without reservation save that during the war period the Allied troops will operate to stem Japanese or Axis attack. But they will have no power of interference with the affairs of India which will be as free as Great Britain herself."

Apart from Indo-British relationship Mr. Gandhi made an important change in his policy in the summer of 1942 when he gave up his old belief that internal unity must precede political emancipation and declared instead that communal unity could only follow the removal of the third party. Writing in *Harijan* in June, he said: " Time is a merciless enemy, if it is also a merciful friend and healer. I claim to be amongst the oldest lovers of Hindu-Muslim unity, and I remain one even today. I have been asking myself why every whole-hearted attempt, made by all including myself to reach unity has failed, and failed so completely that I have entirely fallen from grace and am described by some Muslim papers as the greatest enemy of Islam in India. It is a phenomenon I can only account for by the fact that the third power, even without deliberately wishing it, will not allow real unity to take place. Therefore, I have come to the reluctant conclusion that the two communities will come together almost immediately after the British Power comes to a final end in India. If independence is the immediate goal of the Congress and the League, then, without needing to come to any terms, all will fight together to be free from bondage. When the bondage is done with, not merely the two organisations but all parties will find it to their interest to come together

and make the fullest use of the liberty in order to evolve a national Government suited to the genius of India."

Throughout this controversy over the proposal of Mr. Gandhi, Pandit Jawaharlal Nehru steadfastly advocated that nothing should be said or done which would render India vulnerable to Japanese attack. During the July meeting of the Congress Working Committee the question was put to him whether any political movement in India would not in the ultimate analysis amount to an invitation to Japan to invade India. He answered that whereas India had no wish to injure the cause of China or the defence of India, "it has become highly important to raise the spirit of resistance in order ultimately to be able to resist the Japanese; by passively submitting to things in India today that spirit of resistance will be crushed." He recognised that any step that the Congress might take against the British Government might be full of perils but on the other hand "not taking any step is still more perilous—we have to choose the lesser danger". According to Pandit Jawaharlal Nehru, "the fundamental way to look at it is how ultimately to increase the strength of the Indian people to meet invasion. If I am convinced that I might weaken India I will not take that step".

For a time, there seemed to be some difference of opinion among the front rank Congress leaders on the wisdom of launching a political movement when the enemy was at the country's gates; but eventually unanimity was reached and a resolution was passed (see above) declaring that the withdrawal of British from India was necessary both for Indian independence and for effective resistance to the Axis and that if the British refuse to yield, the Congress had no alternative but to launch a campaign of civil disobedience.

August Resolution.—On the eve of the meeting of the A.-I.C.C. in Bombay, the Working Committee of the Congress met and drafted the following resolution for submission to the A.-I.C.C.:—

"The All-India Congress Committee has given the most careful consideration to the reference made to it by the Working Committee in their resolution dated July 14, 1942, and to subsequent events, including the development of the war situation, the utterances of responsible spokesmen of the British Government, and the comments and criticisms made in India and abroad. The Committee approves of and endorses that resolution and is of opinion that events subsequent to it have given it further justification, and have made it clear that the immediate ending of British rule in India is an urgent necessity, both for the sake of India and for the success of the cause of the United Nations. The continuation of that rule is degrading and enfeebling India and making her progressively less capable of defending herself and of contributing to the cause of world freedom.

"The Committee has viewed with dismay the deterioration of the situation on the Russian and Chinese fronts and conveys to the Russian and Chinese peoples its high appreciation of their heroism in defence of their freedom. This increasing peril makes it incumbent on all those who strive for freedom and who sympathise with the victims of aggression, to examine the foundations of the policy so far pursued by the Allied Nations, which had led to repeated and disastrous failure. It is not by adhering to such aims and policies and methods that failure can be converted into success, for past experience has shown that failure is inherent in them. These policies have been based not on freedom so much as on the domination of subject and colonial countries, and the continuation of the imperialist tradition and method. The possession of empire, instead of adding to the strength of the ruling Power, has become a burden and a curse. India, the classic land of modern imperialism, has become the crux of the question, for by the freedom of India will Britain and the United Nations be judged, and the peoples of Asia and Africa be filled with hope and enthusiasm. The ending of British rule in this country is thus a vital and immediate issue on which depend the future of the war and the success of freedom and democracy. A free India will assure this success by throwing all her great resources in the struggle for freedom and against the aggression of Nazism, Fascism and Imperialism. This will not only affect materially the fortunes of the war, but will bring all subject and oppressed humanity on the side of the United Nations, and give these Nations, whose ally India would be, the moral and spiritual leadership of the world. India in bondage will continue to be the symbol of British imperialism and the taint of that imperialism will affect the fortunes of all the United Nations.

"The peril of today, therefore, necessitates the independence of India and the ending of British domination. No future promises or guarantees can affect the present situation or meet that peril. They cannot produce the needed psychological effect on the mind of the masses. Only the glow of freedom now can release that energy and enthusiasm of millions of people which will immediately transform the nature of the war.

"The A.-I.C.C. therefore repeats with all emphasis the demand for the withdrawal of the British Power from India. On the declaration of India's independence, a Provisional Government will be formed and Free India will become an ally of the United Nations, sharing with them in the trials and tribulations of the joint enterprise of the struggle for freedom. The Provisional Government can only be formed by the co-operation of the principal parties and groups in the country. It will thus be a composite Government, representative of all important sections of the people of India. Its primary functions must be to defend India and resist aggression with all the armed as well as the non-violent forces at its command, together with its Allied powers, and to promote the well-being and progress of the workers in the fields and factories and elsewhere, to whom essentially all power and authority must belong. The Provisional Government will evolve a scheme for a Constituent Assembly which will prepare a constitution for the Government of India acceptable to all sections of the people. This constitution, according to the Congress view, should be a federal one, with the largest measure of autonomy for the federating units, and with the residuary powers vesting in these units. The future relations between India and the Allied Nations will be

adjusted by representatives of all these free countries conferring together for their mutual advantage and for their co-operation in the common task of resisting aggression. Freedom will enable India to resist aggression effectively with the people's united will and strength behind it.

"The freedom of India must be the symbol of and prelude to this freedom of all other Asiatic nations under foreign domination. Burma, Malaya, Indo-China, the Dutch Indies, Iran and Iraq must also attain their complete freedom. It must be clearly understood that such of these countries as are under Japanese control now must not subsequently be placed under the rule or control of any other colonial Power.

"While the A.-I.C.C. must primarily be concerned with the independence and defence of India in this hour of danger, the Committee is of opinion that the future peace, security and ordered progress of the world demand a World Federation of free nations, and on no other basis can the problems of the modern world be solved. Such a World Federation would ensure the freedom of its constituent nations, the prevention of aggression and exploitation by one nation over another, the protection of national minorities, the advancement of all backward areas and peoples, and the pooling of the world's resources for the common good of all. On the establishment of such a World Federation, disarmament would be practicable in all countries, national armies, navies and air forces would no longer be necessary, and a World Federal Defence Force would keep the world peace and prevent aggression.

"An independent India would gladly join such a World Federation and co-operate on an equal basis with other countries in the solution of international problems.

Such a Federation should be open to all nations who agree with its fundamental principles. In view of the war, however, the Federation must inevitably, to begin with, be confined to the United Nations. Such a step taken now will have a most powerful effect on the war, on the peoples of the Axis countries, and on the peace to come.

"The Committee regretfully realises, however, that despite the tragic and overwhelming lessons of the war and the perils that overhang the world, the Governments of few countries are yet prepared to take this inevitable step towards World Federation. The reactions of the British Government and the misguided criticisms of the foreign press also make it clear that even the obvious demand for India's independence is resisted, though this has been made essentially to meet the present peril and to enable India to defend herself and help China and Russia in their hour of need. The Committee is anxious not to embarrass in any way the defence of China or Russia, whose freedom is precious and must be preserved, or to jeopardise the defensive capacity of the United Nations. But the peril grows both to India and these nations, and inaction and submission to a foreign administration at this stage is not only degrading India and reducing her capacity to defend herself and resist aggression, but is no answer to that growing peril and is no service to the peoples of the United Nations. The earnest appeal of the Working Committee to Great Britain and the United Nations has so far met with no response, and the criticisms made in many foreign quarters have shown an ignorance of India's and the world's need and sometimes even hostility to India's freedom, which is significant of a mentality of domination and racial superiority which cannot be tolerated by a proud people conscious of their strength and of the justice of their cause.

"The A.-I.C.C. would yet again, at this last moment, in the interest of world freedom, renew this appeal to Britain and the United Nations. But the Committee feels that it is no longer justified in holding the nation back from endeavouring to assert its will against an imperialist and authoritarian Government which dominates over it and prevents it from functioning in its own interests and in the interests of humanity. The Committee resolves, therefore, to sanction for the vindication of India's inalienable right to freedom and independence, the starting of a mass struggle on non-violent lines on the widest possible scale, so that the country might utilise all the non-violent strength it has gathered during the last twenty-two years of peaceful struggle. Such a struggle must inevitably be under the leadership of Gandhiji and the Committee requests him to take the lead and guide the nation in the steps to be taken.

"The Committee appeals to the people of India to face the dangers and hardships that will fall to their lot with courage and endurance, and to hold together under the leadership of Gandhiji, and carry out his instructions as disciplined soldiers of Indian freedom. They must remember that non-violence is the basis of this movement. A time may come when it may not be possible to issue instructions or for instructions to reach our people, and when no Congress Committees can function. When this happens, every man and woman, who is participating in this movement must function for himself or herself within the four corners of the general instructions issued. Every Indian who desires freedom and strives for it must be his own guide urging him on along the hard road where there is no resting place and which leads ultimately to the independence and deliverance of India.

"Lastly, while the A.-I.C.C. has stated its own view of the future governance under free India, the A.-I.C.C. wishes to make it quite clear to all concerned that by embarking on mass struggle it has no intention of gaining power for the Congress. The power, when it comes, will belong to the whole people of India."

The A.-I.C.C. met in Bombay on the 7th August in a tense atmosphere. Maulana Abul Kalam Azad, opening the proceedings, refuted the suggestion that once India was given freedom she would ally herself with Japan. "Events," he observed, "have reached such a pass that this is not the time for promises. The Congress does not want to make any promises, nor does it want the British Government to make any. The need of the hour is action and action right now. Let us, therefore, simultaneously sign India's freedom here and now and our agreement to the United Nations to fight along with them." Mr. Gandhi, who followed the President, maintained that he had no hatred for the British. "In fact," he remarked, "I am the greatest

friend of theirs now, as they are in trouble. I have always believed that they would never lose."

Six amendments were moved, three of which stressed the need for a communal settlement as a condition precedent to the starting of any mass movement. After Pandit Jawaharlal Nehru, the mover of the resolution, had replied to the debate, the President, Maulana Abul Kalam Azad, appealed to the movers of the amendments to withdraw them and save time. Three amendments were then withdrawn, and the remaining three were rejected. The resolution was carried, 13 members voting against it. The total number of members present was nearly 240.

Mr. Gandhi's Appeal— On the declaration of the result of the resolution, Mr. Gandhi spoke for nearly 70 minutes in Hindi and for 20 minutes in English.

Mr. Gandhi observed that he had no objection to the transfer of power to Muslims. The Muslims would then have a body to administer the affairs of the country. That body would command the allegiance not only of Muslims but of Hindus and other communities as well.

Continuing Mr. Gandhi said that he would write to the Viceroy intimating to him the contents of the resolution and the implications thereof. It would not be very long before the Viceroy's reaction was known. Meanwhile he would advise the members and through them other Indians to feel that very day that they had shaken off the bonds of slavery and that they were free men and women.

In his English speech, Mr. Gandhi remarked that he had the privilege of friendship and trust of many of his friends in India and abroad. Some of them doubted his wisdom and even his honesty. His wisdom was not such a treasure, but honesty was a precious treasure to him. He claimed friendship between the present Viceroy and himself. He wanted Englishmen and the United Nations to examine their hearts and search their hearts. What crime, he asked, had the Congress Committee committed in demanding independence? He hoped that the President of the United States would not distrust the Congress because of its demand. The United Nations and Britain had the opportunity now of a lifetime to declare India free and prove their real intentions. Such an opportunity would never come twice in the same generation, and history would say that they did not discharge their overdue debt to India. He asked for the blessings of the whole world and for the active assistance of the United Nations.

Mr. Gandhi concluded: "Every man is free to go to the fullest length under *ahimsa* (non-violence), by complete deadlock, strikes and other non-violent means. Satyagrahis should go out to die and not to live. It is only when individuals go out to seek and face death that the nation will survive. *Karenge ya Marenge* (We shall do or die)."

Last-minute Peace Efforts—It was reported that on the eve of the A.-I.C.C. meeting and during this session vigorous efforts were made by Congress leaders to contact Mr. Jinnah with a view to arriving at an agreement which the Muslim League.

Just as the Congress was eager to arrive at a settlement with the Muslim League, similarly there was evidence that the Congress would have accepted any genuine gesture from the Government and cheerfully submit to negotiations in respect of details. The view was widely held at the time that subsequent events would have taken a different course if a week or fortnight had been allowed to elapse after the adoption of the A.-I.C.C. resolution. "We stand to lose more than the Government as the result of a struggle" said a prominent Congress leader; "we have to face fines, imprisonment and shooting. We will face it all, if necessary; but we certainly wish to avoid it, if possible."

Government, however, took a different view of the situation. They were convinced that the Congress had no genuine desire to negotiate a settlement but that with peace on their lips they were secretly planning a widespread subversive movement. Government claimed to have in their possession evidence of dangerous preparations which the Congress and its leaders had made to organise a show-down throughout the country including acts of violence and sabotage which, with imminent Japanese invasion, would have spelt disaster both for India and the cause of the Allied Nations. At all events, it was contended that, in face of Mr. Gandhi's unequivocal declaration that there would be no negotiation on the issue of independence, no useful purpose would be served by discussing a settlement with him. They could not parley with one who had a pistol in one hand and the olive branch in the other. It was felt that to allow more time to the Congress in the hope of reaching a settlement by negotiations would be to give it a much needed chance to perfect the preparations for a bloody revolution. The Government, therefore, decided to act firmly, and they acted quickly.

Government's Reaction.—Within a few hours of the adoption of the "Quit India" resolution by the A.-I.C.C. and the termination of its proceedings, Mr. Gandhi and the other Congress leaders were rounded up under the Defence of India Rules and kept under detention, completely isolated from the outside world. Strict measures were taken to prevent the movement from spreading or taking root. In a resolution of the Governor-General-in-Council published on the morrow of the A.-I.C.C. meeting Government expressed regret at the Congress resolution and affirmed their determination to meet the challenge contained in it. The resolution ran:—

"The A.-I.C.C. have ratified the resolution passed by the working Committee of the Indian National Congress on August 5. That resolution demands the immediate withdrawal of British Power from India, and sanctions the starting of a mass struggle on non-violent lines on the widest possible scale.

"The Governor-General-in-Council has been aware, too, for some days past of dangerous preparations by the Congress Party for unlawful, and in some cases violent activities, directed among other things, to the interruption of communications and public utility services, the organisation of strikes, tampering with the loyalty of Government servants, and interference with defence measures, including recruitment.

"The Government of India have waited patiently in the hope that wiser counsels might prevail. They have been disappointed in that hope. To a challenge such as the present there can only be one answer.

"The Government of India would regard it as wholly incompatible with their responsibilities to the people of India, and their obligations to the Allies, that a demand should be discussed the acceptance of which would plunge India into confusion and anarchy internally, and would paralyse her effort in the common cause of human freedom.

"For the demand of the Congress leaders there is no warrant. In the view of the Government of India that demand is difficult, if not impossible, to reconcile with a full sense of responsibility on the part of the leaders of the Congress Party, or a full appreciation by them of the realities of the present situation. The Congress Working Committee admit that 'there may be risks involved.' They are right. Acceptance of the resolution must mean the exposure of India to Axis attack from without. Internally, the withdrawal of British rule invites civil war, the collapse of law and order, the outbreak of communal feud, the dislocation of economic life with its inevitable hardships.

"Nor can the Government of India accept the claim of the Congress Party to speak for India as a whole. The Congress Party has for long occupied a position of great prominence and great importance in Indian political life. At this day its importance is substantial.

"But it is the duty of the Government of India to take a balanced view of the interests of all sections of Indian thought and Indian opinion.

"And looking, as they must, to the repeated protests even in these last few days by the leaders of great communities and solidly established interests, by so many leaders of liberal thought, by those great sections of the populations which are giving unstinted and invaluable support to the war against Axis aggression, they are confirmed in their view that that claim has no solid foundations: and that acceptance of the proposals now put forward by the Congress Party must mean the abandonment of all those large and powerful elements in the population which have condemned the course of action proposed by the Congress Party, and which resent and resist the widespread dislocation which its acceptance would involve of India's war effort and of the general life of the community.

"Nor can the Congress leaders claim that only thus can India's future be assured. The Congress Party is not India's mouthpiece. Yet, in the interests of securing their own dominance and in pursuit of their totalitarian policy, its leaders have consistently impeded the efforts made to bring India to full nationhood.

"But for the resistance of the Congress Party to all constructive endeavours, India might even now be enjoying self-government.

"British policy for India's future stands clear. It is that once hostilities cease, India shall devise for herself with full freedom of decision; and on a basis embracing all and not only a single party, the form of Government which she regards as most suited to her conditions; and that in the meantime Indian leaders shall fully participate in the Government of their country and in the counsels of the Commonwealth and of the United Nations. The fullest opportunity for the attainment of self-government by the people of India has been guaranteed by His Majesty's Government.

"It is on the basis, fully accepted by His Majesty's Government and by the people of Great Britain, that the fullest opportunity shall be open for the attainment of self-government by the Indian people, that when the day of victory comes the final structures of India's constitution will be erected by Indians themselves. That those guarantees given by the British Parliament and the British people are accepted by the people of India we firmly believe.

"The suggestion put forward by the Congress Party that the millions of India, uncertain as to the future, are ready, despite the sad lessons of so many martyr countries, to throw themselves into the arms of the invader is one that the Government of India cannot accept as a true representation of the feeling of the people of this great country.

"The leaders of the Congress Party have claimed that the withdrawal of British rule 'with good will' will 'result in establishing a stable provisional government in India, and co-operation between this government and the United Nations in resisting aggression and helping China'. There is no justification for those claims. Nor can the Government of India accept the suggestion that a stable provisional government could be formed in a moment of time within a day or two of the withdrawal of British Power.

"Past experience has shown, to their profound regret, the existence of deep differences in this country, the harmonising of which must be the object of all on whom responsibility falls, the removal of which is the ambition and the hope of the present Government of India. But to deny that those problems confront India today would be to ignore the facts: and the Government of India are satisfied that the interval between the withdrawal of British rule and the establishment of a stable provisional government would provide an open opportunity for the enemies of order and for all dissident elements in the population.

"In the view of the Government of India, it is not too much to say that acceptance of the demand now put forward by the Congress Party must mean the betrayal of the Allies, whether in or outside India; the betrayal, in particular of Russia and China; the betrayal of those ideals to which so much support has been given and is given today from the true heart and mind of India; the betrayal of India's fighting men whose glory is so great; and the betrayal of all those loyal and co-operating elements which do not support the Congress Party, but which have played so active and so valuable a part in British India and the Indians States in the prosecution of the war.

"India has today a Government stronger and more representative than ever in the past, a Government predominantly Indian and non-official, a Government determined to prosecute the war and no less determined to lead India onto her political goal.

"There is nothing that the Government of India regret more than this challenge at so critical a juncture. But on them there lies the task of defending India, of maintaining India's capacity to wage war, of safeguarding India's interests, of holding the balance between the different sections of her people without fear or favour. That task the Government of India will discharge in face of the challenge now thrown down by the Congress Party with clear determination, but with an anxiety that action shall be preventive of the interruption of the war effort and the other dangers to which they have referred rather than punitive, and with a full consciousness of the responsibility to India and to the cause of the Allies and of civilisation. Their duty is plain and they have to discharge it, profoundly as they must deplore the situation which they have been called upon to face. They urge the people of India to unite with them in resistance to the present challenge of a party. They appeal to them to lay aside all political differences, and for the period of the war place before all other considerations the defence of their country and the achievement of those common aims on which depends the future not only of India but of all the freedom-loving peoples of the world."

Leaders Arrested.—On the morning of August 9, Mr. Gandhi and other Congress leaders were arrested in Bombay and simultaneously throughout the country a round-up of important Congressmen took place. The total number of arrests on that day amounted to a few hundreds. In the words of an official publication, the first reactions to the arrests were surprisingly mild. On August 9 there were disturbances in Bombay, Ahmedabad and Poona, but the rest of the country remained quiet. On August 10 disturbances occurred also in Delhi and a few towns in the United Provinces; but still no serious repercussions were reported from elsewhere. It was from August 11 that the situation began to deteriorate rapidly. From then onwards, apart from the *hartals*, protest meetings and similar demonstrations that were to be expected, concerted outbreaks of mob violence, arson, murder and sabotage took place; and in almost all cases these were directed either against communications of all kinds (including railways, posts and telegraphs) or against the Police. Moreover, these outbreaks started almost simultaneously in widely separated areas in the provinces of Madras, Bombay and Bihar and also in the Central and United Provinces. The damage done was so extensive as to make it incredible that it could have been perpetrated on the spur of the moment without special implements and previous preparation; and in many instances the manner in which it was done displayed a great deal of technical knowledge. Block instruments and control rooms in railway stations were singled out for destruction; and the same technical skill appeared over and over again both in the selection of objects for attack—on the railways, in Post and Telegraph offices and lines, and on electric power lines and installations—and also in the manner in which the damage was carried out. On the other hand, industrial plant and machinery, even where it was fully employed on Government work, escaped any serious injury.

(Copious extracts from the official publication on the disturbances were included in past issues of *The Indian Year Book*.)

In the course of a debate in the Assembly, Sir Reginald Maxwell disclosed that till the middle of November 1942; 49 fatal and 1,863 non-fatal cases amongst the police force were reported from mob violence. Mob violence was responsible for destroying or badly damaging 192 police stations and posts, 494 Government buildings, 318 railway stations and 309 post and telegraph offices. There were 103 cases of serious damage to railway track and 11,285 cases of serious damage or destruction of telegraph and telephone lines and installations. There were three cases in which military property and installations were destroyed or damaged. There were 14 fatal cases and 70 non-fatal cases amongst the military from mob violence. These figures would indicate the seriousness of the rebellion Government had to face in this country.

"A rebellion, an attempted internal revolution" was the description applied to the disturbances by the Home Member. He claimed that the rebellion had been quelled and that Government had come through the ordeal unscathed through the loyalty of the Government servants and the steadiness of the country. Sir Reginald was emphatic that it was not a peoples' movement. Labour wishes to get on with work, and the Muslims and Scheduled Classes had kept entirely aloof. The responsibility for the disorders was of the Congress.

Muslims as a community kept out of the disturbances; so did the followers of Dr. Ambedkar. Except for cessation of work for a few weeks in the Ahmedabad textile industry, the industrial population was generally unaffected by the movement. The public services, the police, the post and telegraphs, the railways and urban utility services stuck to their work. Students were enthusiastic for a few months, but later their zeal flagged.

Most of the moderate leaders condemned the violence in unmistakable terms. Mr. C. Rajagopalachari was among the foremost of the critics of the movement and of the form which it took. Many of them, however, disputed the Government's contention that the movement was initiated and inspired by the Congress, contending that it was more the expression of the peoples frustration and disappointment at Britain's attitude towards Indian aspirations and an expression of the people's resentment over the arrest of Mr. Gandhi and the Congress leaders. They were anxious that something must be done to put a stop to the movement and to restore normal political life. They suggested that negotiations be undertaken with Mr. Gandhi both for a settlement for the Indo-British question and the inter-party disputes within the country.

In pursuance of this desire, Dr. Shyamaprasad Mookerjee, right-wing Hindu Mahasabha leader, requested the Viceroy to permit him to meet Mr. Gandhi with a view to exploring the possibilities of a Congress-League settlement. This was turned down. Mr. Rajagopalachari made a similar attempt a few weeks later, but he too met with the same fate.

Mr. Gandhi's Fast.—There was complete frustration in the Indian political world. There seemed no way out of the deadlock, both Indo-British and internal. At this juncture, on the 9th of February 1943, exactly six months after his arrest, Mr. Gandhi announced his intention to undertake a fast for 21 days. He had earlier written to the Viceroy reiterating his faith in non-violence abhorring the violence both of the Indian masses and of the Government in the shape of repression, protesting against the charge that he and the Congress were responsible for all that had taken place in the country, demanding an opportunity to rebut that charge, and asking for facilities to go over the whole question, in consultation with the members of the Congress Working Committee, with a view to an examination of the political situation *de novo*. His letters to the Viceroy and the latter's replies were published *in extenso* in past issues of *The Indian Year Book*.

Plea for Release.—There was widespread demand for the release of Mr. Gandhi or at least for facilities to enable him to consult the members of the Working Committee. The Opposition in the Indian Legislature raised the question of Mr. Gandhi's fast through an adjournment motion and avoiding controversial issues, demanded the release of Mr. Gandhi both on personal grounds and on wide political considerations. They uttered a warning that "if Mr. Gandhi dies in jail, the Indian people will never forget it and forgive the British people." The Government spokesman was most outspoken. The congress, he said, had passed the resolution hoping to win Jap favour at a time when invasion seemed imminent. Now that the Congress movement has been decisively defeated and the Jap threat had receded, the Congress leader was trying to rehabilitate the party's credit. Mr. Gandhi's demand that he should be convinced of his guilt was like the United Nations asking Hitler to judge the responsibility for the present war. The Home Member described Mr. Gandhi as a rebel and declared that, so long as his rebellious resolution was not cancelled, Mr. Gandhi could not claim the rights of a citizen. As for the moral virtue of the fast, Sir Reginald declared that it was repugnant to the western idea of decency to exploit an opponents' feeling of humanity, chivalry or mercy. The motion was talked out.

A couple of days later an All-parties conference was held at Delhi to voice a joined demand that in the interest of the future of India and of international good-will Mr. Gandhi should be released immediately and unconditionally. To this the Viceroy replied that no change had occurred in the situation since February 10, when the Government decided to let Mr. Gandhi fast in detention, and that the Government could not surrender to coercion. The conference later made an appeal to the Premier of Great Britain and obtained a similar answer.

In this connection it is noteworthy that the Hindu Mahasabha expressed anxiety over Mr. Gandhi's life and said that, in the event of the strain of the fast endangering his health seriously, Government must release him to save his precious life. At the same time the Mahasabha declared that fasting as a political weapon was bound to be futile, detrimental and suicidal.

Similarly, Mr. Jinnah refused to be associated with the conference on the ground that the Viceroy-Gandhi correspondence showed no change on the part of Mr. Gandhi in the attitude towards the Muslim League except the reiteration of his oft-repeated political demand having for his sanction a threat to resort to mass civil disobedience. "Now he has undertaken this dangerous fast with a view to enforcing that demand which, if conceded or agreed to under such coercive method, it is obvious, will destroy the Muslim demand and involve complete sacrifice of the vital and paramount interests of Muslim India. Moreover, mere political issues and the complex political problems of this sub-continent, involving the destinies of millions, cannot be settled or solved by means and methods of fasting adopted by Mr. Gandhi. I do, however, hope that your efforts may lead to the path of reason and peace and then there would come an opportunity for friendly negotiations which might, I trust, result in a settlement satisfactory not only to the two major nations—Hindus and Muslims but to all other interests and minorities concerned."

During the controversy over Mr. Gandhi's fast a mild sensation was caused by the resignation of three members of the Viceroy's expanded Executive Council, namely, Sir H. P. Mody, Mr. M. S. Aney and Mr. N. R. Sarker. Explaining the reasons for their resignations they said that "certain differences arose on what we regarded as a fundamental issue (the action to be taken on Mahatmaji's fast) and we felt we could no longer retain our offices."

Meanwhile, Mr. Gandhi successfully survived the 21-day foodless ordeal, although on two occasions his condition caused anxiety. On the conclusion of the fast the commotion which had prevailed between February 10 and March 4 gradually subsided.

Nevertheless, the situation created by the fast was further considered by the non-party leaders who again met, this time in Bombay, and issued the following resolution:—

"We are of the opinion that the deplorable events of the last few months require a reconsideration of their policy both by Government and the Congress. The recent talks which some of us have had with Mr. Gandhi lead us to believe that a move for reconciliation at the present juncture will bear fruit.

"It is our conviction that if Mr. Gandhi is set at liberty he would do his best to give guidance and assistance in the solution of the internal deadlock and that there need be no fear that there would be any danger to the successful prosecution of the war.

"The Viceroy may be approached on our behalf to permit a few representatives to meet Mr. Gandhi authoritatively to ascertain his reactions to recent events and to explore with him avenues for a reconciliation."

In pursuance of this resolution representations were made to the Viceroy to let some of the non-party leaders meet Mr. Gandhi. Declining to give the facilities sought, the Viceroy said that if Mr. Gandhi was prepared fully to repudiate the Congress resolution of August 1942, to condemn the incitements to violence represented by his reference to "open rebellion," etc., and if he and the Congress party were prepared to give assurances for the future, acceptable to the Government, then the matter could be considered further.

Silence and Inactivity.—The months that followed the termination of Mr. Gandhi's fast were marked by comparative silence and inactivity. The disturbances, which broke out in August 1942 and continued with varying intensity for six months, virtually ceased in the spring of 1943. This was undoubtedly due to the stern measures taken by Government; but it was also due to the atmosphere of anxiety and sorrow created by Mr. Gandhi's fast in February 1943. In particular, the disapproval of violence in any form voiced by Mr. Gandhi in his letters to the Viceroy, published in the first half of February 1943, served to damp the ardour of those Indians who had imagined that either the Congress or Mr. Gandhi had sanctioned acts of violence. The cumulative effect of these factors was the virtual cessation of sabotage, arson and other acts of mob violence and mischief which had marked the latter half of 1942.

The apparent determination of Government to face the situation in the country should Mr. Gandhi's fast prove fatal rather than give an "unrepentent rebel" facilities for normal political life, coupled with their refusal to encourage non-Gandhiite Congressmen and non-Congress leaders to explore possibilities of an internal settlement in consultation with Mr. Gandhi, produced a stifling stillness in the political atmosphere.

Congress activity in 1943-44 therefore was next to nothing. Such political life as prevailed in the country was confined to Liberals and non-party leaders (see chapter on Liberal Federation) and the Muslim League (see chapter on Muslim League). The only activity directly concerning the Congress or emanating from Congressmen was Mr. Gandhi's letter to Mr. Jinnah in the summer of 1943 and an occasional move by released Congressmen to meet together and evolve an agreed policy in the absence of official Congress leadership.

In response to an appeal made by Mr. Jinnah in the Delhi session of the Muslim League inviting Mr. Gandhi to write to him, the latter addressed a letter to the League leader offering to meet him. Not only were the contents of the letter not published, but Government refused to forward it to Mr. Jinnah.

The twelve-month period from the summer of 1943 to that of 1944 was one of depression and inactivity. A feable attempt made by right wing Congressmen released from jail to whip up some kind of political activity in the country was effectively scotched by Mrs. Sarojini Naidu.

Throughout this period there was no authoritative and comprehensive statement of Government's policy towards the Congress, although there were occasional announcements on specific issues. Lord Linlithgow, in his farewell address to the Central Legislature in the autumn of 1943, adopted an attitude of studied silence in respect of the Congress. People thought that it was done in order not to anticipate any new policy which his successor might unfold. This belief was re-inforced by broad hints thrown by the Viceroy-designate, Lord Wavell, on the eve of his assumption of office.

Much was, therefore, expected from Lord Wavell who assumed office in the autumn of 1943. Within a few days of his being sworn in, however, he turned his attention to the famine situation in Bengal and naturally devoted all his energies to that problem in preference to the political question.

This period witnessed a sad event, namely, the passing away of Mrs. Gandhi. She died in detention in the Aga Khan's Palace, a victim of heart attacks. There were repeated demands from the public for her release, but Government seemed to be of the view that she would be more happy where she was, especially when adequate medical help was made available to her. This was the second bereavement of Mr. Gandhi since his arrest and detention, the first being the death of Mr. Mahadev Desai, his secretary and confidante, in August 1942. As during the fast in the spring of 1943, friends and relatives of the Gandhi family were allowed to enter the Aga Khan's Palace to visit Mrs. Gandhi during the latter part of her prolonged illness and later to attend her funeral.

Letter to Mr. Jinnah.—One of the first acts of Mr. Gandhi after his release in May 1944 was to release the text of his letter to Mr. Jinnah which was written from detention about a year previously and which was withheld by Government. Here is the text of the letter: "Dear Quaid-e-Azam, When sometime after my incarceration, Government asked me for a list of newspapers I would like to have, I included *Dawn* in my list. I have been receiving it with more or less regularity. Whenever it comes to me I read it carefully. I have followed the proceedings of the League, as reported in the *Dawn* columns. I noted your invitation to me to write to you. Hence this letter. I welcome your invitation. I suggest our meeting face to face rather than talking through correspondence. But I am in your hands. I hope this letter will be sent to you and, if you agree to my proposal, that the Government will let you visit me. One thing I had better mention. There seems to be an 'if' about your invitation. Do you say I should write only if I have changed my heart? God alone knows men's hearts. I would like you to take me as I am. Why should not both you and I approach the great question of communal unity as men determined on finding a common solution, and work together to make our solution acceptable to all who are concerned with it or are interested in it?" The publication of this letter had no effect on Mr. Jinnah.

In the weeks immediately following his release Mr. Gandhi concentrated on the collection of facts and opinions regarding what had happened during his detention and on efforts to gauge the feeling in the country as he emerged out of his detention. Typical of his reaction immediately after his release was his letter to the Rt. Hon. M. R. Jayakar in which he said: "The country expects much from me. I do not know how you feel about this release. I am not at all happy. I feel even ashamed. I should not have fallen ill. I tried not to, but failed. I feel that they will imprison me as soon as I am declared free from the present weakness. And if they do not arrest me, what can I do? I cannot withdraw the August resolution. As you have very properly said, it is innocuous. You may differ about the sanction. It is the breath of life for me."

Wavell-Gandhi Correspondence.— About this time the correspondence which passed between Mr. Gandhi while was a detenu in the Aga Khan's Palace and Lord Wavell, the Viceroy saw the light of day. The starting point of these letters was a notice served on Mr. Gandhi on behalf of the Government of India giving reasons for his detention and extending to him the right of making a representation against it. He suggested that Lord Wavell should "descend upon Ahmednagar and the Aga Khan's Palace in order to probe the hearts of your captives," adding that if, as His Excellency believed, the Congress leaders were high-minded persons, they should be treated as such and their interpretation of their formula should be accepted. Mr. Gandhi also assured Lord Wavell that he and the other Congress leaders were all friends of the British, however much they might criticise the British Government and system in India. If they could but be trusted, they would be found to be the greatest helpers in the fight against Nazism and the like.

Lord Wavell, writing to Mr. Gandhi, urged that the greatest contribution that the Congress Party could make towards India's welfare was to abandon the policy of non-co-operation and join wholeheartedly with other parties and the British in helping India's economic and political progress. He assured Mr. Gandhi that he was only seeking the best means to implement the Cripps Offer without delivering India to confusion and turmoil. Wisdom and a spirit of goodwill and compromise would be required to arrive at the right solution; but with good leadership he was sure a solution could be found.

In the letters which Mr. Gandhi exchanged with Lord Wavell he argued in effect that the "Quit India" demand had no sinister significance but only gave vivid expression to the people's desire for real political freedom, if only to render India's war effort real and wholehearted; that civil disobedience was not actually launched by the August resolution but was embodied in it as a contingent sanction; that it was never his intention, nor that of the Congress, that the movement should depart from non-violence; and that, above all, the Congress would give genuine and complete help in resisting Nazism, etc., if its co-operation were sought in earnest. Lord Wavell contended that the resolution was ill-timed and unfriendly and that the Congress could not escape responsibility for the tragic events which followed although he exonerated the Congress and Mr. Gandhi of any wish deliberately to aid the Japanese.

About this time, light was also thrown on the correspondence between Mr. Gandhi in detention and the authorities in connection with Government's charge fastening the blame for the disturbances on the Congress. (See last year's issue of *The Indian Year Book.*)

Letter to Lord Wavell.—These letters belong, however, to the pre-release era. His expressed views after the release are more in accord with those contained in his letters to Lord Wavell rather than in those addressed to Lord Linlithgow. In the middle of June 1944, Mr. Gandhi wrote to the Viceroy: "Though there is little cause for it, the whole country and even many from outside expect me to make some decisive contribution to the general good. I am sorry to say my convalescence threatens to be fairly long. Even if I was quite well, I could do little or nothing unless I knew the mind of the Working Committee of the Congress. I pleaded as a prisoner for permission to see them. I plead now as a free man for such permission. If you will see me before deciding, I shall gladly go wherever you want me to, as soon as I am allowed by my medical advisers to undertake long-distance travelling."

To this His Excellency replied: "In consideration of the radical difference in our points of view which appeared in our recent correspondence, I feel that a meeting between us at present could have no value and could only raise hopes which would be disappointed. I am afraid that similar considerations apply to your request to see the Working Committee. You have recently made public your adherence to the 'Quit India' resolution, which I am afraid I do not regard as a reasonable or practical policy for the immediate future. If after your convalescence and on further reflection, you have a definite and constructive policy to propose for the furtherence of India's welfare, I shall be glad to consider."

Advice to Congressmen.—Within a week of the receipt of the Viceroy's reply, Mr. Gandhi made his first public utterance since his release. Addressing the Congressmen of Maharashtra, he said there was no cause to feel frustrated because "we have not achieved our goal within a given period." Speaking for himself, he said he had never for one moment felt that sense of frustration. What was needed was "unshakeable faith in ourselves." Referring to the communal tangle, the political deadlock and the food situation, Mr. Gandhi said: "I have an answer for all these, but I may not attempt it at this meeting." The only solution of India's sufferings, he added, was a real National Government. It was essential that India should be free. He reaffirmed his unbounded faith in truth, non-violence and non-violent non-co-operation with what he considered to be evil. Mr. Gandhi said that his authority as representative of the Congress had lapsed with his imprisonment.

C. R. Formula.—The next stage arrived shortly after. Mr. C. Rajagopalachari, who had spent a few days with Mr. Gandhi while the latter was recuperating at Panchgani, announced in July that, on behalf of Mr. Gandhi, he had carried on negotiations with Mr. Jinnah for a settlement on the basis of virtual agreement on the principle of Pakistan. Mr. Jinnah declined to express an opinion on the proposals, but said he would submit the scheme to the League Working Committee if it was forwarded to him by Mr. Gandhi himself. Mr. Rajagopalachari felt that it was futile to allow Mr. Jinnah, if he could not himself wholeheartedly back it, to put the proposals before the League Working Committee. The personal negotiations, therefore came to an end and Mr. Rajagopalachari released the correspondence between himself and Mr. Jinnah as he wished to take the public into confidence. "My efforts to secure Mr. Jinnah's powerful help in pushing through an honourable settlement of the communal question have reached a stage when the public have to be taken into confidence," Mr. Rajagapalachari said in his statement. "The public will note from the correspondence now published that I had secured Gandhiji's personal approval even during his fast in February-March last year for the formula that I am now releasing. All parties may judge the formula on its merits. I felt that it was futile to allow Mr. Jinnah, if he could not himself wholeheartedly back it, to put my proposal before the Muslim League. Let the League and all who are interested in the solution of the problem apply their minds to the question dispassionately and in the interests of the whole country. Needless to say I am taking the public into confidence with Gandhiji's approval. Both he and I have approached the question in no bargaining spirit. The formula may now be regarded as our joint contribution to the solution of the communal problem and dealt with as such."

The correspondence on this subject between Mr. Jinnah and Mr. Rajagopalachari was published in last year's issue of *The Indian Year Book*.

Close on the heels of the publication of the Gandhi-cum-C.R. offer to Mr. Jinnah, Mr. Gandhi made another gesture, this time to British authority. According to a British journalist, who had had a series of interviews with Mr. Gandhi, the latter "is prepared to accept and to advise the Congress to participate in a war-time National Government in full control of the civil administration, leaving the Viceroy and the Commander-in-Chief in full control of the British and Indian armies. It would be expected that the establishment of such a Government would be accompanied now by a guarantee of Indian independence after the war. Mr. Gandhi has also approved the proposal submitted to Mr. Jinnah by Mr. C. Rajagopalachari. Mr. Gandhi pointed out that he had no authority to speak in the name of the Congress without consulting the Working Committee, but there is no doubt whatever that his views and the Hindu-Muslim proposals as endorsed by him would be accepted by them without hesitation. (For details see last year's issue of *The Indian Year Book*.)

Request to Viceroy.— Mr. Gandhi followed this up by writing direct to the Viceroy. The following is the text of the correspondence :—

Mr. Gandhi's letter to Viceroy :—15th July, 1944 : "You have no doubt seen the authentic copies, now published in the Indian Press of the statements given by me to Mr. Gelder. As I have said to the Press, they were meant primarily to be shown to you. Mr. Gelder, no doubt with the best of motives gave the interview premature publicity. I am sorry. The publication will nevertheless be a blessing in disguise, if the interview enables you to grant at least one of my request contained in my letter of 17th June 1944."

Viceroy's Reply :—22nd July 1944 : "Thank you for your letter of 15th July. I have seen the statements you made to Mr. Gelder, and your subsequent explanation of them. I do not think I can usefully comment at present, except to repeat what I said in my last letter that if you will submit to me a definite and constructive policy, I shall be glad to consider it."

Mr. Gandhi's proposals to Viceroy :—27th July 1944 : "I must admit my disappointment over your letter of the 22nd instant But I am used to work in the face of disappointment. Here is my concrete proposal. I am prepared to advise the Working Committee to declare that in view of the changed conditions, mass Civil Disobedience envisaged by the resolution of August 1942 cannot be offered and that full co-operation in the war effort should be given by the Congress if a declaration of immediate Indian Independence is made and a National Government responsible to the Central Assembly be formed subject to the proviso, that, during the pendency of the war, the military operations should continue as at present but without involving any financial burden on India. If there is a desire on the part of the British Government for a settlement, friendly talks should take the place of correspondence. But I am in your hands. I shall continue to knock so long as there is the least hope of an honourable settlement. After the foregoing was written, I saw Lord Munster's speech in the House of Lords. The summary given by him in the House of Lords fairly represents my proposal. This summary may serve as a basis for mutual friendly discussion."

Viceroy's reply :—15th August, 1944 : "Thank you for your letter of 27th July. Your proposals are :—

"That you should undertake to advise the Working Committee (*a*) that in view of changed conditions mass Civil Disobedience envisaged by the resolution of August, 1942 cannot be offered, and (*b*) that full co-operation in the war effort should be given by Congress, provided that His Majesty's Government (*a*) declare immediate Indian independence, and (*b*) form a 'National Government' responsible to the Central Assembly, subject to the proviso that, during the pendency of the war, the military operations should continue as at present but without involving any financial burden on India."

"His Majesty's Government remain most anxious that a settlement of the Indian problem should be reached. But proposals such as

those put forward by you are quite unacceptable to His Majesty's Government as a basis for discussion, and you must realise this if you have read Mr. Amery's statement in the House of Commons on July 28th last. They are indeed very similar to the proposals made by Maulana Abul Kalam Azad to Sir Stafford Cripps in April 1942 and His Majesty's Government's reasons for rejecting them are the same as they were then.

"Without recapitulating all these reasons in detail, I should remind you that His Majesty's Government at that time made it clear: (*a*) That their offer of unqualified freedom after the cessation of hostilities was made conditional upon the framing of a constitution agreed by the main elements of India's national life and the negotiation of the necessary treaty arrangements with His Majesty's Government; (*b*) That it is impossible during the period of hostilities to bring about any change in the constitution, by which means alone a "National Government," such as you suggest, could be made responsible to the Central Assembly. The object of these conditions was to ensure the fulfilment to their duty to safeguard the interests of the racial and religious minorities and of the Depressed Classes, and their treaty obligations to the Indian States.

"It was upon the above conditions that His Majesty's Government invited Indian leaders to take part in an interim government which would operate under the existing constitution. I must make it quite clear that until the war is over, responsibility for defence and military operations cannot be divided from the other responsibilities of Government and that until hostilities cease and the new constitution is in operation, His Majesty's Government and the Governor-General must retain their responsibility over the entire field. So far as the question of India's share of the cost of the war is concerned, this is essentially a matter for settlement between His Majesty's Government on the one hand and the Government of India on the other, and existing financial arrangements can only be reopened at the instance of one or the other.

"It is clear, in these circumstances, that no purpose would be served by discussion on the basis which you suggest. If, however, the leaders of the Hindus, the Muslims and the important minorities were willing to co-operate in a transitional Government established and working within the present constitution, I believe good progress might be made. For such a transitional government to succeed there must, before it is formed, be agreement in principle between Hindus and Muslims and all important elements as to the method by which the new constitution should be framed. This agreement is a matter for Indians themselves. Until Indian leaders have come closer together than they are now, I doubt if I myself can do anything to help. Let me remind you too that minority problems are not easy. They are real and can be solved only by mutual compromise and tolerance.

"The period after the termination of hostilities for which the transitional Government would last would depend on the speed with which the new constitution could be framed. I see no reason why preliminary work on that constitution should not begin as soon as the Indian leaders are prepared to co-operate to that end. If they can arrive at a genuine agreement as to the method of framing the constitution no unnecessary time need be spent after the war in reaching final conclusions and in agreeing on treaty arrangements with His Majesty's Government. There again, the primary responsibility rests on the Indian leaders."

Mr. Gandhi's reaction.—Commenting on the Viceroy's reply, Mr. Gandhi said: "the Viceroy's proposition means that unless all the main parties agree as to the constitution of the future, and there is agreement between the British Government and the main parties there is to be no change in the constitutional position, and the Government of India as at present is to be carried on. The names of the parties given in the Government reply are illustrative only. I have no doubt that, on due occasions, more will be exhibited as from a conjurer's bag and who knows how and when the British Government will agree to surrender control. It is clear as crystal that the British Government do not propose to give up the power they possess over the 400 millions, unless the latter develop strength enough to wrest it from them. I shall never lose hope that India will do so by purely moral means."

Political circles in India generally welcomed Mr. Gandhi's double gesture to the Viceroy and Mr. Jinnah although some Liberal leaders questioned the wisdom of the acceptance of the Pakistan principle, while a Hindu Mahasabha spokesman derisively referred to it as "from 'Quit India' to 'Split India.' A fierce controversy raged for weeks. As for Mr. Gandhi he said: "I myself feel firmly that Mr. Jinnah does not block the way, but the British Government do not want a just settlement of the Indian claim for independence which is overdue, and they are using Mr. Jinnah as a cloak in denying freedom to India." He denied the interpretation put in certain quarters that the 1942 August Congress resolution had lapsed. On the other hand the resolution, he said, could not be altered except by the Congress Working Committee, but his authority under that resolution had lapsed. "Let me make it clear," he observed, "that the lapsing of my authority has nothing to do with the normal activities of Congressmen.

"What no one can do in the name of the Congress is mass civil disobedience which was never started and which, as I have said, I cannot at the present moment, even in my personal capacity start. The 'Quit India' resolution, I hold to be absolutely innocuous." Dealing with the Cripps Offer, Mr. Gandhi said the proposals were not acceptable to him "for the simple reason that they contemplate the perpetual vivisection of India and they work as an effective barrier against Indian Independence." His own proposals covered the whole of India, British India as well as Indian (Princes) India. "I shall never be a party to a sale of the rights of the people of the States for the sake of freedom of the people of British India."

The doings in India produced little impression on Whitehall whose reaction was restricted to a reiteration of the Cripps Offer. Mr. Amery

said: "Britain stands by the promises of independence after the war made to India two years ago. The Government stands by those proposals in all their generous amplitude. We shall stand by them in our victory, as we did in the days of adversity." Mr. Amery added that Mr. Gandhi had expressed his views on the immediate situation and, so long as that was the basis of his proposals, they did not afford even a starting point for a profitable discussion with the Viceroy or with the interned Congress Party leaders. The proposals were in no sense in response to Lord Wavell's invitation to produce constructive proposals."

If Mr. Gandhi was cold-shouldered by Whitehall, he met with poor response from Mr. Jinnah who in his address to the Lahore session of the League Council was highly critical of the manner in which the Gandhi-C.R. offer was handled from Panchgani. Thereupon Mr. Gandhi sent a communication to Mr. Jinnah conveying to the latter the C.R. formula. This was the basis of a meeting between Mr. Gandhi and Mr. Jinnah which took place in September 1944. (For details see chapter on "The Muslim League.").

Constructive Work.—Meanwhile, Mr. Gandhi gave further evidence of his disapproval of violence by advising underground Congress workers to give themselves up to authority on the ground that sabotage and all that it meant, including the destruction of property, was in itself violence. He said: "the question most discussed with me by visitors is whether I approve of underground activities. These include sabotage, the publication of unauthorized sheets, etc. It has been suggested to me that without some workers going underground they could have done nothing. Some have contended that destruction of property, including dislocation of communications provided that safety of human life could be insured should surely be counted as non-violence. Examples of other nations having not hesitated to do all these things and much worse have been cited. My reply is that no nation has, so far as I know, deliberately used Truth and Non-violence as exclusive means for the attainment of freedom. Judged by that standard, I say unhesitatingly that underground activities, even though utterly innocent in themselves, should have no place in the technique of non-violence. Sabotage and all it means, including destruction of property, is in itself violence. Though these activities may be shown to have touched the imagination of some people and roused their enthusiasm, I have no doubt that they have harmed the movement as a whole.

"I swear by the constructive programme. Let me recount the items of that programme:—

(1) Communal unity, (2) Removal of untouchability, (3) Prohibition, (4) Khadi, (5) Other village industries, (6) Village sanitation, (7) New or basic education, (8) Adult education, (9) Uplift of women, (10) Service of the so-called aboriginals, (11) Education in health and hygiene, (12) Propaganda of *rashtra bhasha*, (13) Love of one's own language, and (14) Working for economic equality.

"Unfortunately the workers have not developed in that programme the living faith which I have. I can but re-emphasize the importance of that programme. And if the whole of India could be converted to take to that programme we should reach our goal in the quickest manner possible. To the workers who are still underground, I advise: If you share my conviction that underground activity is not conducive to the growth of the spirit of active non-violence, you will discover yourselves and take the risk of being imprisoned believing that imprisonment thus undergone itself helps the freedom movement."

Mr. Gandhi also seemed to contemplate a new drive among India's 700,000 villages evidently as a counter-blast to the many post-war reconstruction plans being adumbrated by Government and non-official agencies.

In addition to the disbursement of the Kasturba Memorial Fund (started to commemorate Mrs. Gandhi), which had crossed the one-crore limit and the bulk of which is proposed to be spent among the village folk, it was suggested that the resources and man-power of the principal Gandhian institutions (whose personnel includes highly trained and disciplined field-workers) should be deployed throughout rural India. This new force is calculated to win over the masses to the Gandhi cult and through it to the Congress.

Desai-Liaqat Talks.—In the winter of 1944-45 an interesting development occurred which at least provided an opening for big political changes in the summer of 1945. Mr. Bhulabhai J. Desai, Leader of the Congress Party in the Assembly, initiated negotiations with Nawabzada Liaqat Ali Khan, Deputy Leader of the Muslim League Party in the Assembly. These led up to a proposal by the former which met with a measure of encouragement from the latter. At one time it was believed to have resulted in a pact between the two in their individual capacity, it being assumed that neither would have continued in their efforts without the tacit approval of their respective principals, namely, Mr. Gandhi and Mr. Jinnah. The facts, (as revealed by Nawabzada Liaqat Ali Khan in September 1945) showed that Mr. Desai had suggested a formula for an interim agreement between the Congress and the League. It is known that Mr. Desai discussed this formula with Lord Wavell and that, although its main provisions were varied, it provided the basis for the proposal made by the Viceroy in June 1945 and in a sense for the Simla Conference (see later). Here is the Nawabzada's version, which is the only authoritative statement on the subject:

"Mr. Desai met me after the last autumn session of the Central Legislative Assembly and we informally discussed the prevailing distressing condition in the country, economic and otherwise....It was recognised all round that the Government of India, with its present composition, was incapable of dealing effectively with the various problems which had arisen and were bound to arise in the future.

"Mr. Desai, during the course of the conversation, asked me about the attitude of the Muslim League with regard to some interim arrangement at the Centre and a temporary reconstitution of the Governor-General's Executive Council in a manner which would

secure for it the confidence of all the peoples so that it may be able to help them in their present plight and deal more effectively than what had been done in the past with the serious situation that was bound to arise in the future on account of the prolongation of the war.

"I explained to him the position in the light of the resolutions that were passed from time to time by the Muslim League in this connection, and told him that my personal view was that, if any proposals were made to ease the situation, the Muslim League was bound to give its very careful consideration to them, as it had always done in the past, because the Muslim League had always been anxious to come to the rescue of the people and assist them in their sad plight and help the country in tiding over the difficult period ahead.

"Mr. Desai saw me again in Delhi in the beginning of January this year just as I was leaving on a tour of the Madras Presidency and showed me some proposals which had been drafted for the formation of an interim Government at the Centre. A copy of which he was good enough to give me and which was to be treated as strictly private and confidential, and on the basis of which he told me he was going to make an effort to bring about a change in the composition of the Government of India.

"He told me his plan was to meet the Viceroy and Mr. Jinnah in this connection. I told him that in my personal opinion the proposals were such that they could be made a basis for discussion, but I did not see any prospect of his making any headway unless he could either get Mr. Gandhi to move in the matter personally or get his definite approval and open support for the move that he was making, as Mr. Gandhi was the only person who could deliver the goods on behalf of the Congress in the absence of the Working Committee.

"During my talks with Mr. Desai, which were purely of a personal nature, I made it absolutely clear to him that whatever I had said was my individual view and I was not speaking either on behalf of the Muslim League or anyone else. If and when Mr. Desai felt that he could speak with authority on behalf of the Congress he would have to approach the President of the All-India Muslim League, who was the proper authority to entertain any proposals on behalf of the Muslim League. This is the history of these proposals, which have been described in the press by various names such as the Desai-Liaqat Formula, the Desai-Liaqat Pact and so on.

"I have scrupulously respected the wishes of Mr. Desai and have treated the draft proposals as strictly private and confidential and have not shown them to anyone, but in view of the statement of Mr. Desai—(to the press of Bombay that the Pact could not be published as I desired that it should remain confidential)—and the confusion that is being created, I feel that these proposals should be published; hence I am releasing them to the press.

TEXT OF PACT.

"The following is the Desai-Liaqat Pact:—

"The Congress and the League agree that they will join in forming an interim Government in the Centre. The composition of such Government will be on the following lines:—

(*a*) An equal number of persons nominated by the Congress and the League in the Central Executive (the persons nominated need not be members of the Central Legislature);

(*b*) Representatives of minorities (in particular the Scheduled Castes and the Sikhs);

(*c*) The Commander-in-Chief.

"The Government will be formed and function within the framework of the existing Government of India Act. It is, however, understood that, if the Cabinet cannot get a particular measure passed by the Legislative Assembly, they will not enforce the same by resort to any of the reserve powers of the Governor-General or the Viceroy. This will make them sufficiently independent of the Governor-General.

"'It is agreed between the Congress and the League that, if such interim Government is formed, their first step would be to release the Working Committee members of the Congress.

"'The steps by which efforts would be made to achieve this end are at present indicated to take the following course:

"'On the basis of the above understanding, some way should be found to get the Governor-General to make a proposal or a suggestion that he desires an interim Government to be formed in the Centre on the agreement between the Congress and the League and when the Governor-General invites Mr. Jinnah and Mr. Desai either jointly or separately, the above proposals would be made declaring that they are prepared to join in forming the Government.

"'The next step would be to get the withdrawal of Section 93 in the provinces and to form, as soon as possible, provincial Governments on the lines of a coalition.'"

Wavell Plan.—In the summer of 1945 Lord Wavell paid a visit to Great Britain and had prolonged consultations with members of the British Cabinet. On his return in June His Excellency unfolded the proposals of His Majesty's Government to ease the Indian political situation. He said in a broadcast to the people of India: "I have been authorised by His Majesty's Government to place before Indian political leaders proposals designed to ease the present political situation and to advance India towards her goal of full self-government. These proposals are at the present moment being explained to Parliament by the Secretary of State for India. My intention in this broadcast is to explain to you the proposals, the ideas underlying them, and the method by which I hope to put them into effect.

"This is not an attempt to obtain or impose a constitutional settlement.

"His Majesty's Government had hoped that the leaders of the Indian parties would agree amongst themselves on a settlement of the communal issue, which is the main stumbling-block, but this hope has not been fulfilled.

"In the meantime, India has great opportunities to be taken and great problems to be solved, which require a common effort

by the leading men of all parties. I, therefore, propose, with the full support of His Majesty's Government, to invite Indian leaders both of central and provincial politics to take counsel with me with a view to the formation of a new Executive Council more representative of organised political opinion.

"The proposed new Council would represent the main communities and would include equal proportions of caste Hindus and Muslims. It would work, if formed under the existing constitution. But it would be an entirely Indian council, except for the Viceroy and the Commander-in-Chief, who would retain his position as War Member.

"It is also proposed that the portfolio of External Affairs, which has hitherto been held by the Viceroy, should be placed in charge of an Indian member of the Council, so far as the interests of British India are concerned.

"A further step proposed by His Majesty's Government is the appointment of a British High Commissioner in India, as in the Dominions, to represent Great Britain's commercial and other such interests in India.

"Such a new Executive Council will, you realise, represent a definite advance on the road to self-government. It will be almost entirely Indian, and the Finance and Home Members will, for the first time, be Indians, while an Indian will also be charged with the management of India's foreign affairs, moreover the members will now be selected by the Governor-General after consultation with political leaders: though their appointment will of course be subject to the approval of His Majesty the King-Emperor.

"The Council will work within the framework of the present constitution and there can be no question of the Governor-General agreeing not to exercise his constitutional power of control; but it will of course not be exercised unreasonably.

"I should make it clear that the formation of this interim Government will in no way prejudice the final constitutional settlement.

The main tasks for this new Executive Council would be:—

(1) to prosecute the war against Japan with the utmost energy till Japan is utterly defeated;

(2) to carry on the Government of British India, with all the manifold tasks of post-war development in front of it, until a new permanent constitution can be agreed upon and comes into force; and

(3) to consider when the members of the Government think it possible, the means by which such agreement can be achieved. The third task is the most important. I want to make it quite clear that neither I nor His Majesty's Government have lost sight of the need for a long-term solution, and that the present proposals are intended to make a long-term solution easier.

"I have considered the best means of forming such a Council; and have decided to invite the following to Viceregal Lodge to advise me:—

Those now holding office as Premier in a provincial Government; or, for provinces now under Section 93 Government, those who last held the office of Premier;

The leader of the Congress Party and the Deputy Leader of the Muslim League in the Central Assembly; the leaders of the Congress Party and the Muslim League in the Council of State; also the leaders of the Nationalist Party and the European Group in the Assembly;

Mr. Gandhi and Mr. Jinnah as the recognised leaders of the two main political parties;

Rao Bahadur N. Siva Raj to represent the Scheduled Classes; and

Master Tara Singh to represent the Sikhs.

"Invitations to these gentlemen are being handed to them today, and it is proposed to assemble the conference on June 25 at Simla, where we shall be cooler than at Delhi.

"I trust that all those invited will attend the conference and give me their help. On me and on them will lie a heavy responsibility in this fresh attempt to make progress towards a final settlement of India's future.

"If the meeting is successful, I hope that we shall be able to agree on the formation of the new Executive Council at the Centre.

"I also hope that it will be possible for ministries to re-assume office and again undertake the tasks of Government in the provinces now administered under Section 93 of the Constitution Act and that these ministries will be coalitions.

"If the meeting should unfortunately fail, we must carry on as at present until the parties are ready to come together. The existing Executive Council which has done such valuable work for India, will continue if other arrangements cannot be agreed to.

"But I have every hope that the meeting will succeed, if the party leaders will approach the problem with the sincere intention of working with me and with each other.

"I can assure them that there is behind the proposal a most genuine desire on the part of all responsible leaders in the United Kingdom and of the British people as a whole to help India towards the goal. I believe that this is more than a step towards the goal, it is a considerable stride forward, and a stride on the right path.

"I should make it clear that these proposals affect British India only and do not make any alteration in the relations of the Princes with the Crown Representative.

"With the approval of His Majesty's Government, and after consultation with my Council, orders have been given for the immediate release of the members of the Working Committee of the Congress who are still in detention. I propose to leave the final decision about the others still under detention as the result of the 1942 disturbances to the new Central Government, if formed, and to the provincial Governments.

The appropriate time for fresh elections for the central and provincial legislatures will be discussed at the conference.

"Finally, I would ask you all to help in creating the atmosphere of goodwill and mutual confidence that is essential if we are to make progress. The destiny of this great country and of the many millions who live in it depend

on the wisdom and good understanding of the leaders, both of action and of thought, British and Indian, at this critical moment of India's history.

"India's military reputation never stood higher in the world than it does at present; thanks of the exploits of her sons drawn from all parts of the country. Her representatives at international conferences have won high regard for their statesmanlike attitude. Sympathy for India's aspirations and progress towards prosperity was never greater or more widespread.

"We have thus great assets if we can use them wisely. But it will not be easy, it will not be quick; there is very much to do, there are many pitfalls and dangers. There is on all sides something to forgive and forget.

"I believe in the future of India, and as far as in me lies I will further her greatness. I ask you all for your co-operation and goodwill."

Simultaneously the British Government issued a White Paper on the subject. It said: "The main constitutional position remains, and the offer of March 1942 stands in its entirety without change or qualification. His Majesty's Government still hope that the political leaders in India may be able to come to an agreement as to the procedure whereby India's permanent future form of Government can be determined.

"His Majesty's Government are, however, most anxious to make any contribution that is practicable to the breaking of the political deadlock in India. While that deadlock lasts, not only political but social and economic progress is being hampered.

"The Indian administration, overburdened with the great tasks laid upon it by the war against Japan and by the planning for the post-war period, is further strained by the political tension that exists.

"All that is so urgently required to be done for agricultural and industrial development and for the peasants and workers of India cannot be carried through unless the whole-hearted co-operation of every community and section of the Indian people is forthcoming.

"His Majesty's Government have, therefore, considered whether there is something which they could suggest in this interim period, under the existing constitution, pending the formulation by Indians of their future constitutional arrangements, which would enable the main communities and parties to co-operate more closely together and with the British to the benefit of the people of India as a whole.

"It is not the intention of His Majesty's Government to introduce any change contrary to the wishes of the major Indian communities.

"But they are willing to make possible some step forward during the interim period if the leaders of the principal Indian parties are prepared to agree to their suggestions and to co-operate in the successful conclusion of the war against Japan as well as in the reconstruction in India which must follow the final victory.

"To this end they would be prepared to see an important change in the composition of the Viceroy's Executive. This is possible without making any change in the existing statute law except for one amendment to the Ninth Schedule to the Act of 1935. That Schedule contains a provision that not less than three members of the Executive must have had at least ten years' service under the Crown in India. If the proposals I am about to lay before the House meet with acceptance in India, that clause would have to be amended to dispense with that requirement. There is one further change which, if these proposals are accepted, His Majesty's Government suggest, should follow.

"That is, that External Affairs (other than those tribal and frontier matters which fall to be dealt with as part of the Defence of India) should be placed in the charge of an Indian Member of the Viceroy's Executive so far as British India is concerned, and that fully accredited representatives shall be appointed for the representation of India abroad.

"By their acceptance of and co-operation in this scheme the Indian leaders will not only be able to make their immediate contribution to the direction of Indian affairs, but it is also to be hoped that their experience of co-operation in Government will expedite agreement between them as to the method of working out the new constitutional arrangements."

Mr. Gandhi gave a lead to the Working Committee by observing that the composition of the Simla Conference was "a very great advance upon all similar bodies." Whereas in all the previous conferences convened by the British Government the members had been nominated by the Government principally, on the present occasion the invitees were under no obligation to the Government for their nomination, so that they need not vote or speak merely to placate the Government. This was echoed by the Congress President who observed that "we are very near our goal of complete independence. There remain only one or two hurdles but with determination, unity and strength we will cross them."

The Congress Working Committee met in Bombay after nearly three years. Most members seemed to welcome the political content of the Wavell Plan inasmuch as it dealt only with interim machinery without prejudice to the ultimate goal. After a few hours' deliberation, the Working Committee decided to take part in the Simla Conference and authorised its President to proceed to Simla. The other Congress invitees were asked to do likewise.

The acceptance of the invitation by the Congress was interpreted to mean that it agreed with the broad outlines of the Wavell Plan as an interim arrangement. The transfer of portfolios including the external relations, the appointment of a British High Commissioner and the authoritative assurance regarding the manner of the exercise of the Viceregal veto made a good impression on Congress leaders and Mr. Gandhi, some holding that it was an improvement on the Cripps Offer. Note was also taken of the benefits of co-operation between the Congress and the League in the task of day-to-day administration. Only the ideal of independence remained, but there too the interim arrangement promised to help.

The political centre of gravity then shifted to Simla. Messrs. Gandhi, Azad and Jinnah met the Viceroy on the day previous to the opening of the Conference and it was revealed that, in pursuance of the emphasis laid by Mr. Gandhi on his individual capacity, he would not attend the meetings of the Conference, though he would stay on in Simla. The Conference opened at the Viceregal Lodge on June 25, under the Presidentship of the Viceroy, to discuss the proposals of His Majesty's Government which were designed "to ease the present political situation and to advance India towards her goal of full self-government."

In his opening speech, Lord Wavell said:

"Before we begin on the agenda of this Conference, the outcome of which will have a momentous influence on the destiny of India, I feel there are a few words I should say to you. First, I welcome you all as men who by character and ability have risen to leadership in your provinces and parties. I have called you together from all parts of India, at this critical moment in her history, to advise and help me in advancing India towards prosperity, political freedom and greatness. I ask you to give me that help in a spirit of broad co-operation towards the good of India as a whole. It is not a constitutional settlement, it is not a final solution of India's complex problems that is proposed. Nor does the plan in any way prejudge or prejudice the final issue. But if it succeeds, I am sure it will pave the way towards a settlement; and will bring it nearer.

"The statesmanship, wisdom and goodwill of all of us is here on trial, not merely in the eyes of India but before the world. I said in my broadcast that on all sides there was something to forgive and forget. We have got to rise above the level of old prejudices and enmities, and of party and sectional advantage; and think of the good of India, the good of 400 million people; and how we can best combine to implement these new proposals made by His Majesty's Government for the advancement of India, now and in the future. It will not be easy, and unless we can place our deliberations at a high common level, we shall not succeed.

"You must accept my leadership for the present. Until there is some agreed change in the Constitution I am responsible to His Majesty's Government for the good government and tranquillity of India. I will endeavour to guide the discussions of this Conference in what I believe to be the best interests of this country.

"On the column which stands in front of the Viceroy's House crowned by the Star of India, are engraved these words: 'In Thought Faith, In Word Wisdom, In Deed Courage, In Life Service, so may India be great.' They will make a good guide for our Conference."

A press note issued at the end of the first days' Session said:

"The Conference assembled at Viceregal Lodge, Simla, at 11 a.m. Their Excellencies met and talked to the delegates on the lawn outside the Conference Room. At 11-20 the delegates moved into the Conference Room, and the proceedings began with the Viceroy in the chair. His Excellency made a short opening speech. He then made a statement on the procedure he proposed for the conference and announced that he had appointed Sir Evan Jenkins, his Private Secretary, and Rao Bahadur V. P. Menon, the Reforms Commissioner to act as Secretaries to the Conference.

"The Conference then took up the discussion of the general principles of His Majesty's Government's proposals. The discussions continued until 5 p.m., when the Conference adjourned until tomorrow."

On the following day the Conference reassembled in the morning but dispersed before lunch as it had reached "certain provisional conclusions" and the delegates expressed a wish to confer amongst themselves. There were two further postponements, the last one for a period of a fortnight.

For correspondence exchanged by Lord Wavell and Mr. Jinnah during this period see last year's issue of *The Indian Year Book*.

When the Conference reassembled on July 14, the Viceroy announced the failure of his efforts and said:

"As you know, my original intention was that the conference should agree upon the strength and composition of the Executive Council, and that thereafter the parties should send me lists of names. To these lists I would, if necessary, have added names of my own, and attempted to form on paper an Executive Council which might be acceptable to His Majesty's Government, myself, and the conference, I intended to discuss selections with the leaders, and finally to put them to the conference.

"Unfortunately, the conference was unable to agree about the strength and composition of the Executive Council, and on the 29th June I undertook, with the approval of the conference, to endeavour to produce a solution not based on any formula agreed in advance. I asked the parties to let me have lists of names and said I would do what I could to produce a solution acceptable to the leaders and to the conference.

"I received lists from all parties represented here except from the European Group, who decided not to send a list, and the Muslim League. I was, however, determined that the conference should not fail until I had made every possible effort to bring it to a successful ending. I therefore made my provisional selections, including certain Muslim League names, and I have every reason to believe that if those selections had been acceptable here they would have been acceptable to His Majesty's Government.

"My selections would, I think, have given a balanced and efficient Executive Council whose composition would have been reasonably fair to all parties. I did not find it possible, however, to accept the claims of any party in full. When I explained my solution to Mr. Jinnah he told me that it was not acceptable to the Muslim League and he was so decided that I felt it would be useless to continue the discussion. In the circumstances, I did not show my selections

as a whole to Mr. Jinnah, and there was no object in showing them to the other leaders. The conference has therefore failed.

"Nobody can regret this more than I do myself. I wish to make it clear that the responsibility for the failure is mine. The main idea underlying the conference was mine. If it had succeeded its success could have been attributed to me, and I cannot place the blame for its failure upon any of the parties.

"I ask the party leaders to accept this view and to do all they can to ensure that there are no recriminations. It is of the utmost importance that this effort to secure agreement between the parties and communities should not result in a worsening of communal feeling. I ask you all to exercise the greatest possible restraint.

"I have now to consider the next stage. I must remind you that whatever happens, the first two of three tasks mentioned in my broadcast—the prosecution of the war against Japan, and the carrying on of the administration and preparation of post-war development—must be performed by the Government of India for the time being in office. It will be my duty to see that these tasks are performed with the greatest energy that I can impose, and I cannot permit any hindrance to them.

"I propose to take a little time to consider in what way I can best help India after the failure of the conference. You can help best by refraining from recrimination. The war against Japan must be carried on and law and order must be maintained; and until I see my way more clearly than I do now, it may be difficult, perhaps impossible, to suggest any new move. No Government can carry on under the daily prospect of change or dissolution. I have to secure the stability and day-to-day efficiency of my Government, and it would be impossible to enter upon continuous or even frequent political discussions of this kind. Whatever decision His Majesty's Government may take in the near future must therefore in all probability hold good for some little time.

"I thank you all for the help you have given me and for the restrained patience and understanding you have shown. Do not, any of you, be discouraged by this set-back. We shall overcome our difficulties in the end. The future greatness of India is not in doubt."

Following the failure, spokesmen of the Congress and the League gave their respective versions of the Simla drama. (See last years, issue of *The Indian Year Book*).

Meanwhile, the British General Elections had been held. They resulted in an overwhelming majority for Labour. Of particular interest to India was the defeat of Mr. L. S. Amery who had directed Britain's policy towards India over a period of five years during which the Congress was very much *persona non grata* with his British Government.

Then came the surrender of Japan and the end of the Far Eastern war. This created a new situation in Indian politics inasmuch as the war emergency ceased. The King in his speech from the Throne at the opening of the new Parliament made this reference to India:

"In accordance with the promises already made to my Indian Peoples, my Government will do their utmost to promote, in conjunction with the leaders of Indian opinion, an early realisation of full self-Government in India."

Shortly after, the British Government announced general elections in India, both to the Provincial Legislatures and to the Central Legislature. Simultaneously with this announcement Lord Wavell was summoned to England for fresh consultations with the British Government.

Shortly after the Simla Conference, the Government lifted the ban on the various Congress organizations, and Congress activity was resumed in full swing. Leaders who went straight from the prison to Simla, as it were, and had therefore no time to meet the people after their imprisonment, now had the opportunity to go round the country and survey the effects of the movement. All confusion regarding responsibility for the disturbances in 1942-43 was dispelled by Pandit Nehru not only owning them up, but also applauding those who participated in them and sympathising with those who suffered in consequence. "Victims of repression" were designated "martyrs".

Condonation, may, approbation of violence misled the people at large into the belief that the Congress policy of peaceful struggle had undergone a change. The depression and helplessness which characterized the political outlook in the preceding months soon gave place to a spirit of defiance and militancy. This found expression in various demonstrations, accompanied in many cases by acts of violence, in connection with the trial of officers of the Indian National Army. Students and others, encouraged in this outlook by Congress Socialists and the Communists, created disturbances in several parts of the country and violence was so much in the air that the Congress Working Committee felt called upon to issue a warning to the public in this behalf. It passed the following resolution in December 1945:—

"After the arrest of the principal Congressmen in the August of 1942, the unchilded masses took the reins in their own hands and acted almost spontaneously. If many acts of heroism and sacrifice are to their credit, there were acts done which could not be included in non-violence. It is, therefore, necessary for the Working Committee to affirm, for the guidance of all concerned, that the policy of non-violence adopted in 1920 by the Congress continues unabated and that such non-violence does not include the burning of public property, the cutting of telegraph wires, the derailing of trains and intimidation.

"The Working Committee is of the opinion that the policy of non-violence as detailed in the Congress resolution of 1920 since expanded and explained from time to time, and action in accordance with it has raised India to a height never attained before.

"The Committee is further of the opinion that the constructive activities of the Congress, beginning with the spinning wheel and "khadi" as the centre, are emblematic of the policy of non-violence and that every other Congress

activity, including what is known as the parliamentary programme, is subservient to and designed to promote the constructive activities as explained by Mr. Gandhi.

"The Working Committee is of the opinion that civil disobedience, mass or any other, meant for the attainment of freedom is inconceivable without the adoption of the constructive programme on the widest scale possible by the masses of India."

An event of considerable importance to the internal organization of the Congress occurred in the latter half of 1945 when it was decided that Communists should be expelled from the All-Indian Congress Committee as a punishment for their opposition and obstruction to the policy and programme of the Congress for a considerable time.

Learning a lesson from the Simla breakdown and wishing to make yet another effort at a communal settlement, Maulana Abul Kalam Azad, who was resting in Kashmir, proposed that the Congress should clarify its attitude to the Muslims in order to reassure them that their interests would be safe in any future constitutional reconstruction. His suggestion, on the details of which it is not necessary now to dwell, was hotly discussed for a few weeks until the matter came up before the Congress executive in September 1945. In an effort to clarify the Congress attitude to the separation demand and to remove the confusion arising from the apparently conflicting 1942 resolutions on the subject, the Congress Working Committee adopted a new resolution. It contained no new offer in the shape of an approach to the League view-point; nor did it make any reference to the "C.R." formula or Mr. Gandhi's offer to Mr. Jinnah. It was just a reiteration of Congress policy with the emphasis on unity subject to the proviso that no territorial unit inhabited by a homogeneous people would be forced to stay in against its will.

Apart from this, the Congress Working Committee which in September 1945 held its first business session after August 1942, had a heavy agenda before it. The formation of a Labour Government in Britain, the end of the Japanese war, a fresh consideration of the Indian question in the light of the changed situation, Lord Wavell's second visit to Britain and the announcement of general elections in India—these were all post-Simla developments. After taking into account the altered circumstances and the rapidly changing situation, the Working Committee decided that the Congress should contest the general elections "on the issue of immediate transfer of power" and "to demonstrate the will of the people." Paradoxically enough, the arguments leading up to this decision explain why the Congress objected to participation, but the resolution ended with "Nevertheless...." This announcement came at the tail-end of a two-thousand, word statement split up into three resolutions drafted for the All-India Congress Committee. The first of these reaffirmed the August Resolution of 1942. The second reviewed the various policies pursued by the Congress during the past sixty years and declared that the Congress policy would be "negotiation and settlement when possible and non-co-operation direct action if necessary." All the three resolutions were evidently framed on the one hand, to emphasize the revolutionary ideology of the Congress and ,on the other, to leave the door open for the pursuit of practical politics in the event of the British Government announcing any new approach. There was no regret over the decision arrived at in August 1942 on the contrary, it was sought to be justified by "the urgency of the situation and the perils that confronted India" at the time. Similarly, the disturbances that followed were only partially deplored to the extent that "in some places the people forgot, and fell away from, the Congress method of peaceful and non-violent action," and the authorities were accused of provocative action and "brutal and ruthless repression", which "goaded them to rise spontaneously to resist the armed might of an alien, imperialist power".

The Congress review of the events of the months immediately preceding was full of disappointment and resentment over the British Government's determination "to hold on to its authoritarian power and to exercise it arbitrally autocratically:" yet there was no desire to allow frustration and pessimism to express themselves through any form of direct action. For the moment, Congress policy was one of negotiation and conciliation but the method of non-co-operation was doubtless held in reserve. This was evidently a continuation of the spirit which informed the Congress attitude at Simla.

The same spirit of working with available implements, however imperfect they might be, seemed to have actuated the Working Committee's decision in regard to the forthcoming elections. Vigorous protects were made against the manner and circumstances in which the authorities proposed to hold elections to the legislatures, but eventually the resolution on the subject recommended the Congress participation in the elections.

Between then and the meeting of the All-India Congress Committee the Viceroy had returned from London. His Excellency made a broadcast embodying the conclusions of His Majesty's Government.

These were that H. M. G. were determined to do their utmost to promote, in conjunction with the leaders of Indian opinion, the early realisation of Self-Government in India. It was their intention to convene as soon as possible a Constitution-making Body, and as a preliminary step, they had authorized him to undertake, immediately after the elections, discussions with representatives of the Legislative Assemblies in the Provinces, to ascertain whether the proposals contained in the 1942 declaration were acceptable or whether some alternative or modified scheme was preferable. Discussions would also be undertaken with representative of Indian States with a view to ascertaining in what way they could best take part in the Constitution-making Body. Further H. M. G. were proceeding to the consideration of the content of a treaty which would require to be concluded between Great Britain and India. His Majesty's Government had authorized His Excellency, as soon as the results of the

provincial elections were published, to take steps to bring into being an Executive Council which would have the support of the main Indian parties. His Excellency concluded that the Government and all sections of the British people were anxious to help India in these matters and it remained for Indians to show that they had the wisdom and courage to determine in what way they could best reconcile their differences and how their country could be governed by Indians for Indians.

Congress Reaction.—The All-India Congress Committee which met towards the end of September 1945 adopted its Executive's recommendation to contest the general elections.

Two of the three political resolutions submitted by the executive were endorsed almost unanimously by the A.I.C.C. The first reiterated the "Quit India" resolution passed on August 8, 1942, while the second declared that the Congress policy was one of negotiation when possible and direct action when necessary. Amendments calculated to "stiffen" the Congress attitude were negatived. One of these suggested that the Congress should abondon the "humiliating" path of negotiation; another sought not to "regret" but simply to "admit" acts of violence during the disturbances that followed the adoption of the "Quit India" resolution. Others wanted to denounce Communist "traitors" who had "allied themselves with the alien Government in sabotaging the people's struggle for independence."

The speakers, including Pandit Nehru, Sardar Vallabhbhai Patel an Mr. J. B. Kirpalani, felt no regrets for what had happened but, on the contrary, expressed pleasure at the people's spirit of resistance to Government's "repression of their urge for freedom." Sardar Patel was inclined to replace "Quit India" by "Quit Asia" demand, for the world could have no freedom without a free India. Whereas the resolutions were couched in more or less moderate language, the speeches both of the leaders and the rank and file were keyed to a high pitch; they seemed to ask, "How can we 'forget and forgive'?"

The resolution on the Wavell proposals, moved by Sardar Vallabhbhai Patel, stated: "The A.-I.C.C. has carefully considered Lord Wavell's and the British Prime Minister's broadcasts on the steps proposed to be taken by British authority in India. These proposals repeat, with unimportant variations, the offer made in March, 1942 by Sir Stafford Cripps on behalf of the British Government, an offer which was not accepted by the Congress. Neither the end of he war nor the change of Government in Great Britain appears to have resulted in any real change in British policy towards India which seems to be based on delaying every advance and attempting to create new problems and fresh complications. It is significant that there is no mention in these broadcasts of the independence of India. Nothing short of independence can be acceptable to the Congress and the country. The proposals now made are, in the opinion of the A.-I.C.C., vague, inadequate and unsatisfactory.

"The announcement that general elections will be held for the Central and Provincial Assemblies has been made in a manner and in circumstances which arouse suspicion. The sudden dissolution of the legislatures in some provinces has emphasised the hostility of the present governmental authorities to even the possibility of popular government in the meantime, and is totally indefensible. The Central Assembly is still governed by the Act of 1919. To continue such an impotent and undemocratic Central legislature, constituted on a franchise of less than one per cent. of the population, can have no justification in the context of Indian freedom. If elections for the Central Legislature are to be held they must at least be on a properly revised register, even though this might involve some little delay. In spite of assurances, the electoral rolls for the Central and Provincial Assemblies are not being properly revised.

"Further, free and fair elections are hardly possible when several organisations, like the Congress Socialist Party, the Forward Bloc, and Kisan organisations are still under ban; when thousands are still held in detention without trial, or are undergoing sentences of imprisonment in connection with political activities; when in many places public meetings cannot be held without previous permission of the authorities; and when many persons are labouring under disqualifications arising out of their conviction for political offences.

"It has become notorious that the present Government in India are responsible for the widespread corruption that prevails in the country, for the gross mismanagement of the food and cloth problems and for the supreme tragedy of the Bengal famine. Yet it is declared that, pending elections, and for many months at least, this incompetent and corrupt administration shall continue its misrule. The proposals of the British Government, become, in this context, still more significant indications of their desire to hold on to power in India as long as they possibly can and with all the means and methods at their disposal.

"In spite of the handicaps that the Congress will labour under, as related above, and in order to demonstrate the will of the people, especially on the issue of the immediate transfer of power, the A.-I.C.C. resolves that the forthcoming elections be contested, and directs the Working Committee to take all necessary steps in this behalf. The Committee is confident not only that the people will respond to the call of the Congress on this vital and urgent issue, but will also, with the added strength and assurance that the past years have given them, carry the struggle for the independence of India to a successful issue in the near future."

This resolution was the *piece de resistance* of the session, not only because of the expression of opinion on the latest British proposals and the decision to contest the elections, but also because the Opposition pegged its criticism on it. The decision of the Working Committee not to submit to the A.-I.C.C. its resolution on the partition demand deprived its critics of the opportunity to stage a public opposition to the executive's policy in this behalf. They brought up the subject, however, through the

back door—by means of amendments to what was clearly a political resolution. As one speaker pointed out, the amendments were, strictly speaking, irrelevant, but the President admitted them; evidently he desired to let them blow of steam. They did, but, to change the metaphor, they caught a tartar. Pandit Nehru and Sardar Vallabhbhai Patel gave spirited replies to the effect that, whereas the Congress was prepared to go all out to meet the Muslim masses, it would no more approach the League or Mr. Jinnah unless the latter appologised to the Congress President for the gratuitous insult offered to him. The large majority of the members of the A.-I.C.C. supported the executive and threw out the amendments, which were supported by only half a dozen in a house of 225.

Sardar Valabhbhai Patel, regretted that there was no change of heart on the part of the British Government. He cited the Simla Conference, the tardy measures adopted by the authorities in lifting the ban on Congress organisations and releasing politicals, and the acts of commission and ommission which resulted in imposing restrictions on free elections. He also referred to the disinclination of the authorities to allow popular ministries to return the office. In spite of these discouraging factors, the Congress wished to participate in the elections for two reasons: first, to demonstrate that the country was behind them in demanding the immediate transfer of power and, secondly, not to allow the legislative bodies to be captured by "reactionaries, toadies and fifth columnists". Sardar Patel assured the A.-I.C.C. that the Congress approach to the elections would be in conformity with its ideal and that the future policy would be determined after the elections. The Congress, he added, would choose the best candidates and appealed to those left out not to take it to their heart.

Pandit Govind Ballabh Pant, who seconded, complained that the British plan made no reference to a "constituent assembly" and that the time limit for calling such a body had also disappeared. Similarly, there was no mention of "independence" but only "self-government". The British went on creating fresh problems and asked them to solve them: it was like asking a school boy to make ice in a scorching sun.

Then came the bombshell in the shape of an amendment by a Muslim Communist who wished the elections to be fought on the issue of "an agreed people's plan of convening a constituent assembly ... which will have the support of the major parties and all communities". In order to secure Hindu-Muslim unity he wanted to assure the Muslims that "the elected representatives of areas in which Muslims are in a majority will be free to constitute themselves into a constituent assembly and to decide for themselves whether to join the Indian Union or not." He was frequently interrupted by the House, which had a marked grouse against Communists and against those who demanded further measures to placate the League.

Mian Iftikhar-ud-Din, ex-President of the Punjab Provincial Congress Committee, known to be a keen advocate of a Congress-League settlement, declared through an amendment that "the creation of an independent and democratic India must be such as will win the backing of all major sections of our people, especially the Muslims."

Pandit Nehru, who spoke next, and Sardar Patel, who replied to the debate, said that the Communists always found fault with them, whatever they did. The Congress had gone to the fullest extent possible, consistent with its nationalistic ideal, to meet Muslim fears—communal electorates, weightages, safeguards and recently, parity—and had nearly reduced itself to the position of a purely Hindu body; they could go no farther. If the Congress attitude was regarded as unreasonable, the whole question might be referred to an international tribunal for arbitration. The resolution passed unanimously.

Election Manifesto.—The Congress election manifesto, issued a fortnight later, stated:

"For 60 years the National Congress has laboured for the freedom of India. During this long span of years its history has been the history of the Indian people, straining at the least that has held them in bondage, ever trying to unloose themselves from it. From small beginnings it has progressively grown and spread in this vast country, carrying the message of freedom to the masses of our people in the towns as well as the remotest villages. From these masses it has gained power and strength and developed into a mighty organisation, the living and vibrant symbol of India's will to freedom and independence. From generation to generation it has dedicated itself to this sacred cause, and in its name and under its banner innumerable countrymen and countrywomen of ours have laid down their lives and undergone suffering in order to redeem the pledge they had taken. By service and sacrifice it has enshrined itself in the hearts of our people; by its refusal to submit to any hishonour to our nation it has built up a powerful movement of resistance to foreign rule.

"The career of the Congress has been one of both constructive effort for the good of the people and unceasing struggle to gain freedom. In this struggle it has faced numerous crises and come repeatedly into direct conflict with the armed might of a great empire. Following peaceful methods, it has not only survived these conflicts, but has gained new strength from them. After the recent three years of an unprecedented mass upheaval and its cruel and ruthless suppression, the Congress has risen stronger than ever and more loved by the people by whom it has stood through storm and stress.

"The Congress has stood for equal rights and opportunities for every citizen of India, man or woman. It has stood for the unity of all communities and religious groups and for tolerance and goodwill between them. It has stood for full opportunities for the people as a whole to grow and develop according to their own wishes and genius. It has also stood for the freedom of each group and territorial area within the nation to develop its own life and culture within the larger framework, and

for this purpose such territorial areas or provinces should be constituted as far as possible, on a linguistic and cultural basis. It has stood for the rights of all those who suffer from social tyranny and injustice and for the removal for them of all barriers to equality.

"The Congress has envisaged a free, democratic state with the fundamental rights and civil liberties of all its citizens guaranteed in the constutition.

"This constitution, in its view, should be a federal one with a great deal of autonomy for its constituent units and its legislative organs elected under universal adult franchise.

"A hundred and fifty years and more of foreign rule have arrested the growth of the country and produced numerous vital problems that demand immediate solution. Intensive exploitation of the country and the people during this period has reduced the masses to the depths of misery and starvation. The country has not only been politically kept under subjection and humiliated, but has also suffered economic, social, cultural and spiritual degradation. During the years of war, and even now, this process of exploitation by irresponsible authority and complete ignoring of Indian interests and views has reached a new height, an incompetence in the administration, leading to terrible famine and widespread misery among our people. There is no way to solve any of these urgent problems except through freedom and independence. The content of political freedom must be both economic and social.

"The most vital and urgent of India's problems, is how to remove the curse of poverty and raise the standard of the masses. It is to the well-being and progress of these masses that the Congress has directed its special attention and its constructive activities. It is by their well-being and advancement that it has judged every proposal and every change, and it has declared that anything that comes in the way of the good of the masses of our country must be removed. Industry and agriculture, the social services and public utilities must be encouraged, modernised and rapidly extended in order to add to the wealth of the country and give it the capacity for self-growth, without dependence on others.

"But all this must be done with the primary object and paramount duty of benefiting the masses of our people and raising their economic, cultural and spiritual level, removing unemployment, and adding to the dignity of the individual. For this purpose it will be necessary to plan and co-ordinate social advance in all its many fields, to prevent the concentration of wealth and power in the hands of the individuals and groups, to prevent vested interests inimical to society from growing, and to have social control of the mineral resources, means of transport and the principal methods of production and distribution in land, industry and in other departments of national activity, so that free India may develop into a co-operative commonwealth.

"In international affairs the Congress stands for the establishment of a world federation of free nations. Till such time as such a federation takes shape, India must develop friendly relations with all nations and particularly with her neighbours on the east and the west and the north. In the Far East, in South-East Asia and in Western Asia, India has had trade and cultural relations for thousands of years and it is inevitable that with freedom she should renew and develop these relations. Reasons of security and future trends of trade also demand these closer contacts with these regions. India, which has conducted her own struggle for freedom on a non-violent basis, will always throw her weight on the side of world peace and co-operation. She will also champion the freedom of all other subject nations and peoples, for only on the basis of this freedom and the elimination of imperialism everywhere can world peace be established.

"On the eight of August, 1942, the All-India Congress Committee passed a resolution, since then famous in India's history. By its demands and challenge the Congress stands today. It is on the basis of this resolution and with its battle-cry that the Congress faces the elections for the Central and Provincial Assemblies.

"The Central Legislative Assembly is a body with no power or authority and is practically an advisory body whose advice has been constantly flouted and ignored. It is completely out of date and is based on a very restricted franchise. The electoral registers for it are full of errors and omissions and no opportunities for correcting or adding to them have been given. Large numbers of our countrymen are still in prison and many others who have been released are disqualified from standing for election. Obstructions in the way of holding public meetings still continue in many places. Yet, with all these and other handicaps and drawbacks, the Congress has decided to contest the elections to show that the inevitable result of elections, however, restricted, must be to demonstrate the overwhelming solidarity of the opinion of the voters on the issue of independence. Therefore, in this election, petty issues do not count, nor do individuals, nor sectarian cries—only one thing counts: the freedom and independence of our motherland, from which all other freedoms will flow to our people.

"So the Congress appeals to the voters for the Central Assembly all over the country to support the Congress candidates in every way at the forthcoming elections, and to stand by the Congress at this critical juncture, which is so pregnant with future possibilities. Many a time the people of India have taken the pledge of independence; that pledge has yet to be redeemed, and the well-beloved cause for which it stands and which has summoned us to often, still beckons to us. But the time is coming when we shall redeem it in full, not by the election but by what comes after it. Meanwhile, this election is a small test for us, a preparation for the greater things to come. Let all those who care and long for freedom and the independence of India meet this test with strength and confidence, and march together to the free India of our dreams".

The Congress election campaign was conducted on the assumption that the Congress could secure easy victories in general constituencies and that it should concentrate instead on Muslim seats. In many cases the Hindu Mahasabha candidates withdrew in favour of the Congress, either with a view to giving the Congress a free hand in the light of its unequivocal declaration of hostility to partition or because the Mahasabha realized that it had no chance in face of the strong wave of pro-Congress feeling that was sweeping over the country.

Election Results.—The elections fulfilled Congress expectations as far as general seats were concerned. Such Hindu Mahasabhaites as dared to oppose the Congress nominees were badly defeated. Moderates and Independents had no chance at all. In Sikh constituencies in the Punjab, the Congress captured one-third the number of seats, although in terms of votes recorded nearly half the electorate supported it

It was different, however, in the case of Muslim seats. In all the Hindu-majority provinces the Congress suffered a heavy defeat except in the United Provinces and to a smaller extent in Assam. Of the four Muslim majority provinces the Congress emerged successfully in the Frontier, though even there the League did much better than in the general elections held ten years previously In the Punjab and Bengal, the League secured signal triumphs. In Sind, the League captured the majority of the Muslim seats, while a rebel-section of the League and a pro-Congress group of Muslims secured sufficient number of seats to form a coalition with the Congress and thereby threaten the solidarity of the League there.

All this while, the Congress was waiting events, expecting His Majesty's Government to implement the policy outlined by the Viceroy in his broadcast in September 1945.

Then came Premier Attlee's statement in Parliament in March 1946 followed by the British Cabinet Mission's visit to India to settle the basis of the country's future constitution. (This subject is dealt with in a separate chapter entitled " British Cabinet Delegation ".)

On the eve of the Mission's return to England, the Congress announced its acceptance of the long-term project but turned down the specific proposals for an Interim Government. This decision was endorsed by the All-India Congress Committee which met in Bombay early in July 1946. It was an easy victory for the Congress executive.

Shortly after the A.-I.C.C. meeting, various provincial assemblies elected their representatives to the Constituent Assembly. Most of the " general " seats were filled by Congress nominees, who included representatives of the various cross-sections of Indian life, vertical and horizontal, communal and economic.

Certain statements made by the new Congress President—Pandit Nehru was declared elected in place of Maulana Abul Kalam Azad, who relinquished his office as Congress President after a period of six years—regarding the status and powers of the Constituent Assembly and the Congress intentions in that behalf alienated the Muslim League, which was already labouring under a sense of grievance. For instance, he said that the Constituent Assembly would be a sovereign body with complete freedom to mould the future India. This was interpreted by the League to mean that decisions in the Assembly would be taken by a majority vote, leaving the Muslims helpless. Similarly he said that the Congress was committed to nothing except to enter the Constituent Assembly, which raised a grave doubt in the League mind that the Congress did not accept the framework and procedure laid down in the State Paper of May 16, 1946. These impressions were corrected by the Congress Working Committee early in August, 1946, but the mischief had already been done: for, late in July, the League decided altogether to withdraw its co-operation from the Mission's plan. The August 1946 resolution of the Congress Working Committee said :—

The Working Committee regretted to note that the Council of the All-India Muslim League, reversing their previous decision, had decided not to participate in the Constituent Assembly. In this period of rapid transition from dependence on a foreign power to full independence, when vast and intricate political and eco omic problems had to be faced and solved, the largest measure of co-operation among the people of India and their representatives was called for, so that the change-over should be smooth and to the advantage of all concerned. The Committee realised that there were differences in the outlook and objectives of the Congress and the Muslim League. Nevertheless, in the larger interests of the country as a whole and of the freedom of the people of India, the Committee appealed for the co-operation of all those who sought the freedom and the good of the country, in the hope that co-operation in common tasks might lead to the solution of many of India's problems.

The Committee had noted that criticisms had been advanced on behalf of the Muslim League to the effect that the Congress acceptance of the proposals contained in the Statement of May 16th was conditional. The Committee wished to make it clear that while they did not approve of all the proposals contained in this statement, they accepted the scheme in its entirety. They interpreted it so as to resolve the inconsistencies contained in it and fill the omissions in accordance with the principles laid down in that Statement. They held that provincial autonomy was a basic provision and each province had the right to decide whether to form or join a group or not. Questions of interpretation would be decided by the procedure laid down in the Statement itself, and the Congress would advise its representatives in the Constituent Assembly to function accordingly.

The Committee had emphasized the sovereign character of the Constituent Assembly, that is, its right to function and draw up a constitution for India without the interference of any external power or authority. But the Assembly would naturally function within the internal limitations which were inherent in its task, and would therefore seek the largest measure

of co-operation in drawing up a constitution of free India allowing the greatest measure of freedom and protection for all just claims and interests. It was with this object and with the desire to function in the Constituent Assembly and make it a success, that the Working Committee passed their resolution on June 26, 1946, which was subsequently ratified by the All-India Congress Committe on July 7, 1946. By that decision of the A.-I.C.C. they must stand, and they proposed to proceed accordingly with their work in the Constituent Assembly.

The Committee hoped that the Muslim League and all others concerned, in the wider interests of the nation as well as of their own, would join in this great task.

Nehru Jinnah Correspondence.—Immediately after the Viceroy invited the Congress to make proposals for an Interim Government, Pandit Nehru accepted the invitation on behalf of the Congress and sought Mr. Jinnah's co-operation. The League leader declined. The following correspondence passed between the two leaders:

The following is the text of the correspondence which passed between Pandit Jawaharlal Nehru, Congress President, and Mr. M. A. Jinnah, President of the All-India Muslim League:

Letter from Pandit Nehru, dated Wardha, August 13:

"Dear Mr. Jinnah,—As you know, the Viceroy has invited me, in my capacity as President of the Congress, to make proposals for the immediate formation of an Interim Government. I have accepted this invitation. I feel that my first step should be to approach you and seek your co-operation in the formation of a coalition provisional Government. It is naturally our desire to have as representative a Government as possible. Should you wish to discuss this matter further with me, before coming to a decision, I shall gladly see you in Bombay or whereever you may be. I am leaving Wardha on the 14th and reaching Bombay on the forenoon of August 15. Probably I shall leave Bombay for Delhi on the morning of August 17.—Jawaharlal Nehru."

Reply from Mr. Jinnah, dated Bombay, August 15:

"Dear Pandit Jawaharlal Nehru,—I have received your letter dated the 13th, yesterday, delivered to me by hand.

"I know nothing as to what has transpired between the Viceroy and you; nor have I any idea of what arrangement has been arrived at between you two, except what you say in your letter that the Viceroy has invited you, in your capacity as the President of the Congress, to make proposals for the immediate formation of the Interim Government and that you have accepted the invitation.

"If this means that the Viceroy has commissioned you to form the Executive Council of the Governor-General and has already agreed to accept and act upon your advice and proceed to constitute his Executive accordingly, it is not possible for me to accept such a position on that basis.

HINDU-MUSLIM QUESTION

"However, if you care to meet me on behalf of the Congress to settle the Hindu-Muslim question and resolve the serious deadlock, I shall be glad to see you today at 6 p.m.

"The substance of your letter, unfortunately, has already appeared in the press even before I received it. May I therefore, request you to release this letter of mine also to the press?—M. A. Jinnah."

Letter from Pandit Nehru, dated August 15:—

"Dear Mr. Jinnah,—Thank you for your letter of today's date which was delivered to me at about 1 p.m.

"Nothing has transpired between me and the Viceroy except what has already been published. There is no arrangement other than what is contained in his brief offer and our acceptance. That offer, made by the Viceroy with the concurrence of the British Government, is for us to make proposals for the formation immediately of an Interim Government. The Executive Council of the Governor-General has not been mentioned as such. It is understood, as stated in the published correspondence between the Congress President and the Viceroy, that the Interim Government will have the greatest posible freedom in the exercise of the day-to-day administration of this country.

"Since this brief offer was made and we accepted it, I have had no opportunity to meet the Viceroy or discuss the matter with him more fully, I hope to do so within the next two or three days. It was our wish, however, that I might approach you first and invite your co-operation. We are naturally anxious to form a Government, which will be as representative as possible in order to deal with the urgent problems facing this country

"REGRET DECISION"

"In your letter you state that you are unable to accept the position as it appears to you. I regret this. Perhaps, on fuller consideration of the position you would be agreeable to reconsider your decision. If so we would welcome it. For this purpose I shall gladly see you, if you so desire.

"As regards the general Hindu-Muslim question, we are always prepared to discuss this and try to find a way out. Just at present we are immediately concerned with the formation of the provisional Government and circumstances demand that early steps should be taken in regard to it. We hope that a coalition provisional Government will itself help in the consideration and solution of our problems. While I am willing to discuss the larger question with you. I have no new suggestions to make. Perhaps you may be able to suggest a new approach.

"I am prepared to come to your place at 6 p.m. this evening, or if it is more convenient to you, some time tomorrow. I am leaving Bombay on the 17th morning.

"My letter to you was not sent to the press. I made a brief statement to the press, however, in view of repeated questions put to me by newspapermen and in order to prevent misconceptions, if you so desire you can release all this correspondence to the press. Yours sincerely, Jawaharlal Nehru."

Letter from Mr. Jinnah, dated August 15 :—

"Dear Pandit Jawaharlal Nehru, I am in receipt of your letter of August 15 delivered to me at about 3-30 p.m. and I thank you for it.

"I have already made my position clear in my letter dated August 15 sent to you this morning. But as you have given certain explanations, with some of which I must not be taken to agree, and as you desire to meet, I shall be glad to see you today at 6 p.m.

"I agree with you that in order to prevent misconception in the mind of the public, our correspondence should be published and accordingly I am releasing it to the press. Yours sincerely, M. A. Jinnah.—A.P.I.

Formation of Interim Government.—Pandit Nehru then proceeded to Delhi and submitted to the Viceroy the names of twelve persons constituting the Interim Government. These included six top-ranking Congress leaders, namely Pandit Nehru, Sardar Vallabhbhai Patel, Dr. Rajendra Prasad, Mr. C. Rajagopalachari, Mr. Sarat Chandra Bose and Mr. Asaf Ali This was on the basis of a Cabinet of fourteen. Two seats were to be filled later. Of the 12, three were Muslims, five caste Hindus and one representative each of the scheduled castes, Indian Christians, Sikhs and Parsis. The Congress also suggested the name of an Anglo-Indian as an additional member, but the Viceroy was apparently reluctant to increase the strength of the Cabinet.

On August 24, 1946, His Excellency the Viceroy announced the formation of the Interim Government. In a broadcast, he said :

"You will have heard the announcement of the names of the members of the new Interim Government which will come into office very shortly. You will, I am sure, all realise that a very momentous step forward has been taken on India's road to freedom. Some of you who listen to me may feel, however, that the step should not have been taken in this way or at this time. It is to these that I want principally to address myself tonight.

"You who are opposed to the formation of the new Government are not, I assume, opposed to the main policy of His Majesty's Government, namely, to fulfil their pledges by making India free to follow her own destiny. You will also, I think, all agree that we need it once a Government of Indians as representative as possible of political opinion in the country. This is what I set out to secure : but though seats out of 14 were offered to the Muslim League, though assurances were given that the scheme of constitution-making would be worked in accordance with the procedure laid down, and though the new Interim Government is to operate under the existing constitution, it has not been possible at present to secure coalition. No one could be sorrier about the failure than I am. No one could be more sure that it is a coalition Government in which both the main parties are represented that is needed at this moment in the interests of all parties and communities in India. This is a view which I know that the President of the Congress, Pandit Jawaharlal Nehru, and his colleagues hold as strongly as I do. His efforts like mine will still be directed to persuading the League to join the Government.

"Let me state clearly the offer which has been made and is still open to the Muslim League. They can propose to me five names for places in a Government of 14, of which 6 will be nominees of Congress and three will be representatives of the Minorities. Provided these names are acceptable to me and approved by His Majesty, they will be included in the Government, which will at once be reformed. The Muslim League need have no fear of being out-voted on any essential issue ; a Coalition Government can only exist and function on the condition that both main parties to it are satisfied. I will see that the most important portfolios are equitably shared. I sincerely trust that the League will reconsider their policy and decide to participate in the Government.

"Meanwhile, however, the administration of India has to go on, and there are large issues which must be decided. I am glad that the representatives of a very large body of political opinion in the country will be my colleagues in carrying on the government. I welcome them to my Council. I am also glad that the Sikhs have now decided to participate in the Constituent Assembly and in the Interim Government. I have no doubt that their decision is a wise one.

"As I have already made clear, I shall implement full His Majesty's Government's policy of giving the new Government the maximum freedom in the day to day administration of the country. In the field of provincial autonomy, of course, the Provincial Governments have a very wide sphere of authority in which the Central Government cannot intervene. My new Government will not have any power or indeed any desire to trespass on the field of provincial administration.

"The recent terrible occurrences in Calcutta have been a sobering reminder that a much greater measure of toleration is essential if India is to survive the transition to freedom. I appeal most earnestly not only to sober citizens but to the young and to the discontented to recognise that no conceivable good either to themselves or to their community or to India can come either from violent words or from violent deeds. It is essential that in all Provinces law and order is maintained, that the protection of the ordinary peaceable citizen is assured with a firm but impartial hand, and that no community is oppressed.

"The War Member in the new Government will be an Indian, and this is a change which both the Commander-in-Chief and I warmly welcome. But the constitutional position of the Armed Forces is in no way changed. They still owe allegiance, in accordance with their oath, to the King-Emperor, to whom and to Parliament I am still responsible.

"In spite of all immediate appearances I believe there is yet a chance of agreement between the two principal parties. I am quite sure that there is a very large body of opinion in both parties and of non-party men who would welcome such an agreement, and I hope they will all work for it. I would appeal also to the Press to use its very great influence on the side of moderation and compromise. Remember, the Interim Government can be reformed tomorrow if the League decide to come in. Meanwhile it will administer in the interests of the country as a whole and not of any one party or creed.

"It is desirable also that the work of the Constituent Assembly should begin as early as possible. I can assure the Muslim League that the procedure laid down in the Statement of May 16th regarding the framing of Provincial and Group Constitutions will be faithfully adhered to; that there can be no question of any change in the fundamental principles proposed for the Constituent Assembly in paragraph 15 of the Cabinet Mission's statement of 16th May or of a decision on a main communal issue, without a majority of both major communities; and that the Congress are ready to agree that any dispute of interpretation may be referred to the Federal Court. I sincerely trust that the Muslim League will reconsider their decision no to take part in a plan which promises to give them so wide a field in which to protect the interests and to decide the future of the Muslims of India.

"We have come to another critical and solemn issue in the affairs of India. Never were tolerance and soberness in thought and action more necessary, never were the wild speaking and rash deeds of a few fraught with greater danger for so many millions. Now is the time for all Indians in any authority, with any influence, to show by their good sense and restraint that they are worthy of their country, and that their country is worthy of the freedom it is to receive."

The new Government assumed office on September 2, 1946. It could not, however, settle down to any very useful work of administration or preparation for the Constituent Assembly, because grave breaches of the peace in Calcutta and elsewhere, resulting in the deaths of thousands of persons and considerable loss of property, cast a gloom over the country. Even so, the Government strove to consolidate its position by establishing conventions intended to invest it with real political power. For instance, it stopped the practice of Secretaries having direct access to the Governor-General. It also began to function as a Cabinet with joint responsibility under leadership of the Vice-President, Pandit Nehru.

Broadcastings shortly after the formation of his Government, Pandit Jawaharlal Nehru said:—

"**Friends and Comrades—Jai Hind.**—Six days ago my colleagues and I sat on the chairs of high office in the Government of India. A new Government came into being in this ancient land, the Interim or Provisional Government we called it, the stepping stone to the full independence of India. Many thousands of messages of greeting and good wishes came to us from all parts of the world and from every nook and corner of India. And yet we asked for no celebration of this historic event and even restrained our people's enthusiasm. For we wanted them to realise that we were yet on the march and the goal had still to be reached. There were many difficulties and obstacles on the way and our journey's end might not be so near as people thought. Any weakness now, any complacency would be fatal to our cause.

"Our hearts were heavy also with the terrible tragedy of Calcutta and because of the insensate strife of brother against brother. The freedom we had envisaged and for which we had laboured, through generations of trial and suffering, was for all the people of India, and not for one group or class or the followers of one religion. We aimed at a co-operative commonwealth in which all would be equal sharer in opportunity and in all things that give meaning and value to life. Why then this strife, this fear and suspicion of each other?

"I speak to you today not much of high policy or our programme for the future—that will have to wait a while—but to thank you the love and affection which you have sent us in such abundant measure. That affection and spirit of co-operation are always welcome but they will be needed more ever in the difficult days ahead of us. A friend sent me the following message: 'May you weather every storm,' first pilot of the ship of State, bon voyage! A cheering message but there are many storms ahead and our ship of State is old and battered and slow-moving and unsuited to this age of swift change. It will have to be scrapped and give place to another. But however old the ship and however feeble the pilot, when there are so many millions of willing hearts and hands to help, we can brave the high seas and face the future with confidence.

"That future is already taking shape and India, this old and dear land of ours, is finding herself again through travail and suffering. She is youthful again with the bright eyes of adventure, and with faith in herself and her mission. For long years she had been narrowly confined and had lost herself in brooding. But now she looks out on the wide world and holds out her hands in friendship to the other peoples of the world, even though that world may still be full of conflict and thoughts of war.

"The Interim National Government is part of a larger scheme which includes the Constituent Assembly which will meet soon to give shape to the constitution of free and Independent India. It is because of this expectation of an early realisation of full independence that we have entered this Government, and we propose to function so as progressively to achieve that independence in action both in our domestic affairs and our foreign relations. We shall take full part in international conferences as a free nations with our own policy and not merely as a satellite of another nation. We hope to develop close and direct contacts with other nations and to co-operate with them in the furtherance of world peace and freedom.

"We propose, as far as possible, to keep away from the power politics of groups, aligned against one another, which have led in the past to world wars and which may again lead to disasters on an even vaster scale. We believe that peace and freedom are indivisible and the denial of freedom anywhere must endanger freedom elsewhere and lead to conflict and war. We are particularly interested in the emancipation of colonial and dependent countries and peoples, and in the recognition in theory and practice of equal opportunities for all races. We repudiate utterly the Nazi doctrine of racialism, wheresoever and in whatever form it may be practised. We seek no dominion over others and we claim no privileged position over other peoples. But we do claim equal and honourable treatment for our people wherever they may go, and we cannot accept any discrimination against them.

"The world, in spite of its rivalries and hatreds and inner conflicts, moves inevitably towards closer co-operation and the building up of a world commonwealth. It is for this One World that free India will work, a world in which there is the free co-operation of free peoples and no class or group exploits another.

"In spite of our past history of conflict, we hope that an independent India will have friendly and co-operative relations with England and the countries of the British Commonwealth. But it is well to remember what is happening in one part of the Commonwealth to-day. In South Africa racialism is the State doctrine and our people are putting up a heroic struggle against the tyranny of a racial minority. If this racial doctrine is going to be tolerated it must inevitably lead to vast conflicts and world disaster.

"We send our greetings to the people of the United States of America to whom destiny has given a major role in international affairs. We trust that this tremendous responsibility will be utilised for the furtherance of peace and human freedom everywhere. To that other great nation of the modern world, the Soviet Union, which also carries a vast responsibility for shaping world events, we send greeting. They are our neighbours in Asia and inevitably we shall have to undertake many common tasks and have much to do with each other.

We are of Asia and the peoples of Asia are nearer and closer to us than others. India is so situated that she is the pivot of western, southern and south-east Asia. In the past her culture flowed to all these countries and they came to her in many ways. Those contacts are being renewed and future is bound to see a closer union between India and south-east Asia on the one side, and Afghanistan, Iran and the Arab world on the West. To the furtherance of that close association of free countries we must devote ourselves. India has followed with anxious interest the struggle of the Indonesians for freedom and to them we send our good wishes.

"China, that mighty country, with a mighty past, our neighbour has been our friend through the ages and that friendship will endure and grow. We earnestly hope that her present troubles will end soon and a united and democratic China will emerge, playing a great part in the furtherance of world peace and progress.

"I have not said anything about our domestic policy, nor at this stage do I wish to do so. But that policy will inevitably have to be governed by the principles by which we have stood all these years. We shall look to the common and forgotten man in India and seek to bring him relief and raise his standards of living. We shall continue our fight against the curse of untouchability and other forms of enforced inequality, and shall especially try to help those who are economically or otherwise backward. Today millions lack food and clothing and houses and many are on the verge of starvation. To meet this immediate need is an urgent and difficult task and we hope other countries will will help us by sending food grains.

"An equally urgent and vital task for us is to conquer the spirit of discord that is abroad in India. Out of mutual conflict we shall never build the house of India's freedom of which we have dreamt so long. All of us in this land have to live and work together, whatever political developments might take place. Hatred and violence will not alter this basic fact, nor will they stop the changes that are taking place in India.

"There has been much heated argument about sections and groupings in the Constituent Assembly. We are perfectly prepared to accept and have accepted, the position of sitting in sections, which will consider the question of formation of groups. I should like to make it clear, on behalf of my colleagues and myself, that we do not look upon the Constituent Assembly as an arena for conflict or for the forcible imposition of one view-point over another. That would not be the way to build up a contented and united India. We seek agreed and integrated solutions with the largest measure of goodwill behind them. We shall go to the Constituent Assembly with the fixed determination of finding a common basis for agreement on all controversial issues. And so, in spite of all that has happened and the hard words that have been said, we have kept the path of co-operation open, and we invite even those who differ from us to enter the Constituent Assembly as equals and partners with us with no binding commitments. It may well be that when we meet and face common tasks our present difficulties will fade away.

"India is on the move and the old order passes. Too long have we been passive spectators of events, the playthings of others. The initiative comes to our people now and we shall make the history of our choice. Let us all join in this mighty task and make of India, the pride of our heart,-great among nations, foremost in the arts of peace and progress. The door is open and destiny beckons to all. There is no question of who wins and who loses, for we have to go forward and together as comrades and either all of us win or we all go down together. But there is going to be no failure. We go forward to succes, to independence and to the freedom and well-being of the four hundred millions of India. JAI HIND!"

A.-I.C.C. ON CALCUTTA DISTURBANCE.—Meanwhile, the Congress Working Committee met in Delhi and passed a resolution on the Calcutta carnage. It ran:

"The Working Committee have read with deep sorrow reports about the recent happenings in Calcutta in connection with the observance by the Muslim League of Direct Action Day on August 16 and subsequent days. They deplore the serious loss of life and property and condemn in particular the acts of brutality committed against defenceless persons, especially women and children.

The Committee offer their sympathy to the innocent sufferers of whatever community and party and call upon them to meet the situation with courage, forbearance and fortitude.

On July 29 the Council of the All-India Muslim League passed a resolution deciding upon Direct Action. In support of the resolution inflammatory speeches were made and subsequently speeches and statements and pamphlets by responsible members of the League and Ministers, and articles in some League newspapers have served to inflame a large section of the Muslim masses.

"The Government of Bengal declared August 16 as a public holiday in spite of protest and thereby gave an impression that the observance of August 16 was enjoined by the Government and persons not joining in the observance could claim or get no protection from the Government.

"It appears that processionists carried big bamboo sticks, swords, spears, daggers, axes which they brandished when ordering people to shut their shops from the early morning of August 16 and mercilessly assaulted anybody who declined or hesitated to close his shop.

"Stabbing and looting started early in the day and guns are said to have been used by hooligans in many places. Murders in most brutal circumstances, looting and burning of houses on a large scale followed and lasted for three or four days resulting in the death of several thousand persons and looting and burning of property worth crores of rupees.

There was practically no police, nor even traffic police, to be seen on August 16 and even the precaution of sending foot and mounted police to accompany processions, as is done with the Moharram and other processions was not taken. Even when police were available they rendered no help to peaceful citizens, and frantic appeals for help to officers in charge of police stations were not heeded and the people were told to save themselves as best they could.

"The curfew order was not enforced even after it was proclaimed, for the first two nights. Although no transport was available to the public, hooligans used motor lorries. Petrol was freely used for committing arson. Houses and furniture and other articles were smashed or burnt and whatever could be removed was carried away. Dead bodies littered the streets and many dead and dying persons were thrust into manholes of underground sewers or thrown into the river.

"The military were not called till long after the havoc had commenced. In some places even the police participated in the looting. After the initial orgy of murders, loot and arson the Hindus and others retaliated and indulged in reprisals wherever they could and a large number of Muslims were killed.

"It is satisfactory to note, however, that in the midst of this mutual slaughter and inhuman barbarities there were cases where Hindus gave shelter to Muslims in distress and Muslims gave protection to Hindus in difficulty.

"The Committee are concerned to note that communal tension in other places has increased and conflicts resulting in murders have arisen. There is a general apprehension that this may extend and unless checked in time may become very widespread.

"It is the primary duty of every citizen to prevent this and of every Government to maintain peace and ensure protection to its peaceful citizens.

"In view of the very serious, nature of the riots, the like of which has never before happened in any part of the country, it is essential in the opinion of the Working Committee that a thorough inquiry be held by an impartial tribunal which can command the confidence of the public, into the circumstances preceding August 16 and incidents of August 16 and the following days and the steps taken by the Government both before and during, the riots to meet the situation.

"Working Committee place on record their opinion that the Government of Bengal utterly failed to maintain peace and give protection of life and property to peaceful citizens.

"The Committee realize that the wounds inflicted not only on the bodies but the spirit and self-respect of the people will take long to heal. Nevertheless they appeal to them to forget and forgive and to utilize this terrible experience for re-establishing goodwill and friendly relations between the different communities which have been so rudely disturbed during recent times.

"The Working Committee are of opinion that the communal problem cannot be solved by intimidation and violence but by mutual understanding, friendly discussion and, if necessary, by agreed arbitration."

Another meeting of the All-India Congress Committee was held in Delhi in the autumn which ratified the decision to accept office at the Centre. Pandit Nehru announced his intention to resign the Congress Presidentship because of his membership of the Interim Government. The delegates elected Mr. J. B. Kripalani in his place to preside over the Meerut Session of the Congress, the first to be held since April 1940.

A few weeks after the formation of the Interim Government, the Viceroy invited Mr. Jinnah for a personal discussion with a view to securing the participation of the League in the Interim Government and its co-operation in the Constituent Assembly. As a result of these negotiations the League decided to enter the Interim Government (See Chapter on Muslim League).

The Hindu Mahasabha.

The Hindu Mahasabha, which in recent years has claimed a growing share of public attention in India, is an organisation of comparatively recent origin. Its beginnings can be traced to the first years of the current century, almost simultaneous with the awakening of Muslim consciousness in 1906 and in vigour equal but opposite to that of the Muslim Communal organisation.

During the first twenty-five years of its life, the Hindu organisation had to struggle for its existence, what with the proverbial indifference of the Hindu masses, the inherent inability of majorities the world over to organise, and the better response which the Congress with its wider nationalistic appeal evoked among the Hindus. All this time, however, the causes which hampered the growth of the Hindu organisation were gradually, if imperceptibly, neutralised.

For instance, the Hindu community's indifference began to give place to communal consciousness as a result of a number of Hindu-Muslim riots in which the majority community came out second best. The waves of conversion from the Hindu fold, partly due to the discontent of the outcastes and partly because of the proselytising nature of the Islamic and Christian religions, opened the eyes of Hindu leaders to the growing decrease in the number of people owing allegiance to the Hindu faith.

In addition to the reasons stated above, the political gains secured by the Muslim community under the Minto-Morley and Montagu-Chelmsford Reforms Schemes taught the Hindu community to come together and set up an organisation to voice its claims in future adjustment.

Even the wider platform of national emancipation and Hindu-Muslim unity from which the Congress appealed to the Hindu mind has latterly given signs of weakness, because Hindu-Muslim concord, far from coming within reach, threatens to go beyond grasp.

It is however, wrong to assume that the Hindu organisation is anywhere near as powerful as the Congress, or even the Muslim League of the past six or seven years. The Hindu Mahasabha undoubtedly consolidated its position in recent years; most Hindus, not excluding Congressmen professing nationalistic ideals, have a sneaking sympathy for the Mahasabha, but when it came to a question of elections to representative institutions, the Mahasabha failed to make an appeal to the Hindu electorate to the exclusion of the Congress.

Just as the Muslim League, in spite of its not very flattering success at the polls in 1937, became a mighty organisation among the Muslims of India, similarly the Hindu Mahasabha gave proofs of considerable following among the Hindu and even of a certain amount of power—as evidenced by the importance bestowed on it by His Excellency the Viceroy. In 1940, for the first time in its history, the Mahasabha was recognised as an organisation influential enough in the country to be reckoned with for purposes of representation in the Central Government. This was, however, neutralised subsequently as far as official recognition was concerned; at the Simla Conference, for example, not only was the Hindu Mahasabha was denied representation but its demands found no place.

Speaking for the present, however, it is highly doubtful whether the status attained by the Mahasabha will continue. It was only recently that the Mahasabha struck out a path of its own, to the point of hostility to the Congress, having in the first twenty or twenty-five years of its existence contented itself with occupying a status subordinate to that of the Congress and seeking only to emphasise the communal claims of the Hindu as distinct from their national claims.

Such importance as the Mahasabha enjoyed in recent years as the opposite number of the growingly aggressive Muslim League has almost disappeared with the return of the Congress to active political and parliamentary life. When the Congress set its face squarely against the League, the Mahasabha lost its *raison d'etra*. In the result the Mahasabha fared badly at the general elections of 1945-46—it was routed—and today, like the Liberal Federation, it has ceased to be a force to be reckoned with.

During the war years, the Mahasabha figured prominently—advocating, from the communal point of view, more aggressive opposition to the Muslim claims than the Congress and, from the political stand-point, a less militant programme and policy than the Congress. Even in respect of the latter the Mahasabha became less and less "soft." For instance, at the last session of the All-India Committee of the Mahasabha, some of its leaders, including a Knight, renounced their titles as a protest against the British policy towards Hindus in general and the Mahasabha in particular. Broad hints were thrown at the prospect of a movement to be launched by the Mahasabha for "national liberation and the vindication of Hindu rights." When the Congress went into the wilderness in August 1942, the Hindu Mahasabha came into the lime-light as it was the only organisation to which the Hindus could look up both for urging the Hindu cause as against the militant communalism of the Muslim League and generally to propagate nationalism which, so to say, went by default as the result of the then Congress policy. When the Congress returned to public life the Mahasabha had no place.

Those who first urged the community to organise were actuated by a fear lest the numerical strength of the community should be adversely affected by the proselytising activities of the champions of other faiths. A Hindu leader, for instance, remarked: "Political power in democracies hinges more and more on the population strength of a community which in the case of the Hindus must depend in the main on the proportion in which the Hindus succeed in stopping the dreadful conversion activities of alien faiths and in accelerating the reclamation of the alienated numbers back to the Hindu fold.

In a country like India where a religious unit tends inevitably to grow into a cultural and national unit, the *Suddhi* (reconversion to Hinduism) movement ceases to be merely theological or dogmatic, but assumes the wider significance of a political and national movement. If the Muslims increase in population, the centre of political power is bound to be shifted in their favour."

Another Hindu leader said: "A community which does not know itself, does not feel its individual pulse, does not pride in its past and believe in its future, is, to all intents and purposes, a dead and self-effaced community. In order to exist at all and exist in the midst of a struggle where the universal law is encroachment and survival of the fittest, the very first and most preliminary need is to realise individual existence."

For these reasons, the early years of the Hindu Mahasabha were more or less associated with the activities of the Arya-samaj, an allied organisation which worked for the reclamation to Hinduism of those who had been converted to other faiths.

Apart from the denominational aspect of its activities, the Hindu Mahasabha claims that India belongs to the Hindus—the term 'Hindus' being interpreted as meaning people belonging to the Hindu race, irrespective of their denominational affiliations. It has been argued that "the minority problem of Europe is pre-eminently a racial one and not religious because there is only one religion, Christianity, which is common to all. The minority problem of India, on the other hand, is, if anything, pre-eminently religious and not racial at all."

For the early history of the Hindu Mahasabha see past issues of *The Indian Year Book*.

Modern History Just as the history of the All-India Muslim League as we know it today dates from 1937 or more generally speaking from the inauguration of the present constitution similarly the modern history of the Hindu Mahasabha dates from the start of the present constitution. The Communal Award, which formed the basis of elections to the legislatures under the existing constitution, and the attitude of neutrality observed by the Congress towards it provided the *raison d'etre* for the agitation of the Mahasabha since 1934-35.

About this time there descended on the Mahasabha platform Mr. V. D. Savarkar, the ex-revolutionary who had just been released after long years of incarceration with a virile programme for the regeneration of the Hindu Community. The cleavage between the Congress and the Hindu Mahasabha was further accentuated. Mr. Savarkar's attitude of hostility towards Congress may be illustrated by the following words. "The Hindu Sangatanists had to face the apathy on the part of crores of the unawakened masses of their co-religionists on the one hand and on the other the treacherous attitude of the pseudo-nationalist Hindus who are friends of every other community in the world but their own and who are ever ready to betray even the just interests of the Hindus and to placate the Muslims even in the most anti-national demands on their part—just to prove that the Indian patriotism of these pseudo-nationalists, like Caesar's Wife, was above suspicion. Thus, unaided and betrayed at home, the brave band of the Hindu Sangatanist leaders and missionaries had to face outside the organised opposition of the Christian missionaries on the one hand and the fanatical riots, hooliganism, assaults and assassinations by the Muslim fanatics on the other, while the British Government out of its political hostility to the Hindus was sworn never to take the side of the Hindus whenever Hindu interests clashed with the interests of the traditional 'favoured wife' of the British. . ."

Bhai Parmanand said: "the best way to bring about Hindu-Mahomedan unity is to strengthen the communities... Let the Hindus cease to be Hindus, but the Mahomedans shall be Mahomedans for all times to come. The negation of Hinduism on the part of the Hindus does not mean the negation of Islam on the part of the followers of the latter. The best security, for bringing about a desirable national evolution is to preserve the communal strength. It will then be to the interest of the Mahomedans to consent to the obliteration of all religious distinctions for political purposes... Subconsciously, the Hindus have, perhaps, felt that the Congress, the bestower of the priceless gift of liberty, must have been right in pawning Hindu independence, culture and prosperity in exchange for an elusive Moslem support. In fact the emotion that has accompanied Congress activity in the last twenty years has destroyed in the Hindus the love of their heritage. They have been too willing to offer themselves as sacrifices at the altar of a Goddess which has surreptitiously given back Hindu offerings to Muslims .... If the Congress had not engineered the theory that liberty can only follow Hindu-Muslim unity, liberty today would not be hampered and confined as it is."

Referring to the latest phase of the Hindu-Muslim relationship, Bhai Parmanand said, "The situation has got only two solutions. One is the partition of the country into two, and the other to allow a Muslim state to grow within the State. That is sure to take us to a period of trial of strength, and in that case the Hindu Mahasabha alone and not the Congress can offer the right solution. I am convinced that if the Congress had not thought of Hindu Muslim unity, if Mr. Gandhi had not made his ill fated pact with the Ali Brothers, it could have made a significant contribution to the achievement of freedom. It would then not have nurtured an enemy to its ideals within its own territories."

Dr. Moonje remarked that "during the last 18 years the Congress has developed a tendency that may aptly be called a pro-Muslim mentality at the cost of Hindu interests with the ultimate object of placating and winning them over to merge in the Congress..... The Muslim scheme of emancipation is essentially and fundamentally based on the essentially communal ambition of winning a domineering position for Islam in the hoary land of the Hindus.... The Muslims have no idea of patriotism, or nationalism, if shorn of Muslim communalism; nor do they care for *Swaraj* in India, if Swaraj does not offer to them a domineering status in the administration of the

country. Their one point, on which they have concentrated, for the present, all their energy and intellect and staked everything that counts in life, is how to 'win' a position for Islam in India, even if it be at the cost of others. Does this, in any sense, mean the need for minority protection? What is the cure for such a mentality? It has now reached its culminating point; it is no mere bluff. It has now begun to demand division of India into Muslim India and Hindu India." Dr. Moonje claims that "in any country it is always the right of the majority community to establish Swaraj and to create its own nationalism, to maintain internal law and order and to defend the *swaraj* from external aggression."

For a period of six or seven years since 1937, Mr. Savarkar was Hindu India's No. 1, until owing to his ill-health, his place was taken by the Bengali leader Dr. Syama Prasad Mookerjee. In 1937 the Mahasabha declared as its goal the attainment of complete independence by all legitimate and peaceful means. In 1945 some prominent Maha-sabha leaders gave up their titles as a token sacrifice for their ideals.

In the Limelight.- The declaration of war in September 1939, followed as it was by numerous efforts by His Excellency the Viceroy to get leaders of Indian opinion to agree on the political and constitutional issues with a view to unifying and intensifying India's war effort, brought the Hindu Mahasabha very much into the limelight. It was in 1939-40 that the Mahasabha secured for the first time official recognition at the hands of the Government of India, a fact which was appreciated by the annual session of the Mahasabha in 1940. When His Excellency the Viceroy summoned leaders of different communities and interests for consultation on the political question, the Hindu Mahasabha insisted that it alone had the right to speak in the name of the Hindu community. The resolution passed by the Mahasabha welcomed "the recognition by the Viceroy and the Secretary of State that the political situation in the country cannot be satisfactorily solved without the co-operation of the Hindu Mahasabha, which is the most outstanding body representing the Hindu community's interests."

In the middle of 1940 when the Viceroy was considering the best method of associating representative Indian opinion with the governance of India by means of an expanded Central Executive Council, the Hindu Mahasabha strongly advocated the claims of the Hindu community for adequate representation thereon, and stoutly resisted the claims of Mr. Jinnah that the Muslim League should have a majority in the Central Executive Council if the Congress abstained from participation.

This status of equality with the Muslim League, in the eyes of authority, the Mahasabha has lost, witness the neglect it suffered at the time of the Simla Conference.

Mahasabha and Indian States.—A somewhat recent development in the outlook of the Hindu Mahasabha is its attitude towards Indian States. Presumably as a result of Muslim agitation in certain Hindu States, the Hindu Mahasabha leadership took the side of the Princes. It is also conceivable that Hindu leaders tried to emulate the example of League leadership in regard to the authority and prestige of some Muslim Princes whose administration was criticised by their Hindu subjects. An example of this new trend in Mahasabha thought is to be found in a strong plea made by Mr. Savarkar to maintain Hindu States and strengthen them in all possible ways. Hindu Princes and Hindu States, he said, were the centre of Hindu power with organised machinery and trained armies. Hindu Princes, he added, would always safeguard Hindu rights and privileges. If the establishment of democracy meant subversion of Hindu States he did not want such democracy. The Indian Princes were not foreigners, he said, and as such their people should back them up in all their attempts to preserve their individuality. Mr. Savarkar envisaged a bright future for the Indian Princes who, he thought, would be required to play a great part in laying the foundations of a united and free India.

Opposition to Pakistan—During 1939-40 the Hindu Mahasabha was considerably exercised over the demands of the Muslim League for the division of the country into Muslim and Hindu Indias. Anxiety was also expressed over the statements made by the Secretary of State for India on this subject, which were interpreted by the Mahasabha as conceding too much to the Muslims. The Working Committee of the Mahasabha claimed that India should be granted Dominion Status within a definite time limit and expressed the opinion that the statements made by the Viceroy and Mr. L. S. Amery as highly "unsatisfactory and disappointing" in that they contained no reference to India's right to independence, which was the declared goal of the Mahasabha, and that the reference made to the grant of Dominion Status as an immediate step in constitutional advance was vague and uncertain. The Statement to the effect that the British Government would not agree to hand over the administration of the country to a system of Government which would not be acceptable to large and powerful elements of Indian life, the Committee thought, required clarification as it was capable of the interpretation that if the Muslim League, the Princes or other vested interests opposed the recognition of the legitimate rights of the majority in India the further constitutional advance would be held up, or the rights of the majority would be surrendered to them. This would mean negation of the principle of democracy and an incitement to the minorities to obstruct and revolt.

Direct Action Threat- The annual session of the Mahasabha met at Madura in South India in December, 1940, and passed a resolution appreciating the recognition by the Viceroy and the Secretary of State that the political situation in the country could not be satisfactorily solved without the co-operation of the Hindu Mahasabha.

The resolution added that while reiterating faith in the goal of complete independence, the Hindu Mahasabha is prepared to accept Dominion Status of the Westminster type as the immediate step.

The resolution also called upon the Government to recruit Hindus for the army and the navy, make military training compulsory for Indians, and to promote the establishment of war industries in India. The resolution concluded: "In case the Government fails to make a satisfactory response to the demands embodied herein before March 31, 1941, the Mahasabha will start a movement of direct action." A committee was appointed to devise ways and means for starting and conducting the campaign of direct action after the lapse of the period mentioned above.

Nothing happened, however, on the expiry of the ultimatum. The All-India Committee of the Mahasabha which met in the summer of 1941 resolved to postpone the direct action contemplated at Madura. The resolution on this subject referred to the correspondence that had passed between Mr. Savarkar and H.E. the Viceroy in pursuance of the Madura resolution, and to the pronouncements made from time to time by the Secretary of State for India in connection with the political situation in India. It noted that the Viceroy had turned down "some of the fantastic communal demands" put forward with regard to the extension of the Viceroy's Executive Council and also that the Secretary of State for India had, under pressure of public opinion created by the Hindu Mahasabha, criticised adversely the so-called Pakistan proposal.

"Akhand Hindusthan". About this time communal rioting broke out in several places, including Ahmedabad, Dacca, Bombay, Cawnpore and Bihar Sharif. Hindu Mahasabha circles were unanimous in ascribing the riots to a design on the part of some Muslim leaders to force the issue of Pakistan. Mr. K. M Munshi, a well-known Congress leader and former Home Minister of the Government of Bombay, left the Congress on the issue of a non-violent approach to the communal rioting. He started an Akhand Hindusthan (Indivisible India) campaign which was very popular in Hindu circles.

Cripps Scheme Opposed. - When the Cripps proposals (see the chapter on The Indian National Congress) were announced, the Hindu Mahasabha was one of the earliest to reject it on the ground of the unity of India. This did not, however, mean that the Mahasabha refused to co-operate in any case. In fact, Mr. Savarkar agreed to join in a Government at the centre, in spite of the Mahasabha's opposition to the other parts of the Cripps formula.

The months that immediately followed the Cripps visit witnessed a strong denunciation by Hindu Mahasabha leaders of the demand for Pakistan, rendered more fierce by the proposal of leaders like Mr. C. Rajagopalachariar to settle with Mr. Jinnah and the Muslim League on the basis of Pakistan. When Mr. Rajagopalachariar's move was condemned even by the bulk of Congressmen (see chapter on the Indian National Congress) it is easy to understand the opposition of the Mahasabha leaders.

When disturbances broke out in the country after the arrest of the Congress leaders on August 9, 1942, the Mahasabha President appealed to his followers not to extend any active support to the Congress move, as the Congress resolution was bound to prove detrimental to Hindu interests and to the integrity and strength of India as a nation and State. At the same time he urged Government to appease Indian discontent by an unequivocal Parliamentary declaration giving India the status of a completely free and equal partner in the Indo-British Commonwealth, equal to that of Great Britain herself, and by investing India with actual political power.

The position of the Hindu Mahasabha was indeed unenviable. It could not unduly condemn the Congress which had now given up the cry of "No swaraj without communal unity" and had instead gone all out to win freedom for the country irrespective of what the Muslims said or did. Thus one of the major grievances of the Hindu Mahasabha against the Congress had been removed. At the same time the policy of the Congress was opposed to that of the Hindu Mahasabha which was one of responsive co-operation. The Mahasabha would very much like the Congress demand for India's political emancipation being conceded without delay, but would not at the same time support the Congress methods.

The period when the Congress was behind prison bars witnessed the growth of certain new elements within the Hindu Mahasabha. A right wing came into being rather the right wing forces which were already there came to the fore. This comprised leaders like Dr. Syama Prasad Mookerjee who were, in comparison, for example, with Mr. Savarkar, less communally minded, and more politically conscious.

For a time there was a tussle between the old and the new forces, and the official policy of the Mahasabha fluctuated in consequence. In August 1942 the Working Committee of the Mahasabha demanded immediate declaration of India's independent status and negotiation by Britain with the principal parties in India to solve the political deadlock and establish an Indian National Government. The relevant resolution stated that if the British Government did not respond to the demand the Mahasabha would be compelled to revise its programme and devise ways and means whereby Britain and her Allies "will realise that India as a self-respecting nation can no longer be suppressed." In pursuance of this resolution Dr. Mookerjee sought permission to meet Mr. Gandhi, but the Viceroy declined to give it.

This tendency to move away from the communal basis of the Mahasabha was checked when, in December 1942 the Viceroy, speaking at Calcutta, referred to the geographical unity of India and advised Indians to preserve its unity. This was naturally interpreted as disapproval of Pakistan and any proposal to divide the country. The extremists in the Mahasabha were jubilant and the advocates of compromise thought it expedient to take the Viceroy's hint and abandon all efforts to settle with the Muslim League on the basis of Pakistan. The prospects of a rapprochement between the Hindu Mahasabha and the Muslim League, such as they were, were rendered more remote as the result of the Viceroy's Calcutta speech.

The proceedings of the annual session of the Hindu Mahasabha which met at Cawnpore a few days after the Calcutta pronouncement were naturally coloured by the latter.

The feeling of self-satisfaction engendered by Lord Linlithgow's speech at Calcutta in December 1942, which was voiced at the Cawnpore session of the Mahasabha, was somewhat shaken by developments in the summer of 1943. Mr. Jinnah, who was doubtless upset by the Viceregal pronouncement on the geographical unity of India, made a conciliatory gesture to Mr. Gandhi in his presidential address at the annual session of the All-India Muslim League at Delhi in April, 1943. He said that, if Mr Gandhi were keen on a settlement, he, (Mr Gandhi) had only to write to him (Mr. Jinnah from the Aga Khan's palace. Mr Gandhi did write to him expressing a desire to meet him Although Mr. Gandhi's letter was withheld from Mr. Jinnah, the fact of Mr Gandhi's response to Mr. Jinnah's invitation amounted, in the eyes of the Mahasabha, to a readiness to concede Mr. Jinnah's demand. The Working Committee of the Mahasabha took such a serious view of the possibility of "a cent per cent. transfer of power to the League" that it felt that "under the circumstances the Hindus may have to meet and fight the danger of Pakistan single handed" and urged the Hindu community to "prepare and be ready"

Mr. Savarkar resigns Early in the autumn of 1943 Mr. Savarkar staged one of his periodical exits from the leadership of the Mahasabha. More than once before he had announced his resignation of its presidentship, but on each occasion he was induced to stay on. A similar development was expected on this occasion too. But he stuck to his decision, in spite of the fact that the Mahasabha re-elected him President for another year. Obeying his doctors who advised complete rest, Mr Savarkar declined to go to Amritsar to preside over the Silver Jubilee session of the Mahasabha whose deliberations were guided by Dr. Syama Prasad Mookerjee, Working President.

Silver Jubilee Session The session which celebrated the silver jubilee of the organisation, was inaugurated by the Maharaja of Cossimbazar, whose late father was the first President of the Hindu Mahasabha. Raja Narendra Nath, ex President, in a short speech asserted that the Hindu Mahasabha was not a communal organisation but had come into being to infuse the spirit of nationalism among the people. He was followed by Bhai Parmanand and Dr Moonje, who stressed the need for Hindu unity and claimed that India belonged to the Hindus and should have its constitution based on the Vedas just as the pan-Arabic countries were endeavouring to base their constitution on the Quran. He made a stirring appeal to the audience for the militarization of the Hindus.

MAHASABHA IN 1944-45.

Organisationally speaking, the Hindu Mahasabha suffered a number of reverses in 1944-45. This was due mainly to the fact that Mr. Gandhi was out, and, to the extent that Mr. Gandhi is the Congress, the latter organisation once again came on to the stage, thereby depriving the Hindu Mahasabha of the position which it had held in public life for two or three years previously as the opponent of the Muslim League.

Even so, the Mahasabha was not completely out of the picture; for it was not slow to make its opinion felt on the many situations which arose as the result of the attempts made on behalf of the Congress to placate the Muslim League. Throughout this period, the Mahasabha, which had previously occupied the front of the stage as a counter-blast to the Muslim League, contented itself by attacking the principal actors, the Congress and the League, and latterly the British authority. Symptomatic, perhaps, of the resentment felt by the Mahasabha leaders at this persistent relegation to the background were the series of protests made by the Mahasabha culminating in the renunciation in August 1945 of their titles by some prominent Mahasabha leaders.

The failure of Mr. Gandhi to evoke response from the Viceroy to this gesture soon after his release (see chapter on "The Indian National Congress") led the Mahasabha Working Committee to express deep concern at the constitutional deadlock which "continue to exist at a time when the war menace to India has become so real and so imminent" and regret that "Government have taken no practical steps towards resolving the deadlock and the establishment of national coalition Governments at the centre and in the provinces"

A resolution passed in July 1944 said: "The Working Committee reiterates that no communal settlement will be acceptable to the Hindus which has not the approval of the Hindu Mahasabha, and it will be a fatal mistake for Congress leaders to come to a patched-up agreement with the Muslim League so long as it persists in its Pakistan ideology and refuses to identify itself with the national interests of India as a whole. The Working Committee declares that the suicidal policy of appeasement, specially jeopardising Hindu rights, has not proved a success in the past, nor will it be so in the future. Instead of this policy being pursued, there should now be all-India effort for uniting all progressive parties and organisations throughout the country who believe in the unity and integrity of India on a common Indian national demand, and both Hindu and Muslim public opinion should be effectively mobilised on such lines. In the preparation of, and in giving effect to such a scheme the Hindu Mahasabha will be glad to offer its wholehearted co-operation."

Reaction To C. R. Formula.—Ironically enough, within a few weeks of the adoption of this resolution, Mr. C. Rajagopalachari published the details of his negotiations with Mr. Jinnah on the basis of the Gandhi-cum-C.R. Formula conceding the right of secession on certain conditions (see chapter on "The Indian National Congress). This roused vigorous protests from Mahasabha leaders. Mr. Savarkar remarked:—

"From the 'Quit India' the Congress has inevitably landed on 'Split India.' The Hindu Mahasabha had foretold that just as the Swaraj-Khilafat ended in strengthening the Khilafat

forces and gave birth to the Pan-Islamic movement, the Swaraj-Pakistan movement could result in strengthening the Pakistan forces." He added that this offer had completely justified the policy of the Mahasabha to refrain "from being duped into the movement of 'Quit India,' which has now ended in such a miserable fiasco."

"It is really unjust," observed Mr. Savarkar, "to look upon Mr Rajagopalachari as the villain of this tragedy. The fact is that a Muslim *Raj* in India has always been looked upon by Gandhiji and a large number of Congressmen as cent per cent Swaraj." He contended that neither Mr. Gandhi nor Mr. Rajagopalachari had the authority to make a gift of any of the Indian provinces. He appealed to the Sanatanists to defend the geographical integrity of the country and urged other Hindus affiliated to other organisations, including the Congress, to join hands with the Sanatanists in their efforts to organise the anti-Pakistan front.

He made an appeal to all Hindus to save the land from danger of being vivisected, since "it is almost certain that no pact or servile submission to Government on the part of the Congress can bring about any constitutional change in India as long as the war lasts."

Mahasabha suspicions were accentuated by the prospect of Gandhi-Jinnah negotiations. Mahasabha leaders were so much disturbed by the fear of fresh concessions to Mr Jinnah that Dr Mookerjee sought clarification from Mr. Gandhi on the latter's intentions.

Outlining his impressions of his talk with Mr Gandhi, Dr. Mookerjee made three points. The first was that Mahatma Gandhi's mind was still open to conviction and it he felt satisfied that what he had done was injurious to India as a whole or to a particular province, or even to a particular community, he would not hesitate to retrace his step. Secondly, Mahatma Gandhi's personal views on the question of partition of India were still the same as they were two years ago. In the third place, Mahatma Gandhi was most anxious that all people, including Congressmen, should, without reserve, express their opinion on the C.R. formula so that Mahatma Gandhi might correctly appreciate the country's reaction.

Dr. Mookerjee said that the real solutions for settling Hindu Muslim differences was to find out from the spokesmen of the respective communities in what manner minority right required protection in provincial spheres and the Centre. Mr Jinnah had verbally given the assurance that he would give every protection to the minorities living in Pakistan. "Let us demand from him a clear and full analysis of the nature of the protection that he proposes to give and the manner in which such protection will be guaranteed under the constitution. It should not be difficult for the Hindus to offer exactly similar protection to Muslim minorities in the rest of India. Similarly, let the spokesmen of the minority communities themselves indicate how their rights are to be safeguarded under the Central administration and let the parties representing the majority community decide how far they can be accommodated."

It was clear, continued Dr. Mookerjee, that Mr. Jinnah's settlement with Mr. Gandhi could be only on the basis of Pakistan. He had not even stated what his Pakistan was, though he had emphatically indicated that the C.R. formula did not give him the Pakistan he wanted. Mr. Jinnah's demands would now increase, of which indications had already been given. He would demand that there should be no plebiscite for settling the issue. He might perhaps compromise on a Muslim plebiscite alone. He wanted Pakistan territory to be increased so that from economic, military and other standpoints it might be a strong and self supporting sovereign state. He might well demand a corridor to join his eastern and western Pakistan. Above all, he must have 50-50 representation in the interim national cabinets.

"The trap laid for Gandhiji is clear" added Dr. Mookerjee. "If he fails to satisfy Mr. Jinnah, it is a mistake to suppose that the latter will stand exposed. He will not, for he will then say that although the principle of Pakistan was accepted by Gandhiji, he was not prepared to give it in a form that Muslims wanted so as fully to exercise their right of self determination. Britain would also say that Hindu-Muslim differences being a real obstacle in the path of India's future freedom, and the two great leaders having failed to agree, she must continue her perpetual trusteeship."

Even after it was known that the Gandhi-Jinnah negotiations had broken down the Working Committee of the Mahasabha passed a resolution condemning the Rajagopalachari Formula as Gandhi's Scheme "as being destructive of the integrity of India and being detrimental to the interests of the Hindus as well as of the country as a whole," and reaffirming that "no communal settlement will be binding on the Hindus unless arrived at with the consent of the Hindu Mahasabha."

In a second resolution, the Committee said "In view of the impending termination of hostilities and in view of the war aims proclaimed and embodied in the Four Freedoms as announced by President Roosevelt and the Atlantic Charter and in view of the important part which India will be called upon to play in the maintenance of peace and order in the east and in the world, holding as it does a strategically vital position in the geography of the world, and in view of the fact that thousands of valiant Indians have shed their life blood on the various battle-fronts and India had economically bled itself white for the cause of the Allies in fighting Fascism, the Working Committee of the All-India Hindu Mahasabha hereby reaffirms that India is one and indivisible nation and calls upon the United Nations to make an unequivocal declaration recognising the right of India as such a nation.

"The Working Committee further resolves that, in the event of failure on the part of Britain to satisfy the fair and just demand made by India, the other Allied Nations should not permit Britain to delay any longer the removal of India's bondage on the pretext of communal, sectional or other differences, mostly created

by the policy of divide, and rule and sedulously fostered with the object of continued exploitation of the Indian people.

"In the opinion of the Working Committee, the Allies will be judged by the attitude taken by them in respect of India and her continued bondage will expose the Allied Nations to the charge of insincerity in the actual application of their professed war aims and would confirm the opinion that the war was being fought by rival imperialists struggling for world domination.

"The Working Committee is further of the opinion that continuance of the present undemocratic Government, not at all responsible to the people of India, has resulted in the estrangement between India and Britain which will not fail to be a menace to world peace and world order."

The Working Committee authorised the President to cable the resolution to President Roosevelt Premier Churchill, Marshal Stalin and General Chiang-Kai-shek.

Bilaspur Session.—The annual session of the Mahasabha was held at Bilaspur on Christmas Eve in 1944. Dr. Syama Prasad Mookerjee presided.

The proceedings of the session were signalised by the adoption of a draft constitution for the future free India embodying the principles for which the Mahasabha stands. The draft said: "Hindusthan shall be a free State and her constitution shall be styled 'The constitution of the Hindusthan Free State.' Historically, politically, ethnologically and culturally, Hindusthan is one whole and indivisible, and so shall she remain. The form of Government shall be democratic and federal. The federal legislature shall be bi-cameral in structure. Elections to the legislatures, whether federal or provincial, shall be on the basis of adult franchise and of 'one man one vote.' The federal government shall be distributed between the central and provincial legislatures in a manner so as to give an adequate measure of autonomy to the provinces, with residuary powers at the centre. The power of the Government, whether federal or provincial shall be divided into legislative, executive and judicial, with the executive responsible to the legislature and both responsible to the people and with the judiciary independent of the executive. Distinctions between martial and non-martial races shall no longer exist, and the military strength of the Hindusthan Free State shall, as far as possible, be equitbalanced amongst its various provinces, consistently with its standard of discipline and efficiency. The States should be brought into the federation of Hindusthan. Responsible government should be introduced, on the principles stated above."

It was laid down that "the fundamental rights of a free state, namely, that all citizens domiciled in Hindusthan shall, in general, enjoy rights and privileges and be subject to the obligations of citizenship and shall, in particular, enjoy fundamental rights as under:—

"Citizens shall be equal before the law and shall enjoy equal civic rights. There shall be no law of a discriminatory nature.

"All citizens shall enjoy the fruits of their toil and shall be entitled to the necessaries of life without exploitation of man by man.

"The State shall make suitable laws for maintenance of health and fitness for work of all citizens for securing a living wage for every worker, protection of the motherland, welfare of children and economic consequences of old age, infirmity and unemployment.

"All citizens shall have the right of free elementary education.

"All citizens shall have the right to keep and bear arms in accordance with the regulations made.

"No citizen shall, by reason of colour, caste or creed, be prejudiced in any way in regard to public employment, office of power or honour or exercise of any profession, sequestered or confiscated save in accordance with the law.

"No citizen shall be deprived of his or her liberty of person except in due process of the law.

"All citizens shall enjoy the right of free expression of opinion as also the right of assembly peacefully and to form associations or unions for purposes not opposed to public order or to public morality.

"All citizens shall, subject to public order or morality, enjoy freedom of conscience and free profession and practice of religion and protection of culture and language, and no law shall be made either directly or indirectly to injure any religion or prohibit or restrict free exercise thereof.

"The provinces of Hindusthan may, where necessary, be redistributed on a linguistic basis. The religion, language and culture of minorities shall be respected and guaranteed.

"The press shall be free and no measures shall be taken to hinder the publication, sale, and distribution of any writing or newspaper subject to the rules of morality and public order."

The principal resolution of the session expressed the opinion that an agreed scheme of reforms which would solve her political problems and a united front were the pretexts which were being put forward by British politicians to enable Britain to defeat Hindusthan's claim to freedom. The resolution declared that "a major surgical operation like Pakistan" was not in the best interests of Hindusthan. Without prejudice to the Mahasabha's demands for complete independence and the right to frame its constitution, the resolution called upon the British Government to prove their *bona fides* by taking immediate steps to implement the Cripps scheme, shorn of clauses giving power of secession to provinces, and to dissolve the legislatures as the first step with a view to forming a constituent assembly elected not on the basis of the Communal Award but on the basis of a joint electorate with reservation of seats where necessary.

Wavell Plan.—When Lord Wavell broadcast his plan for an Interim Central Government, the working Committee of the Mahasabha registered its strong protest against the proposal

which it described as a "deliberate device on the part of the British Government to perpetuate British Rule over India to camouflage the issue of India's independence, to break the solidarity of the Indian nation, to reduce the Hindus who constitute about 75 per cent of India's population to a minority by the introduction of parity between caste Hindus and Muslims and disparity between Muslims and the scheduled castes, and to divide the politically minded Hindu community into separate entities as Caste Hindus and the Schedule Castes."

The resolution continued: "The said plan negatives the principles of nationalism freedom and democracy for which the Second World War is said to be waged and fought by the Allies. Even a fully indianized Executive Council under the existing constitution without any collective responsibility with the Viceroy's veto and the overriding power of the Secretary of State intact can be no substitute for a truly National Indian Government responsible to the people based on the recognition of Indian independence. The pernicious principles communal, anti-democratic, and anti-national underlying the interim scheme will create dangerous precedents which will necessarily tend to be the basis for India's future constitution. The Secretary of State had indeed made it abundantly clear that there can be no question of making the Central Government responsible to the Legislature which would at once in Muslim eyes imply control of unified India by the Hindu majority. The scheme is manifestly the culmination of an anti-Hindu policy of the British Government strengthened by an utterly futile and self-destructive policy of Muslim appeasement pursued by the Congress resulting in its unconditional surrender to British Imperialism.

"The Working Committee apprehends that the said plan, though provisional in name and applicable to the Central Government alone, will not fail to be utilised by interested parties as the thin end of the wedge to break constitutionally and permanently India's unity and solidarity by having its reflection in provincial legislature and administration.

"It is obviously a step in retrogression of the Cripps proposal and a monstrous extension of the so-called communal award which has proved to be the fountain source of all communal bitterness and political strife.

"The British Government would not have dared to inflict this astrocious blow on the Hindus but for the secret support accorded by Gandhiji to Desai-Liaqat Pact which, according to Gandhiji himself, forms the basis of the Simla Conference.

"The Indian National Congress has bartered away the political rights of the caste Hindus by repeated secret negotiations and by its open failure to defend such a right whenever they were trampled under foot. The Congress has ceased to be a national organisation by its persistent negotiations with the Muslim League, a body outside the Congress, on communal issues and by its latest acceptance through Gandhiji of an equal political status with an avowedly communal and reactionary organisation like the Muslim League. In view of the fact that the Congress does not itself claim to represent Hindus as such and in view of the further fact that the Hindu community as such is not represented at the Simla Conference, any decision taken behind the back of the Hindu Mahasabha, which alone is the accredited political organisation of the Hindus and which has been in the past recognised by the Government itself as a major political organization, shall not be acceptable to the Hindus of India.

"The Working Committee demands that a referendum be taken of the Wavell plan and the opinion of the people be ascertained before it is put into operation.

"The Working Committee therefore declares that the Wavell Scheme even if it be accepted by the Simla Conference will be repudiated by the Hindus and if enforced will be resisted by all possible means.

"The Working Committee hereby calls upon all its branch organisation and the Hindu community in general to realise the gravity of the dangers that lie ahead of them to raise their voice of protest against the plan and to be prepared for any action necessary to combat it."

Renunciation of Titles.—Government's "increasingly hostile attitude towards the legitimate rights of Hindus" came in for violent criticism at the meeting of the All-India Committee of the Mahasabha held at Delhi in August 1945. The meeting witnessed the unprecedented spectacle of some Mahasabha leaders renouncing their title as a protest against Government's policy.

Opening the session of the All-India Committee Dr. S. P. Mookerjee, the President, said that a new situation had been created by the Wavell offer. Dr. Mookerjee added Lord Wavell had not invited the Hindu Mahasabha to the Simla Conference, because the Viceroy feared opposition from the Mahasabha, who not only opposed the offer but also charged the British Government with unwillingness to part with real power.

Referring to Mr. Jinnah, Dr. Mookerjee said, the League leader had now changed his demand from parity with Hindus to that of parity with the rest of India. Dr. Mookerjee claimed that the Mahasabha was the only national organisation and challenged any one to prove that the policy and programme of the Mahasabha was inconsistent with national aspirations. He strongly demanded that the future of India should be based on unity and drew support from the speeches of Pandit Nehru.

The resolution on titles said: "As a mark of protest against the increasingly hostile attitude of the Government towards the legitimate rights of the Hindus, the Working Committee of the All India Hindu Mahasabha calls upon all Government title-holders who are office bearers or who are members of the Council or committees of the provincial or district Sabhas to relinquish their titles. No Government title-holders shall therefore be eligible for any elective office or offices in the Hindu Mahasabha."

The principal political resolutions ran as follows: "On the termination of the world war causing untold misery and sufferings to millions of people in India and the other countries both in the east and the west, we call upon His Majesty's Government to redeem the pledge of liberation of oppressed humanity from both political and economic fetters. Hindustan was bled white and made great sacrifices both in men and materials in fighting the forces of agression and sacrificed millions of her sons due to famine and pestilence caused by the conditions created by the war. In view of the glorious part played by the Indian Army in achieving victory in theatres of war, and particularly by the Hindus, who formed about 70 per cent. of the combatant forces and won as many as 27 Victoria Crosses out of 31 won by Indian soldiers, the United Nations should stand by India's demand for justice, fairplay and see that no injustice is done to the Hindus in this crisis. If Democracy has any meaning, no power on earth can deny with impunity the united demand of the vast majority of the Indian masses for independence. By the independence of India and other countries in bondage will the United Nations now be judged.

"To make agreement between political parties and communities a condition precedent to the freedom of India is a pretext for imperialism to cling to power. The present constitution is based on the avowedly communal award which is a negation of democracy and makes impossible the real verdict of the Indian people to be expressed constitutionally. We call upon the British Government immediately to repeal the communal award, which is unfair, undemocratic and anti-national. The Hindu Mahasabha has all along rejected the communal award. We are of the opinion that the election should be based on the genuine democratic principle of one man, one vote. A constituent assembly returned on communal electorates based on the communal award can never reflect the true mind of India and will merely create artificial issues which will disrupt Indian unity and help imperialism to continue its domination. The Mahasabha insists that any constituent assembly or any body entrusted with the work of drafting India's new constitution should proceed on the basis that India is and shall remain one and indivisible and further, that any majority community shall not be reduced to a minority or equality.

"A genuine national election based on democratic franchise will pave the way for the formation of a true constituent assembly for framing the constitution of free Hindustan for the uplift of the masses, the economic prosperity of the people, the uprooting of the present corrupt official regime for tackling the problem of hunger and unemployment and for preventing the exploitation of the impoverished masses.

"The Hindu Mahasabha is opposed to the pernicious principle of parity between Hindus and Muslims. It is inherently unjust to reduce a majority of three-fourths to the same position as a minority of one-fourth. This unfair reduction of 25 crores to the same level as that occupied by a minority of 8½ crores is undemocratic and will not solve the communal problem. The British Government has made impossible any agreement between communities and parties because it has conferred practically a veto in the hand of the communalist who has been given unfair weightage and excessive representation. The Hindu Mahasabha is of the opinion that the Wavell Plan, which envisaged no real transfer of power to Indian hands, was fore-doomed to failure because it was based on inherently unjust proposals of parity and the denial of representation to the Hindus as such while conceding recognition to the Muslim League.

"His Majesty's Government can call for the co-operation of all nationalist elements, Hindus and Muslim, who are willing to shoulder responsibility for tackling the triple issues of the integrity of India, opposition to parity and the demand for complete independence without a weakening or crippling of the Hindus. On these three issues His Majesty's Government should make an unequivocal declaration and the Hindu Mahasabha confidently calls upon the people to create sanctions for the effective enforcement of their just demands."

As remarked earlier, the Mahasabha receded into the background with growing political activity on the part of the Congress. Such influence as it had over the Hindu mind suffered as the result of a new declaration of Congress policy towards Pakistan and the proposed partition of India. The Working Committee of the Congress in the April of 1945 adopted a resolution on the subject which set its face squarely against the division of the country (see Chapter on the Indian National Congress). Here followed a period of feverish activity in which the Congress successfully eclipsed the Mahasabha. It was now in very few constituencies that the Mahasabha could put up its own candidates, but in the few it could command the support of the Mahasabha it invariably forfeited their deposit. The Hindu electorate solidly voted Congress.

When therefore the British Cabinet Mission arrived in India in the spring of 1946 and carried on negotiations with the Indian political parties, the Mahasabha was not taken in evidence. Mr. J. B. Kripalani, Acting President of the Mahasabha met the Mission and submitted a memorandum embodying the points made by way of memorial at the Independence of India Conference, the formation of an interim government with entire transfer of all power and authority of Government of India to this Government, the recognition of India's integrity and inviolability in opposition to territorial self-determination, the India's constitution to be of the federal type with the provisions for the grant of the utmost measure of autonomy to the federating units, the powers and the States dealt with residue of powers vested in the latter, (7) the governing principle of the constitution to be democracy, which means the rule of the majority, (8) representation in legislatures on the principle of adult franchise, (9) no division of India into British India and the Indian States, and (10) the setting up of a sovereign constituent assembly.

The memorandum stated that, as all sovereignty in respect of India was vested in the Indian people, it was the right of Indians to be fully and completely free.

As regards the Interim Government, the memorandum said that it should be composed of eleven representatives elected by the eleven provincial legislative assemblies, who should co-opt four members representative of such minorities as were not represented on it. These 15 members need not be members of Legislative Assemblies.

The Constituent Assembly itself should be as small a body as possible and should be composed of members elected by the Provincial Legislative Assemblies with power to co-opt representatives of such minorities as were not represented on it and some experts, if necessary.

The constituent body should be a sovereign one which would decide the terms of a treaty with Great Britain. It would decide all matters by a majority vote, and these decisions should be binding on all.

The memorandum emphatically declared that historically, ethnologically, politically and even culturally India was one whole and indivisible nation and it must remain so in future.

The Sabha was opposed to the principle of territorial self-determination which it said would prove as dangerous as Pakistan itself.

Since then, however, the Mahasabha has been completely out of the picture. The annual session of the organization, which was to have been held early in the year, was postponed. Instead, the Working Committee met in Calcutta towards the end of September when the unprecedented communal outburst at Calcutta provided grist to the Mahasabha mill. It expressed the view that the Muslim League should be declared an illegal body and dealt with as such, if it persisted in its attempt to indulge in unconstitutional and illegal activities. The committee urged the new Central Government and the Governor-General to exercise their powers for the maintenance of peace and tranquillity in the country. It also declared that the "Direct Action" declared by the Muslim League against British imperialism was a camouflage and was a manoeuvre to inflame the fanatical mass mind against the Hindus. It recorded its firm conviction that "the Calcutta massacre was organized and planned to terrorize and intimidate the Hindus in order to frighten them into acceptance of Pakistan."

Sikhs' attitude.—Although the Sikhs are not connected with the Mahasabha, it may be appropriate to mention in this chapter the Sikhs' rejection of the Cripps' formula. The Sikh All-Parties Committee in a representation to Sir Stafford Cripps declared that the proposals were unacceptable to them because: "Instead of maintaining and strengthening the integrity of India, specific provision has been made for separation of provinces and the constitution of Pakistan and the cause of the Sikh community has been lamentably betrayed." The Sikhs said: "Ever since the British advent our community has fought for England in every battle-field of the empire, and this is our reward, that our position in the Punjab, which England promised to hold in trust, and in which we occupied a predominant position has been finally liquidated.

"Why should a province that fails to secure 3/5th majority of its legislature in which a religious community enjoys statutory majority, be allowed to hold a plebiscite and given the benefit of a bare majority. In fairness this right should have been conceded to communities who are in permanent minority in the legislature.

"Further, why could not the population of any area opposed to separation be given the right to record its verdict and to form an autonomous unit? We are sure you know that the Punjab proper extended upto the banks of the Jhelum excluding Jhelum and Multan districts, and the trans-Jhelum area was added by the conquest of Maharaja Ranjit Singh and retained by the British for administrative convenience. It would be altogether unjust to allow extraneous trans-Jhelum population which only accidentally came into the province to dominate the future of the Punjab proper.

"We give below the figures which abundantly prove our contention:—

From the boundary of Delhi to the bank of the Ravi river the population is divided as follows—Muslims 4,505,000, Sikhs and other non Muslims—7,646,000

From the Delhi boundary to the bank of the Jhelum river excluding Multan and Jhang districts:—Muslims - 8,288,000, Sikhs and other non-Muslims—9 348,000

To this may be added the population of the Sikh states of Patiala, Nabha, Jind, Kapurthala and Faridkot, which is also 2,600,000. Of this the Muslims constitute barely 20 per cent and this reduces the ratio of Muslim population still further

"We do not wish to labour the point any more. We have lost all hope of receiving any consideration. We shall resist, however, by all possible means separation of the Punjab from the all India union. We shall not permit our motherland to be at the mercy of those who disown it."

Sikhs and Pakistan.—Subsequent to the withdrawal of the Cripps' offer the Sikhs have been somewhat in the limelight in connection with several proposals, unofficially mooted, to determine the allocation of territories and powers in the event of a compromise between the Muslim League and nationalist India. The virile and compact community of Sikhs, mostly confined to the Punjab, had an important say in regard to the question of Pakistan. With a view to buying over Sikh opposition to Pakistan and thereby strengthening the demand *vis-a-vis* the rest of India, Mr. Jinnah made more than one attempt to reassure the Sikh community and thereby induce them to come under the scheme of Pakistan on the basis of guaranteed safeguards for their interests. At one stage it looked as though a section of the Sikh leadership was favourably inclined towards Mr. Jinnah's gesture. Some of them seemed to be impressed with the argument that, whereas in an All-India

Federation the Sikh community would be a drop in the ocean, they would not be a negligible factor in Pakistan not only because of their proportion in the population of the Punjab, but also by virtue of statutory guarantees offered to them by the Muslim League leader. Eventually, however, Mr. Jinnah's overtures were turned down because the bulk of the Sikh community was opposed to Pakistan.

At the same time there began to grow up in the Sikh community a tendency at exclusivism and self-reliance. This was due, on the one hand, to the growingly militant Muslim League campaign for Pakistan and, on the other, a feeling that Hindu leadership might not hesitate to sacrifice the Sikhs for a settlement with League on the all-India plane.

The advent of the War and the supply by the martial race of Sikhs of a large number of recruits for the Allied armed forces invested this community with added importance in the eyes of British authority. Thus, for instance, a Sikh leader found a place in the expanded Executive Council of the Governor-General, and, later still, the community was given representation in the Simla Conference called by Lord Wavell to consider his proposals for the establishment of an interim Government at the Centre. Now a Sikh leader holds the Defence portfolio in the Interim Government.

Whereas the bulk of Sikh opinion continued to be hostile to the idea of partitioning India into Hindustan and Pakistan, there is a small section of opinion which suspects the possibility of the Congress compromising with the Muslim League in its Pakistan demand. This section tends to take the destinies of the community in its own hands and forestall a possible division of the country by entering into advance arrangements with the League in the event of the creation of Pakistan.

The latter school tended to form the Sikh community into a water-tight entity apart not only from the Muslims but also from the Hindus, with whom they still have close social and inter-marital relations. The fear that, in its anxiety to reach an all-India political settlement, the Congress might sacrifice the interests of the Sikhs was exploited by the Akali Group in the Sikh community, which was thus divided into two strong groups, one owing allegiance to the Congress and the other being hostile to that institution. In the general elections held in April 1946, the Akalis captured two-thirds of the number of seats reserved for them in the Punjab legislature, while the Congress got the remaining one-third, although an analysis of the voting figures revealed that the Congress candidates secured the support of nearly half the electorate.

Cabinet Mission and the Sikhs.—In the British Cabinet Mission's proposals the Sikhs were recognized as an important minority like the Muslims but unlike Indian Christians, Anglo-Indians or even Scheduled Castes, who all came under the term "General"; yet the Sikhs were not given the communal veto which was accorded to the Muslims in determining the future constitution. This constituted a sore point with the community whose spokesman wrote to the Secretary of State for India as follows:

"Since the British Cabinet Mission's recommendations for the future constitution of India have been published, a wave of rejection, resentment and indignation has run throughout the Sikh community. The reasons are quite obvious.

"The Sikhs have been entirely thrown at the mercy of the Muslims. Group B comprises the Punjab, the N.-W. F. P., Sind and Baluchistan, and the representation given to each community will be Muslims 23, Hindus nine and Sikhs four. Can anybody expect from this assembly, constituted as it is, any consideration or justice for the Sikhs? The Cabinet Mission recognises 'the very genuine and acute anxiety among the Sikhs lest they should find themselves subjected to a *perpetual* Muslim majority rule.' If the British Government are not aware of the Sikh feelings, the Sikhs will have to resort to some measures in order to convince everybody concerned of the Sikh anxiety, in case they are subjected to a perpetual Muslim domination. The Cabinet Mission has not only put under Muslim domination the non-Muslim areas of the Punjab and Bengal but the whole province of Assam where the non-Muslims are in overwhelming majority. This is evidently done to placate the Muslims. If the first consideration of the Cabinet Mission's recommendation is to give protection to the Muslims, why should the same consideration be not shown for Sikhs? But it appears that the Sikhs have been studiously debarred from having any effective influence in the province, a group or general Union. I refer to section 15 (b) and section 19 (vii) in which it has been definitely provided that the majority of both the Hindus and Muslims is necessary for certain purposes. The Sikhs are entirely ignored, though they are as much concerned as the other communities.

"This is how I read the recommendations of the Cabinet Mission. But as the issues are very grave and momentous, the Sikh representatives, assembled here to-day to consider the situation created, have advised me to seek clarification from you and find out if there is any hope of such amendments as may save the Sikhs from perpetual domination.

So I put three questions:

"(1) What is the significance of recognising the Sikhs as one of the main communities?

"(2) Suppose the majority of Section B frames a constitution under section 19 (vi) but the Sikh members do not agree does it mean deadlock or does the opposition of the Sikh members mean simply dissassociation?

"(3) Is there any hope of obtaining for the Sikhs the same right as is given to the Muslims and the Hindus under section 15 (ii) and 19 (vii)?"

The Secretary of State replied:—

"The anxieties of the Sikhs were kept prominently in mind when we were drafting the Cabinet Mission's statement, and I can certainly

claim that of the various alternatives open to us the best one from the Sikh point of view was chosen. You will, I am sure, admit that, if India had been divided into two sovereign States, or if the Punjab had been partitioned, either of these decisions would have been far less acceptable to the Sikhs than the one which was actually reached.

"I have considered carefully the detailed points you raise at the end of your letter. I fear the Mission cannot issue any addition to, or interpretation of, the statement. There is, however, no intention whatever to prejudice the position of the Sikhs in the Punjab or in the North-West Group, nor do I think their position has been prejudiced, for, it is inconceivable that either the Constituent Assembly or any future Government of the Punjab will overlook the special place in the province of the Sikhs. The estimate of the importance of your community would never depend on the number of seats that you held in the Constituent Assembly. The Viceroy has told me that he will be glad, in view of the anxieties you have expressed on behalf of your community, to discuss the position of the Sikhs specially with the leaders of the main parties when the Constituent Assembly has been formed. He hopes he may be able to persuade them, if persuasion is needed, that the interests of the Sikhs should on no account be overlooked.

"If you and Sardar Baldev Singh would care to see the Cabinet Mission and the Viceroy in the first week of June, we shall be glad to see you."

Sikh hostility to the Mission's proposals and the fear that they might be placed at the mercy of the Muslims in their own home-land unified the community, with the result that even Congressmen among them had to submit to the will of the majority. Although the Congress, towards the end of June, accepted the long-term proposals of the Mission, the Sikh community, under the leadership of the newly-formed Panthic Board (representative of all Sikh interests) decided not to participate in the proposed Constituent Assembly. The decision was reversed in response to the appeal made by Pandit Nehru to the Congress Sikhs, but was again reversed owing to a misunderstanding caused by Pandit Nehru's instructions. Then followed a series of negotiations between Sikh leaders on the one hand and the Congress and the League on the other. Eventually, the Sikh community decided to withdraw its rejection and to take part in the constitution-making effort on the understanding that the Congress would do everything in its power to safeguard the rights of the Sikhs. As a result of this decision, Sardar Baldev Singh, a leader of the community, was taken on as a member of the Interim Government formed in the Autumn of 1946.

The National Liberal Federation—

History of Moderate Politics.

A definite breach between the moderate and extremist elements in the Congress at its special session in Bombay in August 1918 (*vide* 1919 edition of this book) witnessed the birth of the National Liberal Federation which till the other day was the platform of Indian moderate leaders. Today liberalism in India is as good as dead. The country has become almost exclusively Congress minded, so that this Chapter has only historical value.

The National Liberal Federation held its first session in Bombay in 1918. Sir Surendranath Banerjee presiding. The Federation adopted for its creed the old Congress formula which was set aside by the Nagpur Congress. The Liberal Party in India has always been the rallying point of moderately progressive opinion. It has consistently stood for a pure type of nationalism and orderly progress through peaceful and constitutional means, as opposed to the revolutionary creed and policy of the Congress. During the first five or six years of its existence, the party played a useful and valuable part in politics and exerted a wholesome influence on public life. The death of the Rt. Hon. E. S. Montagu was a serious blow to the Indian Liberal Party whose influence on Indian affairs steadily waned since then. The Indian Round Table Conference brought it again to the front, but its influence again suffered partly as the result of the "reactionary provisions" of the Government of India Act of 1935 and partly as the result of the growing strength of the Congress organisation. The return of the Congress to the constitutional path ousted it from Indian politics. At the time of writing the Liberal Party exists only in name, there being no place for a middle group in Indian affairs of the present day. Latterly scope has arisen for activity in between extremist groups rather as mediators than as principals. This function of mediation has been filled by a group of leaders, consisting mostly of retired administrators and others who own no party affiliations or have severed party allegiance. Quite a few Liberal Party members have joined in the deliberations of this group in their individual capacity. Formed under the title of Non-Party Leaders' Conference, this group has itself crystallised into a centre party, throwing the Liberal Federation further into the background. Indeed, it was felt necessary to enter at a recent session of the Liberal Federation a special plea for the continuance of the Liberal Party in reply to suggestions that the party be wound up.

The general elections for the provincial legislatures under the Government of India Act of 1935 confirmed the exit of Liberals from active political life in India. Few Liberal candidates contested the elections, but hardly any was successful. During the past two or three years the Liberal Party existed only in name. Its leaders, however, made their existence felt by occasional contributions to the discussion of public questions. They also played a valuable part in offering sober and constructive criticism of the policies and actions of the majority party, the Congress. Such criticism was all the more useful owing to the absence of an opposition in most of the provincial legislatures in which the Congress was in power.

The elections of 1946 completed the rout of the Liberals who have ceased to be an effective factor in the country's political life. Their place has more or less been taken by the right wing of the Congress which in its turn is the result of the development of extremism within the Congress itself.

Although the Liberals hold no less progressive views than Congressmen, there is a fundamental difference between the two: the former have fixed Dominion Status within the Empire as their ambition, while the latter have set "complete independence" as their goal; similarly in the matter of method, the Liberals are opposed to direct action and are wedded to constitutional forms of agitation to accelerate the pace of the country's political advance.

There is another direction in which the Liberal Party's sentiments may be said to be different from those of the Congress. Having an abiding faith in the British connection and being convinced of the potentialities for good of the British Empire the Liberal Party constantly wishes well by the Empire and what it stands for. For this reason no member of the Party wished anything but success for the Empire in the struggle against aggression. Many of them gave public expression to their convictions in this behalf and to their undoubted desire that India should render full support to Britain in her war.

Latterly, however, the bulk of the Liberals have shown signs of impatience over the deadlock in the country. While they were ready to realise that the attitude of the Congress was not a little responsible for the political *impasse*, they were by no means happy over the bureaucratic form of administration both at the centre and in the majority of the provinces. They wished that the authorities should make an effort to end the political inactivity. Towards this end they made repeated appeals to the British authorities.

Not all of these were made in the name of the Liberal Federation. Indeed the most influential and well known exponents of the view-point of the Liberal Federation do not belong to that organisation. Take for instance, the Non-Party Leaders' Conference whose proceedings figured largely in Indian politics during the past two or three years. The President and more than one leading light of this Conference are not members of the Liberal Federation. It is nevertheless true that the views of both are identical on many subjects. It may therefore be appropriate to deal with the activities of these leaders in this Chapter.

A Dual Policy.—The activities of the Liberals and other moderate leaders during the past couple of years, till the summer of 1946,

have followed a dual policy. On the one hand, they were never slow to denounce any attempt to hamper the country's war effort, and, on the other, their demands were little different from those of the Congress.

The period when the Congress was in the wilderness, especially since the adoption of the August resolution till the release of the Congress in June, 1945, may perhaps be described as the moderates' era in Indian politics. Not that they regained their lost influence, nor that the masses abandoned their extremist tendencies which they had acquired from the Congress propaganda. If anything, extremism, feeding on itself, became more extremist. Nevertheless, it was a moderates' period in the sense that the moderate leaders occupied the public stage. The Congress exit into wilderness was partly responsible for this development. When the satyagraha movement was in progress, there was hardly any politics worth the name except the activities of the Liberals and other moderate leaders. Another reason for public attention being directed towards moderate politics was the effort made by the British Government to meet the demands of moderate leaders. It cannot be said that the authorities did anything substantial to enhance the reputation, and strengthen the position, of the sober element in the Indian political world; on the contrary, the point was frequently made that the way in which the Liberals were ignored gave additional impetus to extremism. But such action as was taken was the result of the outspoken representations made by the moderate leaders. The year 1944-45 was marked by the jubilee session of the Liberal Federation which completed 25 years of public service. Another remarkable activity was the evolution by Sir Tej Bahadur Sapru and a Committee of non-party leaders of a compromise formula relating to India's future constitution. This was drawn up following the failure of the Gandhi-Jinnah negotiations in the autumn of 1944.

Activities in 1943-44. During the year 1943-44 the activities of the Liberals and the peace efforts of moderate gentlemen generally were of a limited character. This was due partly to the stagnant nature of the attitude of both sides to the dispute, namely, Government and Mr Gandhi. Whereas the Government of India refused to move from the decision not to reopen the question unless Mr Gandhi abrogated the "Quit India" resolution of August 1942 and forswore the policy underlying it, Mr. Gandhi, for his part, gave no indication to respond in terms of the Government demand. Notwithstanding the hopes and speculations of those who variously claimed to know Mr. Gandhi's mind, his own attitude seemed hardly to have varied from the sentiments expressed by him in his letter to Lord Linlithgow and the Government of India published on the eve of his fast in February 1943. Thus there was available to the intermediaries no common factor which they could exploit to bring about an understanding between the two opposite view-points.

Even so, efforts, though of a sporadic nature, continued to be made by unattached leaders to secure a change in the official policy towards the Congress or at least to induce Government to release the leaders so as to enable them to consider the altered situation. Undeterred by their failure to move the Government following Mr. Gandhi's fast, the moderate leaders urged the appointment of an impartial tribunal to investigate the charges made against Congress under detention or, in the alternative the release of those leaders so as to enable them to review the situation and attempt a solution of the deadlock. To this, however, the Secretar of State replied in the House of Commons, saying that the Government of India had no intention of "staging a trial" of Mr. Gandhi and other detained Congress leaders.—(See last year's issue).

In the winter of 1943-44 the annual session of the National Liberal Federation met in Bombay under the presidentship of Kunwar Sir Maharaj Singh. The Session was remarkable for the diametrically opposite view points expounded by the President and the Chairman of the Reception Committee (Sir Cowasjee Jehangir).

While deploring the August resolution of the Congress, Sir Maharaj Singh criticised Government for failure to announce a complete change of policy at the commencement of the war, adding that "if Sir Stafford Cripps had come to India with his proposals in 1939 or early in 1940, instead of 1942, there would have been an excellent prospect of their acceptance." Under present conditions, he deplored, "we are face to face with a divided India, with thousands of our fellow-countrymen, including many prominent and popular leaders, in prison, the retention by European officials of the key departments of Finance, Defence and Home in the Government of India, a complete absence of popular government in large portions of India, swollen prices, general distress and famine in large and densely populated areas." Sir Maharaj complained that the advice of moderate leaders had been brushed aside by Government.

Sir Cowasji Jehangir took a different view of the problem. He blamed the Congress for the failure of the Cripps Mission and affirmed that it broke down owing to the eleventh hour raising of the issue of the Viceroy's veto. He cited Mr Jinnah's opinion in support of the contention that the formation of a national Government on the lines of the Congress demand would have been totally opposed by the minorities in general and the Muslims in particular.

After drawing attention to the events that followed the August resolution Sir Cowasji declared that if any progress was to be made it was essential that the Congress should not only withdraw the August resolution but also give an assurance to the British public and to the peoples of the Allied Nations that all people in India were behind this war and that they would unconditionally and enthusiastically help the war effort.

Resolutions. The unconditional release of Congress leaders, the treatment by the Congress leaders of the "Quit India" resolution of August 1942 as a dead letter, a conference of political parties and the formation of national composite governments at the Centre and in the provinces—these suggestions were embodied

in a resolution, passed by the session. The conference also passed resolutions dealing with the war, India's position at the peace conference, Government's food policy and the Bengal famine.

Early in the summer of 1944, a session of the Non-party Leaders' Conference met at Lucknow under the presidentship of Sir Tej Bahadur Sapru. (See last year's issue)

Two-fold Appeal.—In June 1944 the Council of the National Liberal Federation met in Poona and made a two-fold appeal one to the Government unconditionally to release Congressmen not found guilty of violence and the other to the Congress to treat the August resolution as a dead letter, to put it aside and take measures to arrive at a working arrangement with other political parties for the formation of a provisional Government.

Liberal Federation and Pakistan.—The next meeting of the Council was held at Allahabad in October and expressed the opinion that the two nations theory advanced by Mr. Jinnah was opposed to facts while his insistence on a plebiscite confined to Muslims was unfair to other communities and incompatible with democratic concepts. The Council also declared that the division of the country into two or more separate sovereign states was not a right solution for the Hindu-Muslim question.

Conciliation Committee.—Soon after the failure of the Gandhi-Jinnah talks in Bombay Sir Tej Bahadur Sapru, President of the Non-Party Conference, announced his intention to set up a committee (called the Conciliation Committee), comprising eminent public men with no marked political affiliations, to examine the Indian communal question from a political and constitutional point of view. This was the outcome of a resolution passed by the standing Committee of the Non-Party Conference which said: "The Standing Committee of the Non-Party Conference, having considered the present situation in view of the breakdown of the Gandhi-Jinnah talks on the communal issue, hereby resolves to appoint a committee which will examine the whole communal and minorities question from a constitutional and political point of view, put itself in touch with different parties and their leaders, including the minorities interested in the question, and present a solution within two months to the Standing Committee of the Non-Party Conference. The Standing Committee will take all reasonable steps to get that solution accepted by all parties concerned. The Standing Committee authorises Sir Tej Bahadur Sapru to appoint members of the committee and announce their names in due course."

Sir Tej Bahadur Sapru explained that he had placed before Mr. Gandhi the idea of a committee of the kind now decided upon and Mr. Gandhi had said:—"I shall unreservedly co-operate with it. You can call me whenever you like, put me any questions you like and ask me for any assistance you like."

Sir Tej Bahadur added that it was his intention that there should be on the committee no one who was a partisan or one who had expressed himself violently on political issues of the country. It was also the idea that there should be one or two retired judges who would bring a judicial mind to bear on the country's problems.

The basic conception of the committee was that the discussion of the communal and political problem should be lifted from the partisan level to the scientific and judicial level.

The effort of the committee would be to understand the views of each party, act as a sort of conciliation board by establishing contact with all parties and recommend some solution that they thought good on their own responsibility. "It would be open to each party to accept it wholly or partially or to reject it" said Sir Tej Bahadur. "There is no question of failure or success. When the committee has done its work, it will be for the leaders of different parties to consider whether at that stage they should not call a bigger conference—either an all parties conference or a convention."

"Explaining the function of the proposed committee, Sir Tej Bahadur stated that it would approach various political leaders "very politely and very courteously", and invite them to explain their points of view. It was possible that some might refuse their co-operation and rebuff the committee, but that would not deter them.

The personnel of the Committee was completed towards the end of the year. It included eminent leaders from different communities most of whom fulfilled Sir Tej Bahadur's qualifications, in particular that they should be experts, eminent and experienced and non-partisan in outlook. They included the Metropolitan of India, Sir S. Radhakrishnan, Sir Maharaj Singh, Sir Jagdish Prasad, Sir N. Gopalaswami Iyengar, Mr Tushar Kanti Ghosh, Mr. N. M. Joshi, Mr. P. R. Das, Sardar Sant Singh, Sardar Harnam Singh, Mr. K. B. Nabi Bux Hussain, Sir H. P. Mody, Dr. John Mathai, Dr. P. K. Sen, Mr. Frank Anthony and Mr. B. L. Rallia Ram.

Committee's Aim and Scope.—The Committee began its work on December 29, 1944, with an opening address by the President, Sir Tej Bahadur Sapru, defining the exact scope and functions of the Committee "Our essential duty", he said, "is to apply our minds to the basis of the constitution, not to detailed provisions of the constitution.

"We are approaching our task in a true spirit of humility. The sincerity of our motives may be attacked; we may be supposed to carry on a diabolical conspiracy against others; but we have nothing to conceal, we have nothing of which we need feel ashamed. We only claim the common right of the citizens of this country to form and express our opinions for what they are worth."

The object of the Committee, Sir Tej Bahadur made it clear, was not to frame a detailed constitution. That must be left to some other body and he hoped that that body would come into existence. No one relished the idea that this country should continue to be in its present state "If", he said, "we fail to come to an agreement, somebody else must discharge his duty in this matter. That somebody else must be the British Government."

"Let me assure you", said Sir Tej Bahadur, 'I have got some very encouraging letters and memoranda, even from Muslims". Sir Tej Bahadur mentioned that as many as nine memoranda were from Muslims; one valuable memorandum had come from a very distinguished Muslim, who had approached the problem from an entirely independent point of view.

Sir Tej Bahadur had also received similar encouraging letters from quarters from which he did not expect any encouragement. He had received letters and telegrams from England.

"I have tried to approach Mr. Jinnah. He does not want to recognise the Non-Party Conference or this Committee. I have no quarrel with him. He may not recognise us. But we recognise ourselves. That is my answer. This Committee will go on. This Committee must discharge its duty."

He had tried to approach the Sikh leaders and had received an encouraging reply from Master Tara Singh. He had approached Dr. Syama Prasad Mookerjee and Mr. Savarkar. They had agreed to see him.

This Committee, Sir Tej Bahadur pointed out, was not established on the basis of representation of each caste or community; but he left it to the Committee to decide for itself on this question. He was anxious to get representation of the Scheduled Classes. At one stage Dr. Ambedkar seemed agreeable to help the Committee in this matter, but, later, he said he did not approve of some of the Committee's members—Sir Tej Bahadur did not know who were the sinners.

However, the amount of literature available about the Depressed Classes was enormous and there were men in this Committee to whom the interests of the Scheduled Classes were as dear as to any leader of those classes.

Mr. Gandhi's Views.—The material on which the Committee based its discussions included memoranda which the committee had received from various organisations and individuals. Sir Tej Bahadur Sapru, sent to Mr. Gandhi the committee's questionnaire for a reply, but the latter wrote back saying that he would prefer to reply to any specific questions that may be put to him with reference to his talks with Mr. Jinnah.

The following are some of the questions put to Mr. Gandhi and the replies received from him:—

Question:—In his letter of September 17, Mr. Jinnah says that "the word (Pakistan) has now become synonymous with the Lahore resolution." Did you ask him whether in accordance with the Lahore resolution of the All-India Muslim League a scheme of constitution in accordance with the basic principles provided for the assumption finally by the respective regions of all powers such as defence, external affairs, communications, customs and such other matters as may be necessary, had been prepared? Was your attention drawn to any such scheme by Mr. Jinnah?

Answer:—"No, Qaide Azam's position unfortunately was that while he could come as far as seeing me and trying to convince me of his position, he, the President of the League, could not discuss details with me, a mere individual. But so far as I could gather from our conversations, he had no prepared scheme. As the correspondence shows, he had referred me to two books, both of which I read, but neither of which could help me to understand his exact position. One thing he insisted upon was that if I first accepted the Pakistan of his conception, he could then discuss other things with me, even though I was but an individual."

Asked if it was true that the real breakdown between him and Mr. Jinnah came about on the question of central authority or Government, Mr. Gandhi replied: "It can be said that the breakdown took place because we could not come to an agreement on the two-nation theory of Qaide Azam. As the correspondence will show, I wanted to avoid a central Government. I suggested an authority acceptable to both the parties, but he would insist first on complete partition as between two nations and then an agreement between them as on foreign affairs, etc. He would not agree to anything simultaneous."

Mr. Gandhi's attention was drawn to a passage in his letter to Mr. Jinnah dated September 28, 1944, in which he said:—"That if it means utterly independent sovereignty so that there is to be nothing in common between the two, I hold that it is an impossible proposition. That means war to the knife" and was asked what he meant by "war to the knife."

Mr. Gandhi replied: "War to the knife is a simple English idiom. I have never known it used in the literal sense. It simply means a determined quarrel between parties. I hold that if there is nothing in common between the two or nothing which does not come in conflict with each other's culture, there can be no friendly mutual agreement."

To another question Mr Gandhi replied "Although I could not agree to the two-nation theory, I agreed on the basis of members of a family desiring severance of the family tie in matters of conflict but not in all matters so as to become enemies one of the other as if there was nothing common between the two except enmity."

C.R.'s. Support.—Mr. C. Rajagopalachari wrote to the Committee:

"I have your circular letter of Dec. 3 about the Conciliation Committee. I need hardly say how warmly I wish you every success.

"As regards my views of which you have asked for a memorandum, they are contained in the 'C. R. Formula' which formed the subject matter of the Gandhi-Jinnah talks. I am unable to improve the terms of that formula.

"I may clarify a point which has been deliberately misrepresented by certain advocates of the Muslim League. It is only for fixing the Pakistan area of Punjab and Bengal that I have in my formula asked for examination of population statistics district by district. Once the area is thus delimited, my formula leaves the verdict on the issue of separation to the people inhabiting the delimited area as a whole. It is not the intention of the formula to take the plebiscite district by district. Plebiscite by districts would involve the possibility

of the contiguity of the area being lost if one district votes one way and another district in a different way. This is therefore avoided. The clause as to the right of districts on the border is a safeguard to ensure the prevailing of popular opinion where the contiguity would not thereby be disturbed.

"My position after the failure of the Gandhi-Jinnah talks is set out in the introduction to the Gandhi-Jinnah talks published by the 'Hindustan Times'. I need add nothing to what I have stated therein about the communal issue. I wish, however, to add one other point for the consideration of the Committee. It is not psychologically possible to create an atmosphere of reasonableness unless Self-Government on democratic lines in some shape or other is a settled fact, and such form of Government as is functioning and threatens to continue is replaced by an agreed constitution. I therefore appreciate the stand taken by the Non-Party Conference. The federal part of the Government of India Act of 1935 should with suitable modifications, be introduced at once with or without fresh Provincial elections according to the convenience of the British Government. I would prefer fresh basic Provincial elections, so that if the federal part of the Government of India Act of 1935 cannot be brought into force at once during interim period, an 'ad hoc' control executive may be constituted out of the Provincial Governments of the 11 Provinces which should all be restored in replacement of the Section 93 regimes. This 'ad hoc' Central Executive should replace the present Viceroy's Council. This can be done with very little parliamentary legislation and may be statutorily vested with a fixed term of tenure. If either of these things is done and a Central Executive is constituted on a popular basis, there will be a sanction of conciliation. An agreed constitution on the basis of the declaration of His Majesty's Government of April 11, 1942, will replace the interim arrangement. Parties will feel that unless they come to an agreement the interim arrangement will continue."

Cable to Lord Wavell.—While the Committee was still in session and before the formulation of its conclusions, Sir Tej Bahadur sent a cable to Lord Wavell, who was then in London discussing with His Majesty's Government proposals for a solution of the Indian political deadlock, communicating the following resolution unanimously adopted by the Committee:—

"In view of the internal situation particularly relating to the economic life of the people and in view of the rapid pace at which international events are marching, and in view of the necessity of India being represented in her own right and by her own representatives at all international conferences and peace conferences, if any, this committee strongly recommends that the following steps be taken at once:

"(1) All political prisoners and detenus be released immediately;

"(2) India should, by a royal proclamation, be declared an independent state and treated as a dominion equal and in no way inferior to any other dominion of the British Commonwealth of Nations, even though, pending the framing and coming into force of a new constitution, the Government of India may have to be conducted in conformity with the provisions of the Act of 1935 subject to minimum necessary modifications;

"(3) (*a*) The proclamations issued in several provinces under section 93 of the Act should be withdrawn forthwith and the legislatures allowed to resume their normal activities; (*b*) Popular Ministries should be re-established in those provinces and allowed to function under the provisions of the Act; (*c*) In the formation of such Ministries the Prime Minister representing the largest single party in the legislature should be required as far as possible to include in the Ministry persons commanding the confidence of other parties in the legislature.

"(4) In addition to the restoration of autonomy in all the provinces of British India a National Government should replace the present Executive Council at the centre.

"For this purpose the committee would recommend for consideration the following two alternatives:

FIRST ALTERNATIVE.

"(a) Section five of the Government of India Act, 1935 should be so amended as to provide for the issue of a proclamation by His Majesty bringing into being forthwith a federation of India without insisting on the entry of Indian States as a condition precedent as provided in sub-section (2) of the said section, Indian States being at liberty to accede to the federation in accordance with the terms of section 6 of the Act.

"(b) Part II of the Government of India Act, 1935 with the proposed amendments should be brought into force and steps taken immediately to hold elections to the two houses of the federation legislature and to appoint a Council of Ministers in accordance with the provisions contained in that part.

Provided, however, that in the formation of such a ministry, the prime Minister representing the largest single party in the Legislature shall as far as possible, include in the ministry persons commanding the confidence of other important parties in the legislature.

SECOND ALTERNATIVE.

Schedule IX of the Act may be continued in force but should be so amended as to provide for altering the constitution and functioning of the Governor-General-in-Council on the following lines:

(A) Except for the Commander-in-Chief who may continue to be ex- officio member of the Executive Council in charge of war operations and matters ancillary thereto the entire Executive Council should consist of Indians commanding the confidence of the parties in the Central Legislature, the provision in sub-section (3) of section 36 which requires that three at least of the members should be persons who have been in the service of the Crown in India for a period of at least ten years being repealed.

(B) No officials belonging to the permanent services shall be nominated to either House of the Central Legislature. The nominated block

in each of the two houses shall consist entirely of non-officials nominated by the Governor-General-in-Council.

(C) In the 9th schedule of the Act the provisions excluding from the control of the Legislature expenditure under heads Ecclesiastical, External affairs, Defence, Tribal areas and other items incurred by the Governor-General in his discretion shall be repealed.

(D) The Political Adviser to the Crown Representative should be an Indian with the rank and status of an Executive Councillor though he may not be a member of the Executive Council.

(E) The decision as to when the general elections to the Central and Provincial Legislatures should take place should be left to the National Government at the centre and the popular governments in the provinces.

"The Committee greatly appreciates your initiative in proceeding to London for the purpose, as it believes, of ending the present political deadlock in the country and trusts that the suggestions that it is now making will be of assistance to you and His Majesty's Goverment in solving the problem that faces you. The Committee is continuing its work."

The cable represented the first part of the Committee's work and contained its recommendations with regard to the interim period.

Mr. Jinnah's Protest.—Mr. Jinnah, who represented the principal factor in the internal deadlock, reacted unfavourably to the suggestions made in Sir Tej Bahadur's cable to Lord Wavell. Mr. Jinnah said :

"Sir Tej Bahadur Sapru and his associates have been passing off under different labels from time to time, first as 'all party conference,' then as 'no party conference' and now they have assumed the label of 'conciliation committee.'

"They are nothing but handmaids of the Congress and have played and are playing to the tune of Mr. Gandhi. Their pompous and pious profession that they are a detached and independent body of men is utterly false, and this is clear from their previous activities and resolutions and from the character and the nature of the present resolution they have passed conveying their proposals to Lord Wavell

"Two alternatives are offered. The Muslim aspirations and their national demands of Pakistan would be torpedoed by this subtle and flanking movement, if either of them is accepted.

"Muslim India will not accept any attempt to change the present constitution in any way which would directly or indirectly be on the basis of a united India. The question of Pakistan is the first and the foremost issue to be decided preliminary to any consideration of the framing of any future constitution any attempt to militate against, prejudice or torpedo the Pakistan demand directly or indirectly, if countenanced by the British Government will be at the sacrifice and betrayal of the hundred million Mussalmans in this land.

"I am confident that having regard to the solemn declarations of His Majesty's Government and the pledges and assurances given to the Muslims they will not go back as an honourable nation and coerce the Mussalmans or force or impose upon them a constitution against their will and without their approval and consent. If the British Government are stampeded into any departure from or reversal of their declared policy by some undue pressure, which I do hope will not be the case. I shall be failing in my duty, having regard to the temper, determination and the deep feelings of Muslim India regarding this issue, if I did not draw the attention of Britain to the disastrous consequences it may lead to; for which the British Government alone will be responsible.

Hindu-Muslim Parity.—Within a week the Sapru Conciliation Committee unfolded its proposals for the future constitution of India which proceeded on the basis of parity between Hindus, other than the Scheduled Castes, on the one hand, and Muslims on the other, in the constitution-making body, the future Central Legislature and in the Executive, the overriding condition being that the unity of India and joint electorates were accepted.

The Committee emphatically declared itself against Pakistan. Mr. N. M. Joshi dissented from this declaration, as also from the corollary that no province should elect not to accede to the future Indian Union or secede therefrom.

The Committee envisaged the transfer of Paramountcy to the Union, and recommended the appointment of a Minister in charge of functions in relation to Indian States, with whom a body of three Indian States' advisers is to be associated.

A declaration of fundamental rights, the setting up of a minorities commission, and special proposals for minorities in the Punjab were included in the Committee's recommendations.

"It is needless to say that the recommendations do not constitute a full blue print for the future constitution" Said the Committee "They merely indicate the outlines which the Committee feels would suit the conditions in India. They are essentially suggestions made for the constitution of the country at large

"These proposals are confined to British India only. When the Indian States decide to come into the Union, as the Committee hopes they will, it is obvious that arrangements will have to be made in consultation with them for necessary adjustments and additions."

The Constitution-Making Body.—The constitution-making body shall be constituted in the manner prescribed in Clause "D" of the draft resolution of His Majesty's Government brought by Sir Stafford Cripps, subject to the following modifications :—

(1) The total strength of the body shall be 160, distributed as follows : Special Interests namely, commerce and industry, land-holder-universities, labour and women—16 ; Hindus excluding the Scheduled Castes—51 ; Muslims 51 ; Scheduled Castes—20 ; Indian Christians 7 ; Sikhs— 8 ; Backward areas and tribes—3 ; Anglo-Indians—2 ; Europeans—1 ; others—1

(2) It is because Clause "D" of His Majesty's Government's declaration provides for election by a joint electorate, composed of members

of all Provincial Legislatures, under the system of proportional representation, that the Committee has decided to recommend that, in spite of the disparity in the population strengths between Muslims and Hindus other than the Scheduled Castes, the Hindu community should, in the interests of promoting communal unity, agree that the representation of the Muslim community on the constitution-making body shall be on a par with that given to the Hindus, other than the Scheduled Castes.

(3) No decision shall be valid unless it is supported by three-fourths of the members present and voting.

(4) His Majesty's Government shall enact the constitution on the basis of the valid decisions of the constitution-making body, supplemented wherever necessary by its own awards on matters in which the requisite majority for decision was not forthcoming.

Division of India.—The Committee, having considered carefully the resolution of the Muslim League passed at Lahore in 1940, the various other resolutions of the League and the published version of the talks between Mr. Jinnah and Mahatma Gandhi, and having also considered the "C. R." and Gandhi proposals, is emphatically of the opinion that any division of India into two or more separate independent sovereign States is unjustified, and will endanger the peace and orderly progress of the whole country without any compensating advantage to any community, and that the political unity of India should therefore, be maintained.

Indian States.—Provisions should be made in the constitution for the accession from time to time of Indian States as units of the Union on such terms as may be agreed upon. The establishment of the Union should not, however, be made contingent on the accession of any Indian State or of any minimum number of Indian States. The Union should be brought into being and should commence to function at the earliest possible date, even if no Indian State has acceded to it as a unit by then.

Non-Accession and Secession.—No province of British India may elect not to accede to the Union, nor may any unit—whether a Province or a State, which has acceded—be entitled to secede therefrom.

Provincial Boundaries.—While it is not desirable that the new constitution should be delayed by the realignment of provincial boundaries on linguistic or cultural considerations, the Constitution Act shall indicate the machinery and prescribe the procedure for such realignment of the old Provinces and for the creation of new Provinces after it has come into force, and on such realignment or creation of Provinces all consequential amendments may be made, in the constitution.

The Committee submits the accompanying suggestions for the consideration of the constitution-making body. They have been placed before the Committee by one of its members, who has great experience of the administration of Indian States and of the working of the Government of Indian Act (1935) in relation to them. As the Indian States are not represented on this Committee, and as the suggestions are of a very vital and far-reaching character, the Committee has thought it desirable to express no opinion on the merits of the several alternatives suggested beyond stating that a clear definition of "a Head of the State" is necessary as the several resolutions adopted by the Committee assume the existence of a Head of the State and the exercise by him of certain powers and functions. The member responsible for these suggestions agrees that they, or any variant of them, involving the participation of the Indian States, cannot be finally adopted except with the consent of the Indian States.

(1) There shall be a Head of the State (that is, Union) in India, who shall be the repository of (*a*) all such powers and duties as may be conferred or imposed on him by or under the Constitution Act; and (*b*) such other powers as are now vested in His Majesty the King of England, including powers connected with the exercise of the functions of the Crown in its relations with Indian States, provided that in relation to his powers, the Head of the State shall conform to the traditions, usages and conventions which are binding on the constitutional head of any State.

(2) The office of Head of the State shall have a tenure of five years, and ordinarily no person may hold the office for more than one term.

First Alternative.—The head of the State shall be elected by an electoral college composed of the members of the two Houses of the Union Legislature, either without any restriction as to their choice, or subject to their choice being confined to the Rulers of Indian States having a minimum population, or revenue, or both, to be named in a schedule to the Constitution Act.

Second Alternative.—(3) The Head of the State shall be elected by the Rulers of the Indian States referred to above from amongst themselves.

Third Alternative.—The Head of the State shall be appointed by His Majesty the King of England, on the advice of the Union Cabinet, either without any restriction as to his choice, or subject to his choice being confined to the Rulers of the Indian States referred to above.

(4) In case the third alternative is adopted, and a link with the British Crown is maintained, the Secretary of State for India, together with all the control that he or the British Cabinet exercises over Indian administration, should, in any case, be abolished.

(5) The head of a unit, other than an Indian State, shall be appointed by the Head of the State on the advice of the Union Cabinet.

Union Legislature.—(*a*) The Union Legislature shall consist of the Head of the State and two Chambers the Union Assembly and the Council of State.

(*b*) The strength of the Union Assembly shall be so fixed that there shall be on the average one member for every 1,000,000 of the population.

(*c*) Ten per cent. of the total strength shall be reserved for the representation of the following

special interests: Landholders; commerce and industry; labour; women.

(*d*) The remaining seats shall be distributed among the following communities: (1) Hindus, other than Scheduled Castes; (2) Muslims; (3) Sikhs; (4) Indian Christians; (5) Anglo-Indians; (6) other communities.

(*e*) (i) in case the Muslim community agrees to the substitution throughout of joint electorates with reservation of seats for separate, communal electorates, in that case only this Committee would recommend that, in the interests of promoting national unity, the Hindu community should agree that in the strength of the Central Assembly, excluding the seats allotted to special interests, such as commerce and industry, landholders, labour, etc., Muslim representation from British India shall be on a par with the representation given to the Hindus (other than Scheduled Castes), in spite of the great disparity in their respective population strengths.

The Committee desire to emphasise their view that if this recommendation is not to be implemented in its entirety, the Hindu community should be at liberty not merely not to agree to the claim for parity of representation, but to ask for a revision of the Communal Award.

(ii) The Committee considers that the representation given to the Sikhs and Scheduled Castes in the Government of India Act is manifestly inadequate and unjust and should be substantially raised. The quantum of increased representation to be given to them should be left to the constitution-making body.

(*f*) For the Union Assembly there shall be adult franchise, for seats other than those reserved for special interests.

(*g*) For the special interest, there shall be special constituencies. There shall be direct election to the Union Assembly. As for election to the Council of State, the question shall be decided by the constitution-making body.

Lists of the matters in respect of which the power of making laws for peace, order and good Government, and the functions pertaining to the administration of these laws, shall fall within the sphere, respectively, of the Centre and the units shall be embodied in the Constitution Act. The detailed drawing up of these lists should be left to the constitution-making body. The Committee, however, would recommend that the following principles, among others, should guide the constitution-making body in the distribution of powers and functions between the Centre and the units:—

(A) The powers and functions assigned to the Centre should be as small in number as possible, provided that they shall in any case include (i) matters of common interest to India, as a whole, such as foreign affairs, defence, relations with Indian States, inter-unit communications, commerce, customs, currency, posts and telegraphs; (ii) settlement of inter-unit disputes; (iii) co ordination where necessary of the legislation and administration of different units; and (iv) such other matters or action as may be required for ensuring the safety and tranquillity of India or any part thereof, or for the maintenance of the political integrity and economic unity of India, or for dealing with any emergencies.

(B) While all matters not assigned to the Centre exclusively or concurrently must be declared to fall within the sphere of the units a list of these should, for greater certainty, be given in the Constitution Act, with the rider that all residuary powers—those not included in either of the two lists shall vest in the units.

(C) All customs barriers between one unit and another shall be abolished, and there shall be free trade within the Union, provided that, where the abolition of existing customs barriers affects prejudicially the finances of a unit, it shall be entitled to adequate compensation out of the revenues of the Union Executive.

(A) Subject to the provisions of Clause (B), the Executive of the Union shall be a composite Cabinet in the sense that the following communities shall be represented on it: (i) Hindus, other than Scheduled Castes; (ii) Muslims; (iii) Scheduled Castes; (iv) Sikhs; (v) Indian Christians; (vi) Anglo-Indians.

(B) The representation of these communities in the Executive shall be, as far as possible, a reflection of their strength in the Legislature.

(C) The Cabinet shall be deemed to be duly constituted, notwithstanding the absence from it temporarily of representatives of any of the communities mentioned in Clause (A). Where, on account of a whole community refusing to join or remain in a Cabinet that community goes, without representation therein, the vacancies may, pending the availability of members of that community, be filled by the appointment of members of other communities, and the Cabinet may commence or continue to function, provided it commands a majority in the Legislature.

(D) The Cabinet shall be collectively responsible to the Legislature.

(E) The Cabinet shall be led, guided and held together by a Prime Minister, who shall ordinarily be the leader of a party, which by itself, or in combination with other parties, is able to command a stable majority in the Legislature. A convention should be created that the offices of the Prime Minister and the Deputy Prime Minister should not be monopolised by any one community.

(F) The other members of the Cabinet shall be appointed on the advice of the Prime Minister.

(G) One of these Ministers shall be designated Deputy Prime Minister, and it shall be a standing rule that the Deputy Prime Minister shall not belong to the same community as the Prime Minister.

Alternative.—(A) Subject to the provisions of Clause (B), the Executive of the Union shall be a composite Cabinet in the sense that the following communities shall be represented on it: (i) Hindus, other than Scheduled Castes; (ii) Muslims; (iii) Scheduled Castes; (iv) Sikhs; (v) Indian Christians and (vi) Anglo-Indians

(B) The representation of these communities in the Executive shall be, as far as possible, a reflection of their strength in the Legislature.

(C) The Cabinet shall be deemed to be duly constituted notwithstanding the absence from it temporarily of representatives of any of the communities mentioned in Clause (A) where, on account of a whole community refusing to join or remain in a Cabinet that community goes without representation therein, the vacancies may, pending the availability of members of that community, be filled by the appointment of members of other communities, and the Cabinet commence or continue to function, provided it commands a majority in the Legislature.

(D) The Cabinet shall be elected by the Central Legislature in a joint session by the system of the single transferable vote. The elected Ministers shall hold office for the duration of the Legislature. The Legislature shall elect from among the Ministers a President and a Deputy President who shall not both belong to the same community.

Minister for Indian States.—There shall be a Minister in charge of the functions in relation to Indian States, and with him shall be associated a body of persons, not less than three and not more than five in number, who shall be called Indian States' advisers, and who shall be chosen in the manner agreed upon with the Indian States. The Minister shall consult the Indian State advisers in all important matters, and shall obtain their concurrence in respect of certain matters to be specified in the Constitution Act.

Judiciary.—(1) There shall be a Supreme Court for the Union and a High Court in each of the units.

(2) The strength of Judges in each of these courts at the inception of the Union, as well as the salaries to be paid to them, shall be fixed in the Constitution Act and no modification in either shall be made except on the recommendation of the High Court, the Government concerned and the Supreme Court, and with the sanction of the Head of the State (a Governor General or President as the case may be), provided, however, that the salary of no Judge shall be varied to his disadvantage during his term of office.

(3) (A) The Chief Justice of India shall be appointed by the Head of the State and the other Judges of the Supreme Court shall be appointed by the Head of the State in consultation with the Chief Justice of India.

(B) The Chief Justice of a High Court shall be appointed by the Head of the State in consultation with the head of the unit and the Chief Justice of India.

(C) Other Judges of a High Court shall be appointed by the Head of the State in consultation with the head of the unit, the Chief Justice of the High Court concerned and the Chief Justice of India.

(4) A Judge or a High Court of a Supreme Court shall be appointed for life, subject to an age-limit prescribed by the Constitution Act, but he may by resignation addressed to the Head of the State resign his office.

(5) (A) A Judge of the High Court may be removed from office by the Head of the State on the ground of misbehaviour or of infirmity of mind or body, if on reference being made to it by the Head of the State, the Supreme Court reports that the Judge ought on any such grounds to be removed.

(B) The Judge of the Supreme Court may be removed from office by the Head of the State on the ground of misbehaviour or of infirmity of mind or body, if on reference being made to it by the Head of the State, a special tribunal appointed for the purpose by him reports that the Judge ought on any such grounds to be removed.

(6) As regards other matters connected with the appointment and function of the Judiciary, the provisions embodied in Part 6 of the Government of India Act of 1935 seem suitable, with such modifications as may be required for being fitted into the framework of the new constitution.

Defence.—The Committee strongly recommends that under the new constitution there should be a Portfolio of Defence which should be held by a Minister responsible to the Legislature, and that the actual control and discipline of the Army should be placed in the hands of a Commander-in-Chief under the new Government.

The Committee further recommends that a National Army should be created and developed as rapidly as possible. It is unable to suggest at this stage what the strength of this army should be, as this will depend, apart from the vital question of finance, on a number of other factors, such as the nature of the post-war world settlement and the efficacy of the international organisation for the maintenance of world peace. Among the measures which should be adopted for the creation of such an army, the Committee recommends the following:—

(1) (A) Such British units as temporarily may be required for the efficient defence of India, and such officers as may be needed for officering the National Army until an adequate number of Indian officers becomes available, shall be obtained by a treaty or agreement entered into by the Union Government and His Majesty's Government, specifying, among other things, the terms and conditions of their re-employment by the Union.

(B) As soon as the war is over, all direct recruitment of British officers to the Indian forces should cease. Such British officers as do not belong to the Indian Army and are not required for specific appointments should be reverted to the British Army Establishment.

(2) An institution should be established for the training in sufficient numbers of officers of all the three arms—air, land and sea—and all defects existing in the present system which prevent rapid Indianisation or the creation of Indian officers capable of assuming leadership should be forthwith removed.

(3) If it is found that the present educational system does not produce a sufficient number of young men suitable in every respect for a military career, steps should be taken at once to remove this defect.

(4) University Officers Training Corps should be established where they do not exist and largely expanded, and measures taken not only for ensuring the supply of officers to fill vacancies in peace-time, but for the rapid expansion of the cadre in the event of a military threat to India. Such measures should aim at creating a reserve of young men with service training who can be rapidly absorbed as officers when expansion takes place.

(5) The Committee would emphasise that the maintenance of law and order is essentially the responsibility of the Unit Governments, and they should, if necessary, by increasing the strength of their police forces, equip themselves adequately for the discharge of this responsibility. The Committee would, however, make it clear that the services of troops on the Union Army Establishment should be available for being requisitioned only when the civil power finds itself unable to cope with any particular situation.

The Committee further recommends that a balance should be maintained between the respective arms and that special attention should be paid to the Navy, Air Force, mechanised units and such other branches as may from time to time be developed.

The Committee recommends that steps should be taken, even before the coming into being of the new constitution, to adopt and give effect to the measures as far as practicable.

Public Services.—(3) The orders now in force at the Centre regarding the representation of the communities in public services may continue in operation till the Union Government under the new constitution comes into being. The Committee, however, recommends that the 8½ per cent. of the seats now allotted to the Sikhs, the Indian Christians, and the Anglo-Indians and Parsis may be split up between the Sikhs, the Indian Christians and the Anglo-Indians, and Parsis in the proportion of 3½ per cent. for the Sikhs, 3 per cent. for Indian Christians and 1·5 0 per cent. for Anglo-Indians and Parsis. The special provisions relating to Anglo-Indians in certain services under Section 242 of the Government of India Act of 1935 are not to be affected by this recommendation.

Minorities Commissions.—(A) The Constitution Act shall provide for the establishment at the Centre and in each of the provinces an independent Minority Commission which shall be composed of a representative for each of the communities (not necessarily a member of that community) represented in the Legislature.

(B) Subject to the possession of such qualifications or experience as may be prescribed, the member representing each community, who need not necessarily belong to the same community, shall be elected by members of the Legislature belonging to that community.

(C) No member of the Legislature shall be eligible for membership of the Commission.

(D) The term of office of members of the Commission shall be the same as, and synchronise with the term of office of members of the Legislature concerned.

(E) The functions of the commission shall be:—(i) To keep a constant watch over the interests of minority communities in the area; (ii) without attempting to deal with stray administrative acts or individual grievances to call for such information as the Commission may consider necessary for discharging its functions; (iii) to review periodically—for example once every six months—the policy pursued in legislation and administration by the Legislature and the executive in regard to the implementing of non-justiliable fundamental rights assured by the constitution to minority communities, and to submit a report to the Prime Minister.

(F) The recommendations of the the Cabinet and the Prime Minister Commission shall be considered by small, as soon as possible, place the report of the Commission before the Legislature with a full statement of the action taken or proposed to be taken in pursuance of the recommendations of the Commission. In case any of the recommendations are not accepted wholly or in part, the statement should also contain full explanations of the decisions taken by the Government. Facilities shall be provided to the Legislature for a discussion of the report and the decisions of the Government thereon.

The Committee while strongly recommending to all communities and parties to accept the proposals says that in the event of their being unacceptable to the various communities and parties and their failure to reach an agreement on any other basis. His Majesty's Government should set up an interim Government in India and proceed to establish machinery for drafting the new constitution generally on the basis of the principles underlying these proposals, enact it in Parliament and put it into operation at the earliest possible date.

Silver Jubilee Session.—The Silver Jubilee Session of the National Liberal Federation was held in Lahore in March 1945 under the presidentship of Mr T. P. Venkatrama Sastri of Madras. He made a demand for an immediate declaration by the British Government granting Dominion Status to India and urged the release of political prisoners and Congress detenus including the members of the Congress Working Committee.

Mr. Sastri said, "The Government must declare immediately that India shall have the status of a Dominion at the end of the war. Her millions have fought on the battle-field for the cause of the United Nations. The Cripps Offer contained that declaration and the answers of Sir Stafford Cripps to the questions put to him made clear that the status of India shall be the same as that of the other Dominions, and that India shall have the same right either to remain within the Commonwealth or to go out of it.

"That declaration must be made forthwith and implemented, so far as it may be, by the British Government. While they are devising measures for the reconstruction of Italy, Poland, Greece, they can have no legitimate excuse for postponing the freedom of India. The intricacy of the problems in the countries mentioned above did not bar them from taking steps even when the war is on, and the Indian

problem presents no features more difficult to resolve than the problems they are solving now elsewhere.

"I should say that the Governor-General should have released the political prisoners and the Congress detenus long ago. Neither the public peace nor the safety of the State any longer requires the detention of these persons; and the continuance of their detention is wholly unjustified. They should be immediately released. Even for a solution of the present deadlock, mutual consultation between the members of the Working Committee of the Congress is necessary and their continuance in jail and the refusal of the Government to allow mutual consultation between them only adds to the difficulties in the way of finding a solution."

Mr. Sastri dealt at length with the problem of minorities and said: "Pakistan is no solution for the problem of the minorities. The creation of separate foreign states does not really get rid of the minority problem altogether. There will be a large proportion of non-Muslims in the Muslim areas so separated and comparatively a small proportion of Muslims in the Hindu areas. Definite and satisfactory safeguards for the non-Muslims in the Muslim areas are offered. If such an offer is just and fair to minorities of over 40 per cent. in those provinces, would it be impossible to devise safeguards for the protection of the essential cultural features of all groups, including the Muslims, within a united India?

"What, again, of the expense of defence which each independent state will have to maintain? and would the defence organised by the separate states be adequate in the event of aggression? will the four states in the North-West agree to join and belong to one state? Will the Punjab agree to look after their financial needs and requirements? Will the non-Muslim areas in the Punjab desire to remain in an independent Muslim State or claim to form a separate state of their own? If separate independent states are formed and they have their own armies will joint action invariably result when emergencies arise? may they not be turned against each other in a fratricidal war?

"The Muslim League appeals to the principle of self-determination. This principle is a much misunderstood one. It is a case of secession from an existing state to which that principle does not apply and should not be applied. It has been recognised that it is impossible to grant independence to a section of the population unless they had a territory capable of sustaining the economic and political framework of a nation.

"Whether Mr. Jinnah, who has, so far, made the concession of Pakistan a condition of any discussion, constitutional or other, can now bring himself to put aside Pakistan and discuss the terms of a federal constitution is more than anyone can say. It might be a vain hope still, I see no harm in saying that Mr. Jinnah, who has demonstrated his power to hold up, must now demonstrate his power to solve the Indian problem. The problem of Indian unity was posed first in this province and it must here receive its final solution.

"In the recent Dumbarton Oaks Conference, a formula was evolved for the solution of international conflicts by negotiation, mediation, conciliation, arbitration, judicial settlement or other peaceful means to be chosen by the parties to the conflict. Failing that, the conflict will be referred to the Security Council. Though this formula deals only with international conflict, its principle may be applied for resolving the Indian deadlock.

Mr. Sastri then touched upon the problem of Indian States. He said: "The time has come now when the States should have representative governments, and the people of the States should be given their due share in a popular government. In the Federal Legislature, not only the rulers of the States, but also the subjects of the States should be represented."

Referring to the industrialisation of India, Mr. Sastri remarked: "There have been many plans drawn up or in the process of being drawn up. I will not attempt to assess their exact value. The plans involve expenditure in astronomical figures: How they can be worked out is a matter for the experts to consider. But all seem to agree that without a National Government it will be impossible to put into effect any large-scale plan of economic policy.

"Here again the conclusion is forced on us that for the industrialisation of India, for the relief of poverty, disease and unemployment among the masses and for many other large-scale programmes like sanitation, transport, etc., it is necessary that there should be a united India, pooling her intelligence and her resources in one concerted attempt to raise the standard of her people."

Mr. Sastri referred to the plight of Indians overseas. He said: "The plight of Indians in the colonies and especially in South Africa deserve our active sympathy and help. It is a tragic irony that while the U.S.A. is willing to admit Indians on a quota system and give them rights of citizenship, South Africa should deny that right to the Indians settled there. The Government of India should take such steps as might be necessary to protect them, and the British Government should see to it that this grave injustice is remedied and further embitterment averted."

On the subject of Indianisation, the President said: "Recruitment in the services just now has an alarming aspect and needs our close attention. It is regrettable that the process of indianisation in the services has not been accelerated. The recruitment in the officers' cadre in the Army is still disappointing.

"The Foreign and Political Departments are still largely kept a close preserve of the British. A large number of Europeans who have been recruited in the key services during the last six years' lead Indians to suspect that the foundation is being laid for decades of domination. No change in the composition of the services till a new constitution is agreed to is spurious and untenable as an explanation."

Mr. Sastri concluded: "There will be no place so long as imperialism lasts. As for Britain's attitude to the future of India, words

promise, but action denies. Words uttered in adversity are forgotten on the turn of the wheel of fortune. Conduct seems to reinforce the assertion 'what we have we hold.' But some leaders of thought in England have deplored this attitude and have urged the need for giving independence to India. An independent India will be an asset even in the present war against Japan. Everything plainly indicates the need for unity and the united effort of all parties in India. None but the wilfully blind can fail to see it."

Resolutions.—Resolutions urging the British Government to form a National Government at the Centre and deploring the continuance of the political deadlock in India and asking the Government of India to release the members of the Congress Working Committee and the other Congress leaders were adopted.

The resolution on the formation of a National Government said:

"(*a*) While adhering to its opposition to any division of India into Hindustan and Pakistan, the federation is of the opinion that without prejudice to the different viewpoints on controversial issues relating to the ultimate form of the future Indian constitution, the Congress, the Muslim League, the Hindu Mahasabha and other important political parties and interests should, during the period of the war, unite and co-operate with a view to the formation of National Government both at the Centre and the provinces and urges on the British Government the necessity of forming such a Government at the Centre and creating it on the same footing as a Dominion Government.

"The Federation is convinced that the formation of such a Government would help to clear away misunderstandings and promote mutual confidence and lead to the solution of many urgent and important domestic problems pertaining to the national economy of the country.

"(*b*) The Federation deprecates the policy of the British Government in assuming the role of passive spectators and urges them actively to participate in the solution of the present political deadlock and take constructive steps to promote the establishment of a national government, both at the Centre and in the provinces, composed of important political parties and interests.

"(*c*) The Federation urges the British Government to announce without delay that they would be prepared to implement their promises to India on the basis of an agreement between the various political parties and interests or, in the absence of such agreement, if necessary, by themselves enacture a Dominion constitution for India within one year of the cessation of hostilities."

The Federation also passed a resolution demanding for Indians in South Africa full citizenship rights.

Deploring the failure of the Government of the Union of South Africa to abolish the Pegging Act, the resolution stated in part: "In view of the uncompromising attitude of the Government of South Africa towards this legitimate demand of India, this Federation feels that it was a mistake on the part of the Government of India to have sent the High Commissioner to South Africa and it urges the Government of India to recall the High Commissioner forthwith and to adopt all fiscal and commercial sanctions against South Africa until the Pegging Act is abolished."

Another resolution expressed deep regret and concern at the "misuse of the Defence of India Act and Rules on numerous occasions". The resolution stated that the civil liberties were being invaded without adequate justification and for political ends.

The Federation also deplored racial prejudice existing between the white and non-white peoples of the world and suggested that "unless a determined effort is made on a world scale against the course of race prejudice, the non-white peoples of the world who are now fully conscious of their rights, are bound to revolt against the tyranny of the whites and imperil the cause of world peace."

The Federation pressed upon the Rulers of Indian States to declare full responsible government as their policy as rapidly as possible and assured the people of the States of its full support in their constitutional methods for securing reforms and the redress of their grievances.

The Federation expressed concern over the continued recruitment of the Indian services from outside India and strongly urged upon the Government the necessity for stopping all future recruitment to these services from outside India.

The Federation, in another resolution, expressed profound concern at the food situation in the country "which, though somewhat improved is still far from satisfactory." It urged the Government to evolve a more satisfactory policy and administer it efficiently so as to save the people from all avoidable hardships and distress.

The Federation unanimously passed a resolution demanding that in the Imperial and International conferences India should be represented largely, if not wholly by non-official public men commanding the confidence of the people "until such time as a National Government can appoint its own proper accredited representatives."

Demanding complete nationalisation of India's Defence services within a short period, the Federation also urged that India's status as envisaged in the post-war world and her future role as a bulwark of peace in Asia required a radical change in regard to her defence policy. The Federation suggested that the Defence portfolio should be entrusted to an Indian Member commanding the confidence of the public and that a policy of Indianisation in all grades of the army, navy and air force be expedited. It further suggested that Indian emergency commissioned officers should not be demobilised after the war and that the army should be recruited from all provinces and classes to a much greater extent than at present.

The President, Mr. T. R. Venkatarama Sastri, winding up the session, expressed gratification at the formation of a Ministry by the Congress in the Frontier Province and expressed the hope that this will be followed by the assumption of office by the Congress in those other Provinces where Section 93 rule continued.

"The Viceroy should declare forthwith that the future steps for the formation of a Central Government and for the framing of a constitution will go forward notwithstanding the dissent of any party," said a resolution passed by the Council of the National Liberal Federation of India held in Bombay in the winter of 1945."

The resolution further said :—

"The Council of the National Liberal Federation of India notes that the proposals now adumbrated in the broadcasts of the Prime Minister and the Viceroy are incomplete and must wait for the elections and consultations with the elected representatives to take their final shape.

"The Council is of the opinion that so long as agreement among all parties is insisted on as a condition precedent to any proposals going forward, no solution will be possible. The Council therefore urges that the Viceroy should declare forthwith that the future steps for the formation of a Central Government and for the framing of a constitution will go forward notwithstanding the dissent of any party. Such a declaration will itself help to bring about an understanding between the parties concerned.

"Immediately after the elections, a Central Government should be formed consisting of the representatives of the major political parties with provision for representation of minority interests and no refusal of co-operation by any party should hold up the formation of such representative government."

THE MUSLIM LEAGUE.

The awakening of political consciousness among Muslims in India as a separate entity dates back to 1906 when the All-India Muslim League was formed. It worked up its influence steadily, so that when it was hardly ten years old it became sufficiently important to enter into an agreement—known since as the Lucknow Pact—with the powerful Indian National Congress. The League fell on evil days in the 'twenties, and differences set in among its members. When enhanced powers were conferred on India by the Montford Reforms, Muslims became more and more politically minded and began to aspire for a greater share in the control of the administration of the country and in Government posts. This feeling gave rise to the formation of a new body whose promoters concentrated on aggressive presentation of Muslim demands. With the prospect of still further constitutional reforms at the end of the first ten years of the working of the Montford Scheme, these leaders strove to organise Muslims into an influential body which would safeguard their interests more effectively than the League. The result was the All-Parties Muslim Conference in 1928. The publication of the Communal Award and its inclusion in the White Paper Scheme of Reforms in 1933 helped this process of consolidation. An attempt was made early in 1934 to consolidate the community by healing the split within the Muslim League and, if possible, bringing the League and the Conference together to work as a united body. The latter failed, but the former object was largely successful and the League marched from strength to strength until it emerged as a powerful organisation of the Muslim community on the eve of the first elections to the provincial legislatures under the Government of India Act of 1935. For the first time in the political history of Muslims their representative institution functioned as a vigorous and active all-India organisation with results which flattered Mr. Jinnah, and his co-workers, although the success of League nominees was not very striking. Doubtless Mr. Jinnah, who was the guiding spirit behind this new activity, was handicapped by fissiparous tendencies and reactionary forces in distant provinces beyond the sphere of his direct influence. This was soon rectified by the growing influence of Mr. Jinnah and the League among the Muslims.

Mr. Jinnah's influence among the Muslims increased rapidly in the years following the advent of the 1935 constitution. The Muslim League grew into a powerful organisation with branches all over the country. At Lucknow in 1937 its creed was lightened up; at Lahore three years later it adopted a resolution demanding the partition of the country into Hindu and Muslim India; and in 1941, the creed was again changed into what amounts to a demand for secession.

The Muslim League gathered strength as the years rolled by, especially during the war when the Congress was in jail and there was no effective opposition to the League. An attempt was made by Lord Wavell in the summer of 1945 to form a coalition government including the Congress and the League as a temporary measure without prejudice to the claims and aspirations of the two organizations. This move failed and elections were ordered through the country. The League came on top at the polls, and immediately thereafter the British Government sent a Cabinet Delegation to settle the Indian problem once and for all. The Delegation, after elaborate investigation and personal discussion, came to the conclusion that Pakistan was impracticable and inadvisable. It decided to set up a constituent assembly to frame a three-tier constitution, comprising a limited union centre, three groups of contiguous provinces (one in the north-west, the second in the centre and the third in the east), and 11 provincial constitutions. It also decided to set up an interim government, pending the evolution of a future constitution. The League at first accepted the British Cabinet Mission's proposals, but later went back on its decision and resolved upon direct action. In the late autumn of 1946, the League again decided to co-operate and sent its nominees to the Interim Government at the centre formed earlier by the Congress.

Shortly after the 1936 elections, Mr. Jinnah explained the position of the League members of provincial legislatures *vis-a-vis* other groups and said: "The constitution and policy of the League do not prevent us from co-operation with others. On the contrary, it is part and parcel of our basic principle that we are free and ready to co-operate with any group or party from the very inception, or inside the legislature, if the basic principles are determined by common consent."

These words engendered a hope that the League might be induced to co-operate with the Congress in its extremist programme and negotiations were started, but it soon became apparent that the two could not come together. The situation was rendered more difficult by the attitude of stiffness adopted by the Congress and its President, Pandit Jawaharlal Nehru. Mr. Jinnah refused to convert the League into "an understudy of the Congress" and firmly upheld the position of the Muslim community. The Congress, for its part, found as the result of the elections that it did not have the support of the Muslim community. Very few Congress Muslims were put up as candidates for the elections, and even they failed. The Congress therefore set about roping in the Muslims by an appeal to their economic conscience, explaining that the Congress was out to alleviate the sufferings of the masses, Muslims as well as Hindus, and to uplift the nation as a whole. In this process the League and its leaders came in for a great deal of violent criticism at the hands of the Congress managers. On behalf of the League Mr. Jinnah retorted: "The Congress have not the monopoly, nor are they the sole custodians of Indian nationalism. As I have always maintained, the Muslim League is prepared to join hands with any progressive party in the fight for the country's freedom, but to achieve this the question of minorities must be settled satisfactorily. Here I am not talking of only Muslims but all minorities. Further, we are

not prepared to merge ourselves into any organisation, however great it may be, and however advanced its programme and policy may be unless it is determined by common consent."

Paying little heed to these words of warning, the Congress leaders went their own way. Puffed with the success at the polls, they affected to ignore the claims of League leaders. In what may be described as non-Muslim province—that is, those in which the Muslims are in a minority—the Congress formed Ministries without consulting and securing the co-operation of the Muslim League. No doubt attempts were made to arrive at an understanding with the Muslim League, but they failed mainly on account of the Congress demand that wherever such an understanding was reached the Muslim League should cease to be a separate parliamentary body and merge itself into the resultant Congress-League Party. The League, for its part, was willing to co-operate but not on the terms imposed by the Congress. In the result the negotiations failed, and the League remained in the Opposition. Although the bulk of the Muslim representatives returned to the provincial legislatures by the electorate were in opposition to the Congress the latter proceeded to constitute Governments with Muslim Ministers who did not represent Muslim opinion in the legislature. Nowhere in any of the so-called Congress provinces did the Muslim Ministers have the support of the majority or even a decent number of Muslim legislators. Thus these Muslim Ministers in the Congress provinces were the objects of repeated displays of Muslim hostility.

Having failed to reach an agreement with the League and its leaders, the Congress tried to crush the League and its leaders by making a direct approach to the Muslim masses through an economic and national programme. For a time this appeared to succeed, but eventually failed to achieve its object. The League leaders counteracted the Congress propaganda by pointing out to the Muslim masses that their true interests lay in their organisation under the banner of the League which alone could serve them truly. The League's counter drive succeeded in a large measure aided by allegations that in provinces where the Congress was running the Government the Muslim minorities were not treated well. The widening gulf between the Congress and the League gave an additional stimulus to the consolidation of the Muslim forces under the League which found fruition at the Lucknow session of the League in the autumn of 1937.

Lucknow Session.—The session was unique in several respects. For the first time in the history of the Muslim organisational movement, complete unity was achieved, and every section of Muslim opinion, including those which till then had been opposed to the League or outside it, rallied round the League. There was no discordant note and Muslim political unity was complete. The Muslim League emerged the only strong and influential political organisation of the Muslim community.

The session changed the creed of the League to "the establishment in India of full independence in the form of a federation of free democratic states in which the rights and interests of the Muslim and other minorities are adequately and effectively safeguarded in the constitution." (For details of the proceedings of this session, see *Indian Year Book*, 1938-39.)

The foundations of Muslim solidarity laid at the Lucknow session of the League in the autumn of 1937 proved very strong indeed. The League grew from strength to strength in the two succeeding years and today it is admittedly the most powerful organisation of the community. The League's spokesmen claim that it is the only mouthpiece of the Muslims, and one may be inclined to recognise that claim but for the existence of other organisations in the community with more or less following and influence, not excluding a large number of Muslims who are members of the Congress. There may be two opinions about the claim that the League is the only organisation of the community, but no one can question that it is the most powerful and the most influential.

With the outbreak of the war and the change it wrought in Indian politics, the League found itself in an extremely advantageous position. A perusal of the chapter on the Indian National Congress will show how the Congress withdrew its ministries from the provinces where it had held sway for nearly two and a half years. As a result of this the League came to be on a par with the Congress in that both were now out of office and without the power and influence which went with it. Whereas the Congress lost through the resignation of its ministries such bargaining power as it had while in office, the League acquired some indirect power through the international complications that resulted from the war. Again, whereas the Congress had alienated the sympathies of the Indian Princes by sponsoring and encouraging agitation for responsible government for the States people, the League earned the friendship of the Princely order by condemning such activities and upholding the rights and privileges of the Indian Princes in any revision of the Indian Constitution. In yet another direction the League manœuvred itself into a comfortable position; whereas, the Congress categorically withheld its co-operation from the war, the League abstained from taking any such attitude and merely insisted on the satisfaction of its claims prior to making up its mind. Even this was only the official attitude of the League as an organisation. Most of its individual members were in favour of wholeheartedly aiding in the prosecution of the war. And the League winked at this.

A fortnight after the declaration of the war, the Working Committee of the League passed a resolution which illustrates the tact and firmness with which the League steered the Muslim ship. The League Committee stated that "if full, effective and honourable co-operation of the Mussalmans is desired by the British Government in the grave crisis which is facing the world today and if it is desired to bring it to a successful termination it must create a sense of security and satisfaction among the Mussalmans and take into their confidence the Muslim League, which is the only organisation that can speak on behalf of Muslim India."

Attack on Congress Ministries.—Side by side with the demand for the redress of Muslim grievances and the assertion that their full and free consent should be obtained

before any change in the Constitution was attempted, the League continued its campaign against the Congress ministries, to which a reference has been made in past issues of the *Indian Year Book*. Apart from the "atrocities" which, the League affirmed, had been perpetrated on the Muslim minorities in the provinces administered by the Congress, the League made a fresh point which was soon to become the nucleus of a serious development in Indian politics.

In a resolution passed in September 1939, the Working Committee of the League said: "The developments that have taken place, especially since the inauguration of the provincial constitution based on the so-called democratic parliamentary system of government and the recent experiences of over two years, have established beyond any doubt that it has resulted wholly in a permanent communal majority and the domination by the Hindus over the Muslim minorities, whose life and liberty, property and honour are in danger, and even their religious rights and culture are being assailed and annihilated every day under the Congress Governments in various provinces.

"While Muslim India stands against exploitation of the people of India and has repeatedly declared in favour of 'a free India,' it is equally opposed to domination by the Hindu majority over the Mussalmans and other minorities and vassalisation of Muslim India, and is irrevocably opposed to any federal objective which must necessarily result in a majority community rule under the guise of democracy and parliamentary system of government. Such a constitution is totally unsuited to the genius of the peoples of the country, which is composed of various nationalities and does not constitute a national state."

This attack on provincial autonomy and on majority rule was an altogether new line which was struck almost for the first time by the League. Till then the Muslim demand had always been for effective safeguards for the protection of the Muslim community's religious, cultural and other rights; now the Muslims began to question the very basis of democracy and declared that the western democracy in the sense of rule by majority was unsuitable. This was developed in the summer of 1940 into a demand for the separation of Muslims on the ground that they constituted an integral nation and not a minority in the Indian population.

In the succeeding weeks numerous attempts were made to ascertain the grievances of the Muslims and to find out whether they were justified—in other words, whether the Congress ministries had been guilty of oppressing them or even neglecting them. But all these ended in smoke.

Political Discussions.—Meanwhile, discussions on the political field continued and early in October 1939 the Viceroy called into consultation leaders of all sections of opinion in India with a view to ascertaining their wishes in the matter of constitutional reform. On the conclusion of these consultations, the Viceroy issued an exhaustive statement on Britain's War aims *vis-a-vis* India.

It gave the Muslim community the requisite assurance concerning its status in future adjustments. This is evident from the resolution passed by the Working Committee of the League which met in Delhi towards the end of October 1939. The Committee hailed the Viceroy's statement as a new charter of hope for the minorities and as a recognition of the League's right to full say in the future constitutional arrangements. From this resolution one can infer that the League found in the Vicegeral declaration an acknowledgment of the League's status as an essential factor in any political development on an all-India basis. (See past issues of the *Indian Year Book*.)

Lahore Session.—To return to the Muslim League. As already stated the idea of Muslims being a nation gathered strength during 1939-40 in which period a number of schemes for the formation of a Muslim *bloc* of autonomous states were mooted. For a time they were not regarded seriously; but from the proceedings of the annual session of the League held in April 1940 it became clear that the Muslim League was serious about this partition business. At Lahore, the Muslim community, as represented by the Muslim League, declared for Muslim independence.

The principal resolution of the session, which was carried unanimously, ran:—

"While approving and endorsing the action taken by the Council and the Working Committee of the All India Muslim League, as indicated in their resolutions dated the 27th of August, the 17th and 18th of September and 22nd of October, 1939, and the 3rd of February, 1940, on the constitutional issue, this session of the All-India Muslim League emphatically reiterates that the scheme of Federation embodied in the Government of India Act, 1935 is totally unsuited to and unworkable in the peculiar conditions of this country and is altogether unacceptable to Muslim India.

"It further records its emphatic view that, while the declaration dated the 18th of October, 1939, made by the Viceroy on behalf of His Majesty's Government is reassuring in so far as it declares that the policy and plan on which the Government of India Act, 1935, is based will be reconsidered in consultation with the various parties, interests and communities in India, Muslim India will not be satisfied unless the whole constitutional plan is reconsidered *de novo* and that no revised plan will be acceptable to the Muslims unless it is framed with their approval and consent.

"Resolved that it is the considered view of this session of the All-India Muslim League that no constitutional plan would be workable in this country or acceptable to the Muslims, unless it is designed on the following basic principles, namely, that geographically contiguous units are demarcated into regions which should be so constituted, with such territorial readjustments as may be necessary, that the areas in which the Muslims are numerically in a majority, as in the north-western and eastern zones of India, should be grouped to constitute "independent States" in which the constituent units shall be autonomous and sovereign and that adequate, effective

and mandatory safeguards should be specifically provided in the constitution for minorities in the units and in the regions for the protection of their religious, cultural, economic, political, administrative and other rights and interests in consultation with them, and, in other parts of India where the Mussalmans are in a minority adequate, effective and mandatory safeguards shall be specifically provided in the Constitution for them and other minorities for the protection of their religious, cultural, economic, political, administrative and other rights and interests in consultation with them.

"This session further authorises the Working Committee to frame a scheme of Constitution in accordance with these basic principles, providing for the assumption finally by the respective regions of all powers such as Defence, External Affairs, Communications, Customs and such other matters as may be necessary."

This created a stir in the country, among nationalists and Hindus alike and also among some Muslims. True the novelty of the thing caught the Muslim imagination, but even among Muslims there were many who questioned the wisdom of the step suggested in the Lahore resolution. Apart from destroying Indian unity which had been built up after years of strenuous effort, it was argued by many, the Lahore scheme would place the Muslim minorities in Hindu provinces in a very unenviable position.

The evolution of Muslim League thought in 1940-41 followed the lines laid down in April 1940 when the Pakistan resolution was adopted at Lahore. Percentages and weightages, proportion of representation and share in services' guarantees and safeguards—notions which had held the political field for decades—were clean swept aside. Mr. Jinnah was not thinking in terms of these trifles, outworn gadgets of a democracy held to be unsuitable to an oriental people and totally inapplicable to the peculiar conditions of India. All these devices presupposed the continuance of Muslims as members of a State, more or less secured and safeguarded, enjoying greater or less share of power, but scarcely likely as a community ever to occupy a dominant position. Mr. Jinnah refused to think of an arrangement which would not give the Muslims equal power and authority with the majority community. He would not be party to making the Muslims subordinate to the Hindus. Being a numerical minority they as a community would perforce be the junior partner in any composite State.

As in a composite State the Muslims could not in the nature of democracy expect to be reckoned as equals with the majority community, much less as the dominant force, Mr. Jinnah went away from the idea of a composite State and proposed that India should be divided into two spheres, Muslim and Hindu. Each was to be autonomous internally and for purposes of a Central Government with minimum powers, the two should collaborate as equals.

The Pakistan ideal began to exercise the Muslim mind. It provided the League and Mr. Jinnah with a new plank, gave the Muslim community a new goal, a new vista free from what was described as "the danger of Hindu Raj." Every development affecting the future of India in any way was viewed against the background of Pakistan; how will more power for the future Indian State affect the Muslims? Therefore the League claimed the right to approve or reject every proposal calculated to affect the country and its population. The threat was put forth that "any move by the Congress to widen political power in India without the League's approval will meet with the League's resistance."

Madras Session.—The annual session of the League was held in Madras amidst scenes of great enthusiasm in the middle of April 1941. Mr. Jinnah, who presided, urged the British Government to give up their policy of appeasement towards those who were bent upon frustrating the war efforts and to get on with those who wanted to get on with them.

The most important resolution of the Madras session was that which changed the creed of the League.

"(1) The establishment of completely independent States formed by demarcating geographically contiguous units into regions which shall be so constituted with such territorial readjustments as may be necessary that the areas in which the Muslims are numerically in a majority as in the north-western and eastern zones of India shall be grouped together to constitute independent States as Muslim free national homelands in which the constituent units shall be autonomous and sovereign:

(2) That adequate, effective and mandatory safeguards shall be specifically provided in the constitution for minorities in the above mentioned units and regions for the protection of their religious, cultural, economic, political, administrative and other rights and interests in consultation with them:

(3) That in other parts of India where the Muslims are in a minority, adequate, effective and mandatory safeguards shall be specifically provided in the constitution for them and other minorities for the protection of their religious, cultural, economic, political, administrative and other rights and interests in consultation with them."

Internal Troubles.—Encouraged by the successes achieved through the Lucknow, Lahore and Madras sessions of the League, Mr. Jinnah was engaged in 1941-42 in further consolidating the influence of the League among the Muslim masses and propagating the new policy of the League. In this task he achieved a large measure of success, although it must be admitted that he met with one or two reverses.

These notwithstanding, Mr. Jinnah and the Muslim League continued to grow in stature, as evidenced by the recognition accorded by the British Government to the influence and representative character of that organisation as far as the Muslims of India are concerned. Mr. Jinnah never showed any slackening of his demand for Pakistan, although he expressed willingness not to raise that question in a pointed form while the war was in progress, provided, however, that in any transitional arrangements for the transfer of power from British to Indian hands steps were taken to ensure that the League got a fair share.

Perhaps the highest marks scored by the League so far are to be found in the British War Cabinet's formula brought by Sir Stafford Cripps in the spring of 1942, in which the British Government offered to give to Indian provinces the right to choose whether they would join any union that might be decided to be formed at the end of hostilities or would stay out and form their own State, separately or in collaboration with other provinces similarly willing to stay out. This was an unprecedented concession to the League demand, which was stoutly opposed by the Hindu element of the population and by nationalistic forces, although Mr. Jinnah himself would have liked the concession to be more specific and categorical.

Cripps Scheme Rejected.—The proposals of the British War Cabinet were examined carefully by the Muslim League Working Committee which, whilst rejecting the scheme, expressed gratification that the possibility of Pakistan was recognised by implication by providing for the establishment of two or more independent unions in India. It regretted that the proposals of His Majesty's Government embodying the fundamentals were not open to any modification and therefore no alternative proposals were invited, and passed the following resolutions:—

"In view of the rigidity of the attitude of His Majesty's Government with regard to the fundamentals not being open to any modifications, the Committee have no alternative but to say that the proposals in their present form are unacceptable.

"(1) The Mussalmans, after 25 years of genuine efforts for the reconciliation of the two major communities and the bitter experience of the failure of such efforts, are convinced that it is neither just nor possible, in the interest of peace and happiness of the two peoples, to compel them to constitute one Indian Union, composed of the two principal nations—Hindus and Muslims—which appears to be the main object of His Majesty's Government, as adumbrated in the preamble of the draft declaration, the creation of more than one union being relegated only to the realm of remote possibility and is purely illusory.

"(2) In the Draft Declaration a constitution-making body has been proposed with the primary object of creating one Indian Union. So far as the Muslim League is concerned, it has finally decided that the only solution of India's constitutional problem is the partition of India into independent zones; and it will, therefore, be unfair to the Mussalmans to compel them to enter such a constitution-making body, whose main object is the creation of a new Indian Union. With conditions as they are, it will be not only futile but on the contrary may exacerbate bitterness and animosity amongst the various elements in the country.

"Besides, the machinery which has been proposed for the creation of the constitution-making body, namely that it will consist of members elected by the newly elected lower houses of the eleven provinces, upon the cessation of hostilities, as a single electoral college by the system of proportional representation, is a fundamental departure from the right of the Mussalmans, hitherto enjoyed by them, to elect their representatives by means of separate electorates, which is the only sure way in which true representatives of the Mussalmans can be chosen.

"The constitution-making body will take decisions by a bare majority on all questions of most vital and paramount character involved in the framing of the constitution, which is a departure from the fundamental principles of justice and contrary to constitutional practice so far followed in the various countries and dominions; and the Mussalmans, by agreeing to this will, instead of exercising their right and judgment as a constituent factor, be at the entire mercy of the constitution making body in which they will be a minority of about 25 per cent.

"The right of non-accession to the Union as contemplated in the draft declaration has been conceded presumably in response to the insistent demands by the Mussalmans for the partition of India but the method of procedure laid down is such as to negative the professed object, for in the draft proposals the right of non accession has been given to the existing provinces which have been formed from time to time for administrative convenience and on no logical basis.

"The Mussalmans cannot be satisfied with such a declaration on a vital question affecting their future destiny and demand a clear and precise pronouncement on the subject. Any attempt to solve the future problem of India by a process of evading the real issues is to court disaster

"(3) In the draft proposals no procedure has been laid down as to how the verdict of the province is to be obtained in favour of or against accession to the one union; but in the letter dated 2nd of April from the Secretary of Sir Stafford Cripps, addressed to the President of the All India Muslim League, it is stated that "a province should reach the decision whether or not to stand out of the Union by a vote in the Legislative Assembly on a resolution to stand in.

"If the majority for accession to the Union is less than 60 per cent. the minority will have the right to demand a plebiscite of the adult male population." In this connection it must be emphasised that in the case of the major provinces of Bengal and the Punjab they (the Muslims) are in a minority in the Legislative Assemblies, and in the Assemblies of Sind and the North-West Frontier Province, the total number, namely, 60 and 50 respectively, is so small and the weightage given to the non-Muslims so heavy that it can be easily manipulated and a decision under such conditions cannot be the true criterion of ascertaining the real opinion of the Mussalmans of those provinces.

"As regards the suggested plebiscite in the provinces in which the Mussalmans are in a majority, in the event of the requisite majority not being available in the Legislative Assemblies, the procedure laid down is that reference shall be made to the whole adult population of the provinces and not to the Mussalmans alone, which is to deny them the inherent right, to self-determination.

"(4) With regard to the Indian States, it is the considered opinion of the Committee that it is a matter for them to decide whether to join or not to join or form a union.

"(5) With regard to the treaties to be negotiated between the Crown and the Indian Union or Unions, the proposals do not indicate as to what would happen in case of disagreement on the terms between the contracting parties nor is there any provision made as to what would be the procedure when there is a difference of opinion in negotiating a revision of treaty arrangements with the Indian States in the new situation.

"(6) With regard to the Interim arrangement, there is no definite proposal except the bare statement that His Majesty's Government desire and invite the effective and immediate participation of the leaders of the principal sections of the Indian people in the counsels of their country, of the Commonwealth and of the United Nations. The Committee are, therefore, unable to express their opinion until a complete picture is available.

"Another reason why the Committee are unable to express their opinion on the Interim arrangements for participation in the counsel of the country, is that Sir Stafford Cripps has made it clear that the scheme goes through as a whole or is rejected as a whole and that it would not be possible to retain only the part relating to the immediate arrangements at the Centre and discard the rest of the draft scheme and as the Committee has come to the conclusion that the proposals for the future are unacceptable it will serve no useful purpose to deal further with the question of the immediate arrangements.

"In conclusion, the Committee wish to point out that the position of the Muslim League has been and is that unless the principle of Pakistan scheme, as embodied in the Lahore Resolution of March 1940, which is now the creed of the All-India Muslim League is unequivocally accepted and the right of the Musalmans to self-determination is conceded by means of a machinery which will reflect the true verdict of Muslim India it is not possible for the Muslim League to accept any proposal or scheme regarding the future."

Attitude to Congress.—During 1942-43 the policy of the Muslim League was somewhat negative in character. It made no specific contribution towards the settlement either of the Indo-British question or of the Hindu-Muslim problem. The resolutions of the League and the utterances of its leaders have been in the nature of comments on the actions of other people and response - rather the lack of it - to others' moves.

When Mr. Gandhi on behalf of the Congress evolved the "Quit India" slogan and developed it up to the stage of the A.I.C.C. resolution, Mr. Jinnah made a series of public statements repudiating Mr. Gandhi and the Congress and warning his community against the dangers of playing into the hands of the latter.

(*See last year's issue.*)

Commenting on the A.I.C.C. resolution of August 8, 1942, the League leader said it was substantially the same as the resolution of the Congress Working Committee passed in September 1939.

"In the resolution that was passed in September, 1939," he says, "the demand was for a declaration of immediate independence and freedom for India, with a provisional National Government transferring all power of the Government of India, and secondly, the right of the people to frame their own constitution through a constituent assembly to be elected by means of adult franchise. The only difference, therefore, between the two resolutions is that in the first resolution what was implied by the declaration that was sought is now covered under a different language by the adoption of the slogan 'Quit India'.

"Muslim India, as I have repeatedly said, stand for complete independence of all the peoples of India. But we turned down the proposal of the Congress because the demand for a National Government to be set up immediately would have meant Hindu *raj* or a Hindu majority Government.

"As to the second item, namely, the right of the people to frame their own constitution, the constituent assembly would have been one of overwhelming majority of Hindus and if it were to be elected on the basis of adult franchise the Musalmans would have not secured even 25 per cent of its strength and it is a foregone conclusion as to what decision such a body would arrive at.

"Not only this, but the fundemental principle was also laid down in September, 1939, that the constitution should be on the basis of an All-India Federal Government with units as autonomous as possible. This clearly meant that even those zones which are the homelands of the Musalmans and where they are in a majority would have been entirely under the Central Government with a Hindu majority in all vital matters.

"This position the Musalmans could not accept as it clearly meant ruling out of order their demand for Pakistan and would have implied their submission to Hindu *raj* as a national sub-group, instead of this being a nation in fact, as they are, even in those parts of India where they are in a majority of more than 75 per cent. as in the North-West zones and more than 70 per cent in the eastern zones. In these two zones they are not less than 70 millions of Musalmans as a compact body and exist as a nation by any definition of a nation. But having ignored these one hundred millions of Musalmans and other minorities and interests the Congress have adopted the programme of mass civil disobedience if their fantastic demand is not conceded by the British at once under the slogan of 'Quit India'."

When the disturbances broke out he advised the Muslims to keep aloof from the Congress movement. He regretted that "the Congress" has finally declared war and has launched a most dangerous mass movement in spite of numerous warnings and advices from various individuals, parties and organisations in this country.

Reaction to Disturbances.—About a week after the commencement of the disturbances the Working Committee of the League met in Bombay and passed a resolution calling upon the British Government to guarantee to the Muslims the right of self-determination and assure them, without delay, that they would abide by the verdict of a plebiscite of the Muslims in favour of Pakistan and expressing the willingness of the Muslim League to negotiate

with any party for the setting up of a provisional government in order to mobilise the resources of India for the defence of the country and the successful prosecution of the war, conditional on the grant of the Muslim demands.

In the winter of 1942 Mr. Rajagopalachari had prolonged talks with Mr. Jinnah at Delhi and, presumably in pursuance of some tentative understanding with the League leader, sought the Viceroy's permission to meet Mr. Gandhi with a view to eliciting the latter's reactions to his proposals for a Hindu-Muslim settlement. When permission was refused there was widespread criticism of the Government's attitude, and Mr. Jinnah too evidently thought that there was no use pursuing that line. He, therefore, turned his attention to securing power for the Muslims in general and the League in particular irrespective of the Congress. Thus almost for the first time in recent years, he called upon the British authorities to start a provisional Government with Muslim support. He had all the while pleaded for the continuance of the *status quo* in the absence of a settlement on the basis of Pakistan, but now he made the demand that, settlement or no settlement, the Muslims should not be kept out of power on the plea that the Congress was in prison.

Delhi Session.—A session of the Muslim League was held at Delhi late in the spring of 1943. Mr. Jinnah, who presided, made a three-hour speech in the course of which he said:—"Nobody will welcome it more than myself, if Mr. Gandhi is now really willing to come to a settlement with the Moslem League. Let me tell you that will be the greatest day, both for the Hindus and the Muslims. If that is Mr. Gandhi's desire, what is there to prevent him from writing direct to me? Who is there that can prevent him from doing so? (Renewed Cheers). What is the use of going to the Viceroy? Strong as this Government may be in this country, I cannot believe that they will have the daring to stop such a letter, if it is sent to me. It will be a very serious thing indeed, if such a letter were stopped. Mr. Gandhi gets all the information and knows what is going on. If there is any change of heart on his part, he has only to drop a few lines to me. Then the Muslim League will not fail, whatever may have been our controversy before."

"When we passed the Lahore resolution, we did not use the word Pakistan at all," Mr. Jinnah continued.

"Who gave us this word? (shouts of 'Hindus'). Let me tell you this is their folly. They started damning this on the ground that it was Pakistan. They foisted this word upon us, and they talked of Pan-Islamism. We ourselves went on for a long time using the phrase 'the Lahore resolution popularly known as Pakistan.' But how long are we to have this long phrase? I say to Hindu and British friends, we thank you for giving us one word."

Deprecating talk of some sort of loose Federation, Mr. Jinnah declared, "There is no such thing as a loose Federation. When a Central Federal Government is established, it will tighten and tighten until the units are pulverised in the matter of real power and are reduced to the same status as Indian States at present.

"We are opposed to any such scheme. It is bound in the long run to lead to certain emasculation of the entire Muslim nation, socially, educationally, culturally, economically and politically and to the establishment of a Hindu majority Raj in this sub-continent. Therefore, dismiss from your mind any idea of this kind that might lure you."

After charging Mr. Gandhi and other Congress leaders with systematic and deliberate attempt to establish Hindu rule in India, Mr. Jinnah said "let us close that chapter. Even nations that have killed millions of each other—we have not done so yet—even they who were the bitterest enemies yesterday have to-day become friends. That is politics.

I make this appeal to the Hindu public. If your leaders are on this path, as I say they are, and if you do not approve of it, it is your responsibility. The responsibility of the Hindu public, to come forward and say 'stop this internecine war. Declare a truce. Let us sit as two equals, and come to a settlement.' That is now the problem of problems. I ask how can you keep on saying that it is the British who keep us apart. Of course, I grant the British take advantage of our folly. But we have devices of our own which are better than any devices that the British Government can fashion to keep us disunited (Cheers). Why should not the country say: 'Unite and drive the British out?' It is no use appealing to other nations of the world."

The principal resolution of the session ran:—

"This session of the All India Muslim League views with concern and grave apprehension the failure of the British Government to make an explicit declaration asked for in the resolution passed by the Working Committee of the All-India Muslim League in Bombay on August 7th, 1942.

"Since that resolution was passed, the speeches and statements made by responsible British statesmen, both in England and in India, lead to the conviction that not only the declaration such as was asked for, will not be forthcoming but that some kind of federal constitution, not necessary on the model embodied in the Act of 1935, is under contemplation. This session, therefore, warns the British Government in all earnestness that the imposition of such a federal constitution will be resisted by Muslim India with all its might which will inevitably result in strife, bloodshed and misery, the responsibility of which will rest on the British Government alone.

"This session of the All-India Muslim League is convinced that the attainment of the cherished goal of Pakistan is possible by the untiring effort, willing sacrifices and grim determination of the Muslims, and they should therefore do their utmost to acquire the strength requisite for such an undertaking."

Mr. Gandhi's Gesture.—In response to Mr. Jinnah's appeal at the annual session of the League, Mr. Gandhi a few weeks later wrote a letter to the League leader expressing his willingness to meet him; presumably to discuss with him the Congress-League relationship and Hindu-Muslim question generally. The contents of the letter are not known publicly. The

Government of India refused to forward the letter to the addressee on the ground that it was against their policy to give detenus any facilities for political intercourse. Government intimated to Mr. Jinnah that Mr. Gandhi had addressed a letter to him but that they had decided to withhold it.

Karachi Session.—The year 1943 had two plenary sessions of the Muslim League. In addition to the session at Delhi held in the summer, a session was held in the winter at Karachi. At the Karachi session Mr. Jinnah said: "As I have repeatedly told you, any call that comes from you, any opportunity for service, I shall serve with my heart and soul. I shall not falter nor hesitate but obey. Since we undertook the revival and the revitalising of the Muslim League, it is now seven years. These have been strenuous years. During these seven years we have made remarkable progress, and it is admitted by our friends and even by our opponents today. We have shown that not merely to India but to the world, and we have fully established that we are a nation." We shall never rest content until we seize the territories that belong to us and rule over them. Let me tell you that the struggle is a hard and long and it requires special patience. It requires of every one of you—and now I specially address the youth—patience, hard work and steady progress in building the great nation to which we belong. Every step has to be considered from various points of view. You will admit that so far we have met every manœuvre, every machination, every movement, every scheme and every design to break us, with success every time.

"We have survived the opposition which first came from Government and the bureaucracy when we undertook the reorganisation of the Muslim League. For reasons of their own that opposition was slackened. Then came a terrific onslaught from the Congress—mass contact and challenges—and when the Congress Ministries were formed, the Muslim League was told and ordered to liquidate itself. Every effort was made to destroy the Muslim League and to cause disruption among the Muslims, but they rebounded upon them as a boomerang. The Muslim League now is a true force. Even today we are not left in peace.

"Mr. Churchill said that he did not preside over His Majesty's Government to liquidate the British Empire. I would say voluntary liquidation is more honourable than a compulsory one; it will redound to the honour of the British nation and it will be recognised by us as an act of friendship which has got its value and price for the future. But compulsory liquidation will have none of those advantages—and the British Empire will have to be liquidated one day."

Mr. Jinnah asserted that the Hindus were responsible for holding up the progress of the country. He asked: "Can we Mussalmans of India accept Akhand Hindustan, Hindu Raj over the entire sub-continent? Is it possible to expect Muslim India to agree to Akhand Hindustan and Hindu Raj on the continent? This is their proposal. They have not given up their dream. On the other hand, they talk of independence. Whose independence? I have repeatedly warned you that when they talk of independence, they mean the independence of India and the slavery of Muslim India. If the Hindus, owing to their obsession or dream or cussedness, put obstruction in the path of freedom of both and insist upon the freedom of one and the slavery of the other, I ask you who are responsible for holding up the progress of the country except the Hindus?"

A committe of action consisting of not fewer than five and not more than seven members and with a proper secretariat to organise, co-ordinate and unify the activities of the League was suggested by Mr. Jinnah. "It will be the duty of this committee to examine the various suggestions received for the uplift of the Muslims," he said. He appealed for funds to carry on the activities of the League. He said that he appealed nearly two years ago for a sum of Rs. 10,00,000; but so far he had received only Rs. 5,50,000. With that money at their disposal they could make a beginning. Mr. Jinnah also suggested the setting up of an All-India Parliamentary Board—a supreme body to supervise the elections and disputes regarding elections.

A resolution setting up a committee of action was moved by Chaudhury Khaliquzzaman. It ran:—

"Whereas the All-India Muslim League, in its annual session held at Delhi in April 1943, had, in view of the vague, indefinite and unsettled policy of the British Government towards the Muslim demand of Pakistan on the one hand and the unpatriotic, short-sighted, and antagonistic attitude of the Hindus on the other, resolved to rely on the Mussalmans of India generally and the Muslims of Pakistan zone in particular for the attainment of their cherished goal, this session of the All-India Muslim League hereby resolves to appoint a committee of action of not less than five and not more than seven, to be nominated by the President, to prepare and organise the Mussalmans all over India to meet all contingencies, resist the imposition of All India Federation or any other constitution for a united India and prepare them for the coming struggle for the achievement of Pakistan."

Letter to Mr. Jinnah.—Shortly after the release from jail in May 1944, Mr. Gandhi released to the press a copy of the letter which he had written to Mr. Jinnah from the Aga Khan's Palace (see chapter on "The Indian National Congress"). In this letter Mr. Gandhi expressed a desire to meet Mr. Jinnah to discuss the communal question. Mr. Jinnah, who was holidaying in Kashmir, refused to comment on the letter. In about two months time Mr. Rajagopalachari published details of his offer to Mr. Jinnah for a settlement on the basis of the concession of the principle of Pakistan (see chapter on "The Indian National Congress"). It aroused a diversity of reaction among Muslims, some of whom thought that the C. R. Formula contained the germs of settlement, while others felt that it did not go far enough to meet the Muslim demand. The majority of the Leaguers, however, thought it best to let Mr. Jinnah deal with it.

Gandhi-Jinnah Talks.—The Gandhi-Jinnah talks which were scheduled to take place in August had to be put off owing to Mr. Jinnah's ill-health. They actually began in September.

The negotiations lasted full three weeks at the end of which Mr. Jinnah made the following statement, at the same time releasing for publication the voluminous correspondence that had passed between him and Mr. Gandhi during that period.

"Mr. Gandhi from the very commencement of our talks made it clear that he had approached me in his individual capacity and that he represented no one but himself. However, he assured me that he was really open to conviction and conversion to the Muslim League Lahore Resolution of March 1940."

"Without prejudice to my objection that in order to reach any settlement, negotiations can only be carried on properly when the other side is also fully represented and vested with authority. In deference to Mr. Gandhi's wishes I agreed to the task of persuading and converting him to the fundamentals of the Lahore Resolution."

"I have placed before him everything and every aspect of the Muslim point of view in the course of our prolonged talks and correspondence, and we discussed all the pros and cons generally, and I regret to say that I have failed in my task of converting Mr. Gandhi."

"We have, therefore, decided to release to the Press the correspondence that has passed between us."

"Nevertheless, we hope that the public will not feel embittered, and we trust that this is not the final end of our effort."

For the full text of the Gandhi-Jinnah correspondence see last year's issue of the Indian Year Book.

Commenting on the failure, Mr. Gandhi said at a press conference that it was a matter of deep regret that he and Mr. Jinnah could not reach an agreement but there was no cause for disappointment. "The breakdown is only so-called; it is an adjournment *sine die*," he said. "Each one of us must now talk to the public and put our view-points before them. If we do so dispassionately, and if the public co-operate, we may reach a solution of the seemingly insoluble at an early date.

"My experience of the previous three weeks confirms me in the view that the presence of the third Power hinders the solution. A mind enslaved cannot act as if it was free. I need not impute base motives to the rulers to prove what seems to me to be an axiomatic truth. Nevertheless, I am going to continue to work for the solution as I have done during these weeks.

To this, Mr. Jinnah replied: It is a pity that he thinks that the presence of a third party hinders a solution and it was very painful to me when he said, "a mind enslaved cannot act as if it was free." No power can enslave the mind and soul of man, and I am sure Mr. Gandhi is the last person to allow his mind to be enslaved. I do hope that he will get over this depression from which he is perpetually suffering. We have to reach an agreement of our own and find a solution in spite of that third party.

Desai-Liaqat talks.—Things drifted for the next few months until the publication of press reports relating to certain secret negotiations between Mr. Bhulabhai Desai leader of the Congress in the Central Assembly, and Nawabzada Liaquat Ali Khan, Deputy leader of the Muslim League Party in the Central Assembly.

Pending the publication of authoritative information on the subject (see chapter on the Indian National Congress), both Mr. Jinnah and Nawabzada denied the existence of any understanding between the Congress leader and the League.

Simla Conference.—The next phase of Muslim activity was in connection with the Wavell proposals in the Simla Conference. This, together with the part played by the Muslim League and its leader, were exhaustively dealt with in the chapter on "The India National Congress in last year's issue of *The Indian Year Book*."

After the breakdown of the Simla Conference the Working Committee of the Muslim League passed a resolution emphasising the urgent need for fresh elections to the Central and Provincial legislatures. The League Committee invited the attention of the Government to the resolution unanimously adopted at the annual session of the All India Muslim League held at Karachi in December 1943 demanding free elections to the Central and provincial legislatures on the ground that these legislatures were getting out of touch with public opinion and could no longer be said to be representative of the true needs and sentiments of the people. The committee stressed the urgent necessity of giving effect to the terms of that resolution. The Working Committee was convinced that fresh elections to the central and provincial legislatures should no longer be delayed because important questions awaited solution which could only be properly dealt with by representatives in touch with public opinion and the sentiments of the people.

The Muslim League and its leader then carried on a campaign demanding early general elections throughout the country. In August 1945 the Government announced that general elections would be held in the winter of 1945-46 and the spring of 1946.

The Muslim League plunged into the election heart and soul. In one of his first election speeches Mr. Jinnah said: "This is a war that can be fought only with silver bullets" and, after the fashion of Mr. Churchill, "give me those silver bullets and I will finish the job." He added, "We are determined not to submit to any scheme of an All-India Union, Interim or otherwise, and we will resist any attempt to impose such a union upon us. The just and only solution of India's constitutional problem lies in the establishment of Pakistan and Hindustan."

As the elections drew near, Mr. Jinnah said that the deadlock in this country was not much between India and Britain as between

the "Hindu Congress" and the Muslim League. The British Government were putting the cart before the horse in proposing an all-India constitution-making-body before a settlement of the Pakistan issue. The League leader also revealed his intention to include Assam in the eastern zone of Pakistan.

The elections to the Central Assembly were a hundred per cent success to the League. Applauding the electors, Mr. Jinnah said that the Congress had adopted a cowardly policy and had run away. It didn't dare to put up any Muslim candidate on the Congress ticket, knowing full well that the fate of those candidates would be the same as that of the Nationalist Muslims.

Like the central elections, the elections to the provincial Assemblies were fought on the issue of Pakistan. Mr. Jinnah said: "If the Muslims stand united, with a grim resolve to sacrifice everything for Pakistan, then we shall surely achieve it. We must realize the success for which we were fighting. This is a question of life and death for Muslims. Failure to achieve Pakistan would mean our national extinction."

Except in the Frontier Province and in a few isolated cases in other provinces, the Muslim League scored a signal triumph in the provincial elections as well. In Madras, Bombay, the C. P. and Orissa it secured cent per cent success. In Bihar, Assam and the United Provinces, especially in the last-named, a few non-League Muslims were returned, but the large majority were leaguers. In Bengal, the heart of what is called the eastern pakistan, only a couple of non-leaguers could come in; all the other Muslim seats were captured by the League. At the other end, in the heart of "Western Pakistan", namely the Punjab, the League annexed all the seats except about a dozen which went to supporters of the Unionist Party which had held sway in the province for about ten years. In Sind, out of a total of 35 Muslim seats, as many as 27 went to the League; of the remaining eight, four went to pro-congress Muslims and the other four to a group which had cut itself away from the official League. In the Frontier Province, however, the League's hopes failed, for the majority of the Muslim seats went to the Congress. Even here, the League put up a better show than in the previous elections held ten years ago. Thus the League was able to establish its claim to represent the vast majority of the Muslims of India.

In terms of Ministries, however, the League did not fare so well. Bengal was the only province in which a League Ministry could be formed without its supporters having to depend on the votes of other groups. In the Frontier, of course, the Congress formed the Ministry with the League as the main Opposition party. In the Punjab again, in spite of the fact that the League formed a solid group of 75 in a House of 175, it had to remain in the Opposition, a Government having been formed with the aid of a coalition of a dozen non-League Muslims, 30 odd Sikhs and a large number of Hindus. In Sind, a League Ministry was formed by the Governor, but it had a precarious existence, faced as it was by an opposition of nearly equal strength. Thus, out of the four Muslim majority provinces, there were League Ministries in two, a Congress Ministry in the third and a pro-Congress coalition Ministry in the fourth.

This the League did not mind because it had already stated it did not think in terms of Ministries. As Mr. Jinnah observed on the morrow of the elections, "We have secured a thumbing verdict throughout India, the elections showing a clear result of not less than 90 per cent. of the Muslim votes cast in favour of Pakistan." The claim was more or less right insofar it related to the proportion of successful Leaguers returned at the polls. An analysis of the voting figures showed, however, that the pro-League percentage was much lower.

The months following the Simla Conference of 1945 were devoted to electioneering. There is no doubt that during this period there was an accession of strength to the League throughout the country. The resignation of the Punjab Provincial Congress Committee's President and his subsequent enrolment as a member of the Muslim League was an illustration of the change that was coming over the minds of many Muslims. This obviously accounted for the success of the League at the polls.

Early in 1946 there was an indication of a big move on the part of Britain finally to settle the Indian political and constitutional question. The British Premier, in March 1946, made the famous declaration announcing the Labour Government's policy and the despatch of a Cabinet Delegation to settle the Indian question on the spot. (See the Chapter "British Cabinet Delegation"). Commenting on this Mr. Jinnah said: "The Congress is threatening the British that it will not work the constitution but will use it for the purpose of preparing the people for a final struggle if the British Government did not surrender to the Congress demand for immediate formation of an all-India federal constitution to be framed by a constituent assembly, with an overwhelming Congress majority and the formation of an immediate interim national government at the centre. The British are threatened that, if they want trade facilities, they must surrender to the Congress and make a compromise with its patrons, the capitalists. If they did not surrender, the consequence will be bloodshed and ruination of British trade. If the Pakistan demand is favoured, all the weapons that they are keeping in their armoury will be let loose. To prevent bloodshed a bribe is offered to the British, of a flourishing trade in India, in common with the Indian capitalists, if they make peace with the Congress. This is a dream, for they fail to take into account that there are one hundred million Muslims and that there is a powerful mass organization, the All-India Muslim League, which cannot remain a spectator. So far as trade is concerned, it is not realized that the largest consumers of British goods are Muslims. They can also play a big part in paralyzing British trade if they were resolved to do so.

The weeks that followed the arrival of the British Cabinet Mission was a period in which Mr. Jinnah went all out to sustain his Pakistan

claim. He went to the extent of telling the Sikhs that they as a nation were entitled to a state of their own and that he was not opposed to it as such provided they showed where it could be created.

Mr. Jinnah saw no room for the Muslims to compromise on the issue of Pakistan, which, he said, was the question of their very existence. Asked by an interviewer if this statement inferred a loyalty to the community before loyalty to the country, Mr. Jinnah replied: "There is no country in that sense. I do not regard myself as an Indian. India is a state of nationalities, including two major nations, and all we claim is a distinct sovereign state for our nation, Pakistan." He admitted that 25 million Muslims would be excluded from Pakistan as minorities in Hindustan, but he thought that they could not help that in any case. Under Pakistan, they would be better off, because it was fortunate that there would be a corresponding minority of 25 million Hindus in Pakistan. Mr. Jinnah was not worried about the expenditure necessary to defend the frontiers. "Russia means trouble as far as I can judge, and I think the sooner Britain agrees to Pakistan the better it will be for her and Indian Muslims." He would tell the Congress: "Divide. I do not want to live jointly with you. If you talk in any other terms, it is only camouflage. There cannot be any equal share between two nations thrown together, one in an overwhelming majority of three to one. It is unnatural and artificial. Why does Britain want us to keep together? We refuse. If she wants to force us, she will need to keep her bayonets sharp to maintain the Congress Raj in this sub-continent."

Muslim League Convention.—Early in April, while the British Cabinet Mission was sojourning in Delhi, Mr. Jinnah convened an All-India Muslim Legislators' Convention, attended by about 500 members of the various provincial legislatures. Addressing the Convention, the League President said: "We are prepared to sacrifice anything and everything, but we shall not submit to any government formed without our consent. This convention is going to lay down once for all, in unequivocal terms, what we stand for. We stand unanimously for Pakistan. We shall fight and die for it, if necessary; achieve it we must, or we perish." An inflexible, uncompromising tone was evident throughout his speech. He repudiated the suggestion of an "undivided Pakistan" under the suzerainty of a strong central government. He declared that a government established by handing over the country's civil and military administration to the Congress, "would not hold for 48 hours." Because it implied proceeding on the basis of a united India, a single constitution-making body, asserted Mr. Jinnah, was unacceptable to the Muslim League. He explained that, while matters like defence and external affairs might be the subjects of common arrangement, this should be effected not through a central co-ordinating agency, but by treaties entered into by a completely sovereign Pakistan and Hindustan. "Nothing derogatory to the full sovereignty of Pakistan is acceptable," he affirmed. Mr. Jinnah accused Mr. Gandhi of promising preferences to British goods and hoped that "the commercial tendencies of Britain" would not lead that country to accept the Congress' "illusory hopes and promises." The League leader declared that the Congress forgot that the consumers who were largely Muslims had also "a say" in these matters. Referring to the Congress suggestion of grave trouble if that party's demands were not met, Mr. Jinnah stated: "If unfortunately the British are stampeded by the threat of bloodshed, which is mere bluff, the Muslim League this time is not going to remain passive or neutral."

Commending the resolution to the Convention, Mr. H. S. Suhrawardy, Premier of Bengal, made a speech which was evidently meant for the ears of the British Cabinet Mission. He said: "Britain was ready to part with power and was seeking to whom she might hand over power, and the presence of the Cabinet Mission was proof of her earnestness and sincerity. 'The Congress'", he said, "was stating: 'Hand over power to us. We shall sweep all opposition. We shall suppress the Muslims. We shall bring the scheduled castes to the heel, and we shall annihilate the Adibasis. Give us the police, your army and arms and we shall reproduce an armageddon in the name of a united India.' This I call insanity to hand over the keys for power. The Cabinet Mission is not so blind as to leave the destinies of India to the gang. Is Pakistan our last demand?" he asked, and replied: "I will not attempt to give an answer. But that is our last demand. I would like the Congress to realize that we in the east are as keen as they were prepared to accept the supreme principle of Hindu majority in a democratic constitution, but they turned down every one of our modest demands. Now there is nothing left for us except to demand separation. This is our last and legitimate demand of ours." Hundred million of Muslims Mr. Suhrawardy said, were today united behind the League and they would resist all attempts to deny them their right. Muslims were not a divided nation and the resistance would not be by mere words. If the Hindus wished to live in honour and peace the Congress should concede Pakistan, he added. "The Muslims did not desire to start a civil war but they must have their rights, so that the world be able to hold up their heads and say 'We are a nation and we believe we have something to contribute to the civilization of the world.'"

Khan Abdul Qayyum Khan (N.W.F.P.) said that if "Quit India" meant that "British should quit here and mess and live the Hindus and Muslims to decide the question among themselves, then on behalf of 100 million Muslims he would ask the British to quit. But what puzzled him was that the Congress wanted the British to stay for a sufficiently long period so that they could consolidate their position with British bayonets. "It cannot happen" he said, adding: "Thank God, we have one flag, one leader, one platform and one ideal—Pakistan—to fight for. We are only waiting for the final order to do whatever is considered necessary for the attainment of Pakistan." Concluding he said: "We are not

indulging in any threats against the Congress or the Hindus. But if the British force the Muslims by the setting up of a Government of the Akhand Hindustan type and if they decide there should be one Constituent Assembly, then the Muslims will have no other alternative but to take out the sword and rebel against it."

Mr Shaukat Hyat Khan (Punjab) claimed that he represented the martial class in the Punjab and that they were eager to join the struggle for Pakistan. "You only give us a chance," he said, "and we shall give a rehearsal now when the British army is still here. You will see the reactionary government which is there in the Punjab with the help of the Hindus and the Muslim quislings thrown overboard."

Sir Firoz Khan Noon declared: "If the Hindus give us Pakistan they will be our best friends. If the British give us Pakistan, then they will be our friends. But if neither give us Pakistan, then Russia will give it to us." He added: "We want our freedom and we shall have it. Freedom is a thing which is more valuable than anything else in the world. We wish to see that our children shall never be slaves of Akhand Hindustan."

Winding up the Convention session, Mr Jinnah said that the august and historic Convention of the Muslim nation had declared itself for Pakistan. "While we hope for the best," he said, "we are prepared for the worst." They were prepared to make any and every sacrifice for the attainment of Pakistan Pakistan Mr. Jinnah went on, was not going to be a theocratic State. Religion, of course, played an important part in a nation's life. But there were other aspects, which were vital for a nation's existence. Social, economic and political life were the main pillars which would enable them to live according to their faith, with their social life demarcated and economic raised and with no political power they would not be able to defend their faith.

The following resolution was unanimously adopted by the Convention:—

"Whereas in this vast sub-continent of India hundred million Muslims are the adherents of a faith which regulates every department of their life (educational, social, economic and political), whose code is not confined merely to spiritual doctrines and tenets or rituals and ceremonies, and which stands in sharp contrast to the exclusive nature of Hindu Dharma and philosophy, which has fostered and maintained for thousands of years a rigid caste system resulting in the degradation of 60 million human beings to the position of untouchables, creation of unnatural barriers between man and man and superimposition of social and economic inequities on a large body of the people of this country, and which threatens to reduce Muslims, Christians and other minorities to the status of irredeemable helots, socially and economically,

"Whereas the Hindu caste system is a direct negation of nationalism, equality, democracy and all the noble ideals that Islam stands for;

TWO DISTINCT NATIONS

Whereas different historical backgrounds, traditions, cultures, social and economic orders of the Hindus and Muslims have made impossible the evolution of a single Indian nation, inspired by common aspirations and ideals; and whereas after centuries they still remain two distinct major nations;

"Whereas soon after the introduction by the British of the policy of setting up political institutions in India on the lines of Western democracies based on majority rule, which meant that the majority of one nation or society could impose its will on the majority of the other nation or society in spite of their opposition, as was amply demonstrated during the two and a half years' regime of Congress Governments in the Hindu majority provinces under the Government of India Act, 1935, when the Muslims were subjected to untold harassment and oppression as a result of which they were convinced of the futility and ineffectiveness of the so-called safeguards provided in the constitution and in the Instrument of Instructions to the Governors and were driven to the irresistible conclusion that in a United Indian Federation, if established, the Muslims even in majority provinces would meet with no better fate, and their rights and interests could never be adequately protected against the perpetual Hindu majority at the Centre;

"Whereas the Muslims are convinced that with a view to saving Muslim India from the domination of the Hindus, and in order to afford them full scope to develop themselves according to their genius, it is necessary to constitute a sovereign independent State Comprising Bengal and Assam in the north-east Zone and the Punjab, the North-West Frontier Province, Sind and Baluchistan in the north-west Zone;

"This convention of the Muslim League legislators of India, Central and Provincial, after careful consideration hereby declares that the Muslim nation will never submit to any constitution for a united India and will never participate in any single constitution-making machinery set up for the purpose, and that any formula devised by the British Government for transferring power from the British to the peoples of India, which does not conform with the following basic principles calculated to maintain internal peace and tranquility in the country, will not contribute to the solution of the Indian problem:—

PAKISTAN ZONES

"First that the zones comprising Bengal and Assam in the north-east and the Punjab, the North-West Frontier Province, Sind and Baluchistan in the north-west of India, namely, Pakistan zones where the Muslims are a dominant majority, be constituted into a sovereign independent State and that an unequivocal undertaking be given to implement the establishment of Pakistan without delay.

"Second, that two separate constitution-making bodies be set up by peoples of Pakistan and Hindustan for the purpose of framing their respective constitutions.

"Third, that the minorities in Pakistan and Hindustan be provided with safeguards on the lines of the All-India Muslim League resolution passed on March 23, 1940, at Lahore.

"Fourth, that the acceptance of the Muslim League demand of Pakistan and its implementation without delay are the *sine qua non* for the Muslim League co-operation and participation in the formation of an interim Government at the Centre.

"This convention further emphatically declares that any attempt to impose a constitution on a united India basis or to force any interim arrangement at the Centre contrary to the Muslim League demand will leave the Muslims no alternative but to resist such imposition by all possible means for their survival and national existence.

All the participants in the Convention took the following pledge:

"I do hereby solemnly declare my firm conviction that the safety and security, and the salvation and destiny of the Muslim nation inhabiting the sub-continent of India lie only in the achievement of Pakistan, which is the one equitable, honourable and just solution of the constitutional problem and which will bring peace, freedom and prosperity to the various nationalities and communities of this great sub-continent. I most solemnly affirm that I shall willingly and unflinchingly carry out all the directions and instructions which may be issued by the All-India Muslim League in pursuance of any movement launched by it for the attainment of the cherished national goal of Pakistan, and, believing as I do in the rightness and the justice of my cause, I pledge myself to undergo any danger, trial or sacrifice which may be demanded of me."

The Muslim League's negotiations with the Cabinet Mission are dealt with in the Chapter "British Cabinet Delegation", which relates to the period from April to October 1946.

OTHER MUSLIM ORGANISATIONS

Organisations of Muslims other than the League suffered a progressive decline in status and influence since the League ascendency to power following the withdrawal of Congress Ministries in 1939. When the Congress was outlawed in August 1942 and its leaders put in prison, the non-League Muslims tried to get together to counteract the influence and claims of the Muslim League. It was a slow process, and not very successful, because the League not only maintained its hold on the bulk of the Muslim community but also steadily increased its influence among them. At any rate, officialdom seemed disinclined to recognise the claim to representative character of non-League Muslim organisations. The activities of the latter were further stimulated at the time of the Simla Conference in the summer of 1945 when they felt the call to repudiate the claims of Mr. Jinnah exclusively to represent the Muslim community. Their latest attempt was to create a common platform for those Muslims who did not see eye to eye with the Muslim League.

In the weeks immediately preceding the elections pro-Congress and other non-League Muslims tried to get together in an effort to defeat the League candidates. In this they failed miserably.

The Indian Legislature.

The coming constitutional shake-up overshadowed the Budget Session of the newly elected Central Legislative Assembly. It was a changed Assembly. The Nationalist Party of the old Assembly had disappeared from the Assembly, so also the unattached members. The Party alignments had become clearer and well-defined. The Congress was the largest party in the Assembly, having as many as sixty members. The Muslim League, having captured all the Muslim seats, formed the second large group. The Europeans retained their position and formed the third party in the House. The three Sikhs sat separately as unattached members along with a couple of landlords. Barring the Muslim League, the leadership of the Parties had also changed. Mr. Sarat Chandra Bose had replaced the late Mr. Bhulabhai Desai as the Leader of the Opposition, Mr. P. J. Griffiths had succeeded Sir Harry Richardson as the Leader of the European Group and Sir Edward Benthall and subsequently Sir Ramaswamy Mudaliar had replaced Sir Sultan Ahmed as the Leader of the House. Mr. M. A. Jinnah alone retained his leadership of the Muslim League Party.

Barring the Scheduled Caste Representative, Diwan Bahadur N. Sivaraj, the Indian Christian Representative Dr. J. C. Chatterji and the Anglo-Indian Representative Mr. Frank Anthony the entire nominated bloc had been changed. The Labour representation had been increased from one to three, including a woman. Six Mussalmans had been given separate representation in Raja Sahib of Salempur. And yet the whole setup was unreal. The Government members were polite but not firm. They could not be otherwise. They knew that they were going out. The Opposition was ruthless and aggressive. It had the majority and could and did defeat the Government on many issues, so long as the Congress and the Muslim League could combine. Theirs was neither a Unity nor a Coalition. Theirs was only a combination to defeat the Government because both were opposed to it, though from different standpoint.

Looking back on the three months' session one could say that there was plenty of talent amongst the Congress members but it was hardly mobilised. There was little application and no division of work.

The Muslim League Party was a disappointment, as far as the attendance of its members was concerned. Half the members were invariably absent. It possessed well-known personalities including five Members of the League's Highest Executive. Thus the Party possessed talent, which mostly remained dormant.

The European Group maintained its reputation for industry and application. Mr. G. W. Tyson was always listened to with attention particularly on financial subjects. Mr P. J. Griffiths is a brilliant speaker and made some valuable contributions to the debates on the I. N. A. and R. I. N.

The Government side was definitely poor. For the first time, several non-official Nominated Members voted against the Government and many of them stayed away from the House for the most part of the Session. Here again, the Back Benchers, the War Secretary Mr. P. Mason and the Commonwealth Secretary Mr. Banerji made their mark. Mr. Mason came out as a first rank parliamentarian. The Food Secretary Mr. B. R. Sen had a difficult job but he did it well. The Foreign Secretary, Mr. Weightman is in a class by himself. He was firm when firmness was needed.

The Session had a record number of adjournment motions and short notice questions. In fact, adjournment motions became the order of the day, through which discussions were raised on many and varied subjects. The Sterling Balances, the Brettonwoods Agreement, the Pegging Act of South Africa, the I. N. A. Prisoners and Labour unrest among Railwaymen and Postal Employees, the Defence services, wages and food dominated the Session. The Government, as far as it was possible, was responsive and accommodating and met the Opposition in a large number of cases. This was largely due to the present policy of Lord Wavell, who, for instance, declined to restore the curbs relating to railway co-ordination and the Interception Department.

The Session had a very busy legislative programme, as many as thirty-two official Bills were brought up for disposal. There being no November Session, it was in reality a two Sessions work, which the Central Assembly had been called upon to do in one Session.

Labour legislation topped the list. Dr. Ambedkar having as many as seven Bills some of which were crowded out on the last day. These included the Electricity Bill, the Minimum Wages Bill and the Trade Union Recognition Bill, the last of which was put down for a Select Committee.

Sufficient indications were given during the session by Dr. Ambedkar to bring forward legislation to provide for Health Insurance of both Industrial workers and seamen, to overhaul the Indian Factories Act and to amend the Trade Disputes Act. Indications were also given for a revision of the Indian Companies Act.

The Session, however, passed some important pieces of legislation such as the Mica Labour Welfare Fund Bill and the 48 hours a Week Bill.

The Finance Member, Sir A. Rowlands proved a great tactician and was able to steer through his Finance Bill successfully this year. His work is only half done as yet, for he was unable to bring up legislation in relation to the National Investment Board, Capital Control and the Amendment of the Reserve Bank Act.

One of the out-standing achievements of the Session was Dr. Deshmukh's Bill to give Hindu women the right to separate residence and maintenance.

Looking back on the three months of the Session one inescapable reaction is that the Assembly has outlived its utility. It has become a debating society *par excellence*. The present Government know that it will soon be replaced.

In addition to the annual Finance Bill, the session disposed off twentytwo Bills, including one Private member's Bill :

The more important Bills were:—

The Indian Mines (Amendment) Bill. It makes provision for proper pithead bathing facilities for miners in coal-mines.

The Indian Income-tax (Amendment) Bill : It gives concessions for the purpose of encouraging the modernisation and rehabilitation of Industry and Trade.

The Indian Oil-seeds Committee Bill. It sets up an Indian Oil-seeds Committee on the lines of Indian Central Cotton Committee and provides for a levy of excise duty at the rate of one anna per maund on processed oil-seeds to finance the activities of the Committee.

The Factories (Amendment) Bill. It provides for eight hours working day in industrial undertakings.

The Trade Marks (Amendment) Bill. It provides for reciprocal recognition of Trade Marks between British India and certain Indian States.

The Protective Duties Continuation Bill. It provides for the extension of protective duties on Protected Industries by one year ending March 31, 1947.

The Protective Duties Bill. It empowers Government to impose by Executive action additional duties in pursuance of the recommendation made by the Tariff Board to war Industries, pending necessary legislation.

The Hindu Married Women's Right to separate Residence and Maintenance Bill. It is intended to give married women right to separate residence and maintenance under undesirable conditions.

The Industrial Employment (Standing Orders) Bill : It requires the occupier of a factory to frame standing orders, defining conditions of work.

The Merchant Seamen (Litigation) Bill. It affords protection to Merchant seamen in respect of Civil and revenue Litigation on the lines of the Indian Soldiers (Litigation) Act.

The Mica Mines Labour Welfare Fund Bill. It creates a fund for the Labour welfare employed in Mica mines by a levy of cess, which shall not exceed 2½ per centum *ad valorem*.

Three Bills were referred to Select Committees. They were :

1. The Banking Companies Bill. This is the old Bill which lapsed on account of the dissolution of the Central Legislative Assembly. The main features of the Bill are as follows :

(*i*) A simple definition of banking with the object of limiting the scope of the legislation to institutions in which the funds are deposited primarily to ensure their safety and ready withdrawability ;

(*ii*) Prescription of minimum capital standards.

(*iii*) Prohibition of trading with a view to eleminating non banking risks ;

(*iv*) Inclusion in the scope of the legislation of banks incorporated or registered outside British India.

(*v*) Introduction of a comprehensive system of licensing of Banks.

(*vi*) Provision of an expeditious procedure for liquidation.

(*vii*) Inspection of the books and accounts of a bank by the Reserve Bank when necessary.

(*viii*) Empowering the Central Government to take action against banks conducting their affairs in a manner detrimental to the interests of the depositors.

(*ix*) Prescription of a special form of balance sheet and conferring of powers on the Reserve Bank to call for periodical returns.

2. The Insurance Act Amendment Bill : The Bill implements the recommendations of the Sir Cowasji Jahangir Committee which aimed at (*i*) making it difficult for designing financiers to get control of insurance companies or to use insurance funds for speculative purposes and (*ii*) prevent interlocking of interests between insurance companies and banks. The Bill further prohibits the commission method of remuneration and places a limit on overall expenses of insurers.

3. The Motor Vehicle Act Amendment Bill

The Indian Coinage Act Amendment Bil forand the Indian Pharmacy Bill were circulated eliciting opinion. The Indian Coinage Bill seeks to introduce decimal system of coinage in India.

The Pharmacy Bill is designed to regulate the profession of pharmacists by setting up a Central Council of Pharmacy which in its turn shall prescribe the minimum standards of education and prescribe courses of study and examination for Pharmacists.

Five Bills, which had been introduced and were put down for reference to select Committees or for circulation were not reached before the Session was adjourned *sine die*. They were :

(1) The Estate Duty Bill. It provides for the levy and collection of an Estate Duty on non-agricultural property in British India with the avowed object of assisting the Provinces in their Post war development.

(2) The Minimum Wage Bill. It provides for fixing minimum wage in certain employments.

(3) The Electricity (Supply) Bill provides for the rationalisation of the production and supply of electricity and generally for taking measures conducive to the electrical development of India.

(4) The Indian Trade Unions (Amendment) Act. It provides for obligatory recognition of representative Trade Unions. The question as to whether a Trade Union is representative or not will in the event of dispute be considered by an Industrial Court to be set up for the Purpose.

(5) The Indian Nursing Council Bill seeks to set up an Indian Nursing Council which will prescribe uniform minimum standards of education and training for nurses, midwives and health visitors, supervise examinations and maintain a schedule of qualifications recognised for registration throughout British India.

All the five Bills were subsequently circulated by an Executive Order and along with the two other Bills namely Indian Coinage Bill and the Pharmacy Bill, they will be ready for disposal through Select Committee Stage by the November Session of the Central Legislative Assembly.

GOVERNOR-GENERAL'S ORDINANCES :

Forty-eight Ordinances, of which 21 were original and 27 amending Ordinances were issued in 1945. Fourteen Ordinances of which 6 were original were issued till the end of March 1946.

The most important of the Ordinances issued during 1945 were :

Indian Income-tax (Amendment) Ordinance, 1945 : It amended the Indian Income-tax Act, to give relief to the tax-payer, *inter alia* by giving exemption in respect of earned income.

The Provincial Debt Laws (Temporary Validation) Ordinance : It temporarily validated certain provincial laws in so far as they related to promissory notes.

Refugee Camps Ordinance : It provided for and regularised the accommodation in refugee camps of refugees entering British India from certain war areas and the maintenance of essential discipline in such camps.

War Gratuities (Income-tax Exemption) Ordinance : It exempted certain war gratuities from liability to income-tax.

Bengal Jextiles Association Ordinance : It incorporated and regulated a trading Corporation in the Province of Bengal for the purpose of improving the procurement and wholesale distribution of piece-goods in that Province.

Limitation (War Conditions) Ordinance : It provided that the period of limitation prescribed by law for suits shall not run in the period during which persons instituting suits have been detained in enemy territory by circumstances attributable to war.

Bills of Exchange Ordinance : It made provision in respect of Bills of Exchange lost owing to war conditions.

Army (Forfeiture of emoluments) Ordinance : The Ordinance Provided for the forfeiture in certain cases not provided for by the Army Act of pay and allowances of certain persons subject to that Act.

International Monetary Fund and Bank Ordinance : It implemented the International Monetary Fund and Bank Agreements.

The most important of the Ordinances issued till the end of March 1946 are :

Termination of War (Definition) Ordinance : It provided for the determination of the date on which World War II was officially considered to have ended.

Allied Forces (China) Ordinance : It implemented the Agreement between the Government of India and the Republic of China relating to Jurisdiction over members of the forces of the two Governments.

Bank Notes (Declaration of Holdings) Ordinance : This Ordinance required banks and Government Treasuries to furnish information in the prescribed manner concerning certain bank notes held by them and provided for penalties in event of any bank failing to give information or gives false information.

High Denomination Bank Notes (Demonetisation) Ordinance : It provided for the demonetisation of certain high denomination bank notes.

THE CENTRAL BUDGET, 1946-47.

The Central Budget for the year 1946-47 was presented to the Legislature on the 28th February, 1946. It disclosed a revenue deficit of Rs. 144·95 crores in the Revised Estimates of 1945-46 and Rs. 44·06 crores in the Budget Estimates for 1946-47.

The Revised Estimates for 1945-46 put revenue receipts at Rs. 360·66 crores, or a decrease of Rs. 1·68 crores over the budget estimates. While Customs revenue was expected to improve by Rs. 9½ crores, a short fall of Rs. 2 crores was anticipated under Central Excises. Under Taxes on Income including E.P.T., as against an estimated collection of Rs. 190·5 crores, the revenue was now placed at Rs. 189 crores, the short-fall of Rs. 1½ crores occurring under ordinary income tax. The divisible pool of income-tax was estimated to amount to Rs. 55·94 crores, and the share of the provinces, together with a carry-over of Rs. 5·28 crores from the previous year to Rs. 28·75 crores. The Revised estimates for Defence expenditure was placed at Rs. 376·42 crores as against the original estimate of Rs. 3·4 23 crores. The explanation for this comparatively small decrease despite the end of the war in the middle of the year lay very largely in the heavy costs of war gratuities, Special leave and other terminal benefits granted to personnel on discharge in addition to their pay and allowances and other maintenance expenses while awaiting discharge in India.

Demobilisation of Indian Armed Forces.— Plans for the demobilisation of the personnel of the Indian armed forces had been under active consideration for a considerable time before the V.J. day and it was found possible to put these into operation at the beginning of October. The number of such personnel to be demobilised is well over a million and a half and no effort has been spared to speed up the rate of releases. The work of rehabilitation and development connected with the process of demobilisation was also proceeding apace. This included the making of arrangements for the welfare of soldiers awaiting discharge and their education and preparation for civilian life, cancellation or reduction of Defence demands for stores of all kinds, the closing or the slowing down of munitions manufacture, the declaration of surplus stores and the disposal of fixed assets no longer required by the Defence Services. The complementary schemes and measures to ensure that the personnel and industrial resources are utilised for the recuperation and expansion of India's civil economy have also received attention.

With effect from V. J. day, all Lend-lease arrangements and Reciprocal aid came to an end. As a matter of administrative convenience, however, it was agreed that supply and Services through mutual aid should continue for a short time to be rendered on both sides on a cash repay-

ment basis. Matters relating to Lease-lend and Reciprocal aid between U.S.A. and India were to be settled through discussion at Washington for which two senior officers will be deputed.

The Revised Civil estimates were placed at Rs. 129·19 crores, an increase of Rs. 5¼ corres over the Budget figures. Civil expenditure connected with the War showed a fall of Rs. 7 crores but this was more than offset by a further subvention of Rs. 8 crores to Bengal, towards her famine relief and rehabilitation expenditure. The balance of the increase was mainly due to the strengthening of the Central Revenue organisation and expansion in a number of departments, mostly those termed "nation building."

In order to maintain the economic health of the country in the transition period, the Finance Member stated that selected Controls, both economic and financial, will have to be maintained. Other controls will be withdrawn on their ceasing to serve the purpose for which they were designed, some 150 controls having been withdrawn already.

Revenue Estimates.—For the year 1946-47 the revenue estimates, on the basis of present taxation, were placed at Rs. 307 crores as against Rs. 362·34 crores assumed for the previous year. Customs receipts were placed conservatively, at Rs. 65 crores net and Central Excises at Rs. 47·29 crores. A total revenue of Rs. 158 crores was expected under Corporation and Income-tax including Rs. 75 crores from E.P.T. the surplus of the P. & T. Department was estimated at Rs. 10 crores, of which it was proposed to treat only three-fourth as an outright contribution to the general revenues instead of the whole as in the war years. The Railways were expected to contribute Rs. 7·36 crores to general revenues.

Defence Expenditure.—The Budget estimates of Defence Expenditure for 1946-47 amounts to Rs. 243·77 crores for the Revenue and Rs. 1·57 crores for the Capital head, as compared with Rs. 376·42 crores and Rs. 14·93 crores respectively in the Revised estimates for 1945-46. Civil Expenditure debitable to Revenue amounts to Rs. 111·94 crores. The financial position for 1946-47 may be summarised as follows:—

	(In crores of Rs.)
Civil Estimates	111·94
Defence Services	243·77
Total Revenue Expenditure ..	355 71
Total Revenue at existing level of taxation	307·00
Prospective revenue deficit	48·71

As general demobilisation will be in progress throughout 1946-47, Defence expenditure for the year will be inflated by the abnormal expenditure on this account. Provision had been made for an Indian Contingent to be stationed in Japan as part of the forces of occupation furnished by the United Nations. The estimates took into account the reductions resulting from the withdrawal of the Japanese Campaign pay and the further accrual of war-service increments, etc.

It had been decided after consultation with H.M.G. that the Financial Settlement for the allocation of defence expenditure should remain in force until the 1st April 1947, as it would be impracticable from the administrative point of view to revert to normal accounting methods in 1946-47. The Finance Member, however, stated that the continuation of the Settlement for another year in no way prejudiced the question of an alteration in the procedure hitherto followed for financing H.M.G's future expenditure. Defence Expenditure recoverable from H.M.G. for 1946-47 was expected to amount to only Rs. 42 crores as against Rs. 489 crores in the Budget for 1945-46. The reduction was due to the fall in demands from H.M.G., the discontinuance, with effect from the 1st April '46, of India as the source of Supply of SEAC's requirements except in respect of certain agreed categories of Stores, the use of accumulated stores of previous years to meet current requirements and the reduction in the strength of Indian troops overseas.

Ways and Means. Speaking on the Ways and Means problem, the Finance Member pointed out that it had to facets, *viz*. the securing of stability in the immediate future by keeping a check on the inflationary potential that undoubtedly still existed and by the prevention of any material decline in business and economic activity as a result of the cessation of war-time expenditure. As regards the first, borrowing would continue as a fundamental policy of Government's Ways and Means. The Small Saving Scheme had been given a peace time orientation as a voluntary Scheme of Savings by the less well do section of the community During the year 1945-46 a sum of Rs. 40¼ crores had been invested in Small Savings, while during the first nine months of 1945-46, Rs. 43½ crores had been accumulated. The total amount invested in the various public loans during the period Feb. '45 to Jan. 46 amounted to Rs. 346 crores compared with Rs. 286 crores during the corresponding period of the previous year. The progressive total of public loans from the beginning of the war up to the end of Dec. 194 amounted to Rs. 11,78 crores.

Sterling Balances.—Turning to the question Sterling balances, the Finance Member said that he expected the total holding at the end of March 46 will be of the order £1330 millions. He pointed out that the arrangements for the transfer of these balances will be a matter of bilateral settlement between India and U.K. and that India would be entirely free to adopt any line she thought fit at the negotiations for a settlement. If the negotiations were to take place while the resent Government was in office he hoped to associate representatives of the leading political parties with the delegation appointed to undertake the discussion with H.M.G. He then referred to the Empire Dollar Pool, about which he said that there was a belief that the arrangement was unfair to India and that this country having contributed enormous net amounts of hard currency to the Pool, it would be advantageous to withdraw from it without delay. This was a mis conception. Examining the question under four heads he stated that the Dollar Pool was the modification imposed by war conditions of the

sterling area arrangements. Under such an arrangement, Empire and other countries found it convenient to settle their transactions on international account in sterling. With the restricted ability of the Commonwealth to earn foreign exchange as a result of the war and with imports necessary for war being high, the different countries in the Commonwealth pooled their resources and met their essential requirements of hard currencies from the Pool. India had free access to the Pool to finance her essential current imports, and a sum of $20 million had been specially earmarked to 'pay for capital equipment for India's post-war development. As regards the question of withdrawal from the Pool, he said that in his view it would be unprofitable to do so, as the balance of trade with U.S.A. had been unfavourable to India for many months. Giving some figures relating to the excess of India's contribution to the Pool over her drawings, he explained that owing to the number and complexity of the transactions, it was difficult to arrive at completely accurate figures but, with the help of the Reserve Bank, it had been deduced that between Sept. 1939 and March 1945 India had earned hard currency assets to the amount of Rs. 364 33 crores against which (excluding the $20 million referred to above) India had utilised Rs. 265 02 crores. Adding the net import, amounting to Rs. 50·08 crores, of gold from U.K. during this period (gold being equivalent to hard currency) the balance in India's favour was Rs. 49 23 crores as at March 1945. In his opinion the most that could be claimed was a *pro rata* share of the existing pool assets. Even if the full amount could be established it will be much less than what India will obtain by way of free exchange from the pending negotiations between India and U.K. on the subject of sterling balances.

Central and Provincial Planning.—India's ing the progress of Central and Provincial planning, the Finance Member said that provincial five year plans would be finalised shortly and would involve an expenditure of the order of Rs. 900 crores. In addition to these, Central plans in respect of Railways, roads, Civil Aviation etc., would amount to a considerable sum. As an incentive to urgent action, the Central Government has undertaken to provide provincial Government with the funds required for approved schemes which provide a high proportion of employment relative to their cost. In the case of self-financing schemes this assistance will take the form of loans while for others advance grants will be made to cover the full cost which will not be recoverable but will be adjusted against whatever scheme of Central grants is finally decided upon.

The budget included a lump sum of Rs. 35 crores for such advance payments and Rs. 15 crores for loans to Provinces. For Central development schemes (excluding Railways) a total provision of Rs. 27 crores had been made in the budget. Expenditure on Railway items was expected to amount to approximately another Rs. 22 crores.

It was expected that Provincial Govts. between them will have by the end of 1945-46 balances of the order of Rs. 70 crores and will acquire during the next six years surpluses totalling some Rs. 100 crores. Their plans were based on the broad assumption that apart from borrowing, either from the Centre or from the market, they will receive Central grants during the first five year period amounting to Rs. 250 crores distributed roughly on a population basis. In the distribution of this grant the Finance Member said he would prefer a Scheme on the Australian model for the distributing Federal grants. A senior officer would be deputed to study the Australian system and report on the feasibility of adopting it to Indian conditions.

Industrial Finance Corporation.—In the Industrial field the Finance Member mentioned that an advance stage of preparation had been reached in respect of the establishment of the Industrial Finance Corporation, to ensure the availability of medium and long term credits to Industrial enterprises in India. He also mentioned that pending the consideration of the question of setting up a National Investment Board, the existing control over capital issue must necessarily be continued. He also announced that a Taxation Enquiry Committee which he hoped would be predominately non official in composition, would be set up in the near future to consider what modifications would be required in the taxation system of the country to produce a properly balanced and scientific tax structure.

New taxation proposals.—Turning to the new taxation proposals, the Finance Member observed that fiscal policy was not an end itself and that it should subserve the ends of national policy. Its purpose should be not merely to raise a given revenue but so to raise it as to obtain the maximum social and economic advantage and distribute the burden between the various classes of tax-payers in an equitable manner. He said that in the years immediately ahead the largest single source of revenue will have to be the profits of Industry, and that the main problem was how to lay it under a heavy contribution and at the same time encourage it to expand

Taxation Relief.—As his contribution to the solution of this problem, he announced that E.P.T. will be discontinued after the 31st March 1946. He described E.P.T. as a bad tax, rough and ready in its operation, unfair in its incidence and, beyond a certain point, offering a direct inducement to inefficiency. The discontinuance of the tax will not of itself effect the revenue for 1946-47 since it will be payable in respect of all E.P.T. earned up to the 31st March 1946. The scheme of compulsory deposits will also remain upto the end of the E.P.T. period. E.P.T. deposits will be sanctioned in advance of the date for which the law provides on condition that they are not distributed as dividends but are used for building plant or machinery.

Industry was to get further relief by the grant of special initial depreciation allowance of 10 per cent on new buildings or 20 per cent on new Plant and machinery, by the widening of the scope of obsolescence allowance and by allowing for income-tax purposes expenditure on scientific research.

It was also proposed to relieve from Customs duty raw materials imported for industry, without injury to the Indian manufacturer of similar goods, to reduce the rates on such imported plant and machinery as are now dutiable.

Turning to the direct taxation field, he announced the amalgamation of the surcharges on income-tax and supertax with the basic rates, a proposal which affected not only all classes of tax payers but also Central and Provincial revenue. This proposal was estimated to raise the provincial share of income-tax by Rs. 12·75 crores at the expense of the Centre.

He also proposed to reduce the present rates of income-tax and super-tax on a company from 7½ annas to 6 annas by reducing the supertax by 2 annas and by adding ½ anna to the income-tax. Dealing with the present provision imposing an extra tax, at the rate of 1 anna of all sums distributed as dividends, the Finance Member thought that there was no longer any justification for imposing a uniform extra rate of tax on all sums distributed as dividends. It was therefore proposed that excluding dividends payable at a fixed rate sums equal to 5 per cent. on the Capital of the Company including reserves and equal to 30 per cent of the total income may be distributed without attracting more than 1 anna rate of supertax. Dividends above that datum line were to become liable to supertax at steepening rates.

A further concession was also proposed in connection with building programmes, which were to be encouraged as an anti-deflationary activity. For residential buildings a two year's income-tax exemption was proposed and for buildings used for the purposes of the business profession or vocation the initial depreciation was raised from 10 per cent to 15 per cent.

Two reliefs were proposed for the non-company direct tax payer, viz., a reduction in the rate of tax in the lower ranges and an increase in the earned income allowance. The rate on the second slab of Rs. 3,000 was proposed to be reduced from 15 pies to 12 pies and the rate on the third slab of Rs. 5,000 from 2 annas 1 pie to 2 annas. The earned income relief was to be raised to one-fifth, subject to a maximum of Rs. 4,000 on terms of income.

The differentiation of treatment between unearned and earned income was to be carried into the supertax range, and the number of slabs in incomes subject to supertax increased. The differentiation in favour of earned income is one anna in the rupee between Rs. 25,000 and upto Rs. 2 lakhs and half an anna between Rs. 2 lakhs and five lakhs. On the balance above Rs. 5 lakhs there is no differentiation.

As a partial offset to the loss of revenue involved by the changes and also on merits it was proposed to increase the rate of income tax on the balance of income above Rs. 15,000 from 4 annas nine pies to 5 annas. Other minor changes announced were (a) reduction of rate on Life Insurance Companies from 5 annas 3 pies to 5 annas and (b) the discontinuance of the provision for funding a portion of the tax in the case of incomes upto Rs. 6,000.

In the field of indirect taxation a number of changes were also announced. The duty on Kerosene was reduced from 4 annas 6 pies to 3 annas 9 pies per imperial gallon. A small change was made in the duty on wines. The duty on Cinematograph films was converted into a specific duty charged in footage. The duty on imported betelnut was raised to 5½ annas a pound in the interest of the indigenous grower with a preference of 6 pies per pound for British Colonies. The additional import duty on cotton imposed by the Cotton Fund Ordinance of 1942 was amalgamated with the ordinary duty. The duty on motor spirit was reduced from 15 annas to 12 annas per gallon. A specific duty of Rs. 25 per tola was levied on gold bullion and the duty on silver stepped upto 8 annas an oz. from 3 as. 7 1/5 pies an ounce.

Summing up the financial effects of his proposals, the Finance Member pointed out that his income tax proposals will cost the Centre Rs. 21·5 crores while the changes under Customs and Excises are expected to yield Rs. 5 lakhs. This will increase the gap between revenue and expenditure to Rs. 70·16 crores. To bridge a part of this proposed to transfer to revenue Rs. 26·10 crores being the estimated balances in the two war Risks Insurance Funds.

In his peroration, the Finance Member said that he had aimed at keeping the revenue at the level necessary to sustain and advance India's economy by distributing burdens and relief evenly. He wound up by paying a tribute to his staff by saying that his successor "Can search the world in vain for a more able, a more loyal or a more devoted body of public servants."

The new taxation measures include :—

1.	An increase in the rate of Income Tax on the balance of income above Rs 15,000 from 4 annas 9 pies to 5 annas	Estimated yield. Rs. 3·25 crores
2.	An increase in the number of slabs subject to Super Tax, resulting in a more gradual steepening of the rates, which will be more severe on the largest incomes than at present	75 lakhs.
3.	Additional Super Tax at steepening rates on dividends (other than dividends payable at a fixed rate) in excess of 5 per cent of the capital of a company (other than a private company) including reserves or thirty per cent of the total income, whichever is higher, this measure being intended to keep the distribution of dividends within reasonable limits and encourage the ploughing back of profits into industry	1·50 lakhs
4.	The raising of the surcharge on wines from one-fifth to one-half of the amount of Customs duty	5 lakhs
5.	The conversion of the *ad valorem* duty on un-exposed cinematograph films into a specific duty of 6 pies per linear foot and of 4 annas per linear foot of exposed films	45 lakhs.

6. **An increase in the duty on imported betel-nuts to a standard rate of 5¼ annas per pound (witout surcharge) with a preference of 6 pies per pound for British colonies** .. .. .. 1·55 lakhs.
7. **The amalgamation of the Customs duty on cotton of 1 anna per pound under the Tariff Act and the duty of 1 anna per pound under the Cotton Fund Ordinance of 1942 into a consolidated duty of 2 annas per pound (without any surcharge) wholly leviable under the Indian Tariff Act** .. .. ..
8. **The imposition of a specific duty (without surcharge) on imported gold bullion and coin at the rate of Rs. 25 per tola of 180 grains fine and the raising of the existing duty on silver from 3 annas 7½ pies (including surcharge) to 8 annas an ounce (without any surcharge).**

The following further concessions estimated to cost Rs. 5·12 crores to the Central Exchequer were announced by the Finance Member during the course of discussion on the Budget proposals: reduction in the duty on cotton piece-goods and yarn and twist imported from any part of the British Empire other than India and Burma from 25% to 20%; reduction in the excise duty on matches from 2 annas to 1 anna per pound; reduction by 6 pies of the increase in the export duty on betel-nuts originally proposed in the Budget and the reduction in the duty on cinematograph films and expanded metal from 6 pies per linear foot as originally proposed to 3 pies.

Other concessions announced were a reduction in the price of a match box from 6 pies to 4 pies and a similar reduction in the price of a postcard from 9 pies to 6 pies to come into force respectively from the 1st of August and 1st of July 1946.

Reductions in expenditure arising from the cuts by the Legislative Assembly amount to Rs. 93·34 lakhs on revenue account and Rs. 3·46 crores under capital disbursements. In consequence of changes in taxation and expenditure, the expected deficit of Rs. 44·06 crores for 1946-47 will move up by Rs. 4·19 crores to Rs. 48·25 crores with revenue at Rs. 341·87 crores and expenditure at Rs. 390·12 crores.

RAILWAY BUDGET.

The Railway estimates presented by Sir Edward Benthall in the Central Legislative Assembly on February 18, 1946, disclosed a surplus of 32·07 for 1945-46, which was 4.44 crores less than the Original estimates. This is made up of a surplus of 33.75 crores on commercial lines, off set by a deficit of 1.68 crores on strategic lines. The Government decided that they should not set aside a sum of Rs. 2 crores in 1945-46, as originally intended, to cover arrears of maintenance. According to the arrangements made last year, it was decided that General Revenues should receive 32 crores net.

The net result of the year 1946-47 is a surplus of 12·22 crores which is the result of a gain of 14·24 crores on commercial lines and a loss of 2·02 crores on strategic lines. Out of this it is proposed to contribute 7·36 crores to General Revenues representing 1% of the capital at charge of commercial lines less the loss on strategic lines plus half of the balance left over after appropriating 5 crores to the Betterment Fund which has been initiated this year to meet the large unremunerative expenditure on amenities to the public, particularly third class passengers, operating improvements designed to make travel faster safer and more comfortable, amenities to staff like canteens, recreation centres and institutes, staff welfare centres and hospitals and water borne sanitation.

The table below summarises the principal figures of the Budget estimate and compares them with the revised estimate for 1945-46 and the actuals of 1944-45.

(In lakhs of rupees)

	Accounts 1944-45.	Revised Estimate 1945-46	Budget Estimate 1946-47.
Traffic Receipts.			
Gross Traffic receipts	2,10,38	2,25,00	1,77,00
Working Expenses.			
Ordinary working expenses	1,53,34	1,49,91	1,25,73
Appropriation to depreciation fund	17,01	17,05	13,22
Payments to worked lines	1·3	2,34	1,73
Total working expenses ..	1,42,28	1,69,30	1,40,68
A.—Net traffic receipts	74,10	55,70	36,32
Miscellaneous Transactions.			
Receipts	5,03	4,96	4,39
Expenditure	1,79	1,23	1,25
B.—Net miscellaneous receipts	3,24	3,73	3,14
Net Railway revenues (A & B)	77,34	59,43	39,46
Interest charges	27,45	27,36	27,24
Net gain	49,89	32,07	12,22

The total appropriation to the Railway Revenue in 1946-47 will be 1.88 crores including 2 lakhs on account of profit realised on investment from Reserve in branch line shares which will be cancelled during the year on the purchase of lines by Government. It has also been decided to transfer 12 crores to the Betterment Fund. A withdrawal of 1.82 crores is expected to meet the arrears of depreciation in respect of rolling stock replaced during the year. The net result of this year's above transactions will be a reduction of the balance by 11.94 crores from 29.05 to 17.11 crores.

The appropriation to the Depreciation Fund will be 13.22 crores which is 3.83 crores less than in 1945-46 this reduction being attributable to the discontinuance of the contribution made for extra wear and tear during the war. There will be a withdrawal of 15 crores to meet renewals and replacements and the balance at the end of the year will be reduced to 98.83 crores.

During the war years it was exceedingly difficult to make a reasonably correct forecast of traffic receipts. The cessation of the war has not made the task any easier. There will, of course, be a steep decline in the volume of military traffic, while, as a result of increase in the number of road vehicles available and greater availability of accessories and petrol, more traffic will be carried by road. Coastal shipping services may also be in a position to handle more traffic. The position, however, remains unpredictable, depending, as it must, on the speed with which the changeover from war to peace-time economy takes place, not only in India but also abroad, and the speed with which the various rehabilitation schemes proceed, both in India and in the countries which have suffered greater destruction from the war.

Taking all the factors into account, gross traffic receipts for 1946-47 were placed at 177 crores, which is 48 crores less than the revised estimates for 1945-46.

The ordinary working expenses for 1946-47 were placed at 125.73 crores against the revised estimates of 149.91 crores. The budget estimates contain special items aggregating 10.67 crores of which 10.15 crores is for the inflationary element in the expenditure on railway assets after 1942-43, 47¼ lakhs for premia payable on the purchase of certain branch lines and 3 lakhs for hire of rolling stock, owned by the War Department and half a lakh for revenue portion of military sidings. There is thus a reduction of 19.72 crores under special adjustments as compared to 1945-46. Ordinary Working expenses, excluding special adjustments, are expected to come to 115.06 crores in 1946-47 as compared to 119.52 crores in 1945-46. Provision for repairs and maintenance is less than the revised estimate for 1945-46 by 54 lakhs. Under compensation for goods lost or damaged and for accidents the budget provision is 44 lakhs less than in the previous year. There is a reduction of 1.63 crores under loss on Grain Shops. The disbandment of Defence of India Units has resulted in a saving of 1.56 crores. As against these reductions there is an increase under New Minor Works of 48 lakhs.

Capital Programme.—The capital programme for 1946-47 was estimated at 41.92 crores out of which 2 crores to be spent on the construction of new lines and for the restoration of the lines dismantled during the war, the projects to be taken being determined on the basis of engineering and traffic surveys, and the balance of 39.92 crores on open line works. The distribution of the latter expenditure over the various assets is :—

	Rs.(crores)
Rolling Stock	11·33
Machinery and plant	4·03
Track renewals	9·21
Bridges	1·29
Structural and Engineering works other than bridges ..	9·46
Purchase of lines	2·37
Collieries	·42
Investment in road services ..	·02
Increase in stores and manufacture suspense	1·79

Post-War Development.—Sir Edward Benthall in his budget speech indicated certain aspects of the Railways' post-war plans and stated that he was confident that the Indian Government Railways would not be found wanting in meeting industrial demands for the development of the country.

The programme of construction of new railways and restoration of dismantled lines has been settled in consultation with the Provincial Governments, and surveys are proceeding of 3,000 miles of lines, and work is being put in hand on such sections as do not require any further survey. The total amount budgeted next year for new constructions and open line rehabilitation works is 22 crores, which should be a useful contribution to help counter the reduction in war expenditure. The Railway Board are also considering on regional basis various schemes of developing electric traction and of the establishment of a research branch to take advantage of and to improve on the latest technical progress.

Government have a large programme of additions and improvements including amenities to the public and staff which are not likely to be remunerative. For financing them Government have now decided to fall into line with the best railway practice in other countries of providing such expenditure out of revenue. To enable the Railway Board to plan ahead their programme of such works it has been decided to start a Betterment Fund by transferring a sum of 12 crores from the Railway Reserve and a sum of 3 crores from the net revenue of 1946-47. Subsequent appropriations to the fund will depend upon the net revenue of each year and on a consideration of the respective needs of the Railway and General Revenues.

Revision of Rates.—The acquisition by the Government of all the major Indian Railways clearly renders desirable and possible a thorough revision of the railway rates structure. Sir Edward Benthall held that while it was not possible yet to determine the future level of rates any more than future level of salaries and wages, there was no reason why the revision of the rates structure should not be tackled now and Government hoped before long to produce

the revised system of rating which would eliminate the short-comings of previous practice in unhealthy competition, between railways, and would reduce very drastically the difference between Railway Risk and Owners' Risk rates and would eliminate anomalies and simplify procedure.

Revision of Railwaymen's Pay.—Sir Edward Benthall pointed out the difficulties of a revision of scales of pay at the present time, for going into which Government have decided to set up a predominantly non-official commission, but gave the assurance that in the meantime the present rates of relief which railway servants "are enjoying will not be reduced as long as there is no material reduction in the cost of living." The Railway Board are also giving the welfare of railway servants a prominent position in their post-war programme.

Railway Finance.—Sir Edward Benthall also reviewed the position of railway finance. He stated that there was no question, that the Indian Government railways had prospered financially in many ways as the result of the war. On April 1st 1939 the Railways had accumulated unpaid contributions to General Revenues of 35·41 crores, in spite of borrowings of over 5·0 crores from the Depreciation Fund which stood at 25·09 crores. The Railway Reserve Fund contained the exiguous figure of 48 lakhs only. At the end of 1945-46 it was calculated that after contributing during the war 15·43 crores to General Revenues including the arrears of contribution, Depreciation Fund would stand at 100·61 crores and Reserve Fund before any transfer to the Betterment Fund, at 29·05 crores. Loss on strategic lines to the extent of 6·01 crores were also met.

In spite of these improvements calculation submitted to the Convention Committee showed that the Depreciation Fund was by no means excessive, if indeed it was adequate to meet the increased level of replacements. The Reserve Fund at the end of 1945-46 would represent only some 3·82 per cent of the capital at charge or only a little over one year's interest charges. It covered only a fraction of the large programme of amenities and improvements, many of them financially unremunerative, which the Government had in view. Satisfaction must, therefore, be tempered with great caution especially since the danger lay in the inability effectively to balance the budget in the future.

After making a review of the position of Railway Finance at the end of the war Sir Edward Benthall sounded a clear warning. He pointed out that the satisfactory results in the past years were largely due to war conditions and only to a limited degree to increased rates and fares, that he had already budgeted next year on a fall of 18 crores in receipts and that the future tendencies were more likely to be downwards than upwards. Consequently, he said that "Government and the House may well have to give serious consideration to the linked problems of the levels of rates and fares, the price of coal and the level of wages. These are knotty problems which are to be faced courageously and with a broad outlook, if post-war plans are to be brought to fruition, for once budget becomes unbalanced and reserves are eaten up—and under unwise management they can disappear almost overnight—it will not be an easy matter to rebuild them or to find the money for extensions, improvements, staff benefits and amenities to passengers."

In conclusion, Sir Edward Benthall pointed out that India had in her Railways a valuable asset which had been maintained without disastrous loss of efficiency owing to war usage and which was in many ways much better equipped technically than before the war. Rehabilitation is in hand and resources exist to effect it without undue strain. Financially the position is far sounder than it has been at any stage in the history of the Indian Railways, and bears no relation to the situation revealed after the last war. The railways should soon be able to meet the demand for goods traffic and will expand to meet further industrial and agricultural production. "The one great potential danger which has to be faced is the wartime legacy of a high level of operating costs and of post war commitments for amenities, together with a level of rates and fares out of tune with the general level of prices. Forewarned is forearmed. India has a great asset which must be carefully nursed and firmly administered."

Rail-road co-ordination came up for a good deal of discussion during the budget session. On a cut motion by the Muslim League Party, the assembly threw out a demand for Rs. 3·48 crores in respect of investment in road-rail Companies.

The Indian Tariff Board.

The Indian Tariff Board is an *ad hoc* body constituted from time to time as necessity arises to investigate the claims made by any Indian industry to protection. It generally consists of a President and two members, one of whom is normally a Government official. It has, subject to the approval of the Government of India, power to co-opt other members for particular enquiries. It tours over the industrial centres in India where the industry referred to it is located and if satisfied after detailed enquiries that the claim for protection is justified, it makes its recommendations to the Government of India. The last Tariff Board became *functus officio* early in 1939 after completing an enquiry into the question of extending protection to the Indian sericulture industry

Indians Overseas.

Numbers.—The total Indian population overseas, according to the latest available estimates, is as follows:—

	Name of country.	Indian population.	Date of estimates.
	Dominions.		
1.	Australia	4,544	1933
2.	Canada	1,500	1941
3.	New Zealand	1,200	1942

General.—The recognition of the importance attached by public opinion in this country to the problems of Indians residing in other parts of the Empire led to the creation of the Department of Indians Overseas under the portfolio of a separate Member of His Excellency the Viceroy's Executive Council in October 1941 to deal with this increasingly complex matter. With the extension of war in the East and Far East and the occupation of Allied territories by the Japanese, the problems of the evacuation of Indians from these territories and of the welfare of those stranded in these areas, are also being dealt with in this Department. In March, 1944, consequent upon the decision of the Government of India to accept the proposal of the Australian Government to appoint High Commissioners in India and Australia on a reciprocal basis, the work connected with the conduct of India's political relations with the Dominions was entrusted to this Department and its name was changed to that of the Department of Commonwealth Relations.

Origin of Indian Emigration.—Emigration is prohibited by the Hindu Shastras, and there is little evidence of any settlement of Indians overseas in early times except in Sumatra, Java and Ceylon. Emigration for purpose of labour dates from the beginning of the 19th century. From 1800 A.D. onwards Indians crossed the Bay to the Straits Settlements to work on the sugar, spice, tapioca, and cocoanut plantations of Penang, and this intercourse was allowed to continue for long without regulation. The first officially recorded instance of genuine recruitment for labour emigration occurred in 1830, when a French merchant, named Joseph Argand, carried some 150 artizans to Bourbon. The abolition of slavery in British colonies in 1834 gave the first great impetus to the movement. The sugar planters of Mauritius at once turned to India as their best recruiting ground, and between 1834 and 1837 obtained at least 7,000 recruits from Calcutta. The Government of India at a very early stage realised the necessity of bringing such emigration under regulation. The Law Commission was asked to investigate the case and to make recommendations for securing the well-being of emigrants. They advised that no legislation was required except in order to prevent undue advantage being taken of the simplicity and ignorance of emigrants by providing that a magistrate should satisfy himself that all contracts were entered into freely and understood by them and in order to secure that sufficient provision was made for their accommodation and sustenance during the voyage. A copy of every engagement was also to be transmitted to the Government under which the emigrants were to live. These recommendations were embodied in the first Emigration Act (V of 1837), which also provided that contracts should be determinable after 5 years.

History of Emigration.—Under the above Act emigration during 1837 was permitted to Mauritius, British Guiana and Australia (89 men, the first and last direct emigrants to Australia). In 1838 emigration was suspended owing to agitation in England regarding the abuses to which the system was liable, and a committee of enquiry reported in 1840 that emigrants were being entrapped by force or fraud, robbed of their wages and treated with brutality. In consequence, emigration was prohibited (Act XV of 1842) except to Mauritius and there control was tightened. In Act XXI of 1844 emigration under still stricter regulation was allowed to Jamaica, British Guiana and Trinidad. Act XIII of 1847 removed the restrictions on emigration to Ceylon. The emancipation of slaves in the French colonies in 1849 gave rise to a system of emigration from French Indian ports to Reunion and Bourbon which was largely based on crimping in British territory. This practice was checked by Act XXIV of 1852. In 1858 emigration was opened to St. Lucia, and in 1860 to St. Vincent, Natal and St. Kitts. In the latter

year a more elaborate Act, based on a convention with the French Government was passed legalising and regulating emigration to Reunion, Martinique, Guadeloupe, and French Guiana. Act XIII of 1864 marks an important stage in the history of emigration, since it elaborated and consolidated the whole system of control. It was itself amended in 1869 and 1870 in important respects with the object of preventing epidemics on emigrant vessels and improving sanitary conditions in settlements. In 1869 emigration was permitted to Grenada, and in 1872 to Surinam. Owing to the removal of the Straits Settlements from the control of the Government of India in 1867, emigration to that colony came under all the restrictions imposed by the Emigration Act and was only permitted from the port of Negapatam. Owing to the injury caused to the agricultural industries of the colony, these restrictions were removed in 1872, subject only to magisterial control of recruitment in India. In 1870 complaints reached the Government of India of gross abuses in the treatment of emigrants in British Guiana. A commission of enquiry was appointed, and their report led to important legislation in the Colony for the protection of Indian immigrants, which was subsequently extended to Trinidad. Owing to similar complaints from Natal and Mauritius, commissions of enquiry were also instituted in both these colonies, and their reports in 1872 brought to light a number of points requiring amendment.

Legislation.—In 1871 a fresh consolidating Act was passed (Act VII of 1871) by which the Acts regulating emigration to the French Colonies and two amending Acts to Act XIII of 1864 were incorporated in the general law. The question of revision of the law again came up for consideration in 1882, when several cases of kidnapping and other objectionable practices were reported to the Government of India. The opportunity was taken to depute two officials (Major Pitcher and Mr. Grierson) to ascertain, in the N.-W. P. and in Bengal respectively, the way in which the system of recruitment actually worked, the respects in which it was open to improvement, and the attitude of the people towards emigration. Their reports were reviewed by the Government of India, and finally in 1883 the law was again recast and consolidated by Act XXI of that year. This Act specified the countries to which emigration was lawful, but empowered the Governor-General in Council to add to the list by notification, and also to prohibit emigration to any of the countries in the list on the ground of epidemic disease and/or excessive mortality among emigrants in such country, or on the ground that proper measures had not been taken for the protection of emigrants, or that the agreements made with them in India were not duly enforced. This Act with certain amendments of no importance to the system of indentured emigration remained in force until 1908, when a fresh revision of the law was undertaken.

Under the Act of 1908 (XVII of 1908) the countries to which emigration was lawful were the British Colonies of Mauritius, Jamaica, British Guiana, Trinidad, St. Lucia, Grenada, St. Vincent, Natal, St. Kitts, Nevis, Fiji, the Seychelles, the Netherlands Colony of Dutch Guiana and the Danish Colony of St. Croix. Emigration to St. Lucia, Grenada, St. Vincent, St. Kitts, Nevis, the Seychelles and St. Croix ceased soon after the passing of the Act, the demand for fresh labour having died out. Emigration to Natal was discontinued from the 1st July 1911 as the Government of India were satisfied that it was undesirable to continue to send Indian labour to that country. Emigration to the French Colonies of Reunion, Martinique and Guadeloupe had been suspended prior to the passing of the Act of 1908 on account of repeated complaints of the inadequate precautions taken for the proper treatment and repatriation of the immigrants.

The labour laws of the several Colonies provide for the protection and welfare of resident Indian labourers. The Government of India also occasionally depute to the Colonies their officers to report on the condition of Indian labourers. Deputations from India visited Fiji and British Guiana in 1921. In spite of all precautions certain social and moral evils had grown up in connection with the indentured system of emigration and Indian public opinion became strongly opposed to it. The whole system was exhaustively examined by the Government of India in 1915 in the light of the report received from Messrs. M. Neill and Chimanlal, and they arrived at the conclusion that the time had come when contract labour should be abolished. The Secretary of State for India accepted this policy and authorised the Government of India to announce the abolition of the indentured system and the announcement to this effect was made in 1916.

In 1922 a further step forward was taken in Act VII of 1922 which prohibited indentured emigration and all unskilled emigration, except to countries specially approved by the Legislature. Emigration to Ceylon and Malaya was brought under control, and the definition of "Emigrant" was extended to cover all persons "assisted" to depart from India.

Another development was the appointment of a Standing Emigration Committee, composed of 12 members of the Central Legislature, to advise the Government of India on all major emigration questions, and more particularly with regard to the terms and conditions on which the emigration of unskilled labour should be allowed. The terms and conditions on which emigration of unskilled labour has been permitted to Ceylon and Malaya since March, 1923, are those which the committee approved, after meeting deputations sent by the two countries.

The Committee, though originally constituted to advise on emigration questions only, always advised the Government on all important matters concerning Indians Overseas. In April, 1945, its name was changed to that of 'Standing Committee on Commonwealth Relations' and its membership was increased to 14. Its functions now are to advise the Commonwealth Relations Department on all matters with which it is concerned excepting the pilgrimage to Hedjaz.

It was found that the lack of power to regulate the total flow of emigration for unskilled work, whether assisted or voluntary and whether under contract or not, may operate to the detriment of Indian communities overseas, particularly in times of economic depression. The Indian Emigration Act was suitably amended in 1938 and the Government of India took power to prohibit, when necessary, even unassisted emigration for the purpose of unskilled work. This amendment was promulgated on December 14, 1939.

The Indian Emigration Act, 1922, also contains certain provisions to safeguard the interests of persons emigrating for the purpose of skilled work. It was found that illicit emigration in some volume was taking place particularly in Bombay with the connivance of some dishonest passage brokers and rules were promulgated under the Act on the 14th Dec. 1939, providing for the licensing of passage brokers and requiring that a passage broker should not be a party to any arrangement to recover from the emigrant the 'cost of recruitment.' These rules have so far been made applicable to the provinces of Bombay and Sind.

During 1939-40 two minor defects in the Indian Emigration Act, 1922, were remedied. Now the Protectors of Emigrants can exercise the powers of detention, search, etc., for the prevention of offences under the Act and by making the offence under Section 30 of the Act cognizable, removes an anomaly between Sections 35 and 30A of the Act.

Present Position.—Indian emigration questions have recently taken on a wider aspect. The status of Indians in the Empire generally is one in which the Indian public now take keen interest. It is no longer possible to deal with the treatment of Indian labour apart from other classes of Indian emigrants and travellers. In several Colonies and Dominions considerable Indian communities have sprung up, which although composed largely of the descendants of indentured labourers, are themselves free and lawfully domiciled citizens of the countries in which they are settled, but have not yet been placed on a footing of legal, social, political and economic equality with the rest of the population. The issues round which public interest at present centres are three:—

(*a*) Control of emigration.

(*b*) Rights of Indians to admission to other parts of the Empire.

(*c*) Rights and disabilities of Indians domiciled overseas.

These questions may be considered separately.

Control of Emigration.—So far as unskilled labour is concerned, the Government of India have assumed absolute powers of control in accordance with powers conferred on them by the Emigration Act of 1922. The functions of the Government of India were previously performed by the Provincial Governments by virtue of powers delegated to them under Section 124 (1) of the Government of India Act, 1935. With a view to dealing directly with all emigration problems in the post-war period on a uniform all-India basis, the Government of India resumed the administration of those functions with effect from 1st October, 1944, and appointed a Controller General of Emigration in the Commonwealth Relations Dept. for that purpose. (*See earlier issues of the Year Book* for details.)

Admission of Indians to Empire Countries.—On the motion of the Government of India this question was discussed at the Imperial War Conferences, 1917, and 1918, and the policy accepted by the self-governing Dominions and the British Government was embodied in the following resolutions:—

"(1) It is an inherent function of the Governments of the several communities of the British Commonwealth including India, that each should enjoy complete control of the composition of its own population by means of restriction on immigration from any of the other communities.

"(2) British citizens domiciled in any British country, including India, should be admitted into any other British country for visits, for the purpose of pleasure or commerce, including temporary residence for the purpose of education; such right shall not extend to a visit or temporary residence for labour purpose or to permanent settlement.

"(3) Indians already permanently domiciled in the other British countries should be allowed to bring in their wives and minor children on condition: (*a*) That not more than one wife and her children shall be admitted for each such Indian; and (*b*) that each individual so admitted shall be certified by the Government of India as being the lawful wife or child of such Indian."

The first paragraph of this resolution has regularized the various restrictions on immigration which the self-governing dominions have, from time to time, adopted and which, without expressly differentiating against Indians are in practice used in order to check Indian immigration, the objections to which are stated to be not racial or political but economic. Australia prohibits the entry of any person who fails to pass a dictation test of not less than 50 words in any prescribed language. New Zealand prohibits the entry of any person who has not received in advance a permit from the Dominion Government which is refused to any person regarded as unsuitable to settle in the country. South Africa prohibits the entry of any person deemed by the Minister of the Interior on economic grounds, or on account of his standard or habits of life, to be unsuited to the requirements of the Union. Canada prohibited the landing of any person who had come to the Dominion otherwise than by continuous journey from the country of which he was a native and unless he possessed in his own right 250 dollars. Since 1930, Canada has restricted the immigration of Indians to the wife or unmarried child under 18 years of age, of any Canadian citizen legally admitted to and resident in Canada, who is in a position to receive and care for his dependents. Newfoundland and the Irish Free State impose no restrictions. All the self-governing Dominions have adopted special exemptions in favour

of students, tourists and merchants visiting the countries for the temporary purposes of commerce, pleasure, or education. India on its side assumed power to regulate the admission of immigrants from any other part of the Empire or foreign countries, by means of passports. By the Immigration into India Act, 1924, the Government of India was empowered to make rules "for the purpose of securing that persons not being of Indian origin, domiciled in any British possession, shall have no greater rights and privileges as regards entry into and residence in British India, than are accorded by the law and administration of such possession to persons of Indian domicile." That Act was repealed in 1943 by the Reciprocity Act, 1943, which enables the Government of India to impose such disabilities in respect of entry into, or travel, residence, etc., etc., upon subjects of any British possession which subjects persons of Indian origin to like disabilities. With regard to the Crown colonies and protectorates, the attitude of the Indian Government is that there is no justification for placing any restrictions on the immigration of British Indians, which are not placed on other classes of British subjects, and this principle has in practice been observed by the Colonial Office except in the case of Kenya Colony where, as stated hereafter, the British Government has reserved to itself the right to impose restrictions on the immigration of classes of people whose entry into the Colony may have an adverse effect on the economic evolution of the indigenous population.

Rights and Disabilities of Indians Lawfully Domiciled Overseas.—The policy of the Empire is summed up in the resolution of the Imperial Conference, 1921, which was recorded in the following terms:—

"This Conference reaffirms that each Community of the British Commonwealth should enjoy complete control over the composition of its own population by restricting immigration from any of the other communities, but recognises that there is incongruity between the position of India, as an equal member of the Empire, and the existence of disabilities upon British Indians lawfully domiciled in some parts of the Empire, and this Conference, therefore, is of opinion that in the interests of the solidarity of the Commonwealth it is desirable that the rights of such Indians to citizenship should be recognised."

The representatives of South Africa regretted their inability to accept this resolution in view of the exceptional circumstances of the greater part of the Union. The representatives of India while appreciating the acceptance of this resolution, nevertheless felt bound to record their profound concern at the position of Indians in South Africa and hoped that by negotiations between India and South Africa a way could soon be found to reach a more satisfactory position.

Summary of Present Position.—The present position is as follows:—

Australia.—The majority of Indians in Australia are engaged in retail trade or agricultural operations. The Commonwealth franchise was granted to British Indians domiciled in Australia in 1925. In the States of New South Wales, Victoria, South Australia, Queensland and Tasmania, Indians are not disqualified on racial grounds for the State franchise. The disability which existed in this respect in Queensland until December 1930 and in Western Australia until the end of 1934 was removed as a result of informal representation made by the representatives of India on various occasions, including the one made by the late Sir Muhammad Shafi at the 1930 Imperial Conference. The Constitution and Electoral Acts in Western Australia disqualify an aboriginal native of Australia, Asia or Africa from being registered as an elector for the Assembly; but he may be enrolled as a voter for the Legislative Council (which is the Upper House) in each province in which he holds freehold property of at least £50 capital value.

Indians born in British India were admitted to the benefits of the Invalid and Old Age Pensions Act of 1926. They were also made eligible for maternity allowances. Indians in Australia still suffer from certain minor disabilities (administrative and legal) relating to Crown lands, mining, certain occupations and employment. Under the Mining Act of 1904 in Western Australia the grant of mining rights to Asiatics requires the approval of the Minister in charge of Mines. Under the South Australian Irrigation and Reclaimed Lands Act, 1917, Indians are not eligible to obtain leases of land. In Western Australia wherever licences are prescribed, for example, for cutting sandalwood, for employment under Government contract and for employment in European factories, Indians find it difficult under the present administrative practice to get the authority to exercise discretion in their favour.

An exchange of High Commissioners took place between India and Australia in 1941, when the Government of Australia appointed Lt.-Gen. Sir Iven G. Mackay as the first Australian High Commissioner in India and the Government of India appointed Sir Raghunath Paramshottam Paranjpye as the first High Commissioner for India in Australia. Both the High Commissioners are striving to establish close relations between the two countries.

A delegation consisting of six Indian industrialists visited Australia in 1945 to study trade condition there.

Canada.—Indian residents of Canada are mostly farmers, gardeners, farm workers, managers of retail stores, hawkers and unskilled labourers. While in the other eight provinces of Canada, Indian residents are not subject to any political or legal disabilities, Indians in British Columbia numbering about 1,300 are denied the municipal, provincial and federal franchise, as a result of which they cannot serve as trustees in any municipal or rural school district, hold any municipal office, serve as jurors; they are debarred from employment by contractors for the Public Works Department and for the sale of Government timber and also from holding a foreshore lease or Engineers' certificate under the Boiler Inspection Act.

In October, 1945 a Canadian Citizenship Bill was moved in the Canadian House of Commons which provided for the status of "Canadian

Citizenship' which can be acquired by persons (i) who were/are born in Canada or on Canadian ship (ii) whose parents at the time of their births were/are British subjects of Canadian domicile or are Canadian citizens (iii) who have resided in Canada and make an application of their intention to become Canadian citizens. It also introduced an entirely new system for determining who are British subjects, thus involving fundamental change from the present system for determining the common status of British subjects throughout the Commonwealth. It was passed in 1946 and would come in force with effect from 1-1-47. It would bestow 'Canadian Citizenship' on all Indians born in Canada and would also enable Indians born outside Canada to acquire citizenship rights under certain circumstances. It would not, however, have the effect of conferring franchise on the 1300 Indians resident in the province of British Columbia who are denied the same under the existing Provincial laws.

New Zealand.—Indians domiciled in New Zealand are generally not subject to any disability and enjoy equal citizenship rights including franchise with the other British subjects.

South Africa.—The main grievances of Indians, which led to a passive resistance movement headed by Mr. Gandhi, were settled by the compromise embodied in the Indians Relief Act, 1914 and by the guarantee known as the Smuts Gandhi agreement. (*See earlier editions of the Year Book for details.*)

In 1920 an Asiatic Enquiry Commission was appointed to investigate the grievances of Indians regarding their rights to trade and hold land in the Union. Their main recommendations were published in earlier editions of the Year Book.

CAPE TOWN AGREEMENT, 1927.

It was announced in April 1926 that the Government of India and the Government of the Union of South Africa had agreed to hold a Round Table Conference to explore all possible methods of settling the Indian question in the Union in a manner which would safeguard the maintenance of western standards of life in South Africa by just and legitimate means. The Conference assembled at Cape Town on December 17th and its session finished on January 12th. There was, in these meetings, a full and frank exchange of views which resulted in a truer appreciation of mutual difficulties and a united understanding to co-operate in the solution of a common problem in a spirit of friendliness and good will. The terms of the Cape Town Agreement were on the following lines :—

"Both Governments re-affirm their recognition of the right of South Africa to use all just and legitimate means for the maintenance of western standards of life.

The Union Government recognises that Indians domiciled in the Union who are prepared to conform to western standards of life, should be enabled to do so.

For those Indians in the Union who may desire to avail themselves of it, the Union Government will organise a scheme of assisted emigration to India or other countries where western standards are not required. Union domicile will be lost after 3 years' continuous absence from the Union in agreement with the proposed revision of the law relating to domicile which will be of general application. Emigrants under the assisted emigration scheme who desire to return to the Union within the 3 years will only be allowed to do so on refund to the Union Government of the cost of the assistance received by them.

The Government of India recognise their obligation to look after such emigrants on their arrival in India.

The admission into the Union of the wives and minor children of Indians permanently domiciled in the Union will be regulated by paragraph 3 of Resolution XXI of the Imperial Conference of 1918.

In the expectation that the difficulties with which the Union has been confronted will be materially lessened by the agreement now happily reached between the two Governments, and in order that the agreement may come into operation under the most favourable auspices and have a fair trial, the Government of the Union of South Africa have decided not to proceed further with the Areas Reservation and Immigration and Registration (Further Provision) Bill.

The two Governments have agreed to watch the working of the agreement now reached and to exchange views from time to time as to any changes that experience may suggest.

The Government of the Union of South Africa have requested the Government of India to appoint an agent in order to secure continuous and effective co-operation between the two Governments."

Agent of the Government of India.—The Government of India selected the Rt. Hon'ble V. S. Srinivasa Sastri as their first Agent. He reached the Union on the 28th June, 1927. The designation of the Agent was changed to that of 'Agent-general' in 1935.

Change of Status.—Following the appointment of a High Commissioner in the Union of South Africa by the Dominion Government of Canada, the Government of India considered that the status of their representative should not be lower than that of any of the sister Dominions and an announcement was made that from 1st January, 1941, the status of the Agent General would be raised to that of High Commissioner for India in the Union of South Africa. The announcement was accompanied by a message from General Smuts to His Excellency the Viceroy. While the High Commissioner will be the sole channel of communication between the Governments of India and the Union of South Africa and in official representations and correspondence his views will be those of the Government of India only, he will still be available for giving advice to the Indian community and for making any representations on their behalf.

India's representatives in the Union since 1927 have been—

Rt. Hon'ble V. S. Srinivasa Sastri	1927–1929
Sir K. V. Reddi	1929–1932
Kunwar Sir Maharaj Singh, I.C.S.	1932–1935
Sir Syed Raza Ali	1935–1938
Sir B. Rama Rau, I.C.S.	1938–1941
Sir Shafa'at Ahmad Khan	1941–1945
Mr. R. M. Deshmukh	1945–1946

An Assistant Secretary to the High Commissioner was appointed in 1942 and stationed in Durban to keep the High Commissioner informed of the Indian problems in Natal.

In February, 1930, a Select Committee of the Union House of Assembly was appointed to inquire into and report on certain matters relating to the rights of Indians to own and occupy immovable property in the Transvaal and incidentally to trade. The Committee was required, *inter alia*, to investigate how far the intentions of the legislature, as embodied in the Act of 1919, were being given effect to and whether, and, if so, to what extent, an amendment of the Act was desirable. The Committee came to the conclusion that the position which had arisen as a result of illegal occupation in the mining areas was serious and that there was no doubt that Law 3 of 1885, as amended by the Act of 1919, intended that Asiatics should not own fixed property in the Transvaal outside reserved areas either individually or collectively and either directly or indirectly. It submitted its report on the 13th May, 1930, and embodied its recommendations in a Bill, which it urged should be enacted immediately. The Bill was read for the first time on the 14th May, 1930, but in deference to the representations made by the Government of India that adequate time should be allowed for careful examination of the far-reaching provisions of the measure, the Union Government decided to defer further consideration of it until the Parliamentary session of 1931. As a result of opposition to the Bill, it was later postponed further, and a Conference was held in 1932 to examine the provisions of the Bill and to review the working of the Cape Town Agreement of 1927 in accordance with para. 7 of that Agreement.

The results of the Conference were summarised in previous editions of the Year Book.

Anti-Indian Enactments.—Since 1932, there have also been several enactments which are capable of being used against Indians in the Union, *e.g.*, the Transvaal Licences (Control) Ordinance of 1932 and the Natal Rural Dealers' Licensing Law Amendment Ordinance of 1935. A further development occurred in 1937 when three private Bills affecting the position of Indians in the Union were introduced in the Union Parliament. The first sought to prohibit marriages between Europeans and Asiatics or natives. It was introduced on the 12th January but attempts to have it referred to a Select Committee failed. The second Bill sought to empower Provincial Councils to prohibit the employment of Europeans by non-Europeans in the Union, and the third to prohibit the acquisition of fixed property in the Transvaal by any European, Coloured or Cape Malay women married to Asiatics and by children of such marriages. Both the Government of India and their Agent General in the Union made representations against these two Bills. Second reading, which would have involved acceptance of the principle of the two measures, was not proceeded with and they were referred to a Select Committee of the Union House of Assembly for investigation of their contents and form. Both the Indian community and the Agent General gave evidence before the Select Committee. The Committee came to no conclusion on the proposal to restrict ownership of land through marriage, but after consideration of the other Bill, submitted an amended Bill entitled the White Women's Employment Restriction Bill. The amended Bill sought to prohibit the employment of European women by Asiatics except under a certificate of the Minister of Labour and to forbid the issue of such a certificate if the women concerned were to be under the direction or supervision of a non-European or to be housed or employed on premises containing dwelling or sleeping quarters of Asiatics or at places where they might come into contact with Asiatics other than as customers over the counter. Cape Malays and Japanese (while the trade convention with Japan lasted) were to be exempted from the restriction. The new measure was purely anti-Indian and the Government of India protested strongly against it. In the course of oral evidence before the Select Committee, a representative of the South African Indian Congress stated that he believed Indians would be willing to terminate employment of European women voluntarily where circumstances showed that particular exception might be, or had been, justifiably taken to such employment. The Union Government accepted this statement as an assurance of co-operation by the Indian community in objectionable cases and an announcement was made on the 14th April in the Union House of Assembly that no further opportunity would be given for the discussion on, or for legislation in connection with, the Select Committee's report on the Bills. The Union Government, however, reserved the right to undertake legislation later should circumstances demand it. The dropping of these two Bills did not, however, satisfy certain sections and an announcement was made in the Union Parliament on the 17th May, 1937, that two Commissions, one to enquire into mixed marriages and the other into the question of Asiatic land tenure in areas not covered by the enquiry of the Feetham Commission, would be appointed. These Commissions were appointed in February, 1938.

Mixed Marriages Commission.—In September, 1938, the South African Indian Congress presented a memorandum to the Commission and also gave oral evidence. It was pointed out that the number of marriages between Europeans and Indians was negligible, there was no sign of an increase in spite of the rapid growth in the numbers of each community, and that the effect of such marriages had an insignificant effect on the composition and future welfare of the South African population. The Agent General in the Union supplemented the evidence already given by the local Indian community.

The report of the Mixed Marriages Commission was published in August, 1939. Four members of the Commission signed a majority report and one member a minority report. The finding of the majority report was that public opinion had failed to prevent mixed marriages and could not be relied upon to prevent such marriages in future and that mixed marriages gave rise to social problems of a serious nature. The Commission held that segregation by means of housing schemes and the separation of the sexes at places of work would help in reducing the incidence of mixed marriages. The Commission emphasised the need for improvement of the economic position of non-Europeans on the ground that marriages with Europeans

would be less attractive if their present disabilities were diminished. It was also suggested that a separate law should be enacted to govern the validation of the marriages between coloured persons only, coloured persons including all non-Europeans. In the minority report it was stated that legislation was no solution of the problem and it was suggested that the simple laws of heredity should be taught and also that to overcome the disparity between the European male and female population immigration into South Africa of young European women should be encouraged. In January, 1940, Dr. Malan moved a resolution in the House of Assembly urging introduction of legislation to give effect to the recommendations of the Commission. In the course of the discussion on the resolution the Minister of the Interior stated that as the country was in a state of war, Government did not propose to embark upon contentious legislation touching difficult social conditions, sentiments and racial pride.

Murray Land Commission.—This Commission which was appointed early in 1938, was presided over by Mr. Justice Murray of the Supreme Court of South Africa (Transvaal Provincial Division) and had the following terms of reference:—

"To inquire into and report whether, and if so to what extent, the letter or spirit of any law restricting or prohibiting the ownership, use or occupation by Asiatics of land is being evaded and to make any recommendations it may think fit in regard thereto.

The foregoing terms of reference shall not apply to proclaimed land under the Precious and Base Metals Act, 1908 (Transvaal), as amended from time to time, to the extent to which it has been dealt with by the Feetham Report."

Both the Transvaal Indian Congress and the Agent General in the Union gave evidence before the Commission in October, 1938, and its report was published on the 22nd March, 1939. The recommendations of the Commission, which were published in the Press, were generally considered to be satisfactory from the Indian point of view. No action has so far been taken by the Government of the Union on the report.

In spite of repeated representations from the local Indian community and the Government of India, the Union Government passed the Asiatic (Transvaal Land and Trading) Act, 1939, which came into force on June 16, 1939. The Act restricts three important rights of the Indian community in the Transvaal: (*a*) the right to occupy land not subject to Gold Law restrictions; (*b*) the right to trade anywhere in the Transvaal; and (*c*) the right of Indians holding trading licences in May 1919 to transfer their business premises in the same township. The main provisions of the Act are as follows: (1) Further protection for two years was granted to such illegal occupation of land by Asiatics in the area under the Gold Law as had been protected since May, 1930. (2) The issue of trading licenses except with the permission of the Minister was prohibited unless it was proved that the applicant and the person in control of the business were not Asiatics. (3) The hiring or occupation by Asiatics of any land or premises was prohibited if such land or premises were not occupied by Asiatics or coloured persons on April 30, 1939. (4) The Minister was empowered to issue permits of exemption. In April 1941 an amending Act was passed to keep alive the provisions of the Act of 1939 for a further period of two years, *i.e.*, till May 1943.

The international situation in September, 1939, and the consequent change of Ministry in the Union with General (now Field Marshal) Smuts coming into power altered the position slightly so far as the Indian community was concerned. It was officially announced that the Government of the Union intended to appoint a commission to ascertain whether penetration had in fact taken place. The Union Government also declared that no fresh statutory measures involving segregation would be introduced during the war.

First Broome Commission.—Though the Asiatic (Transvaal Land and Trading) Act, 1939, had been brought into force in June, 1939 as a result of further representations, the Union Government declared that no fresh statutory measures involving segregation would be introduced during the war. In January, 1940, the Minister of the Interior also announced the intention of the Union Government to appoint a judicial Commission to ascertain the extent, if any, of Asiatic penetration of predominantly European areas, and the Commission was actually appointed in May with the Hon'ble Mr. Justice F. N. Broome as Chairman and the following terms of reference:—

"To enquire into and report whether, and if so, to what extent Indians have since 1st January, 1927, commenced occupation of or acquired sites for trading or for residential purposes in predominantly European areas in the Provinces of Natal and the Transvaal (excluding land proclaimed under the Precious and Base Metals Act, 1908, as amended, of the Transvaal), and the reasons for such occupation or acquisition."

An attempt made by the Indian community to get the Commission discharged on account of the critical war position in Europe proved futile. The Commission concluded the recording of evidence in the Transvaal in November and enquiries in Natal were in progress during the first half of 1941. A summary of the findings of the Commission was published on October 11th. The two main findings were that in the Transvaal the extent of penetration since 1927 did not appear to be alarming or even surprising and in Natal the extent of penetration into European areas was little more than a trickle. As regards the cases of penetration as had been found, it was stated that the main reason for penetration by acquisition was attributable to the desire to obtain good investments (and this was also held to account for some of the acquisitions with occupation), while the most important reason for acquisition with occupation was given as the "lack of housing and civic amenities in predominantly Indian areas." The Commission also recorded that "it is the Commission's considered opinion that the Indian opposition to compulsory segregation will never be overcome, but that *de facto* segregation may some day be achieved by voluntary mutual co-operation."

Second Broome Commission.—Towards the end of 1942, the Durban City Council represented to the Minister of the Interior that since October 1940 Indian penetration in predominantly European areas in Durban had been taking place on an accelerated scale. As a result of this representation, Mr. Justice F. N. Broome was once again appointed to enquire into and report whether, and if so to what extent, Indians (including Companies with predominantly Indian directorates) had, since 30th September, 1940, in the Municipal area of Durban, acquired sites in those areas which the previous Commission found to be predominantly European on 1st January, 1927. According to the findings of this Commission, the sites acquired by Indians in 1942 were 2½ times greater than the highest previous yearly total and the amount paid for these sites during the 29 months covered by the Commission did not fall short of the total amount so paid during the 13 years which were covered by the previous Commission.

As a result of this finding and in order to check further acquisition of property by Indians, the Union Government passed an Act called "the Trading and Occupation of Land (Transvaal and Natal) Restriction Act, 1943," generally called as the Pegging Act. This Act provides for the continuance in the Transvaal of the provisions of the Asiatic (Transvaal Land and Trading) Act 1939 for a further period of 3 years and extends similar provisions prohibiting transfer of properties between Europeans and Indians in Natal for a period of 3 years i.e., up to March 31, 1946. The Government of India through their High Commissioner in the Union protested against the measure and brought to the notice of the Union Government the declaration that the latter had made to the effect that no fresh statutory measures involving segregation of Indians would be introduced during the war. They also made various other alternative suggestions in order to achieve the object desired by the Union Government without having recourse to legislative action, but all these protests and suggestions were in vain. Indian public opinion both in South Africa and India was greatly agitated over the new legislation and suggested reciprocal action against the Union of South Africa. These suggestions received the attention of the Government of India.

They formulated their plans to take action against the Union. In the meanwhile, however, it became clear that the general elections in the Union had played a large part in the enactment of Pegging Legislation—Indian penetration having been used as a convenient election issue for securing votes of anti-Indian Europeans. The Government of India, therefore, waited for the excitement aroused by the elections to subside in the hope that the Union Government would make a conciliatory move after the atmosphere in the country had returned to normal. Indian public opinion, however, continued to be disturbed both in India and S. Africa and constantly urged upon the Government of India to adopt retaliatory measures.

Pretoria Agreement.—On 18th April, 1944, as a result of an agreement, known as "Pretoria Agreement", between the Union Prime Minister and the Minister of the Interior on the one hand and a deputation from Natal including members of the Natal Indian Congress on the other, a decision was taken according to which the Pegging Act was to be replaced by an Ordinance to be passed by the Natal Provincial Council. It was agreed by both the parties that the main problem was the occupation of property for residential purposes in urban areas where the question arose of Indians living in close proximity to Europeans. The Ordinance was to provide for the creation of a licensing board with two Europeans and two Indian members and a third European with legal training as chairman. The Board was to control occupation of dwellings in Durban by licensing. The Pegging Act was to be withdrawn by proclamation after the Ordinance was passed. The Agreement on the whole, met with satisfactory reception among the majority of Indians in South Africa. The Government of India also decided to give it a chance although they did not think it an ideal solution. A draft Ordinance embodying major points of the Agreement, which was approved by the Natal Indian Congress, was introduced in the Natal Provincial Council and it was referred to the Select Committee after first reading. On October 17th, 1944, the draft Residential Property Regulations Ordinance with the Report of the Select Committee was placed on the table of the Provincial Council. The amended draft Ordinance departed from the Pretoria Agreement in many aspects; in particular it restricted the right of Indians to acquire property. That Ordinance, with two other Ordinances viz Natal Housing Ordinance and Provincial and Local Authorities Expropriation Ordinance, was passed on 3rd November 1944. Indians in South Africa were greatly agitated over this legislation. It also aroused great resentment among the Indian public in India. It was apprehended that these Ordinances would enable the Provincial Administration to carry out racial zoning.

The Government of India represented to the Union Government that the new measure was unwarranted and urged for its withdrawal and implementation of the Pretoria Agreement. As the representations met with failure, the Government of India enforced the Reciprocity Act against South Africa, and persons of South African domicile were declared prohibited immigrants in India. They were debarred from acquiring or occupying any property without a permit and were also deprived of the local franchise. The Indian Legislature urged the Government of India to recall their High Commissioner from South Africa and to enforce economic sanctions against her.

On 28th November 1944, during his interview with the Natal Indian Congress Delegation, Field Marshall Smuts admitted that the Residential Property Regulation Ordinance was inconsistent with the Pretoria Agreement. Later on the three Ordinances were declared *ultra vires* of the powers of the Provincial Council. In March 1945 Field Marshall Smuts stated in Parliament that the Union Government proposed to bring about legislation to grant powers for expropriation of property, so that what the Provincial Council found impossible to do could be done by the Union Government. The

Indian community took a grave view of the contemplated legislation.

Housing (Emergency Powers) Act and Natal Housing Ordinance, 1945.—The proposed legislation was not however proceeded with, but instead the Housing (Emergency Powers) Act was passed in June 1945. It enabled the Government to frame Regulations relating to acquisition and expropriation of property by the local authorities, the Natal Housing Board and the National Housing and Planning Commission of the Union Government. The power of expropriation was to remain in the hands of the Union Minister. It also empowered the Provincial Councils to institute Housing Boards through Provincial legislation. Accordingly a draft Ordinance entitled "Natal Housing Ordinance" was published in the Natal Gazette of the 23rd August 1945 and was passed by the Provincial Council in September. The Natal Indian Congress feared that the provision which enabled the proposed Housing Board to expropriate and acquire immovable property and impose racial servitudes at the time of selling or letting the land, would lead to the segregation of Indians. The Ordinance remained for some time the subject of discussion between the Union Ministers and the representatives of the Indian community. The Union Government however decided to give assent to the Ordinance but at the same time in order to minimise the fears of the Indian community proposed to promulgate regulations under the Housing (Emergency Powers) Act. Under these regulations the Housing Board would be able to acquire land only for the purpose of constructing dwellings or carrying out housing schemes. The proposed regulations also made the application of the powers of imposing racial servitudes conditional on the specific approval of the Minister of Health. The Ordinance received assent on the 6th December 1945 and became law from that date. The regulations under the Housing (Emergency Powers) Act, were also issued on the same day. The Prime Minister also issued a statement on the same date giving an assurance that the safeguards regarding Ministerial consent and approval would be used to ensure that the powers in question were exercised in a reasonable, equitable and impartial manner. The Natal Indian Congress however complained that the assurance of the Prime Minister had not the force of law and that security might be achieved by other means.

Third Broome Commission.—On 17th March, 1944, the appointment of a Commission by the Union Prime Minister, foreshadowed in the Assembly speech on 22nd March 1943, of Mr Lawrence, then Minister of the Interior, with the following terms of reference was gazetted :—

"To enquire into and report upon matters affecting the Indian community of the Province of Natal, with special reference to housing and health needs, civic amenities, civic status and provision of adequate residential, educational, religious and recreational facilities, and to make recommendations generally as to what steps are necessary further to implement the uplift of clauses of the Cape Town Agreement of 1927, and as to all matters affecting the well-being and advancement of the permanent Indian population of Natal."

The Commission included two Indians and commenced work in May, 1944. The introduction of the Residential Property Regulation Ordinance and other Ordinances mentioned in the foregoing paras brought about a crisis. In December 1944, the two Indian members resigned the membership of the Commission saying that, as the Ordinances and the Reports of the Natal Post-War Reconstruction Commission had anticipated the work of the Commission and forestalled its recommendations, the usefulness of the Commission was stultified. The Commission, however, continued its work. In the 2nd week of June 1945, the Interim Report of the Commission was published. The main and only important recommendation of the Commission is that the Union Government should invite the Government of India to send to the Union a delegation, composed substantially of Indians for the purpose of discussing with the Union Government, and with such representatives as the Union Government may appoint and with such other persons as the delegation may invite, all matters affecting Indians in South Africa.

The Asiatic Land Tenure and Indian Representation Act, 1946.—One of the most important events in the history of Indians in South Africa is the passing of the Asiatic Land Tenure and Indian Representation Act. The Act has raised the Indian question in South Africa to international plane.

On January 23rd 1946, the Prime Minister announced in the Union Parliament, his intention to introduce a Bill for the purpose of prohibiting the occupation and acquisition of property by Indians in Natal, except in certain exempted areas. The natural consternation among the Indian community in South Africa and the public in India. According to the statement made by the Government Spokesman in the Central Legislature on the 12th March the Government of India urged upon the Union Government to observe, as recommended by the Round Table Conference of representatives of both the countries to discuss Indian question before passing this legislation. The Union Government rejected this request. The Bill was introduced in the Union House of Assembly on 15th March and passing through all stages became law on 3rd June 1946. The Government of India was strongly urged by the Indian public and the Indian community in South Africa to recall their High Commissioner and enforce trade sanctions against that country. The Government of India informed the Union Government that in view of the attitude of that Government, the Government of India considered themselves free to take counter-measures. Accordingly they gave notice of the termination of Trade Agreement with the Union Government on the 26th March 1946 and banned all exports to and imports from South Africa with effect from the 17th July. The High Commissioner for India in the Union has been recalled. The Government of India was also urged by the Indian legislature to raise the Indian question in South Africa before the

United Nations as the Union Government's treatment of Indians was a violation of the United Nations Charter. The Government of India lodged a complaint with the Secretary General, United Nations requesting that the General Assembly should take up this question under articles 10 and 14 of the Charter. The question will be discussed in the forthcoming session of the General Assembly which is to commence from the 23rd October 1946. The Indian Delegation to the U.N.O. General Assembly headed by Mrs. Vijaya Lakshmi Pandit left for New York in October 1946. This legislation has led to bitter agitation among the Indian community in South Africa. They sent deputation to India and England to present their case. They have also sent their delegates to America which will be the venue of the session of the General Assembly of the United Nations, to enlist the sympathies of the American public and other nations. In South Africa itself they have started passive resistance movement which has taken the form of defying the provisions of the Asiatic Land Tenure Act by camping on land in the non-exempted areas. Hundreds of Indians have courted imprisonment and at the time of writing the movement is still continuing.

The Act which has replaced the Pegging Act of 1943, consists of two Chapters. The first Chapter dealing with land tenure places restrictions on the acquisition and occupation of land by Asiatics in Natal, except in exempted areas which have been so proclaimed in the schedule to the Act. These areas may be increased or decreased on the advice of the Land Tenure Advisory Board established under the Act, or after five years by a resolution of the Parliament. In non-exempted areas transfer of fixed property between non-Asiatics and Asiatics both for occupation and as question is subject to a permit granted by the Minister. In the Transvaal the Interim Act (1939) position is retained with the exception that trade licenses are no longer to require the Minister's permit. Thus the Act extends the temporary provisions of the Pegging Act to the whole of Natal and has also introduced a new principle of racial segregation.

The second Chapter gives a limited franchise to Indians. It enfranchises a male Indian who is

(*a*) a Union national of or over 21 years of age.

(*b*) has passed the sixth Standard or equivalent, and either

(*c*) has an annual income of not less than £84 or

(*d*) owns immovable property of the minimum value of £250.

Indians will be represented by 2 Senators, 3 Members in the House of Assembly and 2 Members in the Natal Provincial Council. Indians in the Transvaal have not been given any representation in the Transvaal Provincial Council. The members in the Senate and the Assembly must be of European descent and thus Indians will be represented by Europeans in both Houses of the Union Parliament.

Lawrence Committee.—Towards the end of 1939, Mr. Lawrence, the Minister of the Interior, suggested that the Natal Indian Association and the Durban City Council should constitute a Joint Committee for the purpose of preventing further penetration by Asiatics into European areas. The Natal Indian Association expressed their opposition to any form of segregation but offered to co-operate with the Durban City Council in the manner suggested in order to establish harmonious relations between the two communities. The object of the Committee was also to draw the attention of the City Council to the housing needs of the Indian community and the necessity for providing proper municipal amenities. The Committee was formed in March, 1940, but owing to the attitude of the European members, it could not function successfully and the Minister of the Interior was obliged to dissolve it in September, 1942. In its place, an Asiatic Affairs Advisory Board consisting of both Europeans and Indians was established with a view to finding ways and means to improve the condition of Indians in respect of housing, educational and other needs of the community.

War Effort.—The Indian community in South Africa with possibly a few dissentients co-operated in the war effort of the Union Government both by contributing their mite to the War Funds and by assisting in enrolment of Indians in the Services. A separate Indian battalion was formed in August 1942, with Major J. H. B. Knox, M.C., who had served in the Indian Army during the last war, as its commander.

The Feetham Resolutions.—Reference has already been made to the passing of the Transvaal Asiatic Land Tenure (Amendment) Act of 1939 after consideration of the recommendations of the Feetham Commission. Under the Act the Minister of the Interior is empowered to exempt land from the operation of the Gold Law regarding residence on or occupation of that land by coloured persons, but the Select Committee on the Bill had unanimously recommended that Asiatics should be given the right of ownership in areas proposed for exemption by the Feetham Commission, in Asiatic Bazaars and in areas predominantly occupied by coloured persons provided the proposal was approved by both Houses of Parliament by means of a resolution. Hence what is known as the Feetham Resolutions has been of considerable importance to the Indian community in Transvaal, but till early in 1941 the Union Government could not see their way to push the resolutions through Parliament mainly because of opposition among party members to the scheme. The more liberal attitude of General Smuts' Government and the influence on South African public opinion of the magnificent performances of Indian soldiers in the Middle East made it possible for the Feetham Resolutions to be introduced in the Union Parliament in April, 1941. The resolutions were passed by both Houses and hence for the first time Indians were given legal right to continue to occupy and own land in what are known as "gold areas."

Riverside Scheme.—Early in 1941 the Durban City Council proposed to put into effect a housing scheme which popularly came to be known as the Riverside Scheme. Under the Scheme Indians were to be removed from the Riverside—a ridge overlooking the Umgeni

river to another area. The Scheme was to be completed in 8 years and to cost £5½ million. The Indian community apprehended that this was a scheme to segregate them and objected to it. The High Commissioner for India in the Union intervened and in October, 1942, the scheme was practically abandoned.

Education.—As a result of endeavours on the part of the High Commissioner for India, who felt that advancement of education was a real necessity for the Indian community, the Union Government agreed to set up a Committee to 'enquire into and report upon the facilities at present existing in Natal for University and technical education for Indians, and to make recommendations as to the policy which should be followed in the further development of such facilities.' The Committee reported in November, 1942, and made recommendations for the establishment of an Indian Technical College. But owing to non-availability of a suitable site, no progress in this direction could be made.

East Africa Kenya Colony.—The grievances of Indians domiciled in this Colony were fully set forth in the published despatch of the Government of India, dated October 21st, 1920. The controversy centred round the following points :—

(*a*) FRANCHISE.—Indians had not the elective franchise. The Government of India, therefore, proposed that there should be a common electoral roll and a common franchise on a reasonable property basis *plus* an educational test without racial discrimination for all British subjects.

(*b*) SEGREGATION.—Professor Simpson who was sent to East Africa to report on Sanitary matters, recommended segregation on sanitary grounds. The Government of India objected, firstly, that it was impracticable, secondly, that it was commercially inconvenient, and thirdly, that Indians were in practice unfairly treated in the allocation of sites.

(*c*) THE HIGHLANDS.—Lord Elgin decided in 1908 that as a matter of administrative convenience grants of land in the upland area should not be made to Indians. The whole area had by then been given out, and the Government of India claimed, that there was no land left to which Lord Elgin's decision applied. That decision was, however, extended so as to prohibit the transfer of land in the uplands to non-Europeans.

(*d*) IMMIGRATION.—Suggestions were put forward for restricting Asiatic immigration into Kenya. The Government of India claimed that there was no case for restricting Indian immigration and that such restrictions were in principle indefensible.

The Settlement.—The decisions of the British Government were contained in a White Paper presented to Parliament in July, 1923. It was held that the guiding principle should be that "the interests of the African native must be paramount," and in light of this it was decided :—

(*a*) FRANCHISE.—A communal franchise was adopted with 11 seats for elected Europeans, 5 elected Indians, one nominated Arab, one missionary representing the Africans, and a nominated official majority. One Indian was also appointed on the Governor's Executive Council.

(*b*) SEGREGATION.—The policy of segregation as between Europeans and Asiatics was abandoned.

(*c*) THE HIGHLANDS.—The old practice was maintained both as regards initial grants and transfers. A similar reservation in the lowlands was offered to Indians.

(*d*) IMMIGRATION.—Racial discrimination in immigration regulations was rejected. But in the economic interests of the Africans, further control over immigration was considered necessary. It was held that some arrangement was required for securing a strictly impartial examination of applications for entry into Kenya. The Governors of Kenya and Uganda were, in that connection, instructed to submit joint proposals for legislation.

The Government of India reviewed their decisions in a resolution published on August 15th, 1923, and recorded "their deep regret that His Majesty's Government did not feel justified in giving greater effect to the recommendations made by them" and reserved liberty to reopen the case on a suitable opportunity. They stated their intention of making representations regarding the action to be taken to implement those decisions, particularly in the matter of the Immigration regulations.

Following upon the Kenya award, statutory action was taken by the local administration on the franchise question. Adult suffrage on communal lines was conferred upon Indians. As regards immigration, the Government of India took the opportunity to urge the postponement of the bill giving effect to the decision of His Majesty's Government until such time as the Committee proposed by their representatives at the Imperial conference in 1923 had an opportunity of examining the question of the restrictions therein embodied. Accordingly the introduction of the bill was postponed at the instance of the Colonial Secretary. The Government of Kenya was also asked by His Majesty's Government for an explanatory statement regarding the method proposed for the administration of immigration measures. The Government of India received an assurance from the Colonial Secretary that ample opportunities would be afforded for the expression of their views; and that earnest attention would be given to any representation which their Committee desired to make. As stated in a subsequent para, a Colonies Committee was appointed in March 1924. The following statement made by the Secretary of State for the Colonies in the House of Commons on 7th August 1924 shows the result of the representation made by the Colonies Committee :—

"(1) IMMIGRATION.—My position is that if danger ever arises of such an influx of immigrants of whatever class, race, nationality or character, as may likely be prejudicial to the economic interest of the natives, I hold myself entirely free to take any action which may be necessary. Conflicting statistics which have been laid before me have not enabled me to

reach a definite conclusion as regards the extent of net Indian immigration. Accordingly steps will be taken to create a statistical department to obtain accurate information with regard to persons of all races arriving in or departing from Kenya. Meanwhile the Kenya Immigration Ordinance will not be enacted.

(2) FRANCHISE.—I have given careful consideration to representations in favour of a common roll, but I am not prepared to resist the conclusion already arrived at that, in the special circumstances of Kenya, with four diverse communities, each of which will ultimately require electoral representation, the communal system is the best way to secure the fair representation of each and all of these communities.

(3) HIGHLANDS.—I consider that the Secretary of State for the Colonies has no alternative but to continue pledges, express or implied, which had been given in the past, and I can hold out no hope of the policy in regard to agricultural land in the Highlands being reconsidered.

(4) LOWLANDS.—It was proposed to reserve an area in the lowlands for agricultural immigrants from India. The Committee made it plain that it is averse from any reservation of land for any immigrant race, subject to the suggestion that before applications for land in lowland areas are invited an opportunity should be taken of sending an officer experienced in Indian settlement and agricultural methods to report on the areas. At present any consideration of the matter is in suspense pending receipt from the colony of reports from the native and agricultural points of view on the areas in question."

The work of the Colonies Committee did much to abate the bitterness which existed in the relations between the different classes of settlers in Kenya, and the situation was further improved by the decision of the Indian community to relinquish their attitude of non-co-operation and to select five members for nomination by the Governor to the Legislative Council.

In June 1924, His Majesty's Government announced the appointment of an East African Committee, under the Chairmanship of Lord Southborough, to consider and report on certain questions regarding the administration and economic development of British East African dependencies. Since this enquiry was likely to affect Indian interests, the Government of India urged that the Indian point of view should be heard before the Committee came to any conclusions. This request was granted, but further action in the matter was suspended, pending the publication of the report of the Commission presided over by Major Ormsby Gore, which visited East Africa to enquire into certain aspects of the questions referred to the Southborough Committee. The report of the Ormsby Gore Commission was published in the United Kingdom on May 7th, 1925. On June 9th, Major Ormsby Gore announced in the House of Commons that, in view of the completeness of the report presented by the Commission which, under his chairmanship, had visited East Africa, His Majesty's Government had decided that the Southborough Committee should not resume its sittings.

In November 1926, information reached the Government of India, that the Government of Kenya contemplated undertaking legislation at an early date in order to make the European and Indian communities responsible for the net cost of their education. It was originally intended to give effect to this decision by levying from Europeans a tax on domestic servants in their employ and from Indians a poll-tax. The Indian community resented this differentiation and, ultimately, the Colonial Government decided that both communities should pay the same form of tax, *viz.*, an adult poll-tax. For Europeans this has been fixed at 30 shillings and for Indians at 20 shillings. An Ordinance giving effect to this decision was passed by the Kenya Legislative Council and came into force from 1st January 1927.

Closer Union.—In view of the issue of another White Paper in July 1927, in which it was announced that His Majesty's Government had authorised the Secretary of State for the Colonies to send to Africa a special Commission to investigate the possibility of securing more effective co-operation between the Governments of Eastern and Central African Dependencies and make recommendations on this and cognate matters, the question regarding the position of Indians in Kenya again came to the forefront.

In March 1929, the Secretary of State for the Colonies sent out Sir Samuel Wilson, Under-secretary of State for the Colonies, to East Africa to discuss the recommendations of the Hilton Young Commission for the closer union of Kenya, Tanganyika and Uganda (and such possible modification of these proposals for effecting the object in view as may appear desirable) with the Governments concerned and also with any bodies or individuals representing the various interests and communities affected, with a view to seeing how far it might be possible to find a basis of general agreement. Sir Samuel was also directed to ascertain on what lines a scheme for closer union would be administratively workable and otherwise acceptable and to report the outcome of his consultations. At the invitation of the Secretary of State for the Colonies, the Government of India deputed the Rt. Hon. V. S. Srinivasa Sastri, P.C., to East Africa to help the local Indian communities to state their views to Sir Samuel Wilson on matters arising out of the Hilton Young Commission's Report and to be at Sir Samuel Wilson's disposal, if he wished to make use of him in dealing with the Indian deputations.

Mr. Sastri left India in April and returned in June 1929. In the Report presented by him on his return he recommended that the Government of India should—

(*a*) press for inquiries as to the basis of a civilisation franchise which shall be common to all races alike;

(*b*) invoke the good offices of the Colonial Office and of the Government of Kenya in securing the consent of the European Community to the establishment of a common roll;

(*c*) oppose the grant of responsible government to Kenya or of any institutions leading up to it;

(*d*) oppose the establishment of a Central Council on the lines proposed by Sir Samuel Wilson;

(*e*) demand, in case of the establishment of some such body that the unofficial representatives from each province should include an adequate number of Indians;

(*f*) advocate the continuance of the official majority in the Legislative Council of Kenya;

(*g*) demand that the representation of natives in the Kenya Legislative Council should be by natives or by Europeans and Indians in equal proportions.

Thereafter meetings of the Standing Emigration Committee were held and the decision arrived at by the Government of India was communicated to His Majesty's Government.

The report of Sir Samuel Wilson was published on the 5th October 1929. Another meeting of the Standing Emigration Committee was held soon thereafter to consider the report and a further communication was addressed to His Majesty's Government on the subject.

The conclusions of His Majesty's Government as regards closer union in East Africa were published in June, 1930, in the form of a White Paper and it was announced that they would be submitted to a Joint Committee of the two Houses of Parliament. In accordance with this decision a Select Committee was set up in November, 1930. The Government of India communicated their views in a despatch to the Secretary of State for India on the scheme set out in the White Paper in so far as it affected the Indian population in East Africa. With the permission of the Joint Select Committee of Parliament they also deputed the Right Honourable V. S. Srinivasa Sastri, P.C., C.H., as their representative to present their case and elucidate in the course of oral examination such questions as the Committee might consider necessary to refer to him. The Select Committee examined Mr. Sastri in July, 1931.

The report of the Committee was published simultaneously in England, East Africa and India on the 2nd November, 1931, and the decisions of His Majesty's Government on the recommendations of the Committee together with certain correspondence arising from the report of the Committee were also similarly published on the 24th August, 1932.

As regards the question of *Closer Union*, His Majesty's Government accepted the view of the Joint Committee that apart from considerations arising out of the Mandatory position of the Tanganyika Territory, the time had not arrived for taking any far-reaching step in the direction of the formal Union of the several East African Dependencies.

There was no important development in regard to this question until 1935 when certain sections in Kenya attempted to revive the proposal for Closer Union. Early that year an unofficial conference of Europeans, held at Arusha, was reported to have expressed the view that since 1931 circumstances had changed so rapidly as to justify a reversal of the Joint Committee's decision and that immediate steps should be taken towards the Closer Union of East Africa. A "Memorandum on Union" was also forwarded to the Secretary of State for the Colonies by the European Elected Members' Organisation of the Kenya Legislative Council. His Majesty's Government did not, however, consider that there were adequate grounds for reopening an enquiry into the matters which had been so carefully investigated by the Joint Select Committee as recently as 1931. This decision is contained in Malcolm Mac Donald's despatch, dated the 12th October, 1935, to His Excellency the Governor of Kenya which was published in all the countries concerned.

Inter-territorial Organisation in East Africa. In December 1945 the Colonial Office published proposals for the future management of the inter-territorial services in East Africa. At present the inter-territorial functions are administered by the East African Governors' Conference which was set up in 1926. The new proposals envisage a constitution for the common services as follows:—

(*a*) An East African High Commission, consisting of the Governors of Kenya, Uganda and Tanganyika.

(*b*) A central legislature (to be called Legislative Assembly).

(*c*) An executive organisation supported in specific cases by advisory boards.

The High Commission would exercise the actual powers of the Central Government in respect of certain common services that may be organised (e.g., the Governor of Kenya would be the Standing Chairman of the High Commission). The Legislative Assembly will have power to make laws for Kenya, Uganda and Tanganyika. Unofficial members would have the powers to initiate legislation; and executive power of continuation would be invested to be exercised if necessary by the direction of the Secretary of State. The Legislative Assembly would consist of the following:—

12 official members; and

24 non-official members consisting of:—

6 European members elected by the territorial legislative councils;

6 Indian members elected by the territorial legislative councils;

6 Members as nearly as possible of whom would be Africans nominated by the High Commission as trustees of African interests, two from each colony;

2 members nominated by the High Commissioner to represent Arab interests;

4 other members nominated by the High Commission.

The territories would retain their existing constitutions and the territorial Governments would remain responsible for the basic services of administration viz. police, health, education and agriculture etc. The Europeans have criticised the proposals of parity of representation between Indians and Europeans on the

proposed Legislative Assembly. Indians have expressed satisfaction that closer political union is not proposed and have reiterated their opposition to any form of closer union or fusion of the East African colonies. They have asked for safeguards as given below :—

(*i*) Principle of equality of representation should be extended to the various advisory bodies.

(*ii*) All African seats should be occupied by Africans.

(*iii*) The Chairmanship of the High Commission should be filled by the Governors of Kenya, Uganda and Tanganyika in rotation.

The Africans also consider the proposals to be fair and have asked that all members appointed to be Trustees of their interests should be exclusively Africans. The proposals have not yet been implemented.

Re-organisation of the Administration of Kenya.—Another matter which led to much controversy in 1945 was the re-organisation of the administration of Kenya. The Government of Kenya proposed to expand the Executive Council of the Governor. Under the proposals the official members of the executive council were to be made the members of the Executive Council incharge of Departments and the non-officials were to be allowed to hold portfolios in respects of two of the Departments, *viz.*, Agriculture and Natural Resources and Local Government portfolios. The Indian community opposed these proposals on the ground that the appointment of non-officials who would invariably be Europeans as members in charge of Departments would be detrimental to Indians' interest. They suggested that if Government were keen to utilise the experience of non-officials it should be done by means of advisory bodies and that Indians should also be given a share in the Government. The proposals were debated in the Legislative Council of Kenya and were adopted in spite of the opposition from all non-European members. A non-official European has been given the charge of the new Department of Agriculture and Natural Resources.

Pan-African Movement.—For some time past there have been indications of a growing move for a Pan-African Federation which stands for "closer relationship, better co-operation and larger collaboration" between South, East and Central African territories. In May 1943 the Southern Rhodesian Legislative Assembly passed a motion in favour of a Pan-African Conference. Early in January 1945, a resolution, sponsored by the elected European members, was passed by the Kenya Legislature, calling on the British Government to invite the Prime Minister of South Africa to arrange immediately a conference to plan and co-ordinate the development of British territories in South, Central and East Africa. The Indian members opposed the resolution on the ground that in view of the anti-Asiatic policy of the Union of South Africa any affiliation with her would be harmful to the interests of Indians elsewhere also. The Arab member and the African Member also opposed the resolution which was carried by 11 to 7 votes.

Franchise.—As regards franchise, His Majesty's Government stated in the White Paper of 1930 that "His Majesty's Government are of the opinion that the establishment of a common roll is the object to be aimed at and attained, with an equal franchise of a civilization or education character open to all races." In 1931 the question of franchise was also referred to the Joint Select Committee of Parliament which was appointed to consider the question of Closer Union. After discussing the arguments that had been brought forward for and against a common electoral roll, the Select Committee stated in para. 100 of their report that it was impracticable under the prevailing conditions to advocate the adoption of the system of common roll representation in preference to the existing system of election. The Secretary of State for the Colonies accepted the recommendations of the Joint Select Committee in the matter.

Highlands.—The Joint Select Committee of Parliament, which was appointed to consider the question of Closer Union in East Africa, had recommended that "in view of the nervousness among the native population as regards the land question, a full and authoritative inquiry should be undertaken immediately into the needs of the native population, present and prospective, with respect to land within or without the reserve held either on tribal or on individual tenure." In April, 1932, a Commission was accordingly appointed by His Majesty's Government and the terms of reference of the Commission included the following :

'To define the area known as the Highlands within which persons of European descent are to have a privileged position in accordance with the White Paper of 1923.'

The Commission in their report, which was published in May, 1934, recommended that the boundaries of the European Highlands should be safeguarded by Order-in-Council so that the European community might have the same measure of security in regard to land as the Commission had recommended for the natives. His Majesty's Government announced that they accepted this recommendation of the Land Commission. The Indian community was perturbed by this announcement as the proposed Order-in-Council would give statutory effect to restrictions which were originally considered necessary on grounds of administrative convenience and representations were made to His Majesty's Government both by the Government of India and the local Indian community. No Order-in-Council had been promulgated till the end of 1937, but the position as it affected Indians would be seen from the following extracts from the speech of the Secretary of State for the Colonies made on the 9th July, 1936 :—

'(*a*) What is contemplated, arising out of the recommendations of the (Morris-Carter) Commission, is the issue of two Orders-in-Council. There are, of course, many other things arising out of those recommendations, but the points which have been raised are chiefly concerned with these Orders-in-Council. One of them is to define the boundaries of those parts of the Highlands which are to be set aside for non-native occupation, and (*b*) I want to make it clear that there is to be nothing in either Order

imposing any legal disability against Indians or against any persons on the ground of race, colour, creed or anything else. Equally I want to make it clear that the existing administrative practice, which was first laid down by Lord Elgin is to be continued. I wish that to be understood clearly both in India and elsewhere. The existing administrative practice of the Kenya Government which has been followed since 1908 will continue. In the area demarcated as the European area not by law, not by anything in the Order-in-Council, but as a matter of administration that practice will continue in the future as in the past. There will be no legal colour bar.'

In spite of protests from the Government of India and the local Indian community, the Order-in-Council contemplated in the above announcement was issued in February, 1939. Though the Order did not contain a definition of the 'privileged position' which persons of European descent were to have within the territorial limits to be included in the Highlands, His Majesty's Government made it clear that there was no intention of changing the administrative practice which had been followed for many years with regard to alienation and transfer of land in the Highlands. This decision caused profound disappointment to all sections of Indian opinion both in Kenya and in India, in particular because of the preference which it accorded even to non-British subjects of European race.

In 1944 another important development took place. In the middle of the year the Kenya Legislature passed two Ordinances, namely (a) the Land Control Ordinance, 1944, and (b) the Crown Lands (Amendment) Ordinance 1944. The objects of the Land Control Ordinance were stated to be (i) putting land to the most beneficial use, (ii) empowering the Crown to acquire land for settlement purposes, and (iii) prevention of speculation in land to the prejudice of post-war settlement. Under this Ordinance a board called the Land Control Board has been established. The Board is to have, subject to any special or general direction of the Governor, absolute control over all transactions in land in the Highlands. It consists of three official members and 4 other persons appointed by a majority of the European elected members of the Legislative Council of Kenya. One of the objects of the second Ordinance is to make the provisions of the Crown Lands Ordinance 1915 more effective by giving a power of veto to the Governor, in exercise of which he can disallow inter-racial transfers of shares in a landowning company, as is being done in the case of inter-racial transfers of land. Both the Ordinances have been strongly denounced by the Indian community and the Indian members of the Legislature, who have always been opposed to the practice of reservation of the Highlands to the Europeans. The Government of India also made suitable representations against this legislation.

Lowlands.—Subsequent to the announcement made in the House of Commons in 1924, in connection with the 'Lowlands,' the question of deputing an officer to examine these areas was considered by the Government of India but they thought it inadvisable to proceed any further with the idea.

Apart from the major problems outlined above, other questions have also been causing concern to the Indian community in the colony. The most important of these are (i) the Ordinance to control and regulate the marketing of native Produce and (ii) the Transport Control Ordinance. The former Bill sought to regulate the selling and buying of native produce by such methods as limiting the number of licences and confining sales to specified localities so as to ensure control over quality. As a number of Indian traders were affected, representations were made to His Majesty's Government by the Government of India and the Bill was revised in certain respects and became law in 1935. It was brought into force from the 1st January, 1936.

The Kenya Transport Control Bill, passed in 1937, was intended to give effect to the recommendations of the Kenya Transport Co-ordination Committee which was appointed in 1935 to investigate and consider the desirability of co-ordinating and regulating all forms of transport in the colony. The Indian members of the Kenya Legislative Council objected to the principle of the Bill. They felt that in the attempt to prevent wasteful competition between the railways and other forms of transports in Kenya, the considerable interests of Indians in the transport industry would be affected adversely. The other main objections were directed against the composition of the Transport Licensing Board and the provision relating to the grant of exclusive licences. The Bill, however, became Law and an Indian was also appointed to the Transport Licensing Board.

In the latter half of 1938 and the beginning of 1939, the Kenya Indians were interested in (1) the Immigration of Jewish refugees, (2) the Kenya Immigration Restriction Ordinance and (3) the representation of the Indian community on the Kenya Immigration Board. All these three questions were connected with one another in some form. His Majesty's Government had under consideration a scheme for the settlement of a small number of Jews in the Kenya Highlands. The main objection of the Indian community was that it would accord to foreign subjects within a British Colony privileges which are denied to British Indian subjects. As His Majesty's Government were committed to a policy of settling Jewish refugees from Central Europe, it was not possible to meet the objections of the Indian community in the matter. To prevent an influx of destitute and undesirable foreigners into the Colony as a result of the international situation in Europe, an Immigration Advisory Board was, however, established in October, 1938. The Board was to advise the Commissioner of Police on such matters as might be referred to that in connection with immigration into Kenya but it was not intended that the Board should consider or advise upon any aspect of Indian immigration. Nevertheless it was felt that the Indian community which was vitally interested in the composition of the population and the economic development of the Colony should be represented on the Board. Representations were made to His Majesty's Government in the matter. The objections to the Kenya Immigration Restriction Bill centred round two provisions of the Bill:—(a) the provision authorising the Immigration Officer to require any intending immigrant, who was without any visible

means of support or was likely to become a pauper, to give security by bond to an amount not exceeding £500; and (*ii*) the provision altering the period of 12 months, within which an intending immigrant had to prove that he was not a prohibited immigrant, to any period the Immigration Officer might fix in his discretion. Though these clauses were intended to apply only to immigrants from Europe, the Indian community thought that they might at any time be applied to Indians also.

Both questions were settled satisfactorily. Indian representation on the Board was conceded and under the revised provisions all immigrants were divided into two classes: (*a*) those who were, if necessary to be received back by their country of birth or origin and (*b*) those who were, not to be so received back the existing law being left practically unaltered in respect of the former category of persons. Indians therefore were not affected by that measure which received the Royal assent in May 1939.

Tanganyika.—In the adjoining mandated territory of Tanganyika, the Indian community were at one time deeply concerned at the rumoured transfer of the territory to Germany. Their views in regard to this subject were communicated by the Government of India to His Majesty's Government. It was later learnt from His Majesty's Government that the rumours were without foundation.

War-time Immigration Restrictions in East Africa.—After the outbreak of war the East African Governments of Kenya, Uganda and Tanganyika requested the Government of India to restrict the issue of passports to those territories to those male persons above 18 years of age who could make the necessary immigration deposits and against whom there were no security objections. The Government of India on being assured that the restrictions were intended to be only for the duration of the war, issued the necessary instructions in December, 1941.

In December, 1943, the Government of Tanganyika informed the Government of India that on account of extreme pressure on housing and other accommodation, it was proposed to restrict the entry into the territory of non-natives who were not essential for war work. Persons normally resident in the territory were, however, to be exempted from the restrictions provided they had not been away for more than two years. The Government of India pointed out to the Tanganyika Government, among other things, that due to acute shortage of shipping it would not be possible for many Indians otherwise 'normal residents' of the territory to return within two years and asked for their exemption from the scope of the proposed restrictions. The Tanganyika Government while not agreeing to the exemption of such persons, assured the Government of India that the regulations would be enforced with due regard to the circumstances of each case. The Regulations were promulgated on the 14th February, 1944.

In the third week of February, 1944, the Governments of Kenya and Uganda also intimated to the Government of India that on account of acute shortage of housing and food they also proposed to enact legislation similar to that of Tanganyika and promulgated Defence Regulations imposing restrictions on immigration on the 1st March, 1944. The East African Governments assured the Government of India that the Regulations were not discriminatory and that they would be terminated after the war. The restrictions, however, aroused great apprehensions among Indians in East Africa and India. Several representations were made to the Government of India and deputations waited on them. The matter was also raised in the Council of State and it was stressed by all that the restrictions were the outcome of strong anti-Indian agitation carried on by local Europeans and were only the thin end of the wedge, designed to exclude Indians from East Africa after the war. The pleas of housing and food shortage were described by the critics as groundless.

The Government of India took up the matter with the Colonial Governments and brought to their notice the facts and considerations urged in various representations received from Indian leaders. The Colonial Governments assured the Government of India that entry permits would be granted to all *bona fide* residents of the Colonies even though they might have been absent from the Colonies for more than two years.

With the cessation of hostilities in 1945, it was expected that the immigration restrictions which were introduced in the East African territories as a result of the War, would be removed. It was however made known that the war time regulations would be withdrawn in the year 1946 and that in the meantime new proposals for post war legislation on immigration were being examined and would be published early. In February 1946 the Emergency Powers (Defence) Act 1939 to 1945 of the British Parliament were abrogated and consequently the Defence Immigration regulations in East Africa lapsed. These were however revived as an interim measure till 31st December 1946 until the contemplated immigration legislation for the post-war period had been passed.

Immigration Bill.—An Immigration Bill was published simultaneously by the Tanganyika Kenya and Uganda Governments in the month of April 1946. The Bill has created agitation among the Indian community in East Africa who apprehend that although it is non-racial in terms it will be discriminatory in effect against them. This Bill is proposed to be enacted as a permanent measure with a view to tightening up the immigration restrictions.

Section 5 of the Bill specifies who are "prohibited immigrants". Any person born in the colony is not a "prohibited immigrant". Classes of persons who are "prohibited immigrants" have been defined. Persons other than "prohibited immigrants" can enter the colony if they have residential certificates issued under the ordinance. Class of persons who can apply for residential certificates for entering or re-entering the colony have been enumerated. An immigrant intending to engage in agriculture and animal husbandry has to prove that he possesses a sum of at least £5000. Anyone wishing to engage in mining has to possess sum not less than £1,000. A person wishing to engage in trade on his own account has to show that he holds £2500. Most Indians wish to go to East Africa as traders and shop-keepers and thus the requirement of a large bank deposit of £2500 will practically stop the Indian immigration.

As a result of the representation of the Indian community the second reading of the Bill has been postponed till October 1946. In August 1946 the Government of India sent a delegation to East Africa under the leadership of Raja Sir Maharaj Singh to study the facts and circumstances relating to the Immigration Bill in East African Legislatures. The Delegation returned in the last week of September. They are going to submit a report to the Government of India.

Appointment of an Agent of the Government of India.—Demand for an Agent of the Government of India in the East African territories has been voiced from time to time and in April, 1944, while discussing the immigration restrictions in East Africa in the Council of State, the question of the appointment of an Agent was once again raised. It was contended that in the absence of an Agent, the Government of India could not correctly gauge the effect of events in East Africa on the Indians there and thus was unable to take any timely action to prevent mischief being done to their interests. The Government of India agreed to take up the matter.

Nyasaland and Rhodesias.—In May, 1938, a Royal Commission under the Chairmanship of Lord Bledisloe was appointed to enquire and report whether any and, if so, what form of closer co-operation or association between Southern Rhodesia, Northern Rhodesia and Nyasaland was desirable and feasible, with due regard to the interests of all the inhabitants, irrespective of race. It was apprehended that if amalgamation took place, there would be danger of Indian residents in those territories numbering about 4,100 being subjected to restrictions similar to those obtaining in the Union of South Africa. The Commission reported to H.M.G. in March, 1939, recommending against the immediate federation of the two Rhodesias and Nyasaland but in favour of organised closer relations with a view to eventual unification. H.M.G. were understood to have received the views of the Governments of Northern Rhodesia and Nyasaland and discussed them with the Prime Minister of Southern Rhodesia, but further discussions were suspended due to war.

In October 1944, His Majesty's Government announced the setting up of a Standing Central African Council for bringing about the closest possible co-ordination between the Governments of the two Rhodesias and Nyasaland. The Governor of Southern Rhodesia is its Chairman.

Fiji— Emigration to Fiji was stopped in 1917, under Rule 16 (B) of the Defence of India (Consolidated) Rules in pursuance of the general policy of stopping recruitment under the indentured system of emigration. With a view to secure, if possible, a renewal of emigration to the Colony, an unofficial mission composed of the Bishop of Polynesia and Mr. Rankine, Receiver-General to the Fiji Government, arrived in India in December 1919, and submitted a scheme of colonisation, which was referred to a committee of the Imperial Legislative Council on 4th February, 1920. To secure a favourable reception for the mission the Fiji Government cancelled all outstanding indentures of East Indian labourers from 2nd January, 1920, and also announced their intention to take early measures to provide for the representation of the Indian community on the Legislative Council on an elective basis by two members. In accordance with the recommendations made by the Committee the Government of India informed the mission in March, 1920, that they would be willing to send a Committee to Fiji provided that the Government of Fiji and the Secretary of State for the Colonies would guarantee that "the position of the emigrants in their new home will in all respects be equal to that of any other class of His Majesty's subjects resident in Fiji." In July, 1920, the Government of Fiji informed the Secretary of State for the Colonies of their willingness to give the pledge, subject to his approval. Arrangements with regard to the contemplated deputation, however, were postponed until January 1921, owing to the announcement of Lord Milner's policy in regard to Indians in Kenya, and the desirability of consulting the new Legislature in India. After consultation with the Fiji Government as to the terms of reference and personnel of the deputation, an announcement was made on the 27th June, 1921. But owing to the inability of the two Indian members, Messrs. Srinivasa Sastri and Hridaynath Kunzru, who had been nominated to join the Committee which as finally constituted consisted of Messrs. Venkatapati Raju, G. L. Corbett, Govind Sahai Sharma, and Lieutenant S. Hissam-ud-din Khan did not reach Fiji until the end of January 1922.

The labour troubles in Fiji in the years 1920-21 had produced an unexpected result in India. The Government of Fiji cancelled the indentures of Indian labourers, as from January 1920, while arrangements were made for the early repatriation of such of them as desired to return to their own country. In consequence, large numbers left Fiji. Many arrived in India comparatively destitute; while others, who were colonial born or whose long residence in the colonies had rendered them unfit for the old social conditions, found themselves utterly out of place—indeed foreigners—in their own country. Returned emigrants from other colonies also, being in difficulties owing to the unfavourable economic situation in India, strongly desired to return to the territories from which they had come. During the early part of 1921, from all parts of India there was a steady drift of destitute and distressed labourers in the direction of Calcutta where they hoped to find ships to take them back to the colonies in which they were certain of work and livelihood. At the earnest representation of the Fiji Government, and after full consultation with representative public men, arrangements were made to relax the emigration restriction in favour of those Indians who were born and had property in any colony, as well as of such near relations as they desired to take with them. Admirable work was done among these distressed persons by the Emigrants' Friendly Service Committee which had been formed primarily to deal with the applications of repatriated Indians desirous of returning to Fiji. The Government of India gave discretion to this Committee to permit persons who could prove that they had been in Fiji to return there if they so desired. The local labour conditions stimulated the return of these unfortunate people by giving them assisted passages. The Legislative Assembly had made a grant of £1,000 for the maintenance of these labourers, until

such time as they were able to find work and settle down in India. The deputation from India left Fiji on the 3rd April, 1922, and submitted its report to the Government of India. It has not been published.

In February, 1929, Letters Patent under which the constitution of the Fiji Legislative Council was revised were issued. Provision was made, *inter alia*, for the election of three Indian members on a communal basis. On the 5th November, 1929, one of the Indian members moved a resolution recommending the adoption of a common electoral roll in place of the existing communal one. The resolution was supported by the three Indian members and opposed by the rest of the Council including the elected European and nominated Fijian members. As a protest against this vote, all three Indian members resigned their seats and, no Indian having subsequently offered himself for election, the seats remained unfilled throughout the life of the Council. A fresh election was held during 1932 and as a result two Indian constituencies returned their representatives to the Council, but no candidate offered himself for election from the third constituency.

In 1935, the elected Indian members of the Legislative Council advocated a system of nomination in place of the system of election and the proposal was opposed by the local Indian Association. European opinion was divided. The Government of India supported the principle of election and made representations to His Majesty's Government. The decision of His Majesty's Government is contained in the despatch, dated the 20th July 1936, addressed by the Secretary of State for the Colonies to the Government of Fiji. The main points of the decision were :—

(*a*) the Fijian representatives should be selected as heretofore, viz., by the Governor from a panel submitted by the Great Council of Native Chiefs ;

(*b*) some of the European and Indian members should be elected and the others nominated ;

(*c*) the circumstances were such as to make it impossible to arrange for representation of the three sections of the population by means of a general franchise. The Legislative Council should consist of the Governor, 16 official members, 5 European members (3 to be elected on a communal franchise and 2 to be nominated), 5 Fijian members (all to be selected as at present) and 5 Indian members (3 to be elected on a communal franchise and 2 to be nominated).

The Legislative Council as newly constituted met in September, 1937. Fresh elections to the reformed Legislative Council took place in 1940.

The most important problem affecting the Indian community in Fiji is that of land tenure. Out of the total Indian population of 94,966 estimated in 1939, a very large majority consists of agriculturist, but alienation of native-owned land is prohibited. More than 80 per cent. of the land in the Colony is held by native owners as tribal land, and the rest is held as Crown grants or as freehold property mainly by the Colonial Sugar Refining Company, Ltd. Indians hold land as lessees from the native owners for the cultivation of rice, sugarcane, etc., and from the Colonial Sugar Refining Co., for cultivation of sugarcane. Practically the whole problem is one of security of tenure and the encouragement given to Fijians to cultivate their own lands with the most stable and profitable crop, sugarcane, caused some alarm to Indians engaged in agriculture. A number of practical difficulties connected with the leases, which in main related to the procedure for obtaining leases and the administration of the land law, were also brought to the notice of the Government of India.

In September, 1936, the Council of Chiefs of Fiji agreed that all lands (including leases) not required for the maintenance of the Fijian owners should be opened for settlement ; that to further this end a Committee should be appointed to inquire into and to determine the amount of land needed for proper development by the Native owners ; and that all land (including leases) not so required should be handed over to the Government to lease on behalf of the Fijians. As a result of the examination of the question, the Colonial Government came to the conclusion that the most satisfactory method of procedure would be for Government to take power to deal with *all* the native lands in the Colony, and then to appoint a Commission to determine the lands to be set aside for the exclusive use of the Fijians. These proposals were referred to the Council of Chiefs in October, 1938, and accepted by them. A Bill entitled Native Land Trust Bill was published by the Government of Fiji in the Gazette dated the 17th November, 1939 to give effect to the proposals referred to above. The Government of India made suitable representations on the Bill, and the Bill with certain amendments passed its third reading on the 22nd February, 1940 and was assented to by the Governor.

The Native Land Trust Ordinance, 1940, provides for the formation of a Native Land Trust Board to administer all native land in the Colony on trust. A Fijian Commission has been appointed to conduct enquiries into particulars of land needed for Fijian use and to report to the Board, but with a view to safeguarding the interest of Indians, it has been arranged to depute an Indian Assistant to the District Commissioner to accompany the Commissioner and to place before him any representations made by Indian lessees. The Colonial Government have also agreed that existing occupants of land should not as far as possible be disturbed. Though there is no Indian representation on the Board, provision has been made for such representation on local committees which have been set up to advise the Board in respect of native land in those areas. Regulations have been framed regarding the terms and conditions of leases to be granted by the Board and provide *inter alia* for the grant of agricultural leases up to a term of 99 years.

Fiji Sugar Dispute, 1943. In view of the rising cost of living due to war, the sugarcane farmers in Fiji, who are mostly Indians, demanded, in June, 1943, a higher price for their cane. The Sugar Refining Company, who has the monopoly of sugar production in the Colony, refused any increase in the price of cane until and unless the price of sugar was increased by the Ministry of Food, United Kingdom, to whom the Company was bound to sell all its produce. The farmers thereupon decided not to harvest their crop. They stuck to their decision in spite of

appeals made by the Governor of the Colony. As the crushing season advanced, the feelings amongst the Indians ran high. Some of them even ploughed in their crops. All attempts on the part of Indian leaders to reach an amicable settlement having failed till the end of the crushing season, the major part of the cane crop in the Colony remained unharvested. In March, 1944, the Secretary of State for the Colonies announced in the House of Commons his decision to send an independent expert to the Colony to report upon the matter and further informed the House that Dr. C. Y. Shephard of Trinidad had agreed to conduct the enquiry. Dr. Shepherd's report has since been published.

Labour and Industrial Legislation. Three important Ordinances bearing on the subject were passed in 1941. These are (1) The Industrial Association Ordinance (No. 18 of 1941), (2) The Industrial Disputes (Conciliation and Arbitration) Ordinance (No. 19 of 1941) and (3) The Labour (Welfare) Ordinance (No. 20 of 1941). No. (1) provides for the formation, registration and regulation of Industrial Associations; No. (2) provides for the investigation and settlement of industrial disputes and No. (3) authorises the appointment of a Commissioner of Labour to safeguard and promote the general welfare of workmen in the Colony.

Education.—Education in general, and Indian education in particular, has made considerable progress in the last few years. In 1928 there were only one Government and 23 aided schools out of which one was Indian. The number of Indian schools now is 88 as against 230 European and Fijian Schools. Education in the Colony is under the control of a Board of Education consisting of 8 members of whom 2 are Indians.

On the subject of alleged discrimination in the Fiji Civil Service the Government of India have now been assured by His Majesty's Government that there is no rule preventing the appointment of an Indian as such to any posts in Fiji except those concerned solely with Fijian administration. The Colonial Government had under consideration a proposal to fix a quota for Indian emigrants but the matter has been held over for discussion with the Government of India after the war.

West Indies British Guiana.—The Indian population in this colony belong almost entirely to the labouring classes and their grievances are mainly economic. Towards the end of 1919, a deputation consisting of the Hon'ble Dr. J. J. Nunan, Attorney-General, and J. A. Luckhoo, a prominent Indian who was a member of the combined court, visited India to put forward a scheme for the colonisation of British Guiana by means of emigration from India. This was examined by a Committee of the Indian Legislature, which advised that a deputation be sent from India to investigate conditions on the spot. Owing to certain unforeseen circumstances it was not found possible to proceed with the proposal until 1922, when a deputation consisting of Messrs. Pillai, Keatinge and Tivary visited British Guiana. Mr. Keatinge was a former member of the Indian Civil Service who had retired from the post of Director of Agriculture, Bombay; Diwan Bahadur P. Kesava Pillai was an elected member of the Madras Legislative Council of which he was also Vice-President; and Mr. Tivary was a member of the Servants of India Society who had done considerable amount of Social Welfare Work among the Depressed Classes in the United Provinces. The two reports of the deputation were published on the 21st of January, 1924. Towards the end of the month a deputation from the Colony of British Guiana, consisting of Sir Joseph Nunan, Kt., and the Hon. Mr. J. C. Luckhoo, K.C., arrived in India for further discussions. The Standing Emigration Committee of the Indian Legislature eventually reported that while they would be inclined to view with favour the colonisation scheme put forward by the deputation, they would, before making any definite recommendation, like the Government of India to depute an officer to British Guiana to report on certain matters. Kunwar Maharaj Singh, M.A., C.I.E., Bar-at-Law, was deputed for this purpose. He proceeded to that Colony in September, 1925. His report was received on February 1st, 1926, and published. As a result of the report a notification was issued by the Government of India in March, 1926, with the approval of the Standing Emigration Committee and the Indian Legislature, permitting re-opening of emigration to British Guiana on certain terms. Certain recommendations of Kunwar Maharaj Singh relative to the improvement of the position of the existing Indian population in the Colony were also supported by the Government of India to the Colonial Government who accepted all of them in principle and stated that some of them were already being acted upon. The Colonisation scheme did not, however, eventually materialise; the Roy-Wilson Commission of 1926 recommended that it should not be brought into operation in view of the high cost involved, and in June 1927 the Colonial Government, with the concurrence of the Government of India, decided to postpone the scheme indefinitely.

In March, 1928, following special inquiries by the Colonial Office, reports appeared in the press that a bill had been introduced in the House of Commons empowering His Majesty's Government to alter the constitution of British Guiana by Order in Council. The changes eventually introduced by the British Guiana (Constitution), Order in Council 1928, did not involve any differentiation against Indians and did not in any way infringe the provisions of the special declaratory Ordinance which was passed by the Colonial Government in 1923 and which confers equality of status on all persons of East Indian race resident in the Colony.

Nothing important about the Indian community in that colony was heard till September-October 1935, when there were labour disturbances on certain sugar estates. A Commission was appointed by the Governor to enquire into and report on (*a*) the causes which led up to the disturbances and (*b*), *inter alia*, the condition of labour on sugar estates; and to advise on the measures necessary to obviate the recurrence of similar disputes. From the report of the Commission, which was published in December 1936, it would appear that the disturbances were primarily of an economic character and were inspired by grievances and disabilities which the Commission found to be genuine and which were common to both African and Indian labourers

whether resident or non-resident. There is reason to suspect that the position of the Indian labourer has somewhat deteriorated in the last few years. The abolition of the indentured system was no doubt most desirable and constitutes a theoretical advance, but as things are at present the Indian labourer no longer enjoys the measure of security provided by the Immigration Ordinance in regard to pay, hours of work and other benefits and the supervision of the Immigration officers in his relation with the plantation authorities. In order to remedy this state of affairs, the Commission recommended:

(i) the creation by Government of some authority with such powers as were considered necessary for the efficient safeguarding of the interests of both employed and employer; and

(ii) the revision of the provision of the Employers and Servants Ordinance in the light of more modern conceptions of the relations between employer and employed.

In 1942, a Labour Ordinance (No. 2 of 1942) was passed. This Ordinance provided for the appointment of a Commissioner of Labour for the regulation of the relations between employers and employees and for the settlement of disputes between them. This brought the labour laws of British Guiana in line with modern conceptions of labour legislation. The Government of India were given an opportunity to comment on the Ordinance at the Bill stage and certain modifications suggested by them were incorporated in it.

West Indies Royal Commission—The decision of His Majesty's Government to appoint a Royal Commission to conduct a comprehensive survey of the social and economic problems affecting the group of the West Indian Colonies was announced by the Secretary of State for the Colonies in the House of Commons on the 14th June, 1938, in the course of the debate on the Colonial Office vote during which discussion largely centred around conditions in the West Indies. The actual terms of the Commission (which were announced in the House of Commons on the 28th July) were the following:—

"To investigate social and economic conditions in the Barbados, British Guiana, British Honduras, Jamaica, Leeward Islands, Trinidad and Tobago, and Windward Islands and matters connected therewith and to make recommendations."

In view of the large number of Indians in Jamaica, Trinidad and British Guiana and the importance of the Indian case in these territories being properly presented before the Royal Commission, the question of deputing someone from India) safeguarding the interests of Indians engaged the attention of the Government of India. As a result of representations made by them, they were able to secure the approval of His Majesty's Government to the deputation of an officer to represent their views before the Commission and to assist Indians in the West Indies in the presentation of their case. Mr J. D. Tyson, C.B.E., I.C.S., who was secretary to the Rt. Hon'ble V. S. Srinivasa Sastri, P.C., C.H., when the latter went as the first Agent in the Union of South Africa, and subsequently represented the Government of India before the Joint Select Committee in South Africa on the Transvaal Asiatics Land Tenure Amendment Bill in 1930, was the officer chosen in this connection.

The Commission concluded taking evidence towards the end of March, 1939, and the report was made available to the press in October, 1939. Only a summary of the recommendations of the Commission were available the report having been published by H.M.G. in June 1945. The Commission recommended that some officer or officers, preferably members of the labour department should specialise in East Indian questions and if suitable candidates were forthcoming should be East Indians. The Commission also recommended that the possibility of the appointment of suitable East Indians to posts in the Government service should be carefully borne in mind by Colonial Governments. They expressed sympathy with the complaints regarding the arrangements for legitimisation and validation of East Indian marriages and recommended that these marriages should so far as the law was concerned be put on exactly the same footing as other marriages.

In effect the commission conceded practically all the demands to which Indians themselves attached importance. The general recommendations which related to matters of education, housing and labour administration appeared satisfactory and were likely to be of benefit to Indians. As an immediate step towards implementing the recommendations of the Commission His Majesty's Government announced their decision to increase the annual allotment to the Colonial Development Fund from £1,000,000 to a maximum of £5,000,000 for ten years and to sanction annually a grant up to £500,000 for the purpose of colonial research. Though the Commission made no recommendation for the appointment of an Agent of the Government of India in the West Indies the matter continues to engage the attention of the Indian Government.

In June 1945, an ordinance to make provision for the solemnization and registration of Hindu marriages in Trinidad and Tobago was enacted. The Ordinance provides for the appointment of Hindu priests as Marriage Officers and the solemnization by them of Hindu marriages. It makes the marriage officers to get the marriages solemnized by them registered with the Registrar of Hindu Marriages appointed for the Colony. Any marriage officer who fails to get registered a marriage solemnised by him, is made liable on summary conviction to a fine, but the marriage itself is not rendered invalid. Parties to any marriage can also apply to a Judge for an order directing the Registrar to register the marriage.

In British Guiana a Hindu Marriage Bill and a Muslim Marriage and Divorce Bill are receiving attention of the Government of the Colony. The Bills provide for the appointment of Marriage Officers and solemnization by them of Hindu and Muslim marriages. The duty for getting marriages registered here also is laid on the marriage Officers and no marriage is rendered invalid by reason only of its non-registration. Marriage solemnized by any person who has not been appointed as marriage officer or whose appointment as such has been cancelled, are deemd invalid and of no effect. The Muslim Marriage and Divorce Bill provides

for Divorce Boards constituted of three marriage officers, each party selecting one and the two officers thus selected co-opting a third one, who would act as Chairman of the Board.

During 1939-40 Major G. Orde Browne was deputed by the Secretary of State for the Colonies to investigate and report on labour conditions in the West Indies. The Government of India took steps to ensure that any measures undertaken to ameliorate the condition of labour as a result of Major Orde Browne's recommendations should reach also the Indian labour population in British Guiana, Trinidad and Jamaica. The Government of India suggested with reference to Indian labour in Trinidad that the Industrial Adviser should also concern himself with the evolution of machinery for collective bargaining among rural labour as in the sugar industry; and in regard to educational institutions in British Guiana, that the Colonial Government should make every endeavour to assume direct responsibility for their management and control.

CONSTITUTIONAL CHANGES

Some of the recent developments, since the visit of the West India Royal Commission, in the Colonies of British Guiana, Trinidad and Jamaica which contain considerable numbers of East Indians (as Indians in these parts are referred to) deserve mention. In Jamaica where Indians are less organised and fewer in numbers than in the other two territories, there had been a demand for the revival of the post of the Protector of Immigrants to deal with Indians which was abolished in 1934 as a measure of economy and the revival of the appointment was also recommended by Mr. Tyson in his evidence before the Royal Commission. This claim has since been conceded. It has also been proposed to introduce constitutional reforms in the three Colonies immediately by reducing the proportion of official representation in the local Legislative Councils and increasing the extent of elected representation, while retaining the method of nomination for representation of minority or backward interests. In Jamaica where there is not much likelihood of any Indian securing election to the Council in view of the paucity of Indian voters and they not being numerically strong enough in any electoral district to have their effect felt, the Government of India have suggested that the possibility of nominating a member to safeguard Indian interests should be kept in view. In Trinidad and British Guiana local committees having Indian representatives were appointed to examine franchise questions.

The reports of the Franchise Commissions in both the Colonies were published in 1944. The British Guiana Commission recommended that for the purposes of franchise, the income and property qualifications should be approximately halved and there should be a literacy test in English. The Secretary of State for the Colonies accepted all the recommendations of the Commission except the language test which he decided should be in any language. The Indian members of the Commission has supported universal adult suffrage. The decision of the Secretary of State caused disappointment to the Indians, the majority of whom are illiterate labourers. The Secretary of State, however made it plain that the aim of policy in British Guiana was the adoption of universal adult suffrage at an early date. In Trinidad universal adult suffrage as in the case of Jamaica, has been introduced.

(4) OTHER PARTS OF THE EMPIRE.

Ceylon.

Indian Labour Immigration into Ceylon.—A satisfactory settlement regarding the standard wage and other outstanding questions affecting the interests of labourers was arrived at in 1927 and the legislation to give effect to it was passed by the Ceylon Legislative Council in December, 1927, as the 'Indian Labour Ordinance No. 27 of 1927.' The standard rate of wages agreed upon were introduced with effect from the 1st January, 1929. In view of the considerable fall in the cost of living and the precarious condition of the rubber and tea industries during the slump, the rates of wages in mid and low country estates were reduced early in 1932, those in up-country being left intact. A further reduction in wages took place in 1933 in view of the deterioration in the position of the rubber and tea industries. While agreeing to these proposals, the Government of India stipulated that the reductions should be treated as strictly temporary and emergent and revision of rates on the upward grade should be considered as soon as the industries revived.

As soon as there was a revival of these industries towards the middle of 1933, the Government of India pressed for the restoration of wage cuts and the rates in force prior to the reductions of 1933 were restored with effect from the 1st June, 1934.

Since September, 1935, there has been little or no recruitment of Indian labour owing to the depression in the tea and rubber industries. In September, 1937, with an increase of prosperity in these two industries, the demand from the planters for extra labour became insistent. Their requirements were estimated at 20,000 labourers, but the Ceylon Government decided to permit the recruitment of only 5,000 as they were anxious to absorb suitable labour available for employment. The Government of India did not feel justified in permitting recruitment unless some revision of wages was promised and Indian estate labourers were accorded the village Committee franchise. The position in regard to the village Committee franchise is explained in a later paragraph.

After summoning Wages Boards and completion of the necessary formalities the Ceylon Government restored the wages of Indian estate labourers with effect from the 12th June, 1939, to the levels prevailing before the slump period since February, 1932, viz.,

		Men	Women	Children
Up Country	Cts.	49	39	29
Mid-Country	,,	47	37	28
Low Country	,,	45	36	27

with provision for the supply of rice at a rate not exceeding Rs. 4·80 per bushel.

With the outbreak of war there was a general rise in commodity prices and a corresponding rise in the cost of living of the labourers. The period synchronised with a period of unrest and there was naturally a demand by the labourers and their associations for an increase in the rates

of wages. With a view to meeting this demand the planters agreed to the grant of a war bonus at the discretion of the Superintendent of an estate. In order to place the scale of wages on a statutory basis, the Board of Indian Immigrant Labour recommended the following scale of wages after considering the varying recommendations of the Wages Boards:

		Men	Women	Children
Up-Country	Cts.	54	43	32
Mid-Country	,,	52	41	31
Low Country	,,	50	40	30

with the old provision about the issue price of rice to labourers.

These rates were brought into force from the 1st February, 1941, the grant of war bonus being discontinued from that date.

The following increased rates of wages came into legal force with effect from the 1st May 1942:—

	Men	Women	Children
Up-Country ..	57	46	35
Mid-Country ..	55	44	34
Low-Country ..	53	43	33

with issue price of rice not exceeding Rs. 4-8 per bushel together with a "dearness allowance" for each labourer based on the cost of living index number, in the proportion of 5 : 5 : 3 for men, women and children respectively. The dearness allowance was subject to variation according to the prices of foodstuffs from time to time, but from October, 1942, the rate of the allowance remained stationery at 30 cents for men and women and 18 cents for children, notwithstanding the increase in prices. A special committee was constituted at the end of 1942 to examine the whole basis of the calculation of dearness allowances. The recommendations of the Committee were considered by the Board of Indian Immigrant Labour and certain modifications of the system of computing dearness allowance were brought into force in April, 1943. The changes brought about by the modified system affected labour adversely, but the rate of dearness allowance payable to them again showed an upward tendency.

The Wages Boards for Tea and Rubber industries published on Dec. 16, 1944, certain proposals for enhancing the minimum rate of wages and invited objections.

As a result of further discussion by the Wages Boards the proposals were slightly modified with reference to the overtime rates and brought into force from 1-8-45 from which date the minimum rates of daily wage have been fixed as follows:

	Basic rate	Plus Dearness allowance	Total
when index is between	211-219		
	cts.	cts.	cts.
Male worker under 16 yrs.	58	67	125
Female worker not under 15 yrs.	46	54	100
Child worker under 15 years	41	47	88

When the cost of living index for any month varies outside the limit 211-219, the dearness allowance for the following month is to be varied by 3 cents for a male adult and 2 cents for others for each complete unit of 5 points by which the index differs from 215. The minimum overtime rate is to be 25 per cent more than the minimum hourly rate during the day (7 a. m. and 7 p. m.) and 50 per cent more during the night.

One important feature of the new scale of wages is that the distinction hitherto made between the minimum rates for the up-country, mid-country and low country estates is not maintained.

The position in regard to the supply of foodstuffs to estate labourers deteriorated considerably (in 1942) and the basic ration of rice was considerably cut down.

Shortage of foodgrains continued in 1943, in spite of the efforts of the Government to increase their production, and the basic ration to estate labourers practically remained the same as at the end of the year 1942.

The food position on estates did not improve until the end of 1944, and the issue of the ration in the form of rice was reduced to ½ of the basic ration.

In 1945 also the general food rationing scheme continued as in the previous year except that the rice portion of the ration was increased from ½ to ¾ of the basic ration in the beginning of the year. On account of the prospects of improved rice position, this rice portion was further raised to 1¼ measures in May 1946, but owing the non-arrival of promised rice stocks the increased rations had to be abandoned, and return to 1 measure became necessary as the food position again become grave.

Indian Immigration into Ceylon and Indo-Ceylon Relations.— In 1936, as a result of a resolution passed in the State Council, the Ceylon Government appointed an Immigration Commission to consider and report upon the problem of non-Ceylonese workers in Ceylon, particularly with a view to the restriction and effective control of immigration into Ceylon of workers from other countries, including assisted estate labourers. Indians form the majority of the immigrants in Ceylon and they presented a memorandum to the Immigration Commissioner. The report of the Commissioner was published in April, 1938. The Commissioner came to the conclusion that, although in the absence of statistics it was not possible to estimate the extent of Indian immigration, the immigrant came to share the work when it was available and when it was not, he returned to his home; that the immigrant workers made possible an economic and general advance which could not have taken place without them; that Indians did not undercut wages; that the existing means of control of immigration were sufficient and that the restriction of Indian immigration for the protection of Ceylonese employment was not practicable.

Dismissal of Indian Daily-Paid Staff in Government Departments and the ban on Emigration to Ceylon.—Early in 1939, the Government of India came to know that the Ceylon Government had under consideration some scheme for the replacement of Indian daily paid employees in the Government Departments by Ceylonese. The Government of India addressed the Ceylon Government asking for details of the scheme and the reasons therefor.

After some correspondence on the subject, during which the Ceylon Government explained their scheme for the replacement of non-Ceylonese employed since 1st April, 1934, and the offer of gratuities and free repatriation facilities to other non-Ceylonese who voluntarily retired, the Government of India communicated to them their strong objection to the proposed scheme and suggested that it should be held in abeyance pending discussions at the time of trade negotiations, which were to take place between the two countries very soon. The Ceylon Government did not agree to that and also to other requests from the Government of India and the latter were compelled to withdraw their offer to negotiate a trade agreement and also to impose a ban on the emigration to Ceylon of Indian unskilled labour from the 1st August, 1939. The Ceylon Government however, continued their policy of replacement of Indian daily-paid employees and by the end of 1940 over 2,500 employees, including about 1,200 workers, retired from Ceylon Government service under the scheme.

The vindication of the cause of Indian immigration into Ceylon by the Immigration Commission did not satisfy Sinhalese opinion. The Board of Ministers were intent on some measure to control Indian immigration and a memorandum containing a summary of certain far-reaching proposals designed to restrict the entry of persons into Ceylon, whether for purposes of permanent residence or for taking up any occupation in Ceylon, was referred to the Government of India in August, 1940, in accordance with an assurance given to them in the matter. It was agreed to discuss these proposals during the informal conversations arranged to be held in November, 1940, in New Delhi to consider all questions outstanding between the Indian and Ceylon Governments. The Conference was held at New Delhi from the 4th to the 12th November, 1940. The fundamental question of the status of Indians resident in Ceylon was first taken up for discussion. The proposals of the Ceylon Delegation were conditioned by one main purpose, namely, a substantial reduction in the number of Indians resident in the Island, and sought to limit full citizenship rights to Indians in Ceylon in the second or third generation while extending certain restricted rights to those Indians with only a Ceylon domicile of choice (which was to include among other conditions to be prescribed residence in Ceylon for a minimum period of five years). They further proposed that all other Indians in Ceylon and future immigrants should be debarred for ever from acquiring franchise or other rights of citizenship. The Government of India, on the other hand, pressed for full citizenship rights for Indians who had put in five years' residence in the Island and produced evidence of a permanent interest in the Colony and for opportunity for all other Indians in Ceylon on a prescribed date to qualify for such rights in due course. As the Ceylon Delegation were not prepared to modify their attitude, the talks ended in a breakdown of the negotiations.

On 4th March, 1941, the Board of Ministers introduced two Bills in the State Council, one to provide for the registration of persons in Ceylon who did not possess a Ceylon domicile of origin, and the other to make provision for the regulation and control of the entry of non-Ceylonese into Ceylon. After the Bills passed their second reading, they were referred to Standing Committee "A". These bills were, however held in abeyance by the Government of Ceylon pending an outcome of the India-Ceylon talks.

In August, 1941, at the request of the Government of Ceylon, the Government of India agreed to a resumption of the informal conversations that had ended inconclusively at New Delhi in November, 1940. Delegations from the two Governments met at Colombo on the 5th September, 1941, and the conference ended on the 21st when agreed conclusions were reached on all the subjects discussed and a joint report was signed by the two Delegations. This report was simultaneously published in Ceylon and in India on the 16th October. In their report to the Ceylon Board of Ministers, published on the 30th October, the Ceylon Delegation strongly recommended the adoption of the joint report.

The proposals in the joint report, however, came in for criticism from prominent Indians and Indian Associations in Ceylon, particularly in regard to the provisions about the establishment of domicile of choice, the reservation in the grant of franchise rights to the Indian population already in Ceylon, the absence of specific provision for the safeguarding of domicile rights of the children of holders of certificates of permanent settlement, the disabilities attaching to absences of more than a year, and the conditions on which future immigration might take place. Opinion in India was also strongly against the proposals in the joint report, and on 17th November, 1941, the Central Legislative Assembly unanimously passed a resolution that "Indians in Ceylon on the prescribed date of the agreement and those who had been residents within a specified period prior to the date of the agreement should have freedom of entry into Ceylon and no regional or occupational restrictions should be imposed on them; they should be entitled to full rights of citizenship on the completion of the prescribed period, and that, for the future, provision should be made to protect Indian trade interests." In view, however, of the developments in the Eastern political situation, it was agreed between the two Governments that further consideration of the Report should be suspended and that the *status quo ante* introduction of the Immigration Ordinance should be maintained. Considering the hardship caused to Indian labourers already in Ceylon on account of the ban, the Government of India relaxed the ban in respect of such labourers as were in Ceylon on 1st September, 1942. The Government of Ceylon thereupon expressed the view that relaxation of the ban amounted to a change in the *status quo* and that in the circumstances they were free to take any action which they might be compelled to take in the interests of the war effort and which might change the *status quo* still further. Soon after that, however, the Ceylon Government approached the Government of India for additional labour for rubber-tapping, on same terms of employment as those offered to Indian labour already in Ceylon and on the condition of compulsory repatriation to India at the end of war or after other agreed period. The Government of India set their face strongly

against any suggestion of compulsory repatriation and made counter-proposals in this regard. But the Government of Ceylon did not agree to the same. In September 1944 one of the Ceylon Ministers made a statement in the Reforms Committee that the Government of India wanted the Indian question to be left over until the war was won, and that it was not wise for the Reforms Committee to settle the question of Indian status. Early in 1945, it was, however, understood that the Governments of India and Ceylon had under consideration the question of resuming the Indo-Ceylon negotiations.

Legislation Affecting Indians:— In 1937 an amendment to the Village Communities Ordinance, 1924, was proposed, by which it was sought to enfranchise all persons of either sex other than Indian estate labourers thereby giving the vote to Europeans and Burghers who were previously excluded. This discrimination against Indians roused protest both in India and in Ceylon. With the object of removing the charge of obvious racial discrimination, the Standing Committee of the State Council made an amendment to the proposed Bill which had the effect of extending the franchise to those members of excepted classes, *i.e.* (Europeans, Indians and Burghers), who pay land tax, and possess a specified area of land (5 acres). The practical effect of this would be to enfranchise the great majority of Europeans and Burghers and leave practically the entire Indian estate labour population without the vote. A further protest was made to the Ceylon Government by the Government of India, who decided to stop the recruitment of labour for Ceylon until this question was satisfactorily settled. The amending Bill was passed by the State Council on 10th December, 1937, but was reserved by His Excellency the Governor of Ceylon for the signification of His Majesty's pleasure.

In 1938, with a view to meeting the charge of racial discrimination, the relevant clause of the Bill was amended so as to exclude all labourers resident on estates, whether Ceylonese or Indian, from the village committee franchise. The Original Bill and this amendment became law on 1st January, 1939, but it was felt that though *de jure* discrimination against Indians had been removed, *de facto* discrimination remained as a very large body of Indian estate labourers were in practice to be excluded from the village franchise while the effect upon the Ceylonese was to be negligible.

The Shops Regulation Ordinance came into force on 1st August, 1939. As there was great difficulty in fixing closing hours of shops and there were numerous representations, that portion of the Ordinance which related to closing hours was not enforced, only the provisions regarding working hours, holidays, leave and other conditions of service of shop employees being put into operation.

The Fisheries Ordinance which received Royal Assent in November, 1940, discriminated between Indians and "Ceylonese" and prohibited non-Ceylonese from engaging in fishing in Ceylon waters for profit without a fishing license, but the Ceylonese Minister stated that Indians who had been resident in Ceylon for a number of years and had been carrying on *bona fide* fishing as an industry would experience no difficulty in obtaining licenses.

There are other legislative measures enacted by the Ceylon Government which are in effect of discriminatory nature and have therefore affected Indians in Ceylon, the most important of them being the Land Development Ordinance and the Omnibus Services Ordinance.

Ceylon Constitutional Reforms:— The question of reform of the Ceylon Constitution which was debated in the State Council from 9th March to 13th July, 1939, engaged the attention of His Majesty's Government and an Order in Council extending the life of the present State Council, which was normally due to expire in March, 1941, for a further period of two years was published in the Ceylon Gazette Extraordinary, dated 19th October, 1940. On 28th October, 1941, the following communication from the Secretary of State for the Colonies was read by the Speaker in the State Council—

"The urgency and importance of reform of the Constitution are fully recognised by His Majesty's Government but before taking decisions upon the present proposals for reform, concerning which there has been so little unanimity, but which are of such importance to the well-being of Ceylon, His Majesty's Government would desire that the position should be further examined and made the subject of further consultation by means of a Commission or Conference.

This cannot be arranged under war conditions, but the matter will be taken up with the least possible delay after the war."

The proposals for constitutional reforms in Ceylon were revived, as a result of persistent demands in that country, by a declaration by H.M.G. on the 26th May, 1943, authorising the Ministers to proceed ahead with the drafting of proposals for a new Constitution, to be examined in detail by a Commission or Conference. The declaration put the grant of full responsible government under the Crown in all matters of internal civil administration as the goal of the contemplated constitutional advance. The Ministers accordingly drafted their proposals in secret without consulting the representatives of the minority interests in the Island and submitted them to the Secretary of State for the Colonies. H.M.G. then announced in July 1944 that a Commission would be sent to Ceylon at the end of the year to examine the proposals made by the Ministers and it would enter into consultation with all minority parties concerned with the Constitution.

The Ministers contending that the arrival of the Commission was contrary to the declaration of His Majesty's Government made in May, 1943 withdrew their proposed scheme for constitutional reforms, and decided not to co-operate with the Commission. However, the Commission consisting of Lord Soulbury (Chairman) Mr. (now Sir) J. F. Rees, Vice Chancellor of the University of Wales, and Mr. F. J. Burrows, the retiring President of the National Union of Railwaymen arrived in Ceylon on 22nd December, 1944, and invited proposals for the reform of the Ceylon constitution. The Indian

community in Ceylon presented their case before the Commission which completed its sittings and returned to England in March 1945

The report of the Commission on constitutional reforms for Ceylon was published on the 9th October 1945. Therein they recommended the continuance of adult suffrage on the present basis with a legislature composed of the House of Representatives (consisting of 95 elected and 6 nominated members) and the Senate (consisting of 15 elected from the lower House and 15 nominated members) and a Cabinet on the British model with full responsibility in all matters in internal affairs. All Bills relating to defence, external affairs, and currency were to be reserved by the Governor-General for His Majesty's assent while any Bill relating to trade and communication was to be reserved if it prejudiced the interest of any part of the Commonwealth. The safeguards for minorities were contained in the statutory prohibition of legislation discriminatory against persons of one community or religion and the reservation by the Governor General of any bill involving oppression or serious injustice to any racial or religious community. The second chamber by impending precipitate legislation and the Public Service Commission by its freedom from the taint of partisanship would also constitute additional safeguards.

The main demands of Indians in Ceylon that were placed before the Commission were the grant of franchise to the Indian community in Ceylon on a footing of equality with the rest of the population and of citizenship rights to Indians resident in Ceylon for a prescribed period and making a declaration of permanent settlement in Ceylon. Their demands were ignored by the Commission and they left the Indo-Ceylon question to be decided by negotiations between the two Governments.

On 31st October 1945, H.M.G. published a White Paper which accepted almost all of the recommendations of the Commission, but deviated from them only in minor details. A resolution regarding the acceptance of the White Paper was debated upon in the Ceylon State Council on 8th November 1945. The All Ceylon Tamil Congress and the Ceylon Indian Congress however condemned the Soulbury Commission's recommendations, and also the White Paper. The Government of India also considered the Commission's recommendations and the White Paper quite unsatisfactory and made representations to H.M.G. in support of the case of Indians in Ceylon. The Ceylon (Constitution) Order in council was however drafted on the lines of the White Paper and published on 16th May 1946. A Delimitation Commission was also appointed by the Governor in May 1946 to demarcate constituencies which would return Ceylon's first Members of Parliament under the new constitutions.

Eviction of Indian labourers from Knavesmire Estate.—The Government of Ceylon acquired the Knavesmire estate on which were resident about 400 Indian labourers for the purpose of settling on it, under the Land Development Ordinance, landless Sinhalese from the neighbouring villages, and Indians were asked to quit by the 31st May 1946. Prosecutions were launched against those who refused to quit the estate after that date. Though the legality of the action of that Government cannot be questioned, yet it had a discriminatory flavour. This action synchronised with the publication of the new constitution with which the Indians are disappointed. In the sense of utter disappointment and with a view to asserting their legitimate claims Indian labourers on estates went on strike on 12th June 1946 and at one time the number of strikers rose to 126,000. The strike was however, called off since 10th July 1946 as advised by the Indian National Congress which appointed a sub-committee to investigate into the matter.

Exchange of Representatives.—In October, 1942, with the concurrence of the Government of India, the Government of Ceylon appointed Sir Baron Jayatilaka as their Special Representative in India to secure and maintain adequate food supplies for Ceylon from India and to improve relations between the two countries. The Government of Ceylon have also welcomed the appointment of an Indian Representative in Ceylon of similar status should the Government of India decide to appoint one.

Unfortunately Sir Baron Jayatilaka died, after a brief illness, on his way to Ceylon in May, 1944. The Government of Ceylon appointed Sir Tikiri Bauda Panabdkke as his successor He took charge of his office in March 1945.

He however returned to Ceylon and resigned his post with effect from 1st July 1946. Since then the duties of the Representative of the Government of Ceylon in India have been discharged by Mr. K. Vaithianathan, C.C.S., Commissioner, Government of Ceylon Supplies, New Delhi.

The Government of India appointed, on a reciprocal basis, Mr. M. S. Aney as their Representative in Ceylon in September, 1943. The post of the Agent of the Government of India in Ceylon has also been continued and is at present held by Mr. P. C. Mathew, I.C.S.

Miscellaneous.—Several complaints were made to the Government of India by Indian merchants in Ceylon against the Government of the Island in regard to requisitioning of stocks of textiles and other essential commodities soon after their arrival in the Island for being distributed through Government Co-operative Stores and Government nominated private dealers. The ground for such requisitioning was given to prevent the goods finding their way to the black market. The Government of India are now understood to be examining the question with a view to ensuring that Indian traders in the export, import and internal retail trade in Ceylon retain their pre-war proportion of business in Ceylon. In the meantime the Ceylon Government has introduced a system of individual rationing of textile by coupons based on the 'points' system, under which there would be no more requisitioning of textiles for co-operative stores.

Malaya.—The position of Indians in Malaya before the occupation by the Japanese has been fully dealt with in the 1942-43 issue of the Year Book. On the cessation of hostilities in August, 1945 the country was put under military administration till the establishment of civil Government on the 1st April, 1946.

Indian Agency.—The old office of the Agent of the Government of India in Malaya at Kuala Lumpur, which ceased to function on the Japanese occupation of the country, started functioning on the 1st September, 1945 under the charge of Mr. T. G. Nataraja Pillai, the Assistant Agent. In October, 1945 the Government of India appointed Mr. S. K. Chettur, I.C.S. as their Representative and Liaison Officer with Supreme Allied Commander, South East Asia. He opened his office in Singapore in January, 1946.

Condition of Indians.—Soon after the establishment of the military administration reports received in India showed that large number of Indians had been arrested and were being prosecuted because of their connections with the Indian Independence League and the Indian National Army. The reports also showed that the economic condition of Indians, particularly that of labouring class, was unsatisfactory. A large proportion of the Indian labourers who had been drafted by the Japanese for the construction of the Burma-Siam Railway were reported to have perished and the survivors were said to be in miserable plight. On account of the repudiation of the Japanese issued currency called 'Banana' currency the sufferings of the labouring classes were aggravated. Acute shortage of cloth and medical aid was being felt. The Government of India, therefore sent their Representative, Mr. Chettur to Malaya in November, 1945 to study the condition of Indians in that country. Soon after his return in December, 1945 a non-official delegation consisting of the Hon'ble Pandit H. N. Kunzru, Member of the Council of State and Mr. P. Kodanda Rao of the Servants of India Society was also sent by the Government of India. In December, 1945 the Working Committee of the Indian National Congress decided to send Pandit Jawaharlal Nehru to Malaya and he accordingly visited the country in March, 1946.

Prosecution of Indian Arrestees.—The number of Indians arrested on charge of collaboration with the Japanese was considerable. The policy of the Military Administration in Malaya caused great stir both in Malaya and India. The Government of India after considering the reports of their Representative and of the Kunzru delegation undertook the defence of the Indian arrestees by sending a panel of competent lawyers from India. The policy of the Military Administration towards collaborators underwent a change in March, 1946 and in pursuance of that all cases against Indians charged of mere collaboration were withdrawn.

Relief Measures.—The Government of India through their Representative in Malaya provided cash reliefs to deserving working class and middle class Indian families in Malaya. They also placed funds at the disposal of their Representative for assisting destitute Indians in their repatriation to India. Certain relaxations in the export regulations were made to permit of old and new clothes for charitable purposes.

Medical Missions.—The Working Committee of the Indian National Congress in December, 1945 decided to send a Congress Medical Mission to Malaya. In March, 1946 the Government of India Medical Mission headed by Lt.-Col. T. S. Shastry proceeded to Malaya and it was closely followed by the Congress Medical Mission under the leadership of Dr. B. C. Roy. The two Missions worked in close collaboration and did much good work. The Congress Medical Mission returned to India in August, 1946 and the Indian Government Mission in September, 1946.

Burma. General.—Burma was occupied by the Japanese in early 1942 and for an account of matters affecting Indians there see the Year Book for 1942-43. The Allied Forces made some advance in Burma in early 1945 and occupied Rangoon on 16th May, 1945. The Japanese surrendered in August, 1945 and soon thereafter a military administration was established in the whole country under the Civil Affairs Service (Burma). The Governor of Burma, who had remained in Simla during the war returned to Burma on the 16th October, 1945 and established civil administration in the whole of Burma except the Tenaserim Division from that date. The change-over from military to civil administration was, however, gradual and by the 1st January, 1946, the civil administration was established in the whole of Burma.

Political.—H.M.G. made an announcement on the future of Burma in May 1945. The Governor of Burma appointed his Executive Council consisting of 9 members on 4th November, 1945 and a Legislative Council of 34 members on 1st January, 1946. He also appointed the Hon'ble Mr. S. A. S. Tyabji, M.B.E. as his Advisor on India affairs. The main political parties in Burma did not participate in the formation of the E. C. The I. C. H. E. Sir R. H. Dorman-Smith, the Governor of Burma resigned his post on account of ill-health and Major-General Sir H. E. Rance took charge of his office on 31st August, 1946. As a result of his negotiations with political parties in Burma a national Government under the leadership of U. Aung San was formed on 28th September, 1946.

Indian Agency.—The Office of the Representative of the Government of India with the Government of Burma which was functioning in Simla since October, 1944, moved to Burma in November, 1945. The Government of India appointed a publicity Officer in the Representative's office in the beginning of 1946. Mr. Jamnadas Mehta, the Representative of the Government of India resigned his post in June 1946 and no successor has so far been appointed.

Immigration into Burma.—In 1944 the Governments of India and Burma were understood to be considering the question of future Indian Immigration into Burma. The discussions remained on official level and no progress appears to have been made.

On account of shortage of shipping and abnormal conditions prevailing in Burma immediately after its re-occupation, free entry of Indians was not allowed for some-time. Passages to Burma were later controlled by the Government of India and facilities to proceed to Burma were provided by them to evacuees and such of the non-evacuees who desired to proceed to Burma on compassionate grounds or on business, etc.

Indian Collaboration Cases.—Sometime after the establishment of the civil Government in Burma Mr. M. L. Doshi and five other Indians who were connected with the Indian National Army and Netaji's Relief Fund were prosecuted for alleged offences of extortion, dacoity, etc., committed during the period of Japanese occupation. In September, 1946, however, on the personal intervention of Pandit Jawaharlal Nehru, the Vice-President of the Indian Interim Government and Member-in-Charge of the Commonwealth Relations Department, the cases against themewere withdrawn.

Trade.—With a view to expedite rehabilitation and reconstruction of the country, the Government of Burma controlled the import and export trade of the country. They have also controlled the internal distribution of some of the essential commodities. To step up the imports from India, a Burma supply Mission was set up in November, 1945 with its Headquarters at New Delhi. The Government of India are understood to be giving much assistance to Burma in her hour of need.

Labour.—Emigration of unskilled Indian Labour to Burma is prohibited under a ban imposed under the Indian Emigration Act, 1922, in July, 1941. In 1944 the Government of India, however, agreed to the recruitment of some labour by the military authorities. After the end of war, the ban has not been lifted but the ban has been relaxed in favour of evacuees.

Legislation.—With the termination of war certain emergency legislation has been enacted in Burma. This legislation affects a large number of Indians who had assets and properties in Burma. Some of the important Acts are as follows:—

(a) *The Liabilities (Wartime Adjustment) Act* 1946.—The Act aims at providing relief to the debtors who by reason of the circumstances created by the war, were unable to pay their debts. It confers on Courts in Burma certain powers in relation to remedies in respect of non-payment of money and non-performance of obligation, and also provides for the adjustment and settlement of the affairs of persons financially affected by reason of war circumstances.

(b) *The Custodian of Movable Property Act*, 1945.—It is a piece of emergency legislation to provide for the speedy recovery and return to owners of movable property of which the owners had been deprived of possession by circumstances arising out of the war and for the appointment of Custodians of such property.

(c) *The Lands Disputes (Summary Jurisdiction) Act*, 1945.—The Act provides for a summary decision, by specially appointed "Commissioners" in disputes as to possession and boundaries of immovable properties without going into the question of ultimate right or title to the property. The Act aims at determining who was the last person in lawful possession of a particular immovable property during the short period between the dates when the British Administration began to disintegrate and finally ceased to function and leaves questions relating to periods prior to that or later to that small period for decisions of competent civil courts.

2. **The Tenancy Act, 1946.**—The object of the Act is to provide regulation in certain respects of agricultural tenancies. It provides for the determination of rents in respect of tenancies by the Revenue Officers and the mode of payment of the same. Under the Act, the unpaid rent in respect of a tenancy and the unpaid wages of the labourers employed by the tenant rank equally and are the first charge on the produce of the land. This legislation is of some importance to the Indians who own lands in Burma.

3. **The Currency Notes Act, 1945.**—Under the provisions of this Act, Burma will have its own currency with effect from the 1st April, 1947. The currency which is at present being managed and controlled by the Reserve Bank of India will be managed and controlled by a Currency Board situated in London.

Zanzibar.—The small Protectorate of Zanzibar, consisting of the two islands of Zanzibar and Pemba, has an Indian community of nearly 15,000 out of a total population of 235,000. These Indians are mostly traders, and the trade in cloves—of which Zanzibar furnishes more than 80 per cent. of the world's supply—is largely in their hands. No problems of any magnitude faced this community until July, 1934, when a group of Decrees regulating the trade in cloves and prohibiting the free alienation of land by Africans and Arabs to others was passed by the Legislative Council of Zanzibar and received the assent of H.H. the Sultan. (*For full details see The Indian Year Book* 1943-44.)

Mauritius.—In April, 1924, the Government of Mauritius requested that emigration to the Colony might be continued for a period of one year, but the Government of India in consultation with the Standing Committee on Emigration decided that consideration of the request should await the results of a local investigation. The Government of Mauritius agreed to receive an officer for the purpose and to give him all facilities; and in December, 1924, an Indian Officer of Government, Kunwar (now Raja Sir) Maharaj Singh, left India to conduct the necessary inquiry.

Kunwar Maharaj Singh's report was published by the Government of India in August, 1925. The various recommendations made in the report were commended to the consideration of the Colonial Government.

In February, 1926, the Government of India received a reply from the Colonial Government stating that they accepted the main conclusion formulated by Kunwar Maharaj Singh in regard to the renewal of emigration to Mauritius, *viz.*, that no more unskilled Indian labour should be sent to Mauritius either in the immediate or near future. With regard to Kunwar Maharaj Singh's suggestions relating to other matters of interest to the Indian population resident in the Island, the Colonial Government expressed their willingness to give effect to several of them.

The condition of Indians in this Colony continued to remain satisfactory till 1937 when there were labour disturbances on certain

sugar estates employing Indian labour. The Colonial Government appointed a Commission to enquire into and report on the disturbances. The commission reported during 1938 and the most important recommendations of the Commission related to the necessity for the formation of a Department of Labour and the enactment of suitable labour legislation in place of the Labour Ordinance of 1922 which mainly dealt with indentured labour. Both recommendations have been given effect to and the Labour Ordinance of 1938 which closely follows the Malayan Labour Code should prove of considerable benefit to the Indian labourers, a large number of whom are employed on sugar estates. The Industrial Associations Ordinance of 1938 provided for the regulation of conditions of employment, the establishment of machinery for the peaceful settlement of disputes and generally the formation of industrial Association. This Ordinance, it will be observed, provides for collective bargaining by Industrial labourers.

The Government of India had under consideration for some time the question of deputing an officer to visit the Colony and to report on the condition of Indians resident there, as no officer of the Government of India visited the Colony since Kunwar Maharaj Singh's deputation in 1925. The suggestion was accepted by H.M's Government and in May, 1940, Mr. S. Ridley, I.C.S., Secretary to the Agent General for India in the Union of South Africa, was deputed to visit Mauritius. He stayed in the Colony for about five weeks. In his report, which was published at the end of 1943, he made a number of recommendations, the more important of which are (1) minimum wage for labourers in the sugar industry, (2) grant of war bonus, (3) Government control over housing of labourers of estates, (4) introduction of compulsory education in suitable stages, (5) extension of franchise by adding educational qualification as an alternative to property qualification, and (6) adequate representation of the Indian community in the Council of Government and the Executive Council, etc., etc.

Disturbances on Estates, 1943. In 1943 disturbances occurred on 4 estates pending settlement of a demand for higher wages. The police were reported to have been assaulted and in the course of firing which followed, 3 persons were killed and 3 wounded. A Commission of enquiry was appointed to investigate the cause of the outbreak and the Conciliation and Wages Boards examined the question of adjustment of wages. The report of the Commission was published on the 28th November, 1944. The Commission observed that the main underlying causes of the disturbances were unsatisfactory economic conditions and low wages. It made far-reaching recommendations for the improvement of labour conditions, general welfare and health services and the general administrative machinery. The Government of Mauritius have taken action on certain recommendations in regard to the improvement of labour conditions and have set up a Central Statistical Bureau.

War. The extension of war to the Far East and Burma gave rise to new problems. First, under the threat of occupation of territories by the Japanese, there was the question of the evacuation of non-essential civilian Indians, particularly women and children, to India. In spite of the shortage of shipping, about 5,000 Indians were safely transported to India by sea. In the case of Burma, evacuation by sea was possible till the port of Rangoon had to be abandoned and about 70,000 Indians had been evacuated. As regards land routes, a total of over four lakhs of Indians reached India by means of the Assam-Burma land route and the Prome-Akyab-Chittagong route. Appreciable numbers of Indians also evacuated by air. At the end of 1942 it was estimated that the total number of evacuees in India was in the neighbourhood of 5 lakhs. Secondly, following the present occupation of the territories by the Japanese, the problem of assistance to the dependants in India of Indians stranded in those territories, and to the evacuees themselves became of considerable magnitude and the Government of India generously came forward by authorising Provincial Governments to give necessary advances on behalf of the Government of India. The advances are still being granted by them. Thirdly, the welfare of Indians in the Japanese occupied territories generally is one on which both Government and the public are much concerned. Every effort is being still made by the Government of India to obtain such information as may become available through neutral sources and the International Red Cross. Fourthly, with the cessation of normal communications with those countries, a very considerable number of enquiries were, and are still being, received by the Government of India for eliciting information regarding the welfare of individuals in those areas, and through the courtesy of the Red Cross attempts are being made by them to secure the necessary information. Fifthly, the Government of India have been receiving claims in respect of properties and assets left behind in the enemy occupied territories which are for the present merely being recorded by them for any possible action later though obviously they cannot give any guarantee that these claims can at all be settled. Sixthly, the question of the rehabilitation of the evacuees in India is also of great importance. The Provincial Governments and National Service Labour Tribunals have been requested by the Government of India to register applications for employment from non-technical and technical personnel respectively, with a view to the persons being put into touch with employers, including Government Departments, and industry. The Government of India have also appointed an Officer on special duty for the purpose. Central Refugee Officers in Madras, Bombay, Calcutta and Delhi have been appointed by the Government of India with a view to assisting the evacuees in obtaining relief under the Central Government scheme of financial assistance and in securing suitable employment. Burma refugee organisations have also been set up in Assam and Bengal which look to the needs of refugees arriving from across the border. Reference has been made only to some of the more important questions which have arisen and for a fuller account reference should be made to the *communiques* on the various subjects which are being issued from time to time by the Government of India.

Indians in Great Britain.

In the middle of the nineteenth century the Parsee community, in the persons of the late Dadabhai Naoroji and other members of the firm of Cama & Co., led the way in the sojourn of Indians in England for business purposes. This lead it has since maintained, though there are both Hindu and Mahomedan business men firmly established there. Nor are the professions unpresented, for there are in London and elsewhere practising barristers, solicitors and medical men of Indian birth. The number of the latter, especially Parsees, is considerable. Three Indians (all belonging to the Parsee community) have sat in the House of Commons. Since 1910 seven Indians—the late Mr. Ameer Ali, the first Lord Sinha, the late Sir Binode Mitter, the late Sir Dinsha Mulla, Sir Shadi Lal, Mr. M. R. Jayakar and Sir Madhavan Nair—have served on the Judicial Committee of the Privy Council. Three Indians are Advisers to the Secretary of State for India. In 1919, the late Lord Sinha was the first Indian to be raised to the peerage and to be appointed a member of the Home Government.

India House.

High Commissioner for India.—This post was first established in 1920 and its various permanent incumbents have been:—

Sir Wm. Meyer, K.C.S.I. (Retd.), 1920-22. Sir Dadiba Merwanjee Dalal, 1923-24. Sir Atul Chandra Chatterjee, 1925-31. Sir Bhupendra Nath Mitra, 1931-36. Sir Firozkhan Noon, from 1936-1941, Sir Azizul Huq from 1942-1944, and Sir Samuel E. Runganadhan from 1944.

In March, 1930, the office of the High Commissioner for India was transferred from the inadequate premises in Grosvenor Gardens to the new India House in Aldwych, erected and furnished at a cost of £324,000. The design of this noble building, which has a frontage of about 130 ft. opposite the Waldorf Hotel, was the work of Sir Herbert Baker, R.A., with Dr. Oscar Faber as consulting engineer. Although expression of the Indian character of the building is mainly found in the interior, the architect has given to the details of the external elevation, by means of carving, heraldry, and symbolism an individuality that proclaims it the London house of India. Including basement and mezzanine floors, there are twelve floors in all, the available space for clerical work alone being between 50,000 and 60,000 ft. The total height from the lower level in the courtyard on the Strand side to the roof is about 100 ft.

On the ground floor there is a great hall for exhibits of the products and art wares of India. This hall is carried up two floors, the upper floor being represented by a wide gallery, and on either side of the exhibition hall there are recesses after the style of an Indian bazaar for special exhibits. From the octagonal entrance hall a great public staircase leads to a gallery round the octagonal hall on the first floor. This gallery in its turn leads to a high vaulted library and reception rooms, and the central portion of the library provides accommodation for large receptions on special occasions.

The staircase, exhibition hall, octagonal hall and library markedly express the Indian character of the building. The walls of the staircase and the halls are of red stone similar in appearance to the Agra and Delhi sandstone, carved and pierced in the geometrical patterns of the *jali* in Indian architecture. Such of the carving as could be completely separated from the structure was actually worked at New Delhi by Indian workmen from Makara marble. The use throughout of Indian hardwoods, chiefly gurgan, for flooring obviates the need for any floor covering. From basement to roof scarcely any wood of non-Indian origin was employed. For panelling and decorative purposes in all parts of the great building silver gray, koko, laurel and the beautiful dark red padouk have been used. The domes and vaults of the building have been embellished by mural paintings, the work of specially selected Indian artists. The water supply is entirely independent of municipal service, being obtained from two artesian wells sunk some 460 ft. below the basement, where the central heating apparatus is installed.

The Indian Trade Commissioner and his staff are at India House, with all other departments of the Office of the High Commissioner excepting the Stores Department which was housed until the bombing of London at the depot off the Thames at Belvedere Road, Lambeth.

The Students.

Under normal conditions it is the student community which constitutes the greatly preponderating Indian element and creates a constant problem. Its numbers multiplied ten or twelve-fold in the quarter of a century before the 1914-18 war. After a very considerable temporary check caused thereby the numbers rapidly expanded from 1919 in spite of pressure on college accommodation. In addition to the ordinary graduate or undergraduate student, there are some youths of good family, including heirs of Indian States, admitted into the public schools, such as Eton and Harrow. There are ordinarily some 500 Indians at the Inns of Court. In the last quarter of a century there has been a welcome increase in the number of technical and industrial students. Altogether including technical and medical students, there were up to the outbreak of War in 1939 fully 2,000 young Indians (some five per cent. of them women) in London, Edinburgh, Cambridge, Oxford, Glasgow, Manchester, Birmingham, Leeds, Sheffield, Liverpool and a few other centres. London absorbed about half the total. The added dangers of "total warfare" under present day conditions and difficulties of transport led to a rapid reduction of members since there were few new comers, and the stream almost dried up. Happily the decision of H. M. Government in the autumn of 1939, moved thereto by the East India Association, to make open the combatant services to Indian temporarily or permanently resident in Great Britain, led to recruitment of a number of the students, some of whom obtained commissions in the R.A.F. Many Indians took a share in A.R.P. and other civil defence organisation. The Indian Soldiers and Sailors Comfort Fund, under the leadership of Mrs. L. S. Amery has been doing excellent work, with headquarters at India House.

Sport.

With the War removed from India's doors, sport in the country benefited appreciably in the year under review and transport difficulties were not so pronounced as in the previous year, although racing was again hard hit. Cricket, hockey and football, as usual, were the most popular branches, and football, especially, received a great fillip.

Cricket.—The Board of Control for Cricket in India is responsible for the affairs of the game. Several representative teams competed, as usual, on zonal lines for the Cricket Championship of India, for the Ranji Trophy, a magnificent gold cup of unique design which keeps green the memory of that illustrious Indian cricketer, Ranjit Sinhji. The biggest attraction of the year, the Bombay Pentangular Tournament, which comprises teams representing the Muslims, Parsis, Hindus, Europeans and The Rest, was a big success. The Zonal Tournament, inaugurated by the Board of Control for Cricket in India, could not be completed after reaching the final stage, owing to disturbances in Bombay City.

Football.—The game is controlled by subordinate provincial associations in affiliation with the All-India Football Federation. It has gained tremendous popularity in recent years, and the introduction of Rule 33 by the parent body, which prevents the wholesale transfer of players during the season, has proved most beneficial. The Santosh Memorial Shield, the official championship for the country competed for by the various provinces on the zonal basis, was held in Bombay, and proved a success, the premier honours going, appropriately, to Bengal, the hub of the game in the country. The premier competitions in the country are the I.F.A. Shield, in Calcutta, and the Rovers Cup, in Bombay.

Hockey.—The game, which is controlled by the All-India Hockey Federation, is easily the most popular in the country, and the standard of play the best in the world, a fact which is amply borne out by India's triumphs at the last three Olympiads. There is an official championship, competed for by provincial teams, and the trophy is a quaintly carved Maori Shield, presented by the Maoris to the Indian team which toured New Zealand. The principal tournaments are the Aga Khan Cup in Bombay, the Belghton Cup, at Calcutta and the Yadavendra Shield, at New Delhi.

The Turf.—Racing in India is organised on a large scale, and all the many courses are controlled, between them, by the Royal Western India Turf Club and the Royal Calcutta Turf Club. The standard is very high, and the race-courses, particularly those in Bombay and Calcutta, compare favourably with the best in the world. The importation of first-class thoroughbreds from Australia and England was, owing to war and other demands on shipping, negligible and this gave a big fillip to the indigenous breed, which has made remarkable improvement in recent years. The principal races are the newly framed Indian Derby and the Eclipse Stakes of India, both run in Bombay, and the King-Emperor's and Viceroy's Cups at Calcutta. The annual meetings at Bangalore, Mysore and Secunderabad were not held, owing to travel restrictions.

Golf.—The game has a big following, and almost every town of any size has its own course. The Royal Calcutta Golf Club's "A" course is considered the best in the country, and the one recently laid out by the Bombay Presidency Golf Club, at Chembur, holds great promise. Annual competitions by leading clubs were staged all over the country, and the Nasik Golf Week was, as usual, most popular.

Tennis.—Tennis is looked after by the All-India Lawn Tennis Association through its provincial associations, and a definite effort was being made, until comparatively recently, towards the improvement of its standard of play by the employment of expert coaches and the selection of young players for these coaches to work on, the aim of the parent body having been the training of a Davis Cup team. The shortage of tennis balls, however, has compelled this scheme to be temporarily stopped and has also resulted in many popular annual tournaments in the big centres, particularly Bombay, not being held.

Athletics.—There is an All-India Olympic Association, with subordinate associations in most of the provinces, but athletics generally do not approach the standard of other games. There was noticeable improvement in the Games held in some of the provinces, but in no case did the performances approach International standard. Lack of tracks and suitable training grounds is a big handicap to progress being made, but the governing body is tackling this question, and a big improvement was noticeable at Bangalore, where cinder and cycle tracks were used during the All-India Games. Similar tracks are also in use at Patiala.

Other Games.—Most of the other games have their controlling organisations. Table Tennis and Billiards have caught on wonderfully with all classes, and Badminton has made appreciable progress. Amateur boxing is strong in Bombay, Bengal, Lahore and in the Services, but is still in its infancy in other parts of the country.

ATHLETICS

Bangalore

The finals of the Twelfth All-India Olympic Games resulted as follows :—

MEN'S EVENTS.

5,000 Metres—Gurbachan Singh (Patiala) 1. Havildar Ganga Ram (Central Provinces) 2. Syed Jalil (Mysore) 3. Time : 16 minutes, 27 seconds.

400 Metres Hurdles—V. Vazandar (Kholapur) 1. Bhimpuri (Rajputana) 2. Ishwar Singhi (Patiala) 3. Time : 56·7 seconds.

Running Broad Jump—Narinjan Singh (Patiala) 1. Baldev Singh (Bombay) 2. Rebello (Mysore) 3. Distance 22 feet, 9¼ inches.

Pole Vault—Banta Singh (Patiala) 1. Moshraf Hussain (United Provinces) 2. Ridley (Mysore) 3. Height : 11 feet, 6 inches.

Throwing the Hammer—Somnath (Patiala) 1. Kishen Singh (Patiala) 2. Joginder Singh (Punjab) 3. Distance : 153 feet 8 inches (New All-India Record).

16,000 Metres Relay (4 × 400) : Bengal 1. Punjab 2. Patiala 3. Time : Not available.

3,000 Metres Steeplechase Nazir Singh (Punjab) 1. Dila Singh (Patiala) 2. Randhir Singh (Patiala) 3. Time : 10 minutes 13 2 seconds.

100 Metres—K. Jones (United Provinces) 1. L. C. Woodcock (Bombay) 2. Mahomed Sharif (Punjab) 3. Time : 10·8 seconds.

200 Metres—I. Phillips (Madras) 1. Ferron (Bengal) 2. Mahomed Sharif (Punjab) 3. Time : 22·4 seconds.

400 Metres—Kishen Bahtia (Punjab) 1. Howith (Bengal) 2. R. N. Utchil (Bombay) 3. Time : 50·6 seconds.

10,000 Metres—Gurbachan Singh (Patiala) 1. Eeriah (Mysore) 2. Syed Jalil (Mysore) 3. Time : 34 minutes, 15 seconds.

15,000 Metres—Zail Singh (Patiala) 1. Hardev Singh (Patiala) 2. Nazir Singh (Punjab) 3. Time : 4 minutes, 16·7 seconds.

Marathon (26 miles, 385 yards).—Bhota Singh (Patiala) 1. Humphrey (Mysore) 2. Amarsingh (Patiala) 3. Time : 2 hours, 58 minutes, 11·5 seconds.

5,000 Metres Walk—Sahu Singh (Patiala) 1. Ronaq Singh (Patiala) 2. Inderjit Khanna (Punjab) 3. Time : 26 minutes, 13 seconds. (New All-India Record).

110 Metres Hurdles—J. Vickers (Bombay) 1. Nirbal Singh (Patiala) 2. Lal Singh (Patiala) 3. Time : 15·2 seconds. (New All-India Record).

Running High Jump—Gurnam Singh (Patiala) 1. Ullal Rao (Bombay) 2. Bengher Singh (Patiala) 3. Height : 6 feet, 0½ inch.

Hop, Step and Jump—H. Rebello (Mysore) 1. M. A. Mani (Madras) 2. Karim Singh (Punjab) 3. Distance : 46 feet, 6¾ inches.

Throwing the Discus—Somnath (Patiala) 1. Pritam Singh (Patiala) 2. Zahur Ahmed (Delhi) 3. Distance : 129 feet, 2 inches.

Throwing the Javelin—Baldev Singh (Bombay) 1. Captain Chote (Punjab) 2. Mehar Chand (Rajputana) 3. Distance : 169 feet, 5½ inches.

Putting the Shot—Lt. M. G. Hassan Baig (United Provinces) 1. Zahur Ahmed Khan (Delhi) 2. Somnath (Patiala) 3. Distance : 44 feet, 6¾ inches.

Penthat'on : (200 metres, 15,000 metres, javelin throw, discus throw, broad jump). Baldev Singh (Bombay) 1.—2,648 points). G. Raymond (Bombay) 2.—2,231 points). Tankred (Baluchistan) 3.—2,207 points.

16,000 Metres Relay (4 × 400) :—Bengal (Carapeit, Roche, Ferron and Howitt) 1. Bombay (Utchil, Patel, Doulton and Proudfoot) 2. Patiala 3. Time : 3 minutes, 28·7 seconds.

400 Metres Relay (4 × 100) :—Punjab 1. Bombay (B. Fernandes, Vickers, D'Mellow and Woodcock) 2. United Provinces 3. Time : 44 seconds.

Men's Athletic Team Championship of India.—Patiala 87 points. Bombay—46 points. Punjab—32 points. Mysore—18 points. United Provinces—15 points Madras—9 points. Delhi—7 points. Kholapur—5 points Rajputana—4 points Baluchistan—1 point. Bihar, Baroda and Orissa nil.

WOMEN'S EVENTS.

100 Metres—Miss Sylvia D'Costa (Mysore) 1. Miss D. Beck (Bengal) 2. Miss Banoo Gazdar (Bombay) 3. Time : 12·9 seconds.

80 Metres Hurdles—Miss Yvonne Suares (Mysore) 1. Miss Leah Burton (Madras) 2. Miss Magaret Suares (Mysore) 3. Time : 13·3 seconds. Miss Banoo Gazdar negotiated the last hurdle with the ultimate winner, but stumbled on touching the track and lost a place.

400 Metres Relay (4 × 100).—Mysore 1. Bombay 2. Bengal 3. Time : 54·1 second.

50 Metres—Miss Banoo Gazdar (Bombay) 1. Miss M. Nicholas (Bengal) 2. Miss Y. Smith (C. P. and Berar) 3. Time : 6·5 seconds. (New All-India Record.)

80 Metres Hurdles—First Heat.—Miss Majorie Suares (Mysore) 1. Miss Banoo Gazdar (Bombay) 2. Miss M. Nicholas (Bengal) 3. Time : 14·1 seconds ; Second Heat :—Miss Y. Suares (Mysore) 1. Miss L. Burton (Madras) 2. Miss Perin Buhariwalla (Bombay) 3. Time : 14 seconds.

Running High Jump—Miss Suraiya Currimbhoy (Bombay) 1. Miss Magaret Suares (Mysore) 2. Miss McMohan (United Provinces) 3. Height : 4 feet, 8 inches.

Throwing the Javelin—Miss N. Roseboom (Bengal) 1. Miss S. Rutland (United Provinces) 2. Miss June McGrath 3. Distance : 88 feet, 9½ inches.

Women's Athletic Team Championship of India.—Mysore—27 points. Bombay—17 points. Bengal—11 points. United Provinces—4 points. Madras—3 points.

CYCLING EVENTS.

1,000 Metres Time Trial.—Alec Symon (Bombay) 1. Time : 1 minute, 22·4 seconds. Sydney Corder (Bombay) 2. Time : 1 minute, 25·4 seconds. Shah Rukh (Punjab) 3. time : 1 minute, 26·5 seconds. Madan Mohan (Punjab) 4. Time : 1 minute, 28·5 seconds. E. J. Childs (Mysore) 5. Time : 1 minute, 29 seconds.

Team Pursuit.—Bombay (Amin, A. R. Havewalla, E. J. Mistry and K. Mullaferoze) beat Mysore, their fourth man overtaking the oppositions fourth man in the fourth lap.

4,000 Metres Lap Race (Eight laps with points awarded in order of merit to first three home in each lap, the aggregate to decide the winner).—Pudumjee (Bombay) 1. A. R. Havewalla (Bombay) 2. Naqi Malik (Punjab) 3. Details of timings recorded and points awarded not available.

100 Kilometres (Road).—Sydney Corder (Bombay) 1. Gurdev Singh (Punjab) 2. A. Arisappa (Mysore) 3. Time : 3 hours, 25 minutes, 45·2 seconds.

4,000 Metres (Team Pursuit—Semi-final—First Heat : Bombay beat Punjab. Time : Not available. Second Heat :—Mysore w.o. Patiala.

1,000 Metres Lap Race (Women).—Miss Dinoo Darukhanawalla (Bombay) 1.—8 points. Miss Tapati Mitra (Bengal) 2.—6 points. Miss Daphne Hope-Rose (Mysore) 3.—4 points.

Team Championship.—Patiala 42 points. Punjab 10 points, Bombay 9 points, Mysore 6 points, Bengal 5 points.

*

OTHER EVENTS.

Basket Ball.—Mysore beat Bengal in the final 34—20, Bombay lost to Mysore in the second round, 68—17.

Volley Ball.—Punjab beat United Provinces in the final, 15-13, 15—5. 17—5. Bombay lost to Madras in the second round, 15—13, 10—15, 15—7.

Kabbadi.—Bombay lost to Bengal in the semi-final, after leading 14—3 at the end of the first half, by 25—23. Madras beat Bengal in the final, by 48 points to 33.

Bombay

The finals of the two-day Combined Athletic Meeting resulted as follows :—

GROUP D (OPEN—MEN).

100 Metres Run.—J. Vickers 1. B. Fernandes 2. K. P. Tata 3. Time :—11·4 seconds.

400 Metres Run.—R. N. Utchil 1. B. Proudfoot 2. F. Patel 3. Time :—51·6 seconds.

800 Metres Run.—B. Proudfoot 1. N. L. Jayasinh 2. D. M. Olphadwala 3. Time :—2 minutes, 13·5 seconds.

Running Broad Jump.—J. Vickers 1. V. Sanjiva 2. B. Fernandes 3. Distance :—21 feet, 6¼ inches.

Running High Jump.—Baldev Singh 1. J. S. Chauhal 2. J. Vickers 3. Height :—5 feet, 7½ inches.

Throwing the Javelin.—Baldev Singh 1. E. C. Vankadia 2. J. Vickers 3. Distance : 176 feet, 1 inch (new Bombay record).

Medley Relay (200 + 400 + 800 × 200) :—Olympic Athletes Union 1. Cusrow Bang 2. Time : 4 minutes, 8·3 seconds.

4,000 Metres Cycle Lap Race.—A. R. Havewala (44 points) 1. H. R. Havewala (34 points) 2. J. F. Amin (13 points) 3. Time :—7 minutes, 18 seconds.

4,000 Metres Cycle Team Pursuit.—Malcolm Cycling Club 1. Olympic Athletes Union 2. Time :—6 minutes, 5·1 seconds.

GROUP D (OPEN—WOMEN).

100 Metres Run.—Miss Banoo Gazdar 1. Miss Roshan Mistry 2. Miss Vilma Dyer 3. Time 13·7 seconds.

400 Metres Relay (4 × 100).—G. I. P. Railway 1. Cusrow Bang 2. Time :—59·5 seconds.

500 Metres Cycle Race.—Miss Dinoo Darukhanawalla 1. Miss Mani Gazdar 2. Miss Heather Duffield 3. Time :—55·1 seconds.

GROUP D—BOYS UNDER 16 (OPEN).

100 Metres Run.—Behram Khajotia 1. H. B. Bukhariwalla 2. P. J. Marzban 3. Time : 13·2 seconds.

400 Metres Run.—Behram Khajotia 1. K. J. Parekh 2. H. B. Bukhariwalla 3. Time : 59·6 seconds.

GROUP D—GIRLS UNDER 14 (OPEN).

75 Metres Run.—Miss Vilma Dyer 1. Miss Heather Duffield 2. Miss Pragji Hansa 3. Time :—11 seconds.

50 Metres Chatty Balancing.—Miss Pilo Panvewalla 1. Miss Hansa Khatau 2. Miss Jaloo Printer 3.

GROUP D—BOYS UNDER 12 (OPEN).

75 Metres Run.—Richard Duffield 1. M. S. Talkar 2. M. Madhu 3. Time :—11·6 seconds.

Three-Legged Race.—D. Vajidar and R. Duffield 1. R. Duffy and B. S. Mehta 2. P. Patel and H. D. Arsiwalla 3.

GROUP D—GIRLS UNDER 12 (OPEN).

50 Metres Run.—Miss Coomie Panvelwalla 1. Miss Purviz Chichgar 2. Miss Katie Mehta 3.

Book Balancing.—Miss Purvis Chichgar 1. Miss Coomie Panvelwalla 2. Miss Sehra Modi 3.

GROUP A (CENTRAL AMBULANCE CORPS, CADETS, AND CENTRAL NURSING DIVISION AND CENTRAL AMBULANCE CENTRE).

75 Metres Run (girls under 14).—Miss N. J. Daruwalla and Miss Nancy Daruwalla (dead-heat), 1. Miss Jer S. Mody 3. Time—13·5 seconds.

100 Metres Run (boys under 14).—J. C. Umrigar 1. K. R. Billimoria 2. R. B. Driver 3. Time—15 seconds.

Skipping Race (girls under 14).—Miss Nancy Daruwalla 1. Miss Jini Billimoria 2. Miss Jer Modi 3.

Sack Race (boys under 14).—K. R. Billimoria 1. A. N. Gandhi 2. R. B. Driver 3.

Lemon and Spoon race (women).—Miss Mani Mullaferoze 1. Miss Ketty Sarkari 2. Miss Jer Modi 3.

50 Metres Run (boys under 11).—D. E. Tata 1. S. S. Modi 2.

100 Metres Run (men).—P. J. Marzban 1. P. R. Shah 2. V. G. Jhaveri 3. Time—13·9 seconds.

400 Metres Relay (men).—Central Ambulance Division 1.

GROUP B (PARSI HEALTH AND STRENGTH LEAGUE).

50 Metres Run (girls under 14).—Miss Jer Modi 1. Miss Sehra Modi 2.

100 Metres Run (men).—F. Patel 1. D. Kajadia 2. R. Katrak 3. Time—13·5 seconds.

100 Metres Run (boys under 14).—Pilloo S. Modi 1. S. S. Modi 2. Time—18·7 seconds.

50 Metres Back Run (boys under 14).—E. M. Mistry 1. P. S. Modi 2. K. R. Billimoria 3.

Lemon and Spoon race (girls under 14).—Miss Sehra Modi 1. Miss Jer Modi 2.

50 Metres Thread and Needle Race (women).—Miss Mani Gazdar 1. Miss Banoo Gazdar 2. Miss Dolat Chichgar 3.

GROUP C (ALL CENTRE AND AMBULANCE DIVISIONS, BOMBAY).

100 Metres Run (boys under 14).—J. C. Umrigar 1. K. R. Billimoria 2. R. B. Driver 3. Time.—15·1 seconds.

50 Metres Tread and Needle Race (women).—Miss Mani Gazdar 1. Miss N. J. Daruwalla 2. Miss Jer Modi 3.

50 Metres Run (girls under 14).—Miss N. Daruwalla 1. Miss Jer Modi 2. Miss Jini Billimoria 3. Time.—9·6 seconds.

4,800 Metres Run (men).—M. R. Hirani 1. Joseph Moses 2. N. A. Reubens 3. Time.—1 minute, 2·3 seconds.

The finals of the Eleventh Annual Bombay Provincial Olympic Games resulted as follows:—

MEN'S EVENTS.

100 Metres.—L. Dias (Firestone) 1. L. Woodcock (B. B. and C. I.) 2. B. Fernandes (O.A.U.) 3. Time—10·8 seconds.

200 Metres.—L. Dias (Firestone) 1. L. Woodcock (B. B. and C. I.) 2. B. Fernandes (O.A.U.) 3. Time—22·2 seconds. (New Bombay record).

400 Metres.—R. N. Utchil (O.A.U.) 1. B. H. Proudfoot (O.A.U.) 2. L. M. Fernandes (Tata's) 3. Time—51·0 seconds.

800 Metres.—B. H. Proudfoot (O.A.U.) 1. M. D'Silva (St. Xavier's) 2. C. Furtado (Dockyard) 3. Time—2 minutes, 43 seconds.

1,500 Metres.—L. Pereira (B. B. & C.I.) 1. A. S. Rai (R.I.N.) 2. L. Jaysingh (B.P.O.A.) 3. Time—4 minutes, 22·6 seconds.

3,000 Metres.—L. Pereira (B. B. and C. I.) 1. L. Jaysingh (B.P.O.A.) 2. C. Figueredo (Tata's) 3. Time—9 minutes, 39 seconds.

110 Metres Hurdles.—J. Vickers (Dockyard) 1. L. Woodcock (B. B. and C. I.) 2. L. Dias (Dockyard) 3. Time—15·4 seconds.

Running Broad Jump.—Baldev Singh (Tata's) 1. G. Raymond (R.I.N.) 2. Joveniano (Tata's) 3. Distance: 22 feet, 10 inches. (New Bombay record).

Running High Jump.—U. S. Rao (K.A.C.) 1. Baldev Singh (Tata's) 2. S. R. Ullal (Tata's 3. Height—5 feet, 10 inches.

Pole Vault.—J. J. Jamieson (O.A.U.) 1. M. Fernandes (G.I.P. Workshop) 2. M. Kaunds (O.A.U.) 3. Height—10 feet, 5½ inches.

Hop, Step and Jump.—Joveniano (Tata's) 1. M. D'Souza (O.A.U.) 2. L. M. Fernandes (Tata's) 3. Distance: 43 feet, 2½ inches.

Throwing the Javelin.—Baldev Singh (Tata's) 1. I. J. Lee (R.I.N.) 2. J. Birlas (B.P.O.A.—Maharashtra) 3. Distance 169 feet, 10½ inches. (New Bombay record).

Putting the Shot.—B. R. Bhesania (B.P.O.A.—Maharashtra) 1. B. A. Stokes (Dockyard) 2. D. S. Reaji (R.I.N.) 3. Distance—38 feet, 5 inches.

Throwing the Hammer.—C. C. Khajanchi (Ahmedabad Rifles) 1. M. Jeharatnarajah (O.A.U.) 2. Kaji Pehlawan (S.P.C.I.) 3. Distance—62 feet, 3½ inches.

Throwing the Discus.—B. R. Bhesania (B.P.O.A.—Maharashtra) 1. Baldev Singh (Tata's) 2. D. S. Rekhi (R.I.N.) 3. Distance: 104 feet, 5½ inches.

400 Metres (4 × 100) relay.—Olympic Athletes Union 1. Kanara Athletic Club 2. Essex Regiment 3. Time—45 seconds.

1,600 Metres Relay (4 × 400).—Olympic Athletes Union 1. Firestone Sports Club 2. Royal Indian Navy 3. Time—3 minutes, 35·5 seconds.

WOMEN'S EVENTS.

50 Metres.—Miss B. Gazdar (G.I.P., Byculla) 1. Miss P. Mendonca (Antonio D'Souza) 2. Miss R. Mistry (C.B.Y.L. L.) 3. Time—6·6 seconds. (New Bombay record).

100 Metres.—Miss B. Gazdar (G.I.P., Byculla) 1. Miss P. J. Buharivala (B.P.O.A.—Maharashtra) 2. Miss R. Mistry (C.B.Y.L.L.) 3. Time—13·0 seconds.

Running Broad Jump.—Miss B. Gazder (G.I.P., Byculla) 1. Miss C. Soares (Antonio D'Souza) 2. Miss E. D'Souza (O.A.U.) 3. Distance : 16 feet, 3½ inches. (New All-India record).

Running High Jump.—Miss S. Currimbhoy (Cathedral H. S.) 1. Miss B. Gazder (G.I.P., Byculla) 2. Miss D. N. Karanjia (K.A.C.) 3. Height : 4 feet, 8½ inches. (New Bombay record).

Board of Agricultural Income-Tax, Assam; Secretary to the Court of Wards, United Provinces; Senior Marketing Officers employed under the Government of India; Superintendents of Excise, Bombay; Superintendents of Central Jails and Civil Surgeons who are not included in any other article; and Superintendents of Telegraph Workshops.

1. The entries in the above table, which are in alphabetical order in each article, apply exclusively to the persons entered therein, and while regulating their relative precedence with each other do not give them any precedence over members of the non-official community resident in India, who shall take their place according to usage.

2. Officers in the above table will take precedence in order of the numbers of the entries. Those included in one number will take precedence *inter se* according to the date of entry into that number with the exception of officers of the Defence Services, (including I.M.S. officers in civil employ) who rank *inter se* in accordance with their seniority, and of the Chief Justice of Bengal, who will rank before all other persons included in Article 14 irrespective of the date of their entry into that Article.

3. When an officer holds more than one position in the table, he will be entitled to the highest position accorded to him.

4. Officers who are temporarily officiating in any number in the table, will rank in that number below permanent incumbents.

5. All officers not mentioned in the above table, whose rank is regulated by comparison with rank in the army, to have the same rank with reference to civil servants as is enjoyed by military officers of equal grades.

6. All other persons who may not be mentioned in this table to take rank according to general usage, which is to be explained and determined by the Governor-General in his discretion in case any question shall arise.* When the position of any such person is so determined and notified, it shall be entered in the table in italics, provided he holds an appointment in India.

7. The following will take courtesy rank as shown:—

Consuls-General.—Immediately after Article 35, which includes Brigadiers.

Consuls.—Immediately after Article 38, which includes Colonels.

Vice-Consuls.—Immediately after Article 59, which includes Majors.

Consular officers *de carriere* will in their respective grades take precedence of consular officers who are not *de carriere*.

Among themselves Consular Officers will take precedence in their respective grades according to the dates of the Government of India notifications announcing the recognition of their appointments. An officiating incumbent of a grade will rank as an officer of that grade immediately below its permanent incumbents except that when an officer below the substantive grade of Consul officiates as a Consul-General he will be ranked with Consuls and assigned a place immediately after permanent Consuls.

8. The following may be given, by courtesy precedence as shown below, provided that they do not hold appointments in India:—

Peers according to their precedence in England. Knights of the Garter, the Thistle and St. Patrick. Privy Councillors. Advisers to the Secretary of State for India. Immediately after Members of the Governor-General's Executive Council, Article 9.

Baronets of England, Scotland, Ireland and the United Kingdom according to date of Patents. Knights Grand Cross of the Bath. Knights Grand Commander of the Star of India. Knights Grand Cross of St. Michael and St. George. Knights Grand Commander of the Indian Empire. Knights Grand Cross of the Royal Victorian Order. Knights Grand Cross of the Order of the British Empire. Immediately after Puisne Judges of High Courts, Article 23.

Knights Commander of the Bath. Knights Commander of the Star of India. Knights Commander of St. Michael and St. George. Knights Commander of the Indian Empire. Knights Commander of the Royal Victorian Order. Knights Commander of the Order of the British Empire. Knights Bachelor. Immediately after the Residents of the Second Class, Article 31.

9. All ladies, unless by virtue of holding an appointment themselves they are entitled to a higher position in the table, to take place according to the rank herein assigned to their respective husbands with the exception of wives of Peers and of ladies having precedence in England independently of their husbands, and who are not in rank below the daughters of Barons; such ladies to take place according to their several ranks, with reference to such precedence in England immediately after the wives of Members of the Governor-General's Executive Council.

Given at Our Court at St. James's this Ninth day of May in the year of Our Lord One thousand nine hundred and thirty-seven and in the First year of Our Reign.

BY HIS MAJESTY'S COMMAND,

ZETLAND.

*In virtue of the provisions of section 9 (ii) of the Indian Church Act, 1927, a Bishop or Archdeacon who held a bishopric or archdeaconry on the 1st March 1930 takes rank as follows:—

Bishop of Calcutta, Metropolitan of India, immediately after Article 8.

Bishops of Madras and Bombay, immediately after Article 14.

Bishops of Lucknow and Nagpur, immediately after Article 25.

Bishops (not territorial) under licence from the Crown, immediately after Article 39.

Archdeacon of Lucknow, in Article 42.

Indian Orders.

The Star of India.

The Order of the Star of India was instituted by Queen Victoria in 1861, and enlarged in 1866, 1875, 1876, 1897, 1902, 1911, 1915, 1920, 1935, 1937, 1939 and 1942 and the dignity of Knight Grand Commander may be conferred on Princes or Chiefs of India, or upon British subjects for important and loyal service rendered to the Indian Empire; the second and third classes for services in the Indian Empire thirty years in the department of the Secretary of State for India. It consists of the Sovereign, a Grand Master (the Governor-General of India), the first class of forty-six Knights Grand Commanders (24 British and 22 Indian), the second class of one hundred and six Knights Commanders, and the third class of two hundred and thirty-seven Companions, exclusive of Extra and Honorary Members, as well as certain additional Knights and Companions.

The Insignia are (i) the Collar of gold, composed of the lotus of India, of palm branches tied together in saltire, of the united red and white rose, and in the centre an Imperial Crown; all enamelled in their proper colours and linked together by gold chains. (ii) The Star of a Knight Grand Commander is composed of rays of gold issuing from a centre, having thereon a star of five points in diamonds resting upon a light blue enamelled circular ribband, tied at the ends and inscribed with the motto of the Order, *Heaven's Light our Guide*, also in diamonds, that of a Knight Commander is somewhat different, and is described below. (iii) The Badge, an onyx cameo having Her Late Majesty Queen Victoria's Royal Effigy thereon, set in a perforated and ornamental oval, containing the motto of the Order surmounted by a star of five points, all in diamonds. (iv) The Mantle of light blue satin lined with white, and fastened with a cordon of white silk with blue and silver tassels. On the left side a representation of the Star of the Order.

The ribbon of the Order (four inches wide for Knights Grand Commanders) is sky-blue, having a narrow white stripe towards either edge, and is worn from the right shoulder to the left side. A Knight Commander wears (as) around his neck a ribbon two inches in width of the same colours and pattern as a Knight Grand Commander, and pendent therefrom a badge of a smaller size. (b) on his left breast a Star composed of rays of silver issuing from a gold centre having thereon a silver star of five points resting upon a light blue enamelled circular ribbon, tied at the ends, inscribed with the motto of the Order in diamonds. A Companion wears around his neck a badge of the same form as appointed for a Knight Commander but of a smaller size pendent to a like ribbon of the breadth of one and a half inches. All insignia are returnable at death to the Central Chancellery, or if the recipient was resident in India, to the Secretary of the Order at New Delhi or Simla.

Sovereign of the Order. His Most Gracious Majesty the King-Emperor of India

Grand Master of the Order:—His Excellency the Governor-General of India, Field-Marshal The Right Hon'ble Viscount Wavell of Cyrenaica and Winchester, G.C.B., G.M.S.I., G.M.I.E., C.M.G., M.C.

Officers of the Order: *Registrar:* Brigadier I. De La Fere, C.B.E., Secretary of the Central Chancery of the Orders of Knighthood, St. James' Palace, London, S.W.1.

Secretary: G. E. B. Abell, C.I.E., O.B.E., Secretary to the Governor-General (Personal) and Private Secretary to His Excellency the Viceroy.

The Orders of the Star of India are:

Extra Knight Grand Commander, (G.C.S.I.),
Honorary Knight Grand Commander, (G.C.S.I.),
Honorary Knight Commander (K.C.S.I.),
Honorary Companion, (C.S.I.),
Knight Grand Commander, (G.C.S.I.),
Knight Commander, (K.C.S.I.),
Companion, (C.S.I.).

The Most Eminent Order of the Indian Empire

This Order, instituted by Queen Victoria in the winter 1877, and extended and enlarged in 1887, 1892, 1897, 1902, 1911, 1915, 1920, 1927, 1937 and 1939, is conferred for services connected with the Indian Empire, and consists of the Sovereign, a Grand Master, forty-two Knights Grand Commanders, of whom the Grand Master is first and principal, one hundred and fifty Knights Commanders and an indefinite number of Companions not exceeding, without special statute, 24 nominations in any one year), also Extra and Honorary Members over and above the vacancies caused by promotion to a higher class of the Order as well as certain Additional Knights and Companions appointed by special statute.

The Insignia are (i) The Collar of gold formed of elephants, lotus flowers, peacocks in their pride, and Indian roses, in the centre the Imperial Crown, the whole linked together with chains; (ii) The Star of the Knight Grand Commander, comprised of five rays of silver having a small ray of gold between each of them the whole a tentacy plate and scaled, issuing from a gold centre, having thereon Her Late Majesty Queen Victoria's Royal Effigy, within a purple circle, edged and lettered gold, inscribed *Imperatrix Auspicia*, and surmounted by an Imperial Crown gold, (iii) The Badge consisting of a rose, enamelled gules, barbed vert and having in the centre Her Late Majesty Queen Victoria's Royal Effigy, within a purple circle, edged and lettered gold, inscribed *Imperatrix Auspicia*, surmounted by an Imperial Crown also gold; (iv) The Mantle of Imperial purple Satin, lined with and fastened by

a cordon of white silk, with purple silk and gold tassels attached. On the left side a representation of the Star of the Order.

A Knight Commander wears: (*a*) around his neck a ribbon two inches in width, of the same colour (purple) and pattern as a Knight Grand Commander, pendent therefrom a badge of smaller size: (*b*) on his left breast a star, similar to that of the first class, but the rays of which are all of silver.

The abovementioned Insignia are returned at death to the Central Chancery, or if the Knight was resident in India to the Secretary of the Order.

A Companion wears around his neck a badge (not returnable at death) of the same form as appointed for a Knight Commander, but of smaller size, pendent to a like ribbon of the breadth of one and a half inches.

Sovereign of the Order:—His Most Gracious Majesty The King, Emperor of India.

Grand Master of the Order: H. E. the Governor General of India. Field Marshal The Rt. Hon. Ble Viscount Wavell of Cyrenaica and Winchester, G.C.B., G.M.S.I., G.C.I.E., C.M.G., M.C. from 20th October 1943.

Officers of the Order. The same as for the Order of the Star of India.

The Orders of the Indian Empire are

Extra Knight Grand Commander, (G.C.I.E.).
Honorary Knight Grand Commander (G.C.I.E.).
Honorary Knight Commander, (K.C.I.E.).
Knight Grand Commander, (G.C.I.E.).
Knight Commander, (K.C.I.E.).
Honorary Companion, (C.I.E.).
Companion, (C.I.E.).

The Imperial Order of the Crown of India.

This Order was instituted on Dec. 23, 1877, and for a like purpose with the similar Imperial Order of the Indian Empire. It consists of the Queen, the Queen Mother, the Royal Princesses and the female relatives of Indian Princes and persons who have rendered conspicuous services in connection with India, besides the Royal Order in jewels without any appointment to an Herald in Chief and Attendant. It is a bow of light blue water ribbon, edged white. Designation, the letters C.I.

Sovereign of the Order.

THE KING-EMPEROR OF INDIA.

Ladies of the Order (C.I.)

Her Majesty The Queen.
Her Majesty Queen Mary.
H. R. H. The Princess Royal.
H. R. H. The Duchess of Gloucester.
H. R. H. The Duchess of Kent.
H. H. The Princess Helena Victoria.
H. H. The Princess Marie Louise.
H. H. Maharani Sahib Chimna Bai Gaekwar.
Margaret, Dowager Baroness Ampthill.
Lady Victoria Patricia Helena Ramsay.
Margaret Etienne Hannah, Marchioness of Crewe.
Frances Charlotte, Viscountess Chelmsford.
Marie Adelaide, Marchioness of Willingdon.
Dorothy Evelyn Augusta, Countess Halifax.
Pamela, Countess of Lytton.
H. H. Sri Parvathi Ba Sevini Vanchi Dharma Vardhini Raja Rajeswari Maharani Setu Lakshmi Bai, Maharani Regent of Travancore.
Jeannette Hope, Baroness Brabourne.
Doreen Maud, Marchioness of Linlithgow.
Doreen Geraldine, Baroness Brabourne.
Lucienne Marie, Viscountess Wavell.
Florence, Mrs. Amery.

Indian Titles: Badges.—An announcement was made at the Coronation Durbar in 1911, that a distinctive badge should be granted to present holders and future recipients of the titles of 'Diwan Bahadur', 'Sardar Bahadur', 'Khan Bahadur', 'Rai Bahadur', 'Rao Bahadur', 'Khan Sahib', 'Rai Sahib' and 'Rao Sahib'. Subsequently the following regulations in respect of these decorations were issued:—The decoration to be worn by the holders of the titles above mentioned shall be a badge or medallion bearing the King's effigy or when on the name of the title, both to be executed on a plaque of shield surrounded by a five-jointed star surmounted by the Imperial Crown, the plaque of special design of silver gilt for the titles of Diwan, Sardar, Khan, Rai and Rao Bahadur, and of silver for the titles of Khan Rai and Rao Sahib. (2) The badge shall be worn suspended from the neck by a ribbon of one inch and a half in width, viz., for the titles of Diwan and Sardar Bahadur each to right line with a dark blue border, for the titles of Khan Bahadur and Rao Bahadur light red with a dark red border, and for the titles of Khan Rai and Rao Sahib dark blue with light blue border.

A Press Note issued in November, 1914, states: "The Secretary of State has recently had under consideration the question of the grant of personal **miniatures** of Indian titles which have been conferred by His Majesty, and has decided that they should be worn on the left breast fastened by a ribbon and not suspended round the neck by a ribbon as prescribed in the case of the badge itself. When [illegible] worn in conjunction with other decorations, they should be placed immediately after the Kaisar-i-Hind Medal.

Indian Distinguished Service Medal.—This Medal was instituted on June 25th, 1907, by an Army Order published in Simla as a reward for both commissioned and non commissioned officers of the regular and other forces in India. It bears on the obverse the bust of King Edward VII, and on the reverse a laurel wreath encircling the words 'For Distinguished Service. The

medal, 1¼ inches in diameter, is ordered to be worn immediately to the right of all war medals suspended by a red ribbon 1¼" wide, with blue edges ¼" wide. This medal may be conferred by the Viceroy of India.

Indian Order of Merit.—This order was instituted by the Governor-General of India in Council in 1837, and amended in 1939 and 1944. It is divided into a Civil Division and a Military Division. The Civil Division consists of one Class and is awarded for any act of conspicuous personal bravery in aid of public authority or the safety of others. The Badge consists of an eight pointed star 1" in diameter composed of rays, with in the centre a circular ground of dark blue enamel surrounded by a laurel wreath. On the enamel ground there is the Royal Cypher surmounted by a Crown encircled with the words "For Bravery." The Badge is of Silver and the laurel wreath and the design in the centre of gold. The Badge is worn on the left breast pendant from a dark-red ribbon with blue edges.

The Military Division also consist of one class and appointments are made for any act of conspicuous gallantry performed in connection with duties. The Badge of the Military Division consists of an eight pointed silver star 1¼" in diameter, with in the centre two crossed swords around which is inscribed the words "Reward for Gallantry," all on a circular ground of dark-blue enamel and surrounded with a laurel wreath. The laurel wreath and the design in the centre are of gold. The Badge is worn on the left breast pendant from a dark-blue ribbon with red edges.

Anyone who after having performed services for which this Order is awarded, subsequently performed an approved act of gallantry which, if he had not received the Order, would have entitled him to it, will be awarded a Bar to be attached to the riband by which the Badge is suspended, and for every additional such act an additional Bar may be added.

For every Bar awarded a Silver rose is added to the ribbon when worn alone.

The members of the Order use the letters "I.O.M." after their names.

Order of British India.—This Order was instituted at the same time as the Indian Order of Merit and amended in 1939, 1941 and 1944. It consists of two Classes, and appointments are made from among those on the active list in the Armed Forces in India, for long, faithful and honourable Service. Appointments to the First Class are made only from members of the Second Class. The Badge of First Class consists of a Star 1-11/16 in in diameter composed of rays of gold and surmounted by a Crown, with in the centre on a ground of light blue enamel, the words "Order of British India" encircling a lion and surrounded by a laurel wreath of gold. In the Badge of Second Class the star is of 1¼" in diameter on a ground of dark-blue enamel. The Badge is worn pendant from a ribbon of dark red round the neck. Members of the Order also use the letters "O.B.I." after their names. The First Class carries with it the title Sardar Bahadur, and an additional allowance of two rupees a day and the second the title of Bahadur and an extra allowance of one rupee per day.

Indian Meritorious Service Medal.—This was instituted on July 27th, 1888, and on receipt of the medal the order states "a non-commissioned officer must surrender his Long Service and Good Conduct medal": but on being promoted to a commission he may retain the M. S. medal, but the annuity attached to it will cease. On the obverse is the diademed bust of Queen Victoria facing left, with a veil falling over the crown behind, encircled by the legend Victoria Kaisar-i-Hind. On the reverse is a wreath of lotus leaves enclosing a wreath or palm tied at the base, having a star beneath, between the two wreaths is the inscription for meritorious service. Within the palm wreath is the word India. The medal, 1¼ in. in diameter, is suspended from a scroll by means of a red ribbon, 1¼ in. wide. The medals issued during the reigns of Queen Victoria's successors bear on the obverse their bust in profile with the legend altered to EDWARD VII or GEORGE V.

The Kaisar-i-Hind Medal.

This decoration was instituted in 1900, the preamble to the Royal Warrant—which was amended in 1901, 1912, 1933, 1938, 1939 and 1941, being as follows:—"Whereas We, taking into Our Royal consideration that there do not exist adequate means whereby We can reward important and useful services rendered to Us in Our Indian Empire in the advancement of the public interests of Our said Empire and taking also into consideration the expediency of distinguishing such services by some mark of Our Royal favour: Now for the purpose of attaining an end so desirable as that of thus distinguishing such services aforesaid, We have instituted and created and by these presents for Us, Our Heirs and Successors, do institute and create a new Decoration." The decoration is styled "The Kaisar-i-Hind Medal for Public Service in India" and consists of three grades. The Medal is an oval shaped Badge or Decoration in Gold, in Silver or in Bronze—with the Royal Cypher on one side and on the reverse the words "Kaisar-i-Hind for Public Service in India"; it is suspended on the left breast by a dark blue ribbon, and for every Bar awarded a Rose Emblem in Silver Gilt, Silver or Bronze as the case may be, shall be added to the Ribbon when worn alone.

Historical Centres.

Abu, Mount.—The Dilwara Jain temples form the great attraction of Abu. They belong to a beautifully modified style of the Aryavarta or North Indian or Indo-Aryan school of architecture.

Of the Abu group of temples, two are most important. They form the noblest examples of Jain temples of the North Indian school of art. One of them is dedicated to Adishvara or Adinatha or Rishavadeva, the first prophet of Jainism. Vimala Shah, a merchant-prince of Gujarat, built the temple in 1031 A.D. It is said that he bought the ground, covering it with silver coins and that it took 13 years to build the temple at a cost of Rs. 1·8 lacs plus Rs. 59 lacs towards levelling the hill. The other temple is ascribed to the brothers Vastupala and Tejpala, who built the triple temple at Girnar (the name of Tejpala alone is met with in the inscriptions). The temple was dedicated to Neminatha, the 22nd Tirthankara (the prophet of the Jains). This temple was built 200 years (1231 A.D.) after the temple of Vimala Shah. It is comparatively simpler and bolder.

These temples belonging to the last period of the medieval age record specimens of the culmination of Indian decorative sculptures. The Indian sculptor's proverbial patience reaches its limit here. No example of decorative art, known anywhere in the world, can beat the richness and delicacy of the sculptural decorations of the ceilings, pillars and walls of these temples. Never before has marble produced such marvellous specimens of artistic workmanship. Both the temples have at the entrance a room, containing 9 or 10 elephants. Inscriptions record that the elephants carried riders. Most of the figures are missing. Whatever is left records a wonderful amount of life in the figures. Such lively human figures are hard to be met, not only in any other Jain temples, but anywhere else in India.

Apart from the claims of artistic interests, Mount Abu makes the finest hill station of Rajputana. It is on an isolated plateau, about 4,000 ft. high. The Nakhli Talao, an artificial lake, near which the temples stand, lends a fine scenic effect. A few miles off, at Achalgarh, on a summit stand a beautiful group of temples. They are smaller temples and lack the finish of the Abu temple, but they have a real appeal of simplicity and charm. South of Mount Abu will be seen the traces of an ancient town, Chandravati, the remains of which have been removed by the Sultans of Ahmedabad and the Thakurs of Sirohi.

Agra.—The architectural history of Agra dates from the time of the Imperial Lodis, who transferred the capital from Delhi to Agra. It had been an early capital of the Moguls. In 1527 Babar made it his capital. Humayun had a preference for Delhi, but in 1565 Akbar formally removed the capital to Agra. He proposed to make it a worthy capital of an empire extending from Afghanistan to Bengal and from Kashmir to Ahmednagar. In 1658, Aurangzeb made Delhi again the imperial seat and henceforth Agra was relegated to unimportance. On the banks of the Jumna, in the shape of a crescent, lies the fort of Agra, one of the greatest relics of Indian art in the Muslim period. The ramparts, a mile and a half long and 70 ft. high, enfold palaces, halls of state, terraces, balconies, kiosques, etc., the cost of each of which would be a king's ransom. Salim Shah, the son of Sher Shah, laid the foundation of the Fort. Akbar developed it fully. Akbar's tomb at Sikandra is worthy of him, enshrining the unique eclectic spirit of the Great Mogul. It represents the Indian tradition of the multi-storeyed academic hall, where professors of the different schools of art and science could hold discussions in groups. Akbar himself had revived the plan in the council chamber at Fatehpur Sikri. The tomb of Itimad-ud-Daula is worthy of the exceptional abilities of Nurjahan, who was in herself a combination of Elizabeth and Cleopatra. It has distinct qualities apart from its noble grandeur.

Agra had been the favourite seat of Shahjahan and he made contributions to the glories of Agra Fort. In his Moti Masjid (Pearl Mosque) is inscribed "Verily it is an exalted palace of paradise, made of a single pearl of magnificence. In the history of the world no mosque made of marble could rival its greatness and beauty." The appeal of its noble magnificence lies in its great simplicity. Its refinement of contour is matched only in the Taj. The Jama Masjid, one of the greatest mosques of India, is built in white and red stones in memory of Jahanara. The Dewan-I-Am, by some accounts, was built by Aurangzeb. This would be Aurangzeb's greatest architectural contribution. As his puritanical policy doomed to death the Mogul empire, the same spirit put an end to the great tradition of Mogul architecture and sculpture. All these edifices would have made Agra second to no other Mogul city, but the Taj is an unparalleled monument and gives it a unique position.

The Taj Mahal is the tomb built at Agra by Shahjahan for his wife, Mumtaz Mahal where he is also buried. It was begun in 1632 in which year the Shah ordered the stopping of all other Hindu temple buildings, and was completed in 1650. The Taj Mahal is the most perfect example of the Mogul style and is by some considered the most beautiful building in the world. The tomb proper consists of a domed square, white marble building, raised on a terrace from the corners of which rise four slim, white minarets. The whole is set in an exquisite garden surrounded by a red sandstone wall; a gate and a mosque are subsidiary elements in the composition. The tomb building itself is 186 ft. square, with a dome 58 ft. in internal diameter rising to a total height of 210 feet. The building is said to have cost over £3,000,000. It was probably designed by an architect named Ustad Isa, traditionally supposed to have been either Turkish or Persian.

Ajanta.—The Ajanta Hills contain 29 caves (5 chaityas or shrines or churches and 24 viharas or monasteries, all Buddhist) and present a record of an almost unique combination of painting, sculpture and architecture of a period of about 9 centuries (2nd or 1st cen. B.C. to middle of 7th cen. A.D.). Ajanta forms specially the great museum of Indian painting.

The caves, excavated as caves and not as cave temples, (*e.g.*, Kailash, Ellora) extend over a distance of about 600 ft. in a perpendicular rock. Thus the roofs were not hewn, only the facades were hewn and sculptured. The Archæological Department numbers the caves from East to West. Paintings have been noticed in 16 caves.

The sculptures and the paintings of one cave may belong to different periods. Frescoes have been painted sometimes long after the excavation of a cave. Sculptures in different periods have been undertaken to continue the decoration of the caves. Paintings reminiscent of the sculpture of Bharut and Sanchi, partially covered with later paintings, have been found in certain of the caves.

The caves were first noticed in 1819. Greedy ignoramuses, indemnity of weather and much damp, natural to the country, had done the worst imaginable injuries. That it could survive to any extent is due to the peculiar formulæ of plastering and painting. During the present century steps have been taken towards preservation of the great works. H. E. H. Hyderabad State has taken charge of the caves.

The subjects of representation are not always taken from Buddhist literature. They generally portray the beauty of Buddhist sentiments from its lives that set the loftiest and highest ideals of life in that age of luxury and high pitch of civilization. Secular pictures are comparatively few, but not unknown. We have a bodhisatt, many other beasts prowling on their pursuits, a pair of lovers, etc. These drawings are remarkably good. Women have received very great attention in Ajanta. Women with their eyes dreamily cast down with corresponding brows express some best art-ideals and charming and varied types of Indian womanhood have been vividly and successfully depicted in all succeeding ages of Indian art.

Amritsar The Pool of Immortality with the Golden Temple in it makes Amritsar the most famous centre of the Sikhs. Ramdas, the fourth Guru (Pontiff of the Sikhs 1574-81), is said to have received from Akbar a piece of land, within the limits of which the Guru's house is still well known as Amritsar. Some such accounts, however, state that the pool of Amrit was already excavated and a Vidwan (scholar) devoted to Rama claimed it as a sacred tank. The Guru, however, succeeded in getting him the appointment. Harimandir (or Darbar Saheb) is perhaps reminiscent of a tradition that it had been the site of a temple of Shiva. At first the locality was called Ramdaspur. The next Guru Arjun (1581-1606) made Amritsar the proper seat of his followers, the centre which should attract their worldly longings for a material bond of union. The tenth and the last Guru Govind (1695-1708) declared the equal right of all Sikhs of all castes to bathe in the sacred tank. The temple and the pool suffered great havoc, possibly on two occasions, at the hands of the Durani invader, Ahmed Shah Abdali. The Khalsa (specially the Dal or army founded by Jussa Singh Kullal) restored the shrine and rebuilt the temple (1763-64). At this time they held at Amritsar a formal *Gurmatta* or conclave of the Sikhs, probably the first of its kind. On defeating the invader's viceroy, the Sikh chiefs met at Amritsar and struck for the first time the Govindashahi coins. In 1802-03, Ranjit Singh covered the dome and very possibly the whole structure with golden repousse copper work. Hence it is known as the Golden Temple. As it served as the court of the Gurus, it is called the Darbar Saheb.

The temple stands on a raised plinth 65 ft square in the centre of the tank and is surrounded by spacious verandahs. A white marble causeway 2·4 ft long, with an archway over it joins the temple with the mainland. There are four entrances with doors covered with silver plates nicely wrought. Entrance by the principal gateway leads to the Lahung, where the adhi of the Granth is preserved. Except the lower parts of marble, the whole edifice is worked with gold or copper, and quotations from the Granth Saheb (the Sikh bible) are plentifully inscribed. The Granth Saheb is the modern object of veneration.

In the Ganj Ka Bar or the garden of the Guru there is the lofty Bal Atal Tower. There are some interesting late nineteenth century frescoes depicting incidents of the life of Guru Nanak.

Benares Kasi) Benares, the religious capital of Hindu India for centuries, attracts the masses of pilgrims every year. It lies between the rivers Varna and Asi and stands for three miles on the west bank of the Ganges. Most of the houses are built of stone. Benares is a city of temples, of which there are 14 in proximity of the well.

Benares has lost comparatively its former importance as a centre of Sanskrit learning, but it remains the most important of the strongholds of Hinduism. Visweshwar (lord of the Universe) is the chief deity of the Benares temples and shrines. Vishwanath is the most famous of all. Benares is also the seat of Sanskrit learning. Besides the Government Sanskrit College, there is the Queen's College and the Hindu University.

Bhuvaneshvar In the Gupta period (the Golden Age of Hindu civilization) art and literature reached their zenith at Hindu Nalanda as the temple towns then did at Buddhist Nalandas all over their great empire. Most parts of the Gupta empire passed through fasting seats of Muslim kings, whose zeal for iconoclasm almost thoroughly succeeded in clearing the monuments of the Guptas. But in one out of the way place have a few come down relatively insignificant specimens survived to give evidence of the glories of the great art of the period.

Bhuvaneshvar, a small village on the way to Puri and the seat of Shiva, is only second in importance to Benares, and contains some four hundred or six hundred temples mostly of Shiva, dating from the 9th or 10th century to the 13th century A. D. The temples are entirely covered with sculptures and the artistic vision of the builders appears to be practically unlimited. The representations and patterns have been executed with great care and their claims to artistic merit are high.

The great temple in Bhuvaneshvar is the finest example of a purely Hindu temple in India. The main shrine is now 160 ft.; very possibly originally it had been a little (15 to 25 ft.) higher. It stands within a stone wall as strong as the ramparts of a medieval fort. The area is 520 ft. by 465 ft. The deity, *Tribhuvaneshvara* or *Lingaraja Mahadeva*, is represented by a block of granite 8 ft. in the floor. It rises 8 inches above the floor.

The Muktesvara temple, built in some style as "gem" of Orissan art, is a small temple its proportions are almost perfect. The whole six, top to bottom, inside and outside is sculptured. The number of floral designs very artistic and natural men and women dressed with great care and in very elegant poses, loving, guitars and various musical instruments very gracefully drawn, elephants lions, etc., marvellously well represented, demons, nymphs fine and delicate, beautiful figures of and goddesses, etc., form an endless list of beautiful sculptures.

Bijapur.—Yusuf Khan (Yusuf Adil Shah) built to Deccan Sultanate which lasted for the period of forces could not as a very little other in the Deccan. Like the Delhi Sultans of his masters set up the Saracenic style of the city of Vijayapur in 1347. Ibrahim Adil Shah, Sikandar Adil Shah (1627-56) has left to Aurangzeb in 1686. In a commentary of the noble origin of the forms of the Kaaba the great edifices of the city were often associated with the Turkish crescent.

The most important architectural works Bijapur are Jama Masjid, the tomb and Mosque of Ibrahim II or Ibrahim Rauza, the Mother Mahal, Asar Mahal, Gagan Mahal, Jala Mahal Mosque, Masjid, etc.

The Jami Masjid, one of the finest mosques of India and the greatest mosque in the Deccan, was begun in 1565 by Ali Adil Shah I (1557-80) after the fall of Vijayanagar. Some Arabic inscription records that it stands in the reign of Muhammad Shah (1626). As a matter of fact, however, the building was never completed. The minor domes are so low as hardly to be seen from outside.

Bijapur has the distinction of possessing the second largest dome of the world in the Gol Gumbaz, the mausoleum of Muhammad Shah, which covers more ground than any other dome or vaulted roof. It dates back to 1659 A.D. and is also known as Bolt Gumbaz or the whispering gallery. "Loud laughter is answered by a score of fiends hidden behind the plaster."

Conjeevaram (Kanchipuram).—The Benares of South India. Of 7 holy cities (Sapta-Tirtha) only one is in South India, which is Conjeevaram. Jainism, Buddhism, Shaivism and Vaishnavism have all played great parts in this city. It possesses historical records dating before Christ. The City grew in glory under the Pallavas and the Cholas. It has two parts: the western, with a large number of Shiva temples is known as Shiva or Big Conjeevaram and the eastern, with a much lesser number of Vishnu temples, is called Vishnu or Little Conjeevaram. There are well over 1,000 temples in the city of which none belongs to the pre Pallava period and most of the large ones belong to later Dravidian style. There are very good examples of temples of the first half of the eighth century.

Sculptures are lavished all over the main shrine, the porches and the mandapams. There is a joint figure of Shiva Parvati (Ardhanarishvara). The Iravatesa temple (Vishnu Conjeevaram) would make a good example of later Dravidian style in which the early Pallava and early Dravidian styles are mixed up with a predominance of the latter. The temple has not structurally been much modernised at later periods. It has a seven storeyed tower (*vimana*) and the original boulders (*stambhas*) have been replaced by proposed pillars in front. The hall of Pillars is one of the most beautiful portions of its kind. It had received some injuries from Hyder Ali.

The Ekambaresvara temple is a great monument of Conjeevaram. It is covered and has 10 gopuras. Another monument is the Kamakshi temple. The hall of thousand pillars is typical of the wealth of sculpture of Vijayanagar.

The tower of Kamakshi Amman, which the visitor is supposed to climb, is a little more than 200 feet.

Delhi. In the region of Delhi, within a radius of about 5 miles, there are the ruins of seven cities, each of which at some time or other was the capital of India. In the case of Delhi, as in the case of Rome, the ruins of one city are built on the ruins of another. Many of the ancient cities were actually built with the materials of their predecessors. The first of these cities, as far as we know, was that of Indraprastha, which was the capital of the Pandavas, the heroes of the great epic, the Mahabharata. The exact site of Indraprastha is not known, but it is probably to be identified with the modern village of Indarpat, also known as Purana Kila, the Old Fort. It is traditionally supposed to mark the site of Indraprastha. The construction of Purana Kila was begun by Humayun and completed by Sher Shah. In the 11th century the Palas of the Tomara clan had their capital at Delhi; the remains of which may be traced at Lalkot. Their successor, Prithviraja, the last Hindu prince of Delhi (1193 A.D.) built a capital at

Rai-Pithora, which proved to be an extension of Tomara-Delhi. First within the walls of Rai-Pithora and later beyond the same at Siri, Qutubuddin and his successors built the first Muslim Delhi. Materials of the Hindu temples were used often *en block* in the construction of the new capital. Images and sculptures representing figures of men and animals were scrupulously destroyed.

In the middle of the 15th century, the Lodis removed the capital to Agra. Sher Shah built a wall surrounding the city; his capital, however, was Agra. His son built Selimgarh after his name. Akbar and Jehangir lived mainly at Agra, Lahore and Ajmer. The last Muslim Delhi is Shahjahanabad, the city of Shahjahan, which is now known as Old Delhi. In 1857, in course of the suppression of the Sepoy Mutiny, the last Mogul Emperor was taken prisoner and Delhi was formally annexed to the British Crown. At the Delhi Durbar on the 12th December, 1911, by an Imperial Proclamation, the seat of the Indian capital was removed from Calcutta to Delhi (New Delhi).

The Qutb mosque, the Qutb Minar, the tomb of Iyaltimash (Altamash), the mosque of Azmir and the gateway of the chief mosque at Budaun (U.P.) form the early great Muslim edifices of India. The Qutb mosque was named after a Muslim saint Qutbuddin of Ush near Barhdad. It was built in 1196 under the Viceroyalty of Qutbuddin Aibek. The present dilapidated mosque preserves only a small portion of the original one.

The Qutb Minar (circumference 47 ft. 3 ins. at the bottom and 9 ft. at the top, height 238 ft.) a five storeyed detached minar, was begun by Qutbuddin Aibek and completed by Iyaltimash (1232). It is the most beautiful example known to exist anywhere. It does not form part of the mosque which has its own minars. Tradition goes that it marks a pillar of victory first erected by Prithviraj and later reconstructed by the Muslim emperors. Some Muslim accounts say that it had been begun by the Hindus and completed by the Muslims.

New Delhi is the creation of the British, wherein European architecture of different periods generally modified or assimilated has been observed. Often features of Muslim architecture (e.g., the domes) have been added and improved in that light. The appeal of simplicity in magnificence, of correct outlines and proportions forms a great architectural principle.

Ellora.—The Ellora Hill, containing the cave temples stands about 19 miles north west of Aurangabad, His Exalted State. It was known as Grishneshwara (an appellation of Shiva and held holy by the Hindus, especially the Shaivites. It has the largest cave temple in India, a form of architecture which in its development makes a most remarkable feature of architecture in India. The caves are excavated in the face of a hill or rather the scarp of a large plateau, and run nearly north and south for about a mile and a quarter, the scarp at each end of this infernal throwing out a horn towards the west. The hill has the shape of a crescent, the southern arm, the centre, and the northern arm being occupied by the Buddhist, Hindu and Jain temples respectively. The caves have been numbered from south to north. The large or main caves are 34 and there are a number of minor caves.

The Buddhist temples in the southern section, known locally as Dheralerna, are the oldest. The caves number twelve. The first cave is a monastery with eight rooms; the second cave is a hall which was probably used as the lecture hall; its verandah has a number of Buddhist figures; the third one resembles the first, and is older than the other two caves. Five other caves have been more or less destroyed. Further up is the Maharbara cave. The height inside is about 117 ft. and the width 58 ft. The roof rests on 24 pillars. On the left of the entrance is a figure of Buddha in meditation. A crowd of males and females attend him. In the south of the cave there is a temple of a seated Buddha attended by a host of devotees, holding gracefully clusters of lotuses. Next come a number of monasteries and tanks. A little further up is the cave of Visvakarma, the Indian Vulcan. Local craftsmen come to worship here. The dating of the Buddhist caves may be made from the 3rd to the 6th century A.D.

Beyond the three storeyed temple is the Hindu region, containing 17 large caves below the brow of the scarp and a large number of smaller ones above. The Hindu caves are generally more decorated than the other ones and the Kailas Temple is the most famous of all the cave temples of Ellora. Both the architecture and the sculpture of Ellora reached their culminating in the Hindu cave temples. They present some excellent specimens of Indian sculpture and architecture (6th to 8th cen. A.D.). The gem of the collection is the Kailash temple, a masterpiece of Indian architecture and sculpture, with a claim to be called wonder of its kind in the world. About three million cubic feet of rock had to be quarried or chiselled to turn this monolithic temple. It stands in a court averaging from 154 ft. wide by 276 ft. long with a scarp 107 ft. high at the back. Colossal in size and architectural plan, the whole temple, inside and outside, the rock ceilings, walls, pillars every part of it, has been extravagantly adorned with lavish decorations. The sculptures, as in the case of Ajanta, Lepakshi and elsewhere, had been painted with a thin coating of fine plaster.

The whole execution shows an extraordinary command of style in technique, not only in grouping and composition of line, but in the powerful and subtle treatment of the various gradations of relief.

The last temple of the northern section belongs to Parsvanath of the Jains. It was built of brick by a Jain merchant of Aurangabad in the 18th century. The temple is about 70 ft. above the ground. The figure of Parsvanath is unclothed and is about 10 ft. high. The Jains (Digambaris) of Gujarat worship the Jina on the 14th day of the bright moon of Bhadra. South of the Parsvanath temple is the Indra sabha, composed of three caves. The first one is

60 ft. by 30 ft. with 16 pillars. The walls are sculptured with figures of Jain divinities. The second one is Jagannathsabha. A large inner nave or shrine contains figures of Jain Tirthankaras, Ambika, etc. The temple of Ranchhorji is the third one. Figures of Jains, Gandharvas, etc., are seen on the shrine and the walls. In the porch, an elephant carries a male and a female. The Brahmans identify them as Indra and his wife.

Fatehpur-Sikri.—Fatehpur-Sikri was the proud and faithful mistress of the mightiest Mogul emperor, Akbar. His son Salim, who was also her son, had been kind to her in his early days. But she had practically died with the death of her lord. Her noble career is compassed within the period of half a century. Fatehpur-Sikri is now a dead forsaken city.

Again and again Akbar suffered the bereavements of his babies. He was left no son. Stories of miraculous powers of Shaikh Salim Chisti of Fatehpur Sikri reached his ears. When men of science failed him, he turned to the man of God. His prayer was granted. The son was given the name of the saint. This son Salim, born at Fatehpur-Sikri, succeeded Akbar as Jehangir.

In 1569 Akbar founded the city of Fatehpur-Sikri, 23 miles off Agra. The present town of Fatehpur is on the south west and the village of Sikri is on the north east of the ruins. Both used to be within the walls of the city.

The most striking work of art is the Buland Darwaja or the Great High Gateway. It was erected (160 ft.) in commemoration of the conquest of Khandesh. It forms the Southern Gateway of the most imposing edifice in Fatehpur-Sikri, the Jami Masjid (1571), said to be a copy of a mosque at Mecca or Medina. It measures 540 ft. east to west and 470 ft. north to south. It contains the tomb of Shaikh Salim Chisti. The Buland Darwaja makes the noblest example of the Mogul gateways. It is the highest Indian portal, the summit of the finials being 176 ft. from the roadway and 134 ft. from the pedestal. In its construction marble is nowhere used with sandstone. The form is Persian, but the construction is Indian.

Konark, Kanarak.—The Sun-temple of Konarak, known as the Black Pagoda, stands unsurpassed in the field of Indian art. By the seashore it is about 20 miles and by motor car 52 miles from Puri. Traditionally, it had been built by Sthamba, a son of Krishna in thanksgiving to the Sun for curing him of an incurable disease. The present temple was built by King Narasingha-deva I of Orissa (1240-80).

The main temple has been destroyed. It may be that the sandy soil could not bear so enormous a structure. It may also be due to an earthquake. There is a tradition that some Muslim seamen (as their ship foundered, because a great lodestone on the top of the temple attracted away the iron bolts of the ship) had destroyed the temple. Ain-I-Akbari records that there were 28 temples adjoining the main temple and a wall 225 ft. high and 28½ ft. thick surrounded it. The remains of the great temple formed a heap 70 ft. long and 45 ft. high.

As in the cases of some other ancient lithic monuments, so also Konark leaves one to wonder how numerous blocks of stones weighing many tons were conveyed over a long distance (not less than 80 miles) and it is a miracle of engineering how such stones were hoisted to a height of 150 ft. The Konark temple is markedly correct in proportion and symmetry. An image of great beauty of the sun in a temple in the yard of the Puri temple is shown as the image of the sun of Konark. The temple is built of red laterite and was probably called black due to the great shadow it casts. The pillar in front of the Puri temple had been brought from Konark.

Madura.—Known as *Kadamba-Vanam* (the Forest of Kadambas) in an earlier period, it was made the capital of the Pandya Kingdom by Muthu Tirumala Nayak (1623-59). Before the fall of Vijayanagar (1565) Madura had been an important centre of architecture. On the fall of Vijayanagar, it became the principal seat of Hindu architecture. The Nayaka rulers in the 16th and especially in the 17th centuries built the magnificent edifices of Madura, and Tirumala Nayak proved the greatest builder. The town was planned after a coiled snake.

The Great Temple in Madura forms a rectangle 847 ft. by 729 ft. It is made up of two temples, one of Meenakshi (*the* one with eyes resembling the shape of a fish. Tradition holds that she had been born as a Pandya princess and Sundareshvara took her as his consort) and the other of Sundareshvara (*the*. The Lord Beautiful Shiva. The entrance is by Meenakshi's temple. Adjoining the temple are the Natadi Hall, the temple of the Saints (Arunvati Muvar) wherein there are some remarkable statues of saints and gods, the Jewel House (the jewelleries of the deities make one of the finest collections in South India) and the Stable Houses. A "Hall of Thousand Pillars" (*Ayiravidhi* or *Sahasra-stambha mandapam*) stands in the north-east corner. No pillar is a replica of another. In the central row of pillars are statues of 10 Nayak kings together with their queens. In the outer rows are some remarkable sculptural representations of legends connected with Shiva.

Tirumal Nayak's Mahal or Palace in Madura records a landmark in the development of Indian architecture. It makes a great example where Hindu architecture in a masterly way had assimilated the principles of Saracenic and Gothic architectures. The great hall in the Palace is 140 ft. long, 70 ft. wide and 70 ft. high.

Tirumala Nayak's grandson Chokkanadhan went back to the old capital, Trichinopoly, and to build a great palace there, the old palace was shorn of all its splendour. As a matter of fact, the greater portion of the palace, the best parts by his choice were removed.

Mohenjo-Daro.—The ruins of Mohenjo-Daro (the Domain of the Departed) are situated eight miles off Dorki station (B.N.W.R.). Indian archæological history dates from the 3rd century B.C. The excavated remains in Mohenjo-Daro belong to the last city, which had been built on ancient cities, which are suspected generally

to be lower than the water-level. All the objects found have not yet been studied in detail and there are reasons to think that the yield of even the upper layer cannot be strictly confined within 2750 B.C. and the subsequent period. Excavations of the lower strata may be expected to yield the remains of an older period. Failure to read the characters of the seals and inextensiveness of excavation continue to fortify the sealed character of its ancient inhabitants and their civilisation.

It is a very remarkably well planned city. All the streets were laid south to north. Nothing is more welcome to an Indian city than the south wind. The city had necessarily grown most towards the south. Lanes are free from a general deviating or serpentine character. Homes were two-storeyed and the staircases lead not to the lower storey but to outside. This feature is not unknown in the hills. Covered balconies or open porticoes are conspicuous by their absence. The courtyards are to an extent small. Proximity of the dwellings points to a very crowded city. Mohenjo Daro is a city of bricks, fire-burnt and sun-burnt. It had probably stressed more on drainage than any other ancient city. Evidence of underground drains are to be found everywhere. They are large and high and provided with manholes. The vastness of the drainage surely reflects the greatness of the upper structures, now very much lost to view. It is not known, however, whether the drains led to any common dumping place away from the city, although soak pits have been noticed, but from their size one cannot be sure that they were used as the main dumping grounds. A flight of steps into one of them would rather suggest that they proved minor temporary repositories, refuse from which has been systematically scraped out. Bathrooms are another feature significant of the cleanliness of the city.

The objects found in the remains mainly consist of seals, jewelleries, potteries, figures (human and animals and toys). The seals have on them inscribed characters of a conventionalised form of pictograph writing which have not yet been deciphered. Most of them are of steatite and of square size. The more common animal is difficult to be identified. It has features both equine and bovine, with one horn only.

Puri (Jagannatham) A popular Hindu pilgrimage centre on the eastern seaboard of India, specially sacred to the Vaishnavites. The White Pagoda of Jagannath or the Lord of the Universe is at Puri. The presiding deities are Jagannath Krishna seen with his disc, Sudarshana, his brother Balarama and his sister Subhadra.

The strict commensal rules of the Hindu caste system have no application in Puri, especially in the matter of taking together the *Mahaprasada*, cooked or uncooked eatables ceremoniously offered to the deity. This is unknown anywhere else in Hindu India. It has been asserted that this peculiar feature marks Buddhist influence.

The altar in the temple, which is held very sacred, is supposed to contain one hundred thousand Shalagrama-Silas (a particular type of round black stones, of the size of eggs, which serve as emblem of Narayana or Vishnu).

The court of the White Pagoda is 665 ft. east to west and 644 ft. north to south. A 24 ft. high stone wall was built around it by King Purushottamadeva. There are four entrances. The Lion-Door in the east is decorated with sculptures. It has a pyramidal roof. Before the door stands a beautiful pillar of the Sun (Arunstamba), 44 ft. high. The temple had originally a pillar surmounted with the figure of Garuda, the legendary bird, the transport of Vishnu.

The temple of Jagannatha is a combination of four temples, which adjoin one another.

All the gods and goddesses in the temple are yard are strict vegetarians, except Vimala, in whose honour goats are sacrificed on the second day of *Durgapuja* at midnight, when Jagannatha and other gods are supposed to be asleep.

There is a very large number of monastic establishments (Maths) at Puri, the most important of which are Shankara, Nimbarka, Chaitanya, Kavir, Nanaka Shahi and Virakta Math, Chakrathirtha, Svarga dvar, and Lokanath.

The most important event in Puri is the Car Festival, when an image of Jagannatha is taken in procession in a huge *Rath* or wooden vehicle.

Rameshvaram A town and island in the Palk strait adjoining Ceylon and an important Hindu place of pilgrimage, connected with the mainland by railway. It forms the northern limit to the Coromandel of the great performance of South Indian architecture and sculpture.

The Great Temple in Rameshvaram grew in 400 years. The principal shrines were built by Lakkana Sethupati with the assistance of Parakrama Sekharan 1414 of Ceylon or they have been built by the Ceylonese prince himself. They are of a dark hard limestone never met with in the temple. It is said that they were flown at Hanumantamalai. The incomplete north and south *gopurams* are ascribed to Muttuvijaya Kumara Nayar 1420. There are in the temple a number of finished minor *gopurams* and porches and the outer surrounding walls are credited to Udaiyan Sethupati and Komatti Nagur, near Nagapatam, natives of whom and whose wife surmount the eastern wall. Some minor edifices were constructed in 1450.

The principal lingams in the shrine are supposed to have been installed by Ramachandra. The principal deity is known as Ramanatha or Ramlinga Swami. The temple stands near a lake with a circumference of about three miles.

Sanchi. A small village in Bhopal State which is the largest and best preserved Buddhist stupa (or tope) or pagoda in India. A Buddhist stupa is a mound built on a relic of Buddha or Buddhist saints, or the mound is erected to commemorate an incident in the life of Buddha or Buddhist saints. The Great stupa in Sanchi in red stone is about 103 ft. in diameter and 42 ft. high. An encircling pathway of dagoba stone goes round it, as is common with most Indian shrines.

The sculpture of Sanchi has two very remarkable features: "absence of any anthropomorphic figure of Buddha" (everything is "Buddhist, but it is Buddhism without Buddha") and the spirit of naturalism that infuses the art. From the Sanchi art, almost a new school born of it developed in the cave-temples, of which Ellora is the best example.

Shatrunjaya Hills.—Shatrunjaya, near Palitana in Kathiawar, is also known to the Jains as Siddhagiri or Siddhachala or the Hill of the Perfected Ones. It is the most sacred place (*tirtha*) of Shvetambara Jains. There are a great number of temples in groups on tonks or summits. The most important one is the tonk of Adishvara Bhagavan. The ancient image, consecrated by the prophet's son, Ratnaf al, has been replaced. This is perhaps the most holy site within the most sacred precincts of the Shatrunjaya Hills. At this place a large number of saints attained *Nirvana* or absolution. A number of inscriptions have been found here which have been utilised towards writing the history of Western India and the history of the different schools of Jainism.

Shatrunjaya has 108 names. The principal name Shatrunjaya "the conqueror of enemies" is one of the names of Shiva. It is held that the father of the shrine had conquered his enemies and regained his kingdom by the grace of Shiva. In way of thanksgiving he built a temple to Shatrunjaya Shiva and dedicated the idol to the deity.

Sravana-Belgola. A sacred hallowed spot of the Jains, especially of the Digambaras sect. Legend has it a Jain apostle, named Bhadrabahu, who lived in the 3rd century B.C. and was a contemporary of Chandragupta Maurya, settled here. He converted many to the Jain religion and one of them is said to have become a Jain monk. Vishakha, one of the disciples of Bhadrabahu, is also reported to have settled here. The picturesque spot between two hills, the Vindhyagiri hill the Dodda Betta or Vindhyagiri, attracts the figure of Gomateshvara, the largest statue in Asia carved out of the solid rock. Sravana-Belgola (Arishtanemi from a monolith of very fine stone. It is 56½ ft. in height and the shoulders at the broadest point is 13 ft. Five groups of Jain figures in relief are seen on a long boulder in Jwalahar. The largest one is 37 ft. high. The figures have little claim to artistic reconstruction.

At intervals of 12 years or more a ceremony called *Mastakabhisheka* (the anointing of the head) or *Maha mastakabhisheka* is held, which lasts for 15 days.

The Jinanatha pura Basti temple, near Sravana-Belgola, built between the 10th and 12th centuries presents a good example of the finest sculptures of Jain temples in South India.

Srirangam.—Between the two forked Kaveri lies an islet, Srirangam contains the largest temple of India, known as Koyil or the temple of the Vaishnavas. It is consecrated to Ranga Natha (a representation of Vishnu). Inscriptions have been found on the temple of Chola, Pandya, Hoysasala and Vijayanagar Kings dating from the 9th to the 16th centuries. The temple had grown through all this period, if not over a little wider period. The north *gopuram* is 152 ft. high. Generally the *gopurams* are painted with representations of incarnations and mythological legends. In the Hall of thousand pillars (it may be half a hundred or a few more) the pillars have plantain-brackets. In one of the front rows of pillars are monoliths of prancing equestrian figures, spearing tigers. The great temple has grown combining seven *prakaras* of successively dwindling sizes.

Two miles south of Srirangam is Trichinopoly, known as the *Kailash* (a peak in the Himalayas and abode of Shiva) of the South. Trichinopoly is held to be a corruption of Tri Shira-Palli or the quarters of the three headed demon. It was the strategic capital of the Cholas. In the Fort (there is no fort now, part of the town is the Rock. The temple is consecrated to Tayumanavar (Shiva) and the Rock is also known as Tayumanavar Malayar by the name of the deity.

Jambukeshvaram popularly known as Tiruvanikkaval, two miles north of Trichinopoly, has an important temple. The deity is popularly known as Appu Linga or the water phallus, because the deity in the sanctum is always in water. The temple is of five prakaras (courtyards). The *gopuram* in front of Akhilandeshvari represents in carving early legends relating to the deity.

Tanjore. Vishnu, of the Hindu Trinity, is known as Nanniya Perumal at Tanjore to distinguish Tanjore as a great centre. The temple of Vishnu as Nanniya is situated 1½ miles north of Tanjore. The place Tanjore in Tamil) and the temple from the town in Tanjore had its first inception in the Cholas and under them it grew into size and fame as a great seat of learning. Towards the end of the 10th century Raja Raja the great built the Great Temple of Brihadishvara (Great God Shiva). The Nayaks and later the Mahrattas may have made their contributions. The temple has the usual Dravidian style. The *gopuram* is of nine stories. The plan is rectangular and the usual Dravidian order of the successive size of the towers from the sanctum to the gateway.

In the first enclosure of the temple a Tamil inscription is said to belong to the 4th century A.D. The shrine of Subrahmanya, a much later construction has, for its superb ornamentation received very high appreciations. Between the 1st and 2nd *gopurams* there is a passage 170 ft. long and the 2nd *gopuram* gives entrance to the main of the temple. There is a black granite monolith bull about 13 ft. high and 16 ft. long. This huge block of stone is supposed to have been transported over a distance of 400 miles.

The palace in Tanjore has an area of 30 acres. The most noticeable feature about it is an eight-storeyed *gopuram*, 190 ft. high in the 3rd quadrangle. From a distance it has all the prominence of the main tower of the Great Temple. There are two Durbar Halls, one known as the Naik's court and the other the Mahratta's court. The Naik Hall was built before 1614. There is a remarkable sculptural representation of a battle of the gods and the demons on the lateral parts. There is also a large number of pictures of the kings and a library of Sanskrit manuscripts.

The Tanjore Bronze Nataraja in the Madras museum is an able representation of one of the greatest conceptions of Indian art.

Taxila.—The name is a Graeko-Roman rendering of the Indian forms Takasaila and Takkasila. The Indian names literally mean a stone-cut city and the city of the Takka clan respectively. The epics record that Rama's brother Bharata conquered the country and the capital took its name from his son, Taksha. The *Mahabharata* states that the great snake-sacrifice was held at Takshasila. Buddhist records point to the highly flourishing condition of Taxila in 700-800 B.C. and in the light of the epics, the date may not be unreasonably pushed to 800-900 B.C. The oldest dateable remains discovered belong to the 4th or 5th century B.C. Surely in the 7th century B.C. Taxila had a far-famed university.

The remains of Taxila lie about the east and the north-east of Saraikela, 20 miles north-west of Rawalpindi. The remains are of three cities, "within three and a half miles of each other." Those from south-west to north-east are contained in Bhir or Vir, Hatiyal, Shiv-kapi-ka kot, Kachkot, Barkhana and Shir-Sukh-Ka-Kot. The Pir or Vir mound represents the oldest city.

Taxila presents historical records extending over a period of about 1,000 years, from the 4th or 5th century B.C. to the 5th century A.D. Seven different peoples rule at Taxila. Achaemenian and Alexandrian suzerainty have left almost no records. The Mauryan records consist mainly of almost primitive punch coins (they may be of an earlier date), jewelleries and lapidaries, which surely indicate that Indians were in that age the greatest masters in the treatment of the most refractory stones and gold and silverworks of refined workmanship.

The most imposing pile at Taxila is the Dharmarajika or the Great Tope (Stupa). It is also known as Chir (split) tope, because of the cleft driven through its centre by former explorers. Around it there are a number of Stupas, Chaityas, Viharas, etc. The construction of the group extended over four centuries (2nd-5th). The original stupa was built in the Scytho Parthian period and enlargements were made in the Kusha period. The most important architectural features are trefoil arches and Erothian pillars.

Indian Festivals and Observances.

Bara Wafat—(Death on the 12th) is called in Bengal Fatiha-I-Duwazdahum (Prayers of the 12th). In Turkey and Egypt the day is known as Mauludu'n-Nabi (Birth of the Prophet). The date is 12, Rabi I.

It is a joint celebration of the birth and the death of the Muslim Prophet. In some parts of India it is celebrated only as the birthday of the Prophet. (Jashn-I-Milad-Sharif). It is believed that his birth and death took place on the same date, although there are differences of opinion on this. It is a great day of feasting for Muslims (the Wahhabis, however, do not observe it; they regard it to be an innovation or *bidat*). On this occasion the life story of the Prophet is recited and its points of excellence stressed. Prayers are offered for the benefit of his soul. Prayers are also read over cooked food which is then given to the poor. Some observe it on the second day of the month. As the date is disputed, the more devout read the prayers on all the days from the 1st to the 12th day of the month.

Dasara (DASHAMA = TEN DAYS).—This festival is held on the 10th of Ashwin Shuddh (Oct.). It is called *Durga Puja* or *Durgotsava*, and is supposed to relate to the autumnal equinox. The festival commemorates the victory of Devi, wife of Shiva, over the buffalo-headed demon Mahishasura. Her image is worshipped for nine days and afterwards consigned to the river. This is also the day on which Rama marched against Ravana, the demon king of Lanka (modern Ceylon). Early in the morning Hindus perform *puja* to their household gods or religious books. Marathas and Kshatriyas, or those who consider themselves of the martial race, worship their weapons and ask protection for them throughout the year in the faith that, to the propitiousness of the sword, they owe every prosperity. In the afternoon they go to the temple in procession.

The day is also considered most auspicious by the Hindus to begin education of their children. The nine preceding days of Dasara are called *navaratra*, a compound word for 'nine nights'. During this period devotees of *Durga* engage a Brahman to read hymns before her image extolling her exploits and describing her rewards to her votaries. On the ninth day, at every temple of *Durga*, the sacred fire is made and fed with rice and ghee to the chanting of *mantras*. It is customary among Bania women to keep up a dance called *garba* during these nine nights.

The celebration of Dasara is also said to owe its origin to the Pandavas (the five sons of Pandu) who selected this day as an auspicious one for making preparations for their war with their paternal cousins, the Kauravas, which is narrated in detail in the *Mahabharata*.

In modern times Dasara is observed with great pomp in Mysore State.

Dipavali (Popularly termed Divali or Dewali).—Dipa means a lamp and Dipavali means a row or collection of lamps. It is a festival of rejoicing at Lord Krishna's triumph over Narakasura, a demon. Rows of lamps at all places, sacred and secular, make a most beautiful feature on the occasion. Exhibitions of fireworks, crackers, etc., add to its festive nature.

On the 14th day of the waning moon of Kartika (Sept.-Oct.), known as Naraka or Bhuta Chaturdashi (Chaturdashi means 14th lunar day), Krishna destroyed Narakasura. The demon was, however, a great devotee of Krishna and had done severe penance to propitiate the Lord, but he had abducted 16,000 women for his harem and had to be destroyed for his sins. In view of his piety, however, the death anniversary was enjoined to be observed as a sacred day. In the morning a bath is taken and certain rites with a lamp made of rice-dust, etc., are observed. New dresses are worn and sweets are served.

Gahambars—These are traditional festivals of Iran (Persia) adopted by the Parsis, and mark the six festivals of the six seasons of the year. The first one commences on the 11th day of Ardibenesht (Oct. 15), the second on the 11th day of Tir (Dec. 14), the third on the 26th day of Shehnever (Feb. 27), the fourth on the 26th of Meher (March 29), the fifth on the 16th day of Dai (June 17) and the 6th on the 1st day of Gatha at the end of the Parsi year (Aug. 31). They were mainly agricultural festivals and necessarily formed formal seasonal celebrations. The Parsis hold public feasts on the days of the Gahambars.

Ganesh Chaturthi.—On this day was born Ganpati, or Ganesh, who is regarded as the god of wisdom and one to be propitiated for the removal of obstacles. As such he is invoked at the commencement of all ceremonies and undertakings. There are varying versions of the circumstances attending his birth. One relates that as the god Kartikaviya was created by Shiva without connubial assistance, in like manner Ganpati was formed by his consort Parvati from the turmeric and oil scraped from her body while bathing. The loss of his human head and the substitution of that of a female elephant with one tusk are also variously explained. By some his head is said to have been cut off by Shiva when he endeavoured to prevent the god from entering the chamber of Parvati when she was performing her ablutions. According to others, it was reduced to ashes by a glance from Shani Saturn) who, with all the gods, went to look at the new born child, and it was replaced by that of the animal first found, which happened to be an elephant.

The fourth of Bhadrapad Shudth Aug is the period appointed for the celebration of this festival in honour of Ganpati's birth. His image is installed in Hindu households and ...ered *puja*. Some people keep the image ... a day and a half; some for five or ten days, ...ording to the wealth and wish of the house... der. On the final day, the image is taken ... procession and eventually committed to the ...er, sea or tank.

There is a legend that one day Ganpati while ...ing his favourite mouse had a fall at which ... moon laughed. Enraged at the insult, Ganpati cursed the moon and all who should look at her, but afterwards restricted it to one ..., viz., his birthday. Thus, on the day of ...esh Chaturthi, Hindus avoid the moon lest they should incur any calamity during the year. If by any chance they happen to see the moon, they try to provoke their neighbours into reviling them in the belief that its ill-effects will stop at such abuse.

Gokulashtami—(Also known as Janmashtami and Krishnashtami). The occasion marks the celebration of Krishna's birth on the 8th day of the dark moon in the month of *Shravana* (July-August) or *Bhadra* (Aug.-Sept.). In each case (i.e. either in *Shravana* or *Bhadra*) different sects observe it on either of the two consecutive days of Ashtami. At the temple of Puri a Brahmin and a dancing girl play the roles of Vasudeva and Devaki, the parents of Krishna.

To the Vaishnavites, the devotees of Vishnu, and therefore also of Krishna who was one of Vishnu's incarnations), the occasion is a great festival. It is also observed by non-Vaishnavites, and thus sets an example of the spirit of toleration. Janmashtami is a day of fasting. A large part of the day is spent in worshipping Krishna, Shri (the consort of Vishnu) and Devaki the mother of Krishna. *Kirtans* or religious songs (relating to Krishna) make a notable feature. Dacca (Bengal) brings out a great procession on this occasion.

Grahana.—Grahana means an eclipse. Hindu astronomers were the first to declare that the earth is round and Hindu astronomy was the first to discover the scientific facts relating to eclipses. The popular tradition of other days, however, stuck in the popular mind. And the sight of an eclipse continues to suggest to the ignorant person that *rahu* (the ascending node), the trunkless demon, is devouring the sun or the moon as the case may be. Rahu in the guise of a god had attempted to share the nectar along with the gods. As soon as his tongue had tasted the nectar (a drink having the power of making those drinking it immortal), Vishnu detected the false god and struck off his head. Trunkless, up to the throat, as the nectar had passed, Rahu became immortal. Necessarily when he gulps the divine orbs they emerge out down his throat. Acceptance of the version therefore makes it an unholy sight and the defilement of the gods entails a defilement of the earth. Defilement requires a bath and a bath in holy water is held to be particularly efficacious on this occasion. As a matter of fact, two baths are required, one at the first contact of the eclipse and another when it terminates. People flock to the Ganges and other holy sites for baths are resorted to. The occasion, naturally, reminds one of death and oblations are offered to the dead. To ensure full merit of the bath, gifts must be offered after the bath. As a matter of fact gifts make an essential condition of all Hindu fasts and festivals. It would be normal to surmise that the same were to an extent ordained to ensure a spirit of charity. The period of the eclipse is a period of fasting. No food should be prepared during this period. Food prepared earlier cannot be used later.

Haj.—It means "setting out" or "tending towards," and is the term used for the pilgrimage to Mecca. The performance of the *Haj* is to all good Muslims a most cherished ambition. It is one of the five pillars of the practices of Islam (Arkans), and there are the highest Quranic injunctions for its observance. The rites of the *Haj* may be divided into three groups: *Farz* or compulsory; *Wajib* or obligatory (in a lower degree than *farz*); and optional. *Farz* compulsions are three in number, wearing of Ihram (two seamless garments, one worn round the waist and another thrown loosely over the shoulder), standing in *Arafat* and doing the *Tawaf* (circumambulation of the Ka'bah). The Wajib rites are five in number in the case of those who do not belong to Mecca; to run between Mount As-safa and Mount Al-Marwah, to remain in Al-Murdalifah, to cast stones to the three pillars of Mina (Ramyu'r rijam), to perform a second *tawaf* and shave the head as the final ceremony. The month of Zu'l-Hijjah (the 12th Muslim month) is the month of the Haj.

Idu'l-Azha (also called Iduz-Zuha).— It is the Muslim counterpart of the Passover. It is enjoined in the *Quran* (xxii 33-38) and falls on the 10th Zul-Hijjah. The words of the prophet are: Man cannot (by any act) on this day propitiate God better than by shedding blood.

Idul-Azha means the (great) sacrificial ceremony or festival. The festival commemorates Abraham's offer to sacrifice the object dearest to him, his son Ishmael (not Issac), on Mount Mina close to Mecca (the Bible gives the name of the land as Moriah). Its observance is one of the necessary acts in the performance of the Haj. All adult Muslims who can afford it are required to make a sacrifice of an animal. If the animal is a big one (*e.g.*, a camel or a cow), it is allowed to be the joint offering of seven, (according to some authorities as many as seventy). It is meritorious to sacrifice one animal for each member of the family, but on economic grounds the sacrifice of one animal for a whole family is allowed. A fully grown up and sound camel, cow, goat or sheep is considered best. The sacrifice is offered with a short prayer absolutely surrendering the soul to Allah and acknowledging His greatness as the accepted creed. The meat is distributed equally among the poor, the relatives and friends and members of the household.

In India the cow is the usual beast of sacrifice. In other Muslim countries the camel takes its place. The cow being held most sacred by Hindus, the more popular Muslim monarchs of India (possibly a few of Afghanistan as well) had stopped its slaughter out of consideration for Hindu sentiment.

'Id-ul-Fitr.—"The festival of *breaking fast*" called also *Ramazan ki 'Id*, and "the feast of alms," is celebrated on the 1st of Shawwal. On this day Muslims bathe, put on new clothes, apply antimony to the eyes and perfume themselves, then distribute the *fitr* or *sadaka*, which is 2½ seers of wheat, dates or any grain used for food, to the poor or religious mendicants. All then proceed to the *Idgah*, repeating "God is great. There is no God but God". The Mulla ascends the *mimbar* or pulpit, and after a short thanksgiving reads the *Khutbah* or sermon. He then descends to the lower step (which with the Shiahs is the third but the fourth with the Sunnis) and recounts the virtues of the king, and prays for him. Then a general prayer is offered, and the congregation rise with a shout of *Din*". "Faith" and fire of muskets. The evening is spent in rejoicing and merriment.

Khordadsal.—The birthday (the 6th day of the 1st Parsi month, Farvardin, 10th Sept.) of Zarathustra, the Prophet of the Parsis. He is the earliest known founder of a great religion of faith courage and hope. The exact date and place of his birth have not yet been fully ascertained. Probably he was born in the province of Media, Iran (Persia) about 3,000 years ago. His great sermons are preserved in the Gathas (Parsi Scriptures). He was held in great respect by the court of Gushtasp. He professed the doctrine of monotheism and held that Ahura Mazda is the Creator of the Universe. He preached the doctrine of *Asha* or piety, which would infuse in man the spirit to fight the force of evil and attain the beatific region of Ahura Mazda.

Muharram (Ar. Muharram, 'most sacred').—The mourning held annually in remembrance of the first martyrs of Musalmans, Hasan and Husain, from whom the whole race of Sayads are descended. Abu Muhammad al Hasan and Husain were the two sons of 'Ali bin Abi Taleb, the cousin, and Fatimah, the daughter of Muhammad. The Muslims are divided into two distinct sects, called the Shiahs and the Sunnis, the former regard Ali and his descendants. Hasan Husain, Zain-ul-Abidin, Muhammad Baiqar, Jafar Sadik, and Ismail bin Jafar Sadik, as the lawful leaders after Muhammad; and the latter, the Caliphas, as Abubakar, Omar, Ossman and 'Ali—hence quarrels, animosities, and dislikes are hoarded up to be avenged during Muharram. Tazivas (a term signifying grief, applied to a representation of the mausoleum erected over the remains of Imam Husain at Karbala) made of ivory, ebony, sandalwood, cedar, and sometimes wrought in silver filigree and indeed of every variety of material, from pure silver to bamboo and paper, according to the rank and wealth of the party are exhibited and conveyed in procession through the streets.

Navroz, Nauroz (Jamshed of "the seven-ringed cup," who fixed the Parsi calendar, marked the day on which the Sun enters Aries 20th or 21st March to be the New Year's Day. It is held that he chose to make the State entry on this day to the newly founded capital of Persepolis. The festival was given the name of Id of Jamshed and it has been celebrated with the greatest eclat in both Parsi and Muslim Iran (Persia). Shah Jalaluddin commenced his administrative year from this day. The Shiahs celebrate the day as Id Khalafat or the festival in commemoration of 'Ali's formal succession on this day to the Caliphate. For the Parsis it is only next to Pateti as a festival of social merriment and they begin the Fash agricultural year on this day. Navroz is one of the three celebrated Jashans of ancient Iran. Modern Iran celebrates it festival as a national event.

Pajjusana A great Svetambara Jain festival literally it means serving with whole hearted devotion. Formerly it was observed by the ascetic order, but now the laity also do so. The festival, as is common to Jain festivals, is marked with rigorous fasts and penance.

Two schools, both of the Svetambara sect observe the festival on slightly different days either from the 12th or the 13th day of the dark fortnight to the 8th or the 5th day of the bright fortnight of Bhadra (Aug.-Sept.). In either case it lasts for eight days. The more devout observe complete fasting during the whole period, while others fast on the last day only.

Pateti.—The Parsi New Year, being the first day Hormazd of the first month Farvardin (Sept. 5), Firdausi associates many historical events of Zoroastrian Iran (Persia) with this day. It is the greatest social festival of the Parsis. In the great gatherings in their Fire Temples the cause of purity and chastity is preached.

Ram-Lila.—An open-air amateur dramatic representation of selected episodes from Rama's life. The performance continues all through the Navaratra (the first nine days of the bright fortnight of Aswin (Sept.-Oct.) and the Vijaya-Dashami (the tenth lunar day). Every day in the afternoon one act is played, the battle between Rama and Ravana being the most popular theme.

Ram-Lila is an important festival observed in the Hindi-speaking provinces.

Ram-Navami.—It celebrates the birth of Rama, one of the incarnations of *Vishnu* of the Hindu Trinity, on the 9th lunar day (*navami*) of *Chaitra* (March-April). Besides Rama, his consort Sita, and brothers Lakshmana, Bharata and Shatrughna are also worshipped. Prayers are offered to them at intervals of three hours. The day is one of strict fasting. The night is spent in worshipping. The learned give discourses upon Rama's life, stressing its excellent points as examples for man to follow. A legend (the *vrata katha*) relating to the origin of this ceremony with pointers to the merits of observing it is recited. At Puri *Jagannatha*, an incarnation of Rama (Vishnu), in his representative figure *Mahaprabhu* is dressed as Rama and worshipped with great zeal. On this day oblations are offered to the departed ones.

In some cases, preparatory ceremonies commence from the first day of the waxing moon. In the evenings sermons or discourses on Rama are delivered in the temples of Rama. His birth is celebrated at 12 noon of the ninth day. This day is observed by a great many people as the New Year's day.

Ramzan.—This Muslim fast commences from the morning after the new moon of Shawan is first observed, and is kept each day throughout the month of this name, from dawn, or when the first streak of light borders the eastern horizon, till the stars are clearly discerned in the heavens. During the whole period not the slightest particle of food, or a single drop of water or any other liquid should pass the lips. The day is spent in occasional prayers, besides the usual *namaz*, and in reading the Quran or the life stories of the prophets. The fast is generally broken by a cooling beverage called *Dandai*. On the 21st and 22nd the Sunnis celebrate the night of Ali, the nephew and adopted son of Muhammad, who is said to have died on one of these two nights. They perambulate the streets, carrying a flag and beating their breasts. The odd ones of the last ten nights are called *Lailat ul Kadr*, or 'night of power,' because it is said the Quran descended from heaven during one of these nights. It should be observed as a vigil.

Shiva Ratri. The 14th night of the dark fortnight in Megha (Janu.-Feb.) is known as the night specially consecrated to Shiva. The 13th night of the waning moon of each month is held as the night of Shiva (Shiva-Ratri). The month of Shravana (July-August) is very sacred to Shiva. Hence, Shivaratri of Magha is generally called Mahashivaratri (maha meaning great).

In the *Mahabharata*, Bhishma, the great celibate, most scholarly and valorous prince, relates that King Chitrabhanu of the Ikshvaku dynasty popularised the festival. On this day when the King was fasting, a sage suggested to him that the human soul being one with God indulgence in pleasure to the self and not infliction of pain to it by fasting would please God best. The King explained that the self of flesh and blood was not the real self and narrated the legend of a fast. In a previous life, the King was born a hunter. One dark night he lost his way in the forest and took shelter for the night on a *bilva* or bel (Indian wood apple) tree. The hunter had no food for the whole day and was ruminating on how his family must be keenly feeling the double misery of starving and missing him. He wept bitter tears. To make himself comfortable and also to have a better view of the lie of the land and approaching game, he tore away and threw down the boughs and leaves obstructing his vision. It so happened that that night Shiva was under that *bilva* tree, and the tears and leaves fell on him. Shiva was propitiated by this act of the hunter, although unknowingly done, and declared that if anybody fasted on that day and worshipped him with offerings of water and *bilva* petals he would, on death, be accepted in Shiva's heaven.

Another account in later Puranic stories of the *Linga Purana* narrates that a hunter spending the day imprisoned in a Shaiva monastery or temple for having failed to pay his debt, was let out on parole. His way home lay through a forest and as night grew too dark to continue the journey, he took shelter on a *bilva* tree with his stock of water. Hunger anxiety and expectation of game kept him awake all through the night. Throughout the day in the monastery he had nothing to do but listen to the pious recitation of Shiva's name, which had made an almost indelible impression upon his wicked heart. He killed his time hunting and the form it took fashion, plucking the *bilva* leaves and throwing them down. Often as water pot was knocked about either by his movements or the wind and its contents trickled down. Shiva happened to be resting under the tree and was propitiated. The moral is that acts of devotion, even if not meant to be so, are accepted by the Lord.

Zarthost-No Diso. The anniversary day of Zoroaster's death. The Parsi Prophet died a martyr's death, at the age of 77, while at prayer in a fire temple at the hand of Turbratur. On this solemn occasion of mourning, discourses on the life and teachings of the Prophet form the most important feature.

British Cabinet Mission's Visit to India.

Soon after the Labour Government in Britain took office in 1945 they decided to initiate measures to end the Indian political deadlock, and Mr. Attlee, the British Premier, announced in the House of Commons early in December, 1945, that His Majesty's Government had decided to send out a Parliamentary Delegation to India, consisting of 8 members of the House of Commons belonging to all parties in the House. They were Mr. R. Richards (Under-Secretary for India in the first Labour Govt. and leader of the Delegation); Mrs. M. Wallhead Nichol; Mr. R. W. Sorensen; Major W. Wyatt; Mr. A. G. Bottomley; Mr. Godfrey Nicholson; Brigadier A. R. W. Low and Mr. Hopkin Morris. The Delegation's object was to make personal contacts, to ascertain individual views and convey to leading Indians the broad general attitude of the chief political parties in Britain. They were in India for three months and had extensive contacts with all elements in the country.

On February 19, 1946, Lord Pethick-Lawrence and Mr. Attlee simultaneously announced in the *House of Lords* and the *House of Commons* respectively, H.M.G's decision to send out a Cabinet Delegation to India consisting of Lord Pethick-Lawrence, Secretary of State for India, Sir Stafford Cripps, President of the Board of Trade, and Mr. A. V. Alexander, First Lord of the Admiralty. It was stated that they would carry the authority of the Cabinet and have power to negotiate and to settle, albeit within the broad framework of the Government's policy, with the option to refer back on points that might require Cabinet sanction. It was clear from the statement that, whilst negotiating for the acceptance of the British policy in respect of the constitutional and political problems of India, the Ministers would have power to make adjustments on their own authority, unlike the Cripps Mission of 1942. Moreover, the negotiations were conducted and decisions were jointly taken by the Cabinet Ministers and the Viceroy.

The Mission arrived in India on March 23rd, 1946. During the first week of their stay, they consulted His Excellency the Viceroy, provincial Governors, members of the old Executive Council and officials. They also met leaders of all shades of opinion and all political, communal and sectional parties, including leaders of the ministerial and opposition groups in the various provincial legislatures. These discussions were preliminary to the setting up of machinery whereby the form under which India could realise her full independent status could be determined by Indians.

Failure of First Attempt.

The first attempt at agreement between the principal Indian political parties was a failure. The main difficulty lay in the fact that not only were the major parties divided as to the character of the future constitutional structure of India, but these divergencies of view prevented them from agreeing on any constitution-making machinery. The Congress wanted to have a single constitution-making body, while the Muslim League desired two separate constitution-making bodies, one for Hindustan and one for Pakistan. After considerable discussion with them separately, the Cabinet Delegation decided to invite the Congress and the Muslim League to send four representatives each to meet them in Simla and to consider a proposal to frame a constitution on a three-tier basis. This they agreed to do while preserving complete freedom of action.

State Paper of May 16.

The Simla talks were marked by a spirit of accommodation on the side of both parties, and though final agreement was not reached, the talk ended amicably and sufficient progress was made to justify the Mission putting out a statement on May 16 as follows:—

1. On the 15th March last, just before the despatch of the Cabinet Mission to India, Mr. Attlee, the British Prime Minister, used these words:—

"My colleagues are going to India with the intention of using their utmost endeavours to help her to attain her freedom as speedily and fully as possible. What form of Government is to replace the present regime is for India to decide; but our desire is to help her to set up forthwith the machinery for making that decision.

"I hope that the Indian people may elect to remain within the British Commonwealth. I am certain that she will find great advantages in doing so.

"But if she does so elect, it must be by her own free will. The British Commonwealth and Empire is not bound together by chains of external compulsion. It is a free association of free peoples. If, on the other hand, she elects for independence, in our view she has a right to do so. It will be for us to help to make the transition as smooth and easy as possible."

2. Charged in these historic words, we—the Cabinet Ministers and the Viceroy—have done our utmost to assist the two main political parties to reach agreement upon the fundamental issue of the unity or division of India. After prolonged discussions in New Delhi we succeeded in bringing the Congress and the Muslim League together in conference at Simla. There was a full exchange of views and both parties were prepared to make considerable concessions in order to try to reach a settlement, but it ultimately proved impossible to close the remainder of the gap between the parties and so no agreement could be concluded. Since no agreement has been reached, we feel that it is our duty to put forward what we consider are the best arrangements possible to ensure a speedy setting up of the new constitution. This statement is made with the full approval of His Majesty's Government in the United Kingdom.

3. We have accordingly decided that immediate arrangements should be made whereby Indians may decide the future constitution of India, and an interim Government may be set up at once to carry on the administration of British India until such time as a new constitution can be brought into being. We have endeavoured to be just to the smaller as well as to the larger sections of the people; and to

recommend a solution which will lead to a practicable way of governing the India of the future, and will give a sound basis for defence and a good opportunity for progress in the social, political and economic field.

4. It is not intended in this statement to review the voluminous evidence which has been submitted to the Mission; but it is right that we should state that it has shown an almost universal desire, outside the supporters of the Muslim League, for the unity of India.

5. This consideration did not, however, deter us from examining closely and impartially the possibility of a partition of India, since we were greatly impressed by the very genuine and acute anxiety of the Muslims lest they should find themselves subjected to a perpetual Hindu-majority rule. This feeling has become so strong and widespread amongst the Muslims that it cannot be allayed by mere paper safeguards. If there is to be internal peace in India it must be secured by measures which will assure to the Muslims a control in all matters vital to their culture, religion, and economic or other interests.

Pakistan not Feasible

6. We therefore examined in the first instance the question of a separate and fully independent sovereign state of Pakistan as claimed by the Muslim League. Such a Pakistan would comprise two areas: one in the North-West consisting of the provinces of the Punjab, Sind, North-West Frontier, and British Baluchistan; the other in the North-East consisting of the provinces of Bengal and Assam. The League were prepared to consider adjustment of boundaries at a later stage, but insisted that the principle of Pakistan should first be acknowledged. The argument for a separate state of Pakistan was based, first upon the right of the Muslim majority to decide their method of government according to their wishes, and, secondly upon the necessity to include substantial areas in which Muslims are in a minority in order to make Pakistan administratively and economically workable.

The size of the non-Muslim minorities in a Pakistan comprising the whole of the six provinces enumerated above would be very considerable as the following figures show:—

	Muslim	*Non-Muslim*
North-Western Area—		
Punjab	16,217,242	12,201,577
North-West Frontier Province	2,788,797	249,270
Sind	3,208,325	1,326,683
British Baluchistan	438,930	62,701
	22,653,294	13,840,231
	62.07 per cent.	37.93 per cent.
North-Eastern Area		
Bengal	33,005,434	27,301,091
Assam	3,442,479	6,762,254
	36,447,913	34,063,345
	51.69 per cent.	48.31 per cent.

The Muslim minorities in the remainder of British India number some 20 million dispersed amongst a total population of 188 million.

These figures show that the setting up of a separate sovereign state of Pakistan on the lines claimed by the Muslim League would not solve the communal minority problem; nor can we see any justification for including within a sovereign Pakistan those districts of the Punjab and of Bengal and Assam in which the population is predominantly non-Muslim. Every argument that can be used in favour of Pakistan can equally, in our view, be used in favour of the exclusion of the non-Muslim areas from Pakistan. This point would particularly affect the position of the Sikhs.

7. We, therefore, considered whether a smaller sovereign Paki-tan confined to the Muslim majority areas alone might be a possible basis of compromise. Such a Pakistan is regarded by the Muslim League as quite impracticable because it would entail the exclusion from Pakistan of (*a*) the whole of the Ambala and Jullundur divisions in the Punjab; (*b*) the whole of Assam except the district of Sylhet; and (*c*) a large part of Western Bengal, including Calcutta, in which city the percentage of the Muslim population is 21.6 per cent. We ourselves are also convinced that any solution which involves a radical partition of the Punjab and Bengal, as this would do, would be contrary to the wishes and interests of a very large proportion of the inhabitants of these provinces. Bengal and the Punjab each has its own common language and a long history and tradition. Moreover, any division of the Punjab would of necessity divide the Sikhs, leaving substantial bodies of Sikhs on both sides of the boundary. We have therefore been forced to the conclusion that neither a larger nor a smaller sovereign state of Pakistan would provide an acceptable solution for the communal problem.

8. Apart from the great force of the foregoing arguments there are weighty administrative, economic and military considerations. The whole of the transportation and postal and telegraph systems of India have been established on the basis of a united India. To disintegrate them would gravely injure both parts of India. The case for a united defence is even stronger. The Indian Armed Forces have been built up as a whole for the defence of India as a whole, and to break them in two would inflict a deadly blow on the long traditions and high degree of efficiency of the Indian Army and would entail

the gravest dangers. The Indian Navy and Indian Air Force would become much less effective. The two sections of the suggested Pakistan contain the two most vulnerable frontiers in India and for a successful defence in depth the area of Pakistan would be insufficient.

9. A further consideration of importance is the greater difficulty which the Indian States would find in associating themselves with a divided British India.

10. Finally, there is the geographical fact that the two halves of the proposed Pakistan state are separated by some seven hundred miles and the communications between them both in war and peace would be dependent on the goodwill of Hindustan.

11. We are therefore unable to advise the British Government that the power which at present resides in British hands should be handed over to two entirely separate sovereign states.

12. This decision does not, however, blind us to the very real Muslim apprehensions that their culture and political and social life might become submerged in a purely unitary India, in which the Hindus with their greatly superior numbers must be a dominating element. To meet this the Congress have put forward a scheme under which provinces would have full autonomy subject only to a minimum of central subjects, such as foreign affairs, defence and communications.

Under this scheme provinces, if they wished to take part in economic and administrative planning on a large scale, could cede to the centre optional subjects in addition to the compulsory ones mentioned above.

13. Such a scheme would, in our view, present considerable constitutional disadvantages and anomalies. It would be very difficult to work a central executive and legislature in which some ministers, who dealt with compulsory subjects, were responsible to the whole of India while other ministers, who dealt with optional subjects, would be responsible only to those provinces who had elected to act together in respect of such subjects. This difficulty would be accentuated in the central legislature, where it would be necessary to exclude certain members from speaking and voting when subjects with which their provinces were not concerned were under discussion. Apart from the difficulty of working such a scheme, we do not consider that it would be fair to deny to other provinces, which did not desire to take the optional subjects at the centre, the right to form themselves into a group for a similar purpose. This would indeed be no more than the exercise of their autonomous powers in a particular way.

Paramountcy not Transferable

14. Before putting forward our recommendations we turn to deal with the relationship of the Indian States to British India. It is quite clear that with the attainment of independence by British India, whether inside or outside the British Commonwealth, the relationship which has hitherto existed between the Rulers of the States and the British Crown will no longer be possible. Paramountcy can neither be retained by the British Crown nor transferred to the new government. This fact has been fully recognised by those whom we interviewed from the States. They have at the same time assured us that the States are ready and willing to co-operate in the new development of India. The precise form which their co-operation will take must be a matter for negotiation during the building up of the new constitutional structure and it by no means follows that it will be identical for all the States. We have not therefore dealt with the States in the same detail as the provinces of British India in the paragraphs which follow.

Cabinet Mission's Solution

15. We now indicate the nature of a solution which in our view would be just to the essential claims of all parties and would at the same time be most likely to bring about a stable and practicable form of constitution for All-India.

We recommend that the constitution should take the following basic form:—

(1) There should be a Union of India, embracing both British India and the States, which should deal with the following subjects: foreign affairs, defence, and communications; should have the powers necessary to raise the finances required for the above subjects.

(2) The Union should have an executive and a legislature constituted from British Indian and States representatives. Any question raising a major communal issue in the legislature should require for its decision a majority of the representatives present and voting of each of the two major communities as well as a majority of all the members present and voting.

(3) All subjects other than the Union subjects and all residuary powers should vest in the provinces.

(4) The States will retain all subjects and powers other than those ceded to the Union.

(5) Provinces should be free to form groups with executives and legislatures, and each group could determine the provincial subjects to be taken in common.

(6) The constitutions of the Union and of the groups should contain a provision whereby any province could by a majority vote of its legislative assembly call for a reconsideration of the terms of the constitution after an initial period of ten years and at ten-yearly intervals thereafter.

16. It is not our object to lay out the details of a constitution on the above programme but to set in motion machinery whereby a constitution can be settled by Indians for Indians.

It has been necessary, however, for us to make this recommendation as to the broad basis of the future constitution because it became clear to us in the course of our negotiations that not until that had been done was there any hope of getting the two major communities to join in the setting up of the constitution-making machinery.

Constitution-Making Machinery

17. We now indicate the constitution-making machinery which we propose should be brought into being forthwith in order to enable a new constitution to be worked out.

18. In forming any assembly to decide a new constitutional structure the first problem is to obtain as broad-based and accurate a representation of the whole population as is possible. The most satisfactory method obviously would be by election based on adult franchise, but any attempt to introduce such a step now would lead to a wholly unacceptable delay in the formulation of the new constitution. The only practicable course is to utilise the recently elected Provincial Legislative Assemblies as electing bodies. There are, however, two factors in their composition which make this difficult. First, the numerical strengths of Provincial Legislative Assemblies do not bear the same proportion to the total population in each province. Thus, Assam, with a population of 10 million, has a Legislative Assembly of 108 members, while Bengal, with a population six times as large, has an Assembly of only 250. Secondly, owing to the weightage given to minorities by the Communal Award, the strengths of the several communities in each Provincial Legislative Assembly are not in proportion to their numbers in the province. Thus the number of seats reserved for Moslems in the Bengal Legislative Assembly is only 48 per cent. of the total, although they form 54 per cent. of the provincial population. After a most careful consideration of the various methods by which these points might be corrected, we have come to the conclusion that the fairest and most practicable plan would be—

(*a*) to allot to each province a total number of seats proportional to its population, roughly in the ratio of one to a million, as the nearest substitute for representation by adult suffrage,

(*b*) to divide this provincial allocation of seats between the main communities in each province in proportion to their population,

(*c*) to provide that the representatives allocated to each community in a province shall be elected by members of that community in its Legislative Assembly.

We think that for these purposes it is sufficient to recognise only three main communities in India, General, Moslem and Sikh, the "General" Community including all persons who are not Moslems or Sikhs. As smaller minorities would upon a population basis have little or no representation, since they would lose the weightage which assures them seats in Provincial Legislatures, we have made the arrangements set out in paragraph 20 below to give them a full representation upon all matters of special interest to minorities.

19. (*i*) We therefore propose that there shall be elected by each Provincial Legislative Assembly the following numbers of representatives each part of the Legislative Assembly (General, Moslem or Sikh) electing its own representatives by the method of proportional representation with single transferable vote:—

TABLE OF REPRESENTATION

SECTION A

Province—	*General*	*Muslim*	*Total*
Madras	45	4	49
Bombay	19	2	21
United Provinces	47	8	55
Bihar	31	5	36
Central Provinces	16	1	17
Orissa	9	0	9
Total	167	20	187

SECTION B

Province—	*General*	*Muslim*	*Sikhs*	*Total*
Punjab	8	16	4	28
North-West Frontier Province	0	3	0	3
Sind	1	3	0	4
Total	9	22	4	35

SECTION C

Province—	*General*	*Muslim*	*Total*
Bengal	27	33	60
Assam	7	3	10
Total	34	36	70

Total for British India	292
Maximum for Indian States	93
Total	385

NOTE.—In order to represent the Chief Commissioners' Provinces there will be added to Section A the number representing Delhi in the Central Legislative Assembly, the number representing Ajmer-Merwara in the Central Legislative Assembly and a representative to be elected by the Coorg Legislative Council. To Section B will be added a representative of British Baluchistan.

(*ii*) It is the intention that the States would be given in the final Constituent Assembly appropriate representation which would not, on the basis of the calculation of population adopted for British India, exceed 93; but the method of selection will have to be determined by consultation. The States would in the preliminary stage be represented by a Negotiating Committee.

(*iii*) Representatives thus chosen shall meet at New Delhi as soon as possible.

(*iv*) A preliminary meeting will be held at which the general order of business will be decided, a chairman and other officers elected and an Advisory Committee (see paragraph 20 below) on rights of citizens, minorities and tribal and excluded areas set up. Thereafter the provincial representatives will divide up into three sections shown under A, B and C in the Table of Representation in sub-paragraph (*i*) of this paragraph.

(*v*) These sections shall proceed to settle provincial constitutions for the provinces included in each section and shall also decide whether any group constitution shall be set up for those provinces and if so with what provincial subjects the group should deal. Provinces should have power to opt out of groups in accordance with the provisions of sub-clause (*viii*) below.

(*vi*) The representatives of the sections and the Indian States shall reassemble for the purpose of settling the Union constitution.

(*vii*) In the Union Constituent Assembly resolutions varying the provisions of paragraph 15 above or raising any major communal issue shall require a majority of the representatives present and voting of each of the two major communities. The Chairman of the Assembly shall decide which, if any, resolutions raise major communal issues and shall, if so requested by a majority of the representatives of either of the major communities, consult the Federal Court before giving his decision.

(*viii*) As soon as the new constitutional arrangements have come into operation it shall be open to any province to elect to come out of any group in which it has been placed. Such a decision shall be taken by the legislature of the province after the first general election under the new constitution.

20. The Advisory Committee on the rights of citizens, minorities and tribal and excluded areas will contain due representation of the interests affected and their function will be to report to the Union Constituent Assembly upon the list of fundamental rights, clauses for protecting minorities, and a scheme for the administration of tribal and excluded areas, and to advise whether these rights should be incorporated in the provincial, the group or the Union constitutions.

21. His Excellency the Viceroy will forthwith request the provincial legislatures to proceed with the election of their representatives and the States to set up a negotiating committee.

It is hoped that the process of constitution-making can proceed as rapidly as the complexities of the task permit so that the interim period may be as short as possible.

22. It will be necessary to negotiate a treaty between the Union Constituent Assembly and the United Kingdom to provide for certain matters arising out of the transfer of power.

Interim Government

23. While the constitution-making proceeds the administration of India has to be carried on. We attach the greatest importance therefore to the setting up at once of an Interim Government having the support of the major political parties. It is essential during the interim period that there should be the maximum of co-operation in carrying through the difficult tasks that face the Government of India. Besides the heavy tasks of day-to-day administration, there is the grave danger of famine to be countered, there are decisions to be taken in many matters of post-war development which will have a far-reaching effect on India's future and there are important international conferences in which India has to be represented. For all these purposes a government having popular support is necessary. The Viceroy has already started discussions to this end and hopes soon to form an Interim Government in which all the portfolios, including that of War Member, will be held by Indian leaders having the full confidence of the people. The British Government, recognising the significance of the changes, will give the fullest measure of co-operation to the Government so formed in the accomplishment of its task of administration and in bringing about as rapid and smooth a transition as possible.

24. To the leaders and people of India, who now have the opportunity of complete independence, we would finally say this. We and our Government and countrymen hope that it would be possible for the Indian people themselves to agree upon the method of framing the new Constitution under which they will live. Despite the labours which we have shared with the Indian parties and the exercise of much patience and goodwill by all, this has not been possible. We, therefore, now lay before you proposals which, after listening to all sides and after much earnest thought we trust will enable you to attain your independence in the shortest time and with the least danger of internal disturbance and conflict. These proposals may not, of course, completely satisfy all parties, but you will recognise with us that, at this supreme moment in Indian history, statesmanship demands mutual accommodation and we ask you to consider the alternative to the acceptance of these proposals. After all the efforts which we and the Indian parties have made together for agreement, we must state that, in our view, there is small hope of a peaceful settlement if the agreement of the Indian parties also. The alternative would, therefore, be a grave danger of violence, chaos and even civil war. The gravity and duration of such a disturbance cannot be foreseen, but it is certain that it would be a terrible disaster for many millions of men, women and children. This is a

possibility which must be regarded with equal abhorrence by the Indian people, our own countrymen and the world as a whole. We therefore lay these proposals before you in the profound hope that they will be accepted and operated by you in the spirit of accommodation and goodwill in which they are offered. We appeal to all who have the future good of India at heart to extend their vision beyond their own community or interest to the interests of the whole 400 millions of Indian people.

We hope that the new independent India may choose to be a member of the British Commonwealth. We hope, in any event, that you will remain in close and friendly association with our people. But these are matters for your own free choice. Whatever that choice may be, we look forward with you to your ever-increasing prosperity among the greatest nations of the world and to a future even more glorious than your past.

The statement pleased neither the League nor the Congress. Both viewed it critically, each from its own viewpoint, and both wanted elucidation on several points.

League Reactions

Muslim League reactions were embodied in a statement issued by the President, Mr. M. A. Jinnah, on May 22nd, 1946, of which the following were the main points :—

"To begin with, the statement is cryptic with several lacunas and the operative part of it is comprised of a few short paragraphs to which I shall refer later.

"I regret that the Mission should have negatived the Muslim demand for the establishment of a complete sovereign State of Pakistan, which we still hold is the only solution of the constitutional problem of India and which alone can secure stable governments and lead to the happiness and welfare, not only of the two major communities, but of all the peoples of this sub-continent. It is all the more regrettable that the Mission should have thought fit to advance commonplace and exploded arguments against Pakistan and resorted to special pleadings, couched in a deplorable language, which is calculated to hurt the feelings of Muslim India. It seems that this was done by the Mission simply to appease and placate the Congress, because when they come to face the realities, they themselves have made the following pronouncement embodied in the paragraph 5 of the statement which says:— 'This consideration did not, however, deter us from examining closely and impartially the possibility of a partition of India, since we were greatly impressed by the very genuine and acute anxiety of the Muslims lest they should find themselves subjected to a perpetual Hindu majority rule. This feeling has become so strong and widespread amongst the Muslims that it cannot be allayed by mere paper safeguards. If there is to be internal peace in India it must be secured by measures which will assure to the Muslims a control in all matters vital to their culture, religion and economic or other interests.'

"And again in paragraph 12: 'This decision does not, however, blind us to the very real Muslim apprehensions that their culture and political and social life might become submerged in a purely unitary India, in which the Hindus with their greatly superior numbers must be a dominating element.'

"And now what recommendations have they made to effectively secure the object in view and in the light of the very clear and emphatic conclusion they arrived at in paragraph 12 of the statement?

"I shall now deal with some of the important points in the operative part of the statement:—

(1) They have divided Pakistan into two, what they call Section B (for the North-Western Zone) and Section C (for the North-Eastern Zone).

(2) Instead of two constitution-making bodies only one Constitution-making body is devised with three sections A, B and C.

(3) They lay down that: 'There should be a Union of India, embracing both British India and the States, which should deal with the following subjects: Foreign Affairs, Defence and Communications; and should have the powers necessary to raise the finances required for the above subjects.

"There is no indication at all that the Communications would be restricted to what is necessary for Defence nor is there any indication as to how this Union will be empowered to raise finances required for these three subjects, while our view was that finances should be raised only by contribution and not by taxation.

(4) It is laid down that: 'The Union should have an Executive and a Legislature constituted from British Indian and States representatives. Any question raising a major communal issue in the Legislature should require for its decision a majority of the representatives present and voting of each of the two major communities as well as a majority of all the members present and voting.'

"While our view was:

(*a*) that there should be no Legislature for the Union, but the question should be left to the Constituent Assembly to decide;

(*b*) that there should be parity of representation between Pakistan Group and the Hindustan Group in the Union Executive and Legislature, if any; and

(*c*) that no decision, legislative, executive or administrative, should be taken by the Union in regard to any matter of a controversial nature, except by a majority of three-fourths; all these three terms of our offer have been omitted from the statement.

"No doubt, there is one safeguard for the conduct of business in the Union Legislature that:—'any question raising a major communal issue in the Legislature should require for its decision a majority of the representatives present and voting of each of the two major communities as well as a majority of all the members present and voting.' Even this is vague and ineffective. To begin with, who will decide and how as to what is a major communal issue and what is a minor communal issue and what is a purely, non-communal issue?

(5) Our proposal that Pakistan Group should have a right to secede from the Union after an initial period of ten years, although the Congress had no serious objection to it, has been omitted and now we are only limited to a reconsideration of terms of the Union Constitution after an initial period of ten years.

(6) Coming to the Constitution-making machinery, here again, a representative of British Baluchistan is included in section B, but how he will be elected, is not indicated.

(7) With regard to the Constitution-making body for the purpose of framing the proposed Union Constitution, it will have an overwhelming Hindu majority, as in a House of 292 for British India the Muslim strength will be 79, and, if the number allotted to Indian States, 93, is taken into account, it is quite obvious that the Muslim proportion will be further reduced as the bulk of the States representatives would be Hindus. This Assembly, so constituted, will elect the Chairman and other officers and, it seems, also the members of the Advisory Committee, referred to in paragraph 20 of the statement, by a majority and the same rule will apply also to other normal business. But, I note, that there is only one saving clause which runs as follows:—'In the Union Constituent Assembly resolutions varying the provisions of paragraph 15 above or raising any major communal issue shall require a majority of representatives present and voting of each of the two major communities. The Chairman of the Assembly shall decide, which (if any) of the resolutions raise major communal issues and shall, if so requested by a majority of the representatives of either of the major communities, consult the Federal Court before giving his decision.'

"It follows, therefore, that it will be the Chairman alone who will decide. He will not be bound by the opinion of the Federal Court, nor need anybody know what that opinion was, as the Chairman is merely directed to consult the Federal Court.

(8) With regard to the provinces opting out of their Group, it is left to the new legislature of the province after the first general election under the new constitution to decide, instead of a referendum of the people as was suggested by us."

Congress Working Committee's Resolution on Mission's Plan

On May 24 the Congress Working Committee passed the following resolution:—

"The Working Committee has given careful consideration to the Statement dated 16th May, 1946, issued by the Delegation of the British Cabinet and the Viceroy on behalf of the British Government, as well as the correspondence relating to it that has passed between the Congress President and the members of the Delegation. They have examined it with every desire to find a way for a peaceful and co-operative transfer of power and the establishment of a free and independent India. Such an India must necessarily have a strong central authority capable of representing the nation with power and dignity in the councils of the world. In considering the Statement, the Working Committee have kept in view the picture of the future, in so far as this was available to them from the proposals made for the formation of a Provisional Government and the clarification given by members of the Delegation. This picture is still incomplete and vague. It is only on the basis of the full picture that they can judge and come to a decision as to how far this is in conformity with the objectives they aim at. These objectives are: independence for India, a strong, though limited, central authority, full autonomy for the provinces, the establishment of a democratic structure in the centre and in the units, the guarantee of the fundamental rights of each individual so that he may have full and equal opportunities of growth, and further that each community should have opportunity to live the life of its choice within the larger framework.

"The Committee regret to find a divergence between these objectives and the various proposals that have been made on behalf of the British Government, and, in particular, there is no vital change envisaged during the interim period when the Provisional Government will function, in spite of the assurance given in paragraph 23 of the Statement. If the independence of India is aimed at, then the functioning of the Provisional Government must approximate closely in fact, even though not in law, to that independence and all obstructions and hindrances to it should be removed. The continued presence of a foreign army of occupation is a negation of independence.

"The Statement issued by the Cabinet Delegation and the Viceroy contains certain recommendations and suggests a procedure for the building up of a Constituent Assembly, which is sovereign in so far as the framing of the constitution is concerned. The Committee do not agree with some of these recommendations. In their view it will be open to the Constituent Assembly itself at any stage to make changes and variations, with the proviso that in regard to certain major communal matters a majority decision of both the major communities will be necessary.

"The procedure for the election of the Constituent Assembly is based on representation in the ratio of one to a million, but the application of this principle appears to have been overlooked in the case of European members of Assemblies, particularly in Assam and Bengal. Therefore, the Committee expect that this oversight will be corrected.

"The Constituent Assembly is meant to be a fully elected body, chosen by the elected members of the Provincial Legislatures. In Baluchistan there is no elected assembly or any other kind of chamber which might elect a representative for the Constituent Assembly. It would be improper for any kind of nominated individual to speak for the whole province of Baluchistan, which he really does not represent in any way.

"In Coorg the Legislative Council contains some nominated members as well as Europeans elected from a special constituency of less

than a hundred electors. Only the elected members from the general constituencies should participate in the election.

"The Statement of the Cabinet Delegation affirms the basic principle of provincial autonomy and residuary powers vesting in the Provinces. It is further said that Provinces should be free to form groups. Subsequently, however, it is recommended that provincial representatives will divide up into sections which 'shall proceed to settle the Provincial Constitutions for the Provinces in each section and shall also decide whether any Group Constitution shall be set up for those Provinces'. There is a marked discrepancy in these two separate provisions, and it would appear that a measure of compulsion is introduced which clearly infringes the basic principle of provincial autonomy. In order to retain the recommendatory character of the Statement, and in order to make the clauses consistent with each other, the Committee read paragraph 15 to mean that, in the first instance, the respective provinces will make their choice whether or not to belong to the section in which they are placed. Thus the Constituent Assembly must be considered as a sovereign body with final authority for the purpose of drawing up a constitution and giving effect to it.

"The provisions in the Statement in regard to the Indian States are vague and much has been left for future decision. The Working Committee would, however, like to make it clear that the Constituent Assembly cannot be formed of entirely disparate elements, and the manner of appointing State representatives for the Constituent Assembly must approximate, in so far as is possible, to the method adopted in the Provinces. The Committee are gravely concerned to learn that even at this present moment some State governments are attempting to crush the spirit of their people with the help of armed forces. These recent developments in the States are of great significance in the present and for the future of India, as they indicate that there is no real change of policy on the part of some of the State governments and of those who exercise paramountcy.

"A Provisional National Government must have a new basis and must be a precursor of the full independence that will emerge from the Constituent Assembly. It must function in recognition of that fact, though changes in law need not be made at this stage. The Governor-General may continue as the head of that Government during the interim period, but the Government should function as a cabinet responsible to the Central Legislature. The status, powers and composition of the Provisional Government should be fully defined in order to enable the Committee to come to a decision. Major communal issues shall be decided in the manner referred to above in order to remove any possible fear or suspicion from the minds of a minority.

"The Working Committee consider that the connected problems involved in the establishment of a Provisional Government and a Constituent Assembly should be viewed together so that they may appear as parts of the same picture, and there may be co-ordination between the two, as well as an acceptance of the independence that is now recognised as India's right and due. It is only with the conviction that they are engaged in building up a free, great and independent India, that the Working Committee can approach this task and invite the co-operation of all the people of India. In the absence of a full picture, the Committee are unable to give a final opinion at this stage."

Sikhs' Views

Master Tara Singh speaking for the Sikhs submitted a memorandum to the Secretary of State for India in which he asked:

(1) What is the significance of recognising the Sikhs as one of the "Main communities"?

(2) Suppose the majority of section B frames a constitution under section 19 (5), but the Sikh members do not agree. Does it mean deadlock or does the opposition of the Sikh members mean simply disassociation?

(3) Is there any hope of obtaining for the Sikhs the same right as is given to the Muslims and the Hindus under section 15 (2) and 19 (17)?

Replying to Master Tara Singh the Secretary of State repudiated any intention of prejudicing the position of the Sikhs in the Punjab or the North-West Group and said that it was inconceivable that either the Constituent Assembly or any future Govt. of the Punjab would overlook their special place in the Province. Further, the estimate of the importance of the Sikhs would never depend on the number of seats they held in the Constituent Assembly. Also the Viceroy would specially discuss the position of Sikhs with the leaders of the main parties after the Constituent Assembly had been formed.

Cabinet Mission's Clarification

On May 25th the Cabinet Mission issued a Statement which ran:

The Delegation have considered the statement of the President of the Muslim League dated 22nd May and the resolution dated 24th May of the Working Committee of the Congress.

2. The position is that since the Indian leaders after prolonged discussion failed to arrive at an agreement, the Delegation put forward their recommendations as the nearest approach to reconciling the views of the two main parties. The scheme stands as a whole and can only succeed if it is accepted and worked in a spirit of co-operation.

3. The Delegation wish also to refer briefly to a few points that have been raised in the statement and resolution.

4. The authority and the functions of the Constituent Assembly and the procedure which it is intended to follow are clear from the Cabinet Delegation's statement. Once the Constituent Assembly is formed and working on this basis there is no intention of interfering with its discretion or questioning its decisions. When the Constituent Assembly has completed its labours, His Majesty's Government will recommend to Parliament such action as may be necessary for the cession of sovereignty to the

Indian people, subject only to two matters which are mentioned in the statement and which, we believe, are not controversial, namely: adequate provision for the protection of the minorities (paragraph 20 of the statement) and willingness to conclude a treaty with His Majesty's Government to cover matters arising out of the transfer of power (paragraph 22 of the statement).

5. It is a consequence of the system of election that a few Europeans can be elected to the Constituent Assembly. Whether the right so given will be exercised is a matter for them to decide.

6. The representative of Baluchistan will be elected in a joint meeting of the Shahi Jirga and the non-official members of the Quetta municipality.

7. In Coorg the whole Legislative Council will have the right to vote but the official members will receive instructions not to take part in the election.

8. The interpretation put by the Congress resolution on paragraph 15 of the statement, to the effect that the Provinces can in the first instance make the choice whether or not to belong to the Section in which they are placed, does not accord with the Delegation's intentions. The reasons for the grouping of the Provinces are well known and this is an essential feature of the scheme and can only be modified by agreement between the parties. The right to opt out of the groups after the constitution making has been completed will be exercised by the people themselves, since at the first election under the new provincial Constitution this question of opting out will obviously be a major issue and all those entitled to vote under the new franchise will be able to take their share in a truly democratic decision.

9. The question of how the States representatives should be appointed to the Constituent Assembly is clearly one which must be discussed with the States. It is not a matter for decision by the Delegation.

10. It is agreed that the Interim Government will have a new basis. That basis is that all portfolios including that of the War Member will be held by Indians and that the members will be selected in consultation with the Indian political parties. These are very significant changes in the Government of India and a long step towards independence. If M. G. will recognise the effect of these changes, will attach the fullest weight to them and will give to the Indian Government the greatest possible freedom in the exercise of the day-to day administration of India.

11. As the Congress statement recognises, the present Constitution must continue during the interim period and the Interim Government cannot, therefore, be made legally responsible to the Central Legislature. There is, however, nothing to prevent the members of the Government, individually or by common consent, from resigning if they fail to pass an important measure through the Legislature or if a vote of non-confidence is passed against them.

12. There is, of course, no intention of retaining British troops in India against the wish of an independent India under the new Constitution; but during the interim period, which it is hoped will be short, the British Parliament has under the present Constitution the ultimate responsibility for the security of India and it is necessary, therefore, that British troops should remain.

From this time onwards the Cabinet Ministers receded into the background and the Viceroy took up negotiations with Congress and League leaders for the establishment of an Interim Government, which came to be known as the short-term plan. This period, broadly speaking, lasted from May 20th to June 29th and covered a good deal of correspondence between the Viceroy and the Congress and League Presidents.

As a result, the League Council passed a resolution on June 6th, 1946, which, while critical of the Cabinet Mission's statement of May 16th, particularly in regard to the Pakistan issue and while reserving opinion on the point, definitely accepted the scheme put forward in it.

Cabinet Delegation's Statement of June 16

The Congress was still undecided and both the Congress President and Mr Jinnah carried on a lengthy correspondence with the Viceroy asking for assurances and clarification on various points such as League-Congress parity in the Interim Government, grouping of provinces, etc., which resulted in the Cabinet Mission issuing a third statement dated June 16th, 1946, which ran as follows:

1. His Excellency the Viceroy, in consultation with the members of the Cabinet Mission, has for some time been exploring the possibilities of forming a Coalition Government drawn from the two major parties and certain of the minorities. The discussions have revealed the difficulties which exist for the two major parties in arriving at any agreed basis for the formation of such a Government.

2. The Viceroy and the Cabinet Mission appreciate these difficulties and the efforts which the two parties have made to meet them. They consider however that no useful purpose can be served by further prolonging these discussions. It is indeed urgently necessary that a strong and representative Interim Government should be set up to conduct the very heavy and important business that has to be carried through.

3. The Viceroy is therefore issuing invitations to the following to serve as members of the Interim Government, on the basis that the constitution-making will proceed in accordance with the statement of May 16th:

Sardar Baldev Singh, Dr. John Matthai, Sir N. P. Engineer, Nawab Mohammed Ismail Khan, Mr. Jagjivan Ram, Khwaja Sir Nazimuddin, Pandit Jawaharlal Nehru, Sardar Abdur Rab Nishtar, Mr. M. A. Jinnah, Mr. C. Rajagopalachari, Nawabzada Liaquat Ali Khan, Dr. Rajendra Prasad, Mr. H. K. Mahatab, Sardar Vallabhbhai Patel.

If any of those invited is unable for personal reasons to accept, the Viceroy will after consultation invite some other person in his place.

4. The Viceroy will arrange the distribution of portfolios in consultation with the leaders of the two major parties.

5. The above composition of the Interim Government is in no way to be taken as a precedent for the solution of any other communal question. It is an expedient put forward to solve the present difficulty only, and to obtain the best available coalition Government.

6. The Viceroy and the Cabinet Mission believe that Indians of all communities desire to arrive at a speedy settlement of this matter so that the process of constitution-making can go forward and that the Government of India may be carried on as efficiently as possible in the meantime.

7. They therefore hope that all parties, especially the two major parties will accept this proposal so as to overcome the present obstacles and will co-operate for the successful carrying on of the Interim Government. Should this proposal be accepted the Viceroy will aim at inaugurating the new Government about the 26th June.

8. In the event of the two major parties or either of them proving unwilling to join in the setting up of a Coalition Government on the above lines, it is the intention of the Viceroy to proceed with the formation of an Interim Government which will be as representative as possible of those willing to accept the statement of May 16th.

9. The Viceroy is also directing the Governors of the Provinces to summon the Provincial Legislative Assemblies forthwith to proceed with the elections necessary for the setting up of the Constitution making machinery as put forward in the statement of May 16th.

The Congress accepted the Mission's long-term plan contained in their statement of May 16th, whilst the League accepted both the statements of May 16th and June 16th and claimed that as the Congress did not accept the latter, the Viceroy should proceed to set up an Interim Government along the lines of that statement. The Viceroy, however, contended that the statement of June 16th expressly provided in paragraph 8 that "in the event of the two major parties or either of them proving unwilling to the setting up of a Coalition Government on the above lines, it is the intention of the Viceroy to proceed with the formation of an Interim Government which will be as representative as possible of those willing to accept the statement of May 16th."

Accordingly, the Cabinet Mission issued the following Statement on June 26th, 1946 :—

The Cabinet Mission and the Viceroy are glad that constitution-making can now proceed with the consent of the two major parties and of the States. They welcome the statements made to them by the leaders of the Congress and the Muslim League that it is their intention to try and work in the Constituent Assembly so as to make it a speedy and effective means of devising the new constitutional arrangements under which India can achieve her independence. They are sure that the members of the Constituent Assembly who are about to be elected will work in this spirit.

2. The Cabinet Mission and the Viceroy regret that it has not so far proved possible to form an Interim Coalition Government, but they are determined that the effort should be renewed in accordance with the terms of paragraph 8 of their statement of June 16th. Owing, however, to the very heavy burden which has been cast upon the Viceroy and the representatives of the parties during the last three months, it is proposed that further negotiations should be adjourned for a short interval during the time while the elections for the Constituent Assembly will be taking place. It is hoped that when the discussions are resumed, the leaders of the two major parties who have all expressed their agreement with the Viceroy and the Cabinet Mission on the need for the speedy formation of a representative Interim Government, will do their utmost to arrive at an accommodation upon the composition of that government.

3. As the Government of India must be carried on until a new Interim Government can be formed, it is the intention of the Viceroy to set up a temporary caretaker Government of officials.

4. It is not possible for the Cabinet Mission to remain longer in India as they must return to report to the British Cabinet and Parliament and also to resume their work from which they have been absent for over three months. They therefore propose to leave India on Saturday next, June 29th. In leaving India the members of the Cabinet Mission express their cordial thanks for all the courtesy and consideration which they have received as guests in the country and they most sincerely trust that the steps which have been initiated will lead to a speedy realisation of the hopes and wishes of the Indian people.

Mr. Jinnah's Objections

Mr. Jinnah objected to the Mission's proposal that further negotiations for the setting up of an Interim Government should be adjourned for a short interval. He urged that elections to the Constituent Assembly should be postponed as "according to all the relevant documents and particulars the two statements of the Cabinet Delegation and yours of dated 16th and 25th May, the long-term plan and the formation of the Interim Government, formed one whole, each constituting an integral part of the whole scheme." The League was considerably agitated over the Viceroy's refusal to form an Interim Government with itself as the major element.

Deep regret at what he described as the "Atom bomb dropped on the cause of the scheduled castes of India" by the manner in which they had been treated by the Mission was expressed by Dr. B. R. Ambedkar, leader of one section of Scheduled Castes. He was surprised that only one seat in the Interim Government was allotted to his community who numbered 60 million, whereas other

communities whose strength did not exceed three or four million were also allotted one seat.

Master Tara Singh, the Sikh leader, declared to a representative gathering of Sikhs from all over the Punjab, "we are in danger before our Guru" and urged the Sikhs not to delay preparations for a fight—a "morcha" struggle. He said that the proposals of the Cabinet Mission had finished their political existence. The Sikhs opposed Muslim domination in the Punjab, they were against grouping of provinces—compulsory or otherwise—because it strengthened Muslim domination. He refused to make over their fate to the Congress as it had accepted virtual Pakistan, and said if they became henchmen of the Congress they deprived themselves of the right of resisting Pakistan. Later, however, as a result of the Congress Working Committee's assurances, the Sikh Panthic Board agreed to work the long-term plan.

The Princes on their part reacted favourably to the Mission's proposals and accepted the Viceroy's invitation to set up a Negotiating Committee to discuss and determine the relationship of States to British India. As regards arrangements for the interim period, the Chancellor of the Chamber of Princes proposed:—

1. That a special Committee may be set up consisting of representatives of the States and of the Central Government to discuss and reach agreement on matters of common concern during the interim period;
2. That disputes on justiciable issues and on fiscal, economical and financial matters should be referred to Courts of Arbitration as a matter of right;
3. That in personal and dynastic matters the agreed procedure should be implemented in letter and spirit, and the Crown Representative should ordinarily consult the Chancellor and a few other Princes if not objected to by the States concerned;
4. That in agreement with the States, machinery may be provided for the early settlement of the pending cases and for the revision, at the instance of the States concerned, of the existing arrangements in regard to such subjects as Railways, Ports and Customs.

The European party in the Bengal Assembly declared their decision to abstain from elections to the Constituent Assembly as the two major political parties had not come to an agreement and hoped that their decision would contribute to the successful working of the Constituent Assembly.

Viceroy's Proposals for a Coalition Interim Govt.

On July 22nd, 1946, the Viceroy communicated to the Presidents of the Congress and the League his decision to form an Interim Government, and made the following proposals for their consideration:—

(*a*) the Interim Government will consist of 14 members;

(*b*) six members (to include one Scheduled Caste representative) will be nominated by the Congress; five members will be nominated by the Muslim League; three representatives of Minorities will be nominated by the Viceroy. One of these places will be kept for a Sikh.

It will not be open to either the Congress or the Muslim League to object to the names submitted by the other Party, provided they are accepted by the Viceroy.

(*c*) Distribution of portfolios will be decided after the Parties have agreed to enter the Government and have submitted their names. The Congress and the Muslim League will each have an equitable share of the most important portfolios.

(*d*) The assurances about the status of the Interim Government which I gave in my letter dated May 30, to Maulana Azad will stand.

3. I would welcome a convention, if freely offered by the Congress, that major communal issues can only be decided by the assent of both the major parties, but I have never thought that it was essential to make this a formal condition since in fact a Coalition Government could work on no other basis.

4. I sincerely trust that your party will agree to co-operate in the administration of India on the above basis, while the work of constitution-making proceeds. I am confident that this will be of the greatest possible benefit to India. I suggest that we should not spend further time in negotiation, but should try out at once a Government on the basis proposed above. If it does not work, and you find the conditions unsatisfactory, it will be open to you to withdraw, but I am confident that you will not.

5. Would you be good enough to let me know very soon whether the Muslim League will enter in the Interim Government on this basis." I have written in similar terms to Pandit Nehru and enclose a copy of my letter to him.

League's Refusal to Join Interim Govt.

Mr. Jinnah replied that the League could not join the Interim Government on these conditions. Among his reasons were that the Viceroy's first proposal was that representation on the Executive Council would be in the proportion of 5 Congress; 5 League and 2 minority representatives, which ratio was later changed to 5:5:3, again altered to 5:5:4, and revised a fourth time to 6:5:3. That broke the principle of Congress-League parity. Also, as neither party could object to the names submitted by the other party, it gave Congress freedom to nominate a "quisling" Muslim. Mr. Jinnah also considered that the Viceroy had gone back on his earlier assurance that no decision on a major communal issue would be taken by the Interim Government "if a majority of the representatives of either of the two major parties were opposed to it", which was now watered down to the hope of a convention "if freely offered by the Congress" that major communal issues could only be decided by the assent of both the major parties.

The League Council met in Bombay in the last week of July and resolved to withdraw its acceptance of the State paper of May 16th and to launch "direct action" for the achievement of Pakistan. It also called upon Muslims to renounce forthwith the titles conferred upon them by the "alien Government".

Congress Acceptance

The Congress Working Committee met at Wardha in the last week of August and ratified their earlier decision to accept the long-term plan.

Soon after, the Viceroy invited Pandit Nehru, the Congress President, to make proposals for the formation of an Interim Government. Pandit Nehru accepted the invitation and invoked League co-operation in the task, but in vain. Thereupon the following communique was issued by the Viceroy on August 24th, 1946.

"His Majesty the King has accepted the resignations of the present members of the Governor-General's Executive Council. His Majesty has been pleased to appoint the following :—

"Pandit Jawaharlal Nehru, Sardar Vallabhbhai Patel, Dr. Rajendra Prasad, Mr. M. Asaf Ali, Mr. C. Rajagopalachari, Mr. Sarat Chandra Bose, Dr. John Matthai, Sardar Baldev Singh, Sir Shafaat Ahmad Khan, Mr. Jagjivan Ram, Syed Ali Zaheer, Mr. Cooverji Hormusji Bhabha.

"Two more Muslim Members will be appointed later.

"The Interim Government will take office on September 2nd."

Following this the League declared September 2nd as "Direction Action Day". The League Governments in Sind and Bengal declared it a public holiday. While Sind was quiet, communal passions in Calcutta resulted in an unprecedented orgy of murder, loot and arson. The disaster had hardly been brought under control when trouble of an even more violent character in all its ughest aspects broke out in Noakhali. Bombay and Ahmedabad were also affected though not to anything like the same extent. The Congress-governed province of Bihar was not slow in taking revenge, and the minority community there was subjected to the same terrible cruelties as were witnessed in Calcutta and Noakhali.

League's Entry into Interim Govt.

Meanwhile, before the end of September, 1946, the Viceroy renewed efforts to persuade the League to rescind its decisions of July 29th and come into the Interim Government and agree to participate in the Constituent Assembly. Mr. Jinnah was invited to Delhi. Negotiations also ensued between him and Pandit Nehru, Vice-President of the Interim Cabinet, through the good offices of the Nawab of Bhopal. Eventually, although Mr. Jinnah could not come to an understanding with Pandit Nehru, he accepted the Viceroy's assurances and agreed to League participation in the Interim Government. The names of the 5 League nominees were announced on October 15th, 1946, three Congress members of Government standing down to make room for the Leaguers.

The five Muslim League members of the Interim Government were as follows :—Mr. Liaquat Ali Khan, Mr. I. I. Chundrigar, Mr. Abdur Rab Nishtar, Mr. Ghazanfar Ali Khan and Jogendra Nath Mandal. The Government was reconstituted as follows :—

Pandit Jawaharlal Nehru, *External Affairs and Commonwealth Relations*; Mr. Liaquat Ali Khan, *Finance*; Sardar Vallabhbhai Patel, *Home and Information and Broadcasting*; Dr. Rajendra Prasad, *Food and Agriculture*; Sardar Baldev Singh, *Defence*; Mr. I. I. Chundrigar, *Commerce*; Dr. John Matthai, *Industries and Supplies*; Mr. Asaf Ali, *Transport and Railways*; Mr. Jagjivan Ram, *Labour*; Mr. C. H. Bhabha, *Works, Mines and Power*; Mr. Jogendra Nath Mandal, *Legislative*; Mr. Abdur Rab Nishtar, *Communications (Post and Air)*; Mr. Ghazanfar Ali Khan, *Health*.

Meanwhile the League in its appraisal of the communal tension in the country came to the decision that the time was not opportune to convene the Constituent Assembly fixed for December 9th, 1946, and demanded its postponement indefinitely. The Congress, however, insisted that postponement was out of the question, and towards the end of November, Mr. Jinnah announced that the League would not participate in the Constituent Assembly. The Congress reply was that the League entered the Interim Government on an undertaking to participate in the Constituent Assembly and that if they went back on that promise they had no place in the Government. The League reply was that Congress acceptance of the State paper of May 16th was only conditional, and that the League had the same right to stay in the Government as the Congress.

Correspondence on the subject of the League's entry, released later, revealed that Mr. Jinnah did not accept the basis on which the Viceroy sought to reconstruct the Interim Government with the League, but that, nevertheless, the League wished to enter the Government because it did not want to leave the field entirely to the Congress. The correspondence also revealed that the Congress asked for specific assurances from the League and the Viceroy wrote to Pandit Nehru : "Mr. Jinnah has assured me that the Muslim League would come into the Interim Government and the Constituent Assembly with the intention of co-operating".

Viceroy's Visit to London with Indian Leaders

Immediately the League decision not to participate in the Constituent Assembly was made known, the Viceroy began consultations with the British Cabinet, as a result of which he announced his decision to fly to London and invited two Congress nominees in the Government, Pandit Jawaharlal Nehru and Sardar Vallabhai Patel, a League nominee (Mr. Liaquat Ali Khan) and Mr. M. A. Jinnah and Sardar Baldev Singh to accompany him to London to take part in discussions with the British Cabinet.

While the League accepted the invitation, Congress and Sikh members declined it in the first instance on the ground that the whole question of the Constituent Assembly and Congress participation in the Interim Government had been settled after prolonged negotiation, and that no new situation had arisen to warrant further consultations. Later, however, as a result of a personal approach by the British Premier to Pandit Nehru, the latter and Sardar Baldev Singh agreed to to accompany the Viceroy.

H. M. G.'s Statement on London Talks

All efforts in London to bring the two parties to agreement failed, and the British Government issued the following statement :—

"The conversations held by His Majesty's Government with Pandit Jawaharlal Nehru, Mr. M. A. Jinah, Mr. Liaqat Ali Khan and Sardar Baldev Singh came to an end this evening as Pandit Nehru and Sardar Beldev Singh are returning to India tomorrow morning".

"The object of the conversations has been to obtain the participation and co-operation of all parties in the Continuent Assembly. It is not expected that any final settlement could be arrived at, since the Indian representatives must consult their colleagues before any final decision is reached.

"The main difficulty that has arisen has been over the interpretation of paragraph 19 (5) and (8) of the Cabinet Mission's statement of May 16, relating to meeting in sections, which runs as follows :

Paragraph 19 (5): 'These sections shall proceed to settle provincial constitutions for the provinces included in each section and shall also decide whether any group constitution shall be set up for those provinces and if so with what provincial subjects the group should deal. Provinces should have power to opt out of the groups in accordance with the provisions of sub-clause (8) below'.

Paragraph 19 (8): As soon as the new constitutional agreements have come into operation it shall be open to any province to elect to come out of any group in which it has been placed. Such a decision shall be taken by the legislature of the province after the first general election under the new Constituent Assembly.

"The Cabinet Mission have throughout maintained the view that the decisions of the sections should, in the absence of an agreement to the contrary, be taken by a simple majority vote of the representatives in the sections. This view has been accepted by the Muslim League, but the Congress have put forward a different view. They have asserted that the true meaning of the statement, read as a whole, is that the provinces have the right to decide both as to grouping and as to their own constitutins.

"His Majesty's Government have had legal advice which confirms that the statement of May 16 means what the Cabinet Mission have always stated was their intention. This part of the statement, as so interpreted, must therefore be considered an essential part of the scheme of May 16 for enabling the Indian people to formulate a constitution which His Majesty's Government would be prepared to submit to Parliament. It should, therefore, be accepted by all parties in the Constituent Assembly.

"It is, however, clear that other questions of interpretation of the statement of May 16 may arise, and His Majesty's Government hope that if the Council of the Muslim League are able to agree to participate in the Constituent Assembly, they will also agree, as have the Congress, that the Federal Court should be asked to decide matters of interpretation that may be referred to them by either side and will accept such a decision, so that the procedure, both in the Union Constituent Assembly and in the sections, may accord with the Cabinet Mission's plan

"On the matter immediately in dispute, His Majesty's Government urge the Congress to accept the view of the Cabinet Mission in order that a way may be opened for the Muslim League to reconsider their attitude. If in spite of this reaffirmation of the intention of the Cabinet Mission, the Constituent Assembly desires that this fundamental point should be referred to for a decision of the Federal Court, such a reference should be made at a very early date. It will then be reasonable that the meetings of the sections of the Constituent Assembly should be postponed until the decision of the Federal Court is known.

"There has never been any prospect of success for the Constituent Assembly except upon the basis of the agreed procedure. Should a constitution come to be framed by the Constituent Assembly in which a large section of the Indian population has not been represented, His Majesty's Government could not, of course, contemplate - as the Congress have stated they would not contemplate - forcing such a constitution upon any unwilling parts of the country."

The reaction of both parties to the British statement was still indefinite when the Constituent Assembly met on December 9, 1946 under the temporary presidentship of Dr Sachchidananda Sinha, with the representatives of the Muslim League absent. Dr. Rajendra Prasad was elected permanent Chairman of the Assembly, which proceeded to discuss a motion by Pandit Jawaharlal Nehru on the objectives. These envisaged India as an "Independent Sovereign Republic."

GANDHI, MOHANDAS KARAMCHAND, Bar-at-Law (Inner Temple). *b.* 2nd October 1869. *Educ.* at Rajkot, Bhavnagar, and London. Practised law in Bombay, Kathiawar, and South Africa. Was in charge of an Indian Ambulance Corps during the Boer War and the Zulu revolt in Natal. During the great war raised an ambulance corps and conducted a recruiting campaign in Kaira district. Started and led the Satyagraha movement, (1918-19) and the non-co-operation campaign (1920) in addition to associating himself with the Khilafat agitation (1919-21). Has championed the cause of Indians abroad, notably those in South and East Africa. Sentenced to six years' simple imprisonment in March, 1922; released, Feb. 4th, 1924. President of the Indian National Congress, 1924. Inaugurated campaign of Civil Disobedience, especially of the breach of the Salt Laws, April, 1930. Interned, 5th May, 1930 and released 25th January 1931. Delegate to the Round Table Conference, 1931. Signed the Truce with Lord Irwin as representative of British Government, 6th March 1931. Imprisoned, January 1932; released on May 8th, 1933. Undertook a "Fast unto death" at Rajkot in 1939 to induce the Thakore Saheb to implement his promise of reforms but broke it on the Viceroy's intervention, agreeing to adjudication by the Chief Justice of the Federal Court, whose judgment went in his favour. Inaugurated in Oct. 1940 a campaign of Individual Civil Disobedience. Arrested and imprisoned under the Defence of India Rules in Aug. 1942. Again embarked on a 21 days' fast in Feb., 1943, on Govt. turning down his claim for the right, as a free man, to repudiate the charges made by the Government of India against the Congress in respect of the 1942 disturbances or, in the alternative, to be put in touch with members of the Congress Working Committee with a view to a revision of Congress policy, and although it was generally feared that he would not survive his fast owing to his age, he successfully carried it through. Released May 6, 1944, on grounds of health. *Publications:* "Indian Home Rule," "Universal-Dawn," "Young India," "Nava Jivan" (Hindi and Gujarati), "Autobiography" 2 Vols., "Self-Indulgence *vs.* Self-control", "Guide to Health"; also "Harijan" in English, Gujarati and Hindi. *Address:* Sevagram (Wardha).

GWALIOR, HON. LT.-GEN. HIS HIGHNESS THE MAHARAJA OF (*See Indian Princes' Section*).

GWALIOR, HER HIGHNESS THE MAHARANI SCINDIA OF GWALIOR, the former Princess Lekha Divyeshwari Devi, is the grand-daughter of Prince Khadga Shamsher Jung Bahadur Rana, late Commander-in-Chief of Nepal, and an elder brother of the Maharaja of Nepal who recently abdicated in favour of the Commander-in-Chief. Her Highness's mother, Princess Chuda Divyeshwari Devi, was a lady of refined taste and culture and was married to Thakur Mahendra Pal Singhji who belongs to the Yadava clan of Rajputs. Having lost her mother when she was only nine days old, she was brought up by her grand-mother at Sangor in Central Provinces. Educated upto B.A. Final; fond of painting and proficient in music; Deeply interested in girls' education and has played an important part in the all round rapid development of female education which has taken place in the State in recent years; An up-to-date Montessori School for children, the raising of the Kamala Raja Intermediate Girls' College to a degree college, the only one in Central India and Rajputana, and its equipment on modern lines of Education, further development of the Padma Vidyalaya into a centre imparting education to girls upto the High School standard, which covers an exhaustive curriculum about domestic science, and various other arts and crafts are some outstanding results of Her Highness's work. The needs of these and other institutions in the form of trained teachers and equipment are being met under the fostering care of Her Highness and the female education in the State, it is hoped, would come to be regarded as the most up-to-date in course of time under the guidance and administration of Her Highness who personally looks after all matters of female education.
